37 CFR 5.3. *Prosecution of application under secrecy orders; withholding patent.*

(b) An interference will not be declared involving a national application under secrecy order. An applicant whose application is under secrecy order may suggest an interference (§ 41.202(a) of

this title), but the Office will not act on the request while the application remains under a secrecy order.

Once an interference is declared, an opposing party is entitled to access to the application and benefit applications. 37 CFR 41.109. See MPEP § 2307.02. Consequently, an interference should not be suggested for an application under a secrecy order. See MPEP § 120 and § 130. When a secrecy order expires or is rescinded, if the examination is otherwise completed, 37 CFR 41.102, then the need for an interference may be reconsidered.

If an application not under a secrecy order has allowable claims that interfere with allowable claims of an application that is under a secrecy order, then the application that is not under the secrecy order should be passed to issue as a patent. An interference may be suggested with the application and the patent (unless the patent has expired) once the secrecy order has been lifted.

Example

Application L discloses and claims a transistor that is useful in a commercial context. Application M discloses the same transistor in the context of a missile control circuit, but claims only the transistor. A secrecy order is placed on application M. Once examination of application L is completed and the transistor claim is allowable, application L should pass to issue.<

>

2307 Action During an Interference [R-4]

37 CFR 41.103. Jurisdiction over involved files.

The Board acquires jurisdiction over any involved file when the Board initiates a contested case. Other proceedings for the involved file within the Office are suspended except as the Board may order.

Once a patent or application becomes involved in an interference, the Board of Patent Appeals and Interferences (Board) has jurisdiction over the file. The examiner may not act on an involved patent or application except as the Board may authorize.

The Board may occasionally consult with the examiner, for instance, on a question regarding the technology at issue in an involved application or patent.

The Board retains jurisdiction over the interference until the interference is terminated. The Director has defined termination to occur after a final Board judgment in the interference and the period for seeking judicial review has expired or, if judicial review is sought, after completion of judicial review including any further action by the Board. 37 CFR 41.205(a).<

>

2307.01 Ex Parte Communications [R-4] [R-4]

37 CFR 41.11. Ex parte communications in inter partes proceedings.

An ex parte communication about an inter partes reexamination (subpart C of this part) or about a contested case (subparts D and E of this part) with a Board member, or with a Board employee assigned to the proceeding, is not permitted.

Since an interference involves two or more parties, the integrity of the process requires the opportunity for the opposing party to participate in communications or actions regarding any involved application or patent. Once an interference is declared, any attempt by a party to communicate with the Board of Patent Appeals and Interferences (Board) through the examiner or to have the examiner act in an involved patent or application without Board authorization should be promptly reported to the Board. Board action may include a sanction in the interference or referral of a patent practitioner to the Office of Enrollment and Discipline.<

>

2307.02 Access to Related Files [R-4]

37 CFR 41.109. Access to and copies of Office records.

(a) *Request for access or copies.* Any request from a party for access to or copies of Office records directly related to a contested case must be filed with the Board. The request must precisely identify the records and in the case of copies include the appropriate fee set under § 1.19(b) of this title.

(b) *Authorization of access and copies.* Access and copies will ordinarily only be authorized for the following records:

- (1) The application file for an involved patent;
- (2) An involved application; and
- (3) An application for which a party has been accorded benefit under subpart E of this part.

In addition to any access permitted to a member of the public under 37 CFR 1.11 and 1.14 (see MPEP § 103), an opposing party may be authorized under 37

CFR 41.109 to have access to or a copy of the record for any involved patent or application, and for any application for which benefit has been accorded. The availability of a file to an opposing party under 37 CFR 41.109 has no bearing on whether a file is otherwise available under 37 CFR 1.11 or 1.14.<

>

2307.03 Suspension of Related Examinations [R-4]

Although the examiner may not act in a patent or an application directly involved in an interference, 37 CFR 41.103, examination may continue in related cases, including any benefit files. Once examination is completed, the examiner should consult with an Interference Practice Specialist (IPS) to determine whether and how further action should proceed. The IPS may consult with the Board of Patent Appeals and Interferences (Board) to determine whether the application claims would be barred in the event the applicant loses the interference.

Suspension may be necessary if the claims would be barred by a loss in the interference. Steps should be considered to minimize the effect of any patent term adjustment that would result from the suspension. For instance, the examiner could require restriction, 35 U.S.C. 121, of the application to only the claims that do not interfere so that they can be issued. The applicant may then file a divisional application with the interfering claims, which may be suspended.<

>

2307.04 Additional Parties to Interference [R-4]

During the course of an interference, the examiner may come across applications or patents of parties that claim the same invention, but are not already involved in the interference. If so, the examiner should consult with an Interference Practice Specialist (IPS) and prepare a referral of the suggested interference to the Board of Patent Appeals and Interferences in the same way that a referral is prepared in the first instance.<

>

2307.05 Board Action on Related Files [R-4]

Occasionally, the Board may order that a paper be filed in a related application. Generally, the paper will notify the examiner of a fact, such as a party admission or prior art, that may be relevant to examination of the related case.<

>

2307.06 Action at the Board [R-4]

Action at the Board of Patent Appeals and Interferences (Board) during an interference is beyond the scope of this Chapter. For further information, see 37 CFR part 41, subparts A, D, and E; see also the Board's Contested Case Practice Guide. A Standing Order and other orders, which further direct the conduct of the parties, are also entered in each interference.<

>

2308 Action After an Interference [R-4]

37 CFR 41.127. Judgment.

(a) *Effect within Office*—(1) *Estoppel*. A judgment disposes of all issues that were, or by motion could have properly been, raised and decided. A losing party who could have properly moved for relief on an issue, but did not so move, may not take action in the Office after the judgment that is inconsistent with that party's failure to move, except that a losing party shall not be estopped with respect to any contested subject matter for which that party was awarded a favorable judgment.

(2) *Final disposal of claim*. Adverse judgment against a claim is a final action of the Office requiring no further action by the Office to dispose of the claim permanently.

(c) *Recommendation*. The judgment may include a recommendation for further action by the examiner or by the Director. If the Board recommends rejection of a claim of an involved application, the examiner must enter and maintain the recommended rejection unless an amendment or showing of facts not previously of record is filed which, in the opinion of the examiner, overcomes the recommended rejection.

Jurisdiction over an application returns to the examiner once the interference has terminated. If there is a recommendation for further action in the application, the examiner must reopen prosecution to consider the recommendation. The examiner must enter any recommended rejection, and must maintain

the rejection unless the applicant by amendment or submission of new evidence overcomes the rejection to the examiner's satisfaction.

If there is no recommendation in the judgment, the examiner should update the search and may, but is not required to, reopen prosecution for any claim not disposed of in the judgment.

An interference judgment simply resolves any question of priority between the two parties to the interference. The judgment does not prevent the examiner from making a rejection in further examination in the same application or a different application. If a party loses on an issue in the interference, the examiner should reject any claim for which allowance would be inconsistent with the interference judgment.

Form paragraph 23.02 may be used to resume *ex parte* prosecution.

¶ 23.02 *Ex Parte Prosecution Is Resumed*

Interference No. [1] has been terminated by a decision [2] to applicant. *Ex parte* prosecution is resumed.

Examiner Note:

1. In bracket 1, insert the interference number.
2. In bracket 2, insert whether favorable or unfavorable.

<

>

2308.01 Final Disposal of Claims [R-4]

Judgment against a claim in an interference, including any judgment on priority or patentability, finally disposes of the claim. No further action is needed from the examiner on that claim. If no claim remains allowable to the applicant, a notice of abandonment should be issued.<

>

2308.02 Added or Amended Claims [R-4]

An applicant may file a motion during the interference to add or amend a claim. A patentee may file a reissue application in support of a motion to add or amend a claim. A copy of the paper adding or amending the claim will be placed in the official record of the application, but not entered. A decision on the motion is entered in the official record of the application. The examiner may enter the added claim or amended claim into the application only if, and only to the extent, authorized by the Board of Patent Appeals and Interferences, typically in the decision on the motion. The decision authorizing entry of the added or amended claim does not prevent the examiner from rejecting the claim during further prosecution.<

>

2308.03 Estoppel Within the Office [R-4]

If a party loses on an issue, it may not re-litigate the issue before the examiner or in a subsequent Board of Patent Appeals and Interferences (Board) proceeding. The time for the party to make all pertinent arguments is during the interference, unless the Board expressly prevented the party from litigating the issue during the interference.

There are two main types of interference estoppel. First, a losing party is barred on the merits from seeking a claim that would have been anticipated or rendered obvious by the subject matter of the lost count. *In re Deckler*, 977 F.2d 1449, 24 USPQ2d 1448 (Fed. Cir. 1992); *Ex parte Tytgat*, 225 USPQ 907 (Bd. Pat. App. & Inter. 1985). Second, a losing party is procedurally barred from seeking from the examiner relief that could have been--but was not--sought in the interference. 37 CFR 41.127(a)(1); *Ex parte Kimura*, 55 USPQ2d 1537 (Bd. Pat. App. & Inter. 2000) (reissue applicant estopped to claim compound when patentability of that compound could have been put in issue in interference where opponent's application also described compound).

The examiner should consult with an Interference Practice Specialist (IPS) before allowing a claim to a losing party that was added or amended during post-interference examination.

Example 1

The applicant lost on priority for a count drawn to subject matter X. The Board's judgment automatically disposed of all of the applicant's claims corresponding to the count. The applicant files a continuing application with a claim to subject matter X. The claim must be rejected as estopped on the merits by the applicant's loss in the interference.

Example 2

Same facts as Example 1 except the applicant files a continuing application with a claim generic to subject matter X. Since the generic claim encompasses subject matter lost in the interference, the generic claim must be rejected as estopped on the merits by the loss in the interference.

Example 3

Same facts as Example 1 except the applicant files a continuing application with a claim to subject matter that would have been obvious in view of subject matter X. The claim must be rejected as estopped on the merits by the applicant's loss in the interference, but the examiner must demonstrate why the claim would have been obvious if subject matter X is assumed to be prior art.

Example 4

Same facts as Example 1 except the applicant files a continuing application with a claim identical to a claim that corresponded to the count of the interference. The applicant also files a showing of why the claim should not have corresponded to the count. The claim should be rejected as procedurally estopped. Whether the showing is adequate or not, it is too late. The time to make the showing was during the interference.

Example 5

Same facts as Example 4 except that during the interference the applicant timely requested, but was not permitted, to show the claim did not correspond to the count. The examiner may determine in light of the new showing whether the lost count would have anticipated or rendered obvious the subject matter of the claim. The procedural estoppel does not apply if, through no fault of the applicant, the Board prevented the applicant from seeking relief during the interference.

Example 6

The applicant's claim 1 was held unpatentable during the interference. The applicant could have moved, but did not move, to amend the claim. The applicant files a continuing application with an amended claim 1. If the subject matter of the amended claim would have been anticipated or obvious in view of a count of the interference, it must be rejected as procedurally estopped. Whether the amendment is sufficient to overcome the ground for unpatentability or not, the time to have amended the claim was during the interference.

Example 7

Same situation as Example 6 except the applicant did move to amend the claim, but the motion was

denied. The result is the same as in Example 6. If the subject matter of the amended claim would have been anticipated or obvious in view of a count of the interference, it must be rejected as procedurally estopped. The applicant's lack of success on the motion does not prevent the estoppel from applying to the claim.

Example 8

Same facts as Example 6 except the applicant filed a late request during the interference to amend the claim to overcome the basis for unpatentability. The request was denied as untimely. The claim must be rejected as procedurally estopped. Even though the applicant was not permitted to amend the claim during the interference, the estoppel still applies because the applicant's inability to obtain relief in the interference was the result of the applicant's failure to seek timely relief.<

>

2308.03(a) Losing Party [R-4]

A party is barred (estopped) from raising an issue if the party lost on the issue during the interference. A party may lose on one issue, yet not lose on a different issue.

Example

The applicant lost the interference on a count drawn to a compound, but the opponent lost on a count drawn to methods of using the compound. The applicant may continue to pursue claims to the method of using the compound, but not claims to the compound itself.<

>

2308.03(b) No Interference-in-Fact [R-4]

A judgment of no interference-in-fact means that no interference is needed to resolve priority between the parties. Neither party has lost the interference for the purpose of estoppel, 37 CFR 41.127(a)(1), even if one of the parties suggested the interference.

A judgment of no interference-in-fact bars any further interference between the same parties for claims to the same invention as the count of the interference.<

>

2308.03(c) No Second Interference [R-4]

No second interference should occur between the same parties on patentably indistinct subject matter. If the Board of Patent Appeals and Interferences held that there is no interference-in-fact between the parties for the subject matter of the count, that holding may not be reopened in further examination. If a party that lost the earlier interference is again claiming the same invention as the count, the interfering claims should be rejected as estopped.<

>

2309 National Aeronautics and Space Administration or Department of Energy [R-4]

Ownership of an invention made pursuant to a U.S. government contract may be vested in the contracting government agency. The Board of Patent Appeals and Interferences (Board) determines two such ownership contests using interference procedures: for the National Aeronautics and Space Administration (NASA), 42 U.S.C. 2457 (inventions having significant utility in aeronautical or space activity), and for the Department of Energy (DoE), 42 U.S.C. 2182 (inventions relating to special nuclear material or atomic energy).

An applicant with an application covered by these Acts must file a statement regarding the making or conception of the invention and any relation to a contract with NASA or DoE. See MPEP § 150 and § 151. The examiner should work in coordination with Licensing and Review and one of the Technology Centers Interference Practice Specialists in suggesting these cases to the Board. Although these cases are not interferences, the interference practices in this chapter generally apply to NASA and DoE ownership contests as well.<

- 2435 **Publishing of Patents and Patent Application Publications With Lengthy Sequence Listings**

2401 Introduction

This chapter provides guidance on the practices and procedures for implementation of the deposit rules (37 CFR 1.801 - 1.809) and the sequence rules (37 CFR 1.821 - 1.825). The final rule for deposits of biological materials for patent purposes was published in the *Federal Register*, 54 FR 34864 (August 22, 1989) and in the *Official Gazette*, 1106 O.G. 37 (September 12, 1989). The deposit rules went into effect on January 1, 1990. Revised deposit rules were published in the *Federal Register* at 66 FR 21090 (April 27, 2001) and in the *Official Gazette* at 1246 O.G. 104 (May 22, 2001) and went into effect on May 29, 2001. The final rule for the requirements for patent applications containing nucleotide sequence and/or amino acid sequence disclosures was published in the *Federal Register*, 55 FR 18230 (May 1, 1990) and in the *Official Gazette*, 1114 O.G. 29 (May 15, 1990) and went into effect on October 1, 1990. Revised sequence rules were published in the *Federal Register* at 63 FR 29620 (June 1, 1998) and in the *Official Gazette* at 1121 O.G. 82 (June 23, 1998) and went into effect on July 1, 1998.

Further revisions to the sequence rules were published in the *Federal Register* at 65 FR 54604 (September 8, 2000) and in the *Official Gazette* at 1238 O.G. 145 (September 19, 2000) and went into effect on September 8, 2000.

Additional information regarding the development of the deposit rules can be obtained in the text of the draft policy statement, published in BNA's *Patent, Trademark and Copyright Journal*, 32 PTCJ 781 at 76, 90 (May 22, 1986), the advanced notice of proposed rulemaking, published in the *Federal Register*, 52 FR 34080 (September 9, 1987), and in the *Official Gazette*, 1082 O.G. 47 (September 29, 1987) and in the notice of proposed rulemaking, published in the *Federal Register*, 53 FR 39420 (October 6, 1988), and in the *Official Gazette*, 1095 O.G. 47 (October 25,

1988). Additional information regarding the development of the sequence rules can be obtained in the text of the notice of proposed rulemaking, published in the *Federal Register*, 54 FR 18671 (May 2, 1989) and in the *Official Gazette*, 1102 O.G. 34 (May 16, 1989).

See MPEP § 803.04 and § 1850 for restriction and unity of invention practice respectively in patent applications claiming independent and distinct nucleotide sequences. See also MPEP § 2434.

2402 The Deposit Rules

Every patent must contain a written description of the invention sufficient to enable a person skilled in the art to which the invention pertains to make and use the invention. Where the invention involves a biological material and words alone cannot sufficiently describe how to make and use the invention in a reproducible manner, access to the biological material may be necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. Courts have recognized the necessity and desirability of permitting an applicant for a patent to supplement the written disclosure in an application with a deposit of biological material which is essential to meet some requirement of the statute with respect to the claimed invention. See, e.g., *Ajinomoto Co. v. Archer-Daniels-Midland Co.*, 228 F.3d 1338, 1345-46, 56 USPQ2d 1332, 1337-38 (Fed. Cir. 2000), *cert. denied*, 121 S.Ct. 1957 (2001)(explaining how deposit may help satisfy enablement requirement); *Merck and Co., Inc. v. Chase Chemical Co.*, 273 F. Supp. 68, 155 USPQ 139 (D. N.J. 1967); *In re Argoudelis*, 434 F.2d 666, 168 USPQ 99 (CCPA 1970). To facilitate the recognition of deposited biological material in patent applications throughout the world, the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure was established in 1977, and became operational in 1981. The Treaty requires signatory countries, like the United States, to recognize a deposit with any depository which has been approved by the World Intellectual Property Organization (WIPO).

The deposit rules (37 CFR 1.801 - 1.809) set forth examining procedures and conditions of deposit which must be satisfied in the event a deposit is required. The rules do not address the substantive issue of whether a deposit is required under any particular set of facts.

The rules are effective for all applications filed on or after January 1, 1990, and for all reexamination proceedings in which the request for reexamination was filed on or after January 1, 1990, except that deposits made prior to the effective date which were acceptable under the then current practice will be acceptable in such applications and proceedings. Since most of the provisions of the rules reflect policy and practice existing prior to January 1, 1990, little change in practice or burden on applicants for patent and patent owners relying on the deposit of biological material has occurred. Applicants and patent owners are encouraged to comply with these rules even if their applications and reexamination proceedings were filed prior to January 1, 1990.

2403 Deposit of Biological Material

37 CFR 1.801. Biological material.

For the purposes of these regulations pertaining to the deposit of biological material for purposes of patents for inventions under 35 U.S.C. 101, the term biological material shall include material that is capable of self-replication either directly or indirectly. Representative examples include bacteria, fungi including yeast, algae, protozoa, eukaryotic cells, cell lines, hybridomas, plasmids, viruses, plant tissue cells, lichens and seeds. Viruses, vectors, cell organelles and other non-living material existing in and reproducible from a living cell may be deposited by deposit of the host cell capable of reproducing the non-living material.

37 CFR 1.801 indicates that the rules pertaining to deposits for purposes of patents for inventions under 35 U.S.C. 101 are intended to relate to biological material. For the purposes of these rules, the term "biological material" is defined in terms of a non-exhaustive list of representative materials which can be deposited in accordance with the procedures defined in these rules. These rules are intended to address procedural matters in the deposit of biological material for patent purposes. They are not designed to decide substantive issues such as whether a deposit of a particular organism or material would be recognized or necessary for the purposes of satisfying the statutory requirements for patentability under 35 U.S.C. 112. Although the issue of the need to make a deposit of biological material typically arises under the enablement requirement of the first paragraph of 35 U.S.C. 112, the issue could also arise under the description requirement (35 U.S.C. 112, first paragraph), best mode requirement (35 U.S.C. 112, first

paragraph) or the requirements of the second paragraph of 35 U.S.C. 112 with respect to the claims.

37 CFR 1.801 does not attempt to identify what biological material either needs to be or may be deposited to comply with the requirements of 35 U.S.C. 112. For the most part, this issue must be addressed on a case-by-case basis. Thus, while the Office does not currently contemplate that there would be any situations where a material that is not capable of self-replication either directly or indirectly would be acceptable as a deposit, an applicant is clearly not precluded by these rules from attempting to show in any given application why the deposit of such a material should be acceptable to satisfy the requirements of 35 U.S.C. 112.

2403.01 Material Capable of Self-Replication

Biological material includes material that is capable of self-replication either directly or indirectly. Direct self-replication includes those situations where the biological material reproduces by itself. Representative examples of materials capable of self-replication are defined in the rule. Indirect self-replication is meant to include those situations where the biological material is only capable of replication when another self-replicating biological material is present. Self-replication after insertion in a host is one example of indirect self-replication. Examples of indirect replicating biological materials include viruses, phages, plasmids, symbionts, and replication defective cells. The list of representative examples of each type of replicating material includes viruses to demonstrate that the two lists in the rule are not intended to be mutually exclusive.

2403.02 Plant Material

Although plant material is included within the scope of the definition of biological material for purposes of patents for plant inventions under 35 U.S.C. 101, the rules on deposits are not applicable to applications filed under the Plant Patent Act (35 U.S.C. 161-164). The Office is of the view that a deposit is not required under the present provisions of 35 U.S.C. 162. Thus, a deposit is not necessary for the grant of a plant patent under the provisions of 35 U.S.C. 161-164. As with other biological material deposited for

purposes of patents for inventions under 35 U.S.C. 101, the deposit of plant material together with the written specification must enable those skilled in the art to make and use the claimed invention, in accordance with the requirements of 35 U.S.C. 112.

As with some types of reproducible biological material, seeds can be reproduced only after a growing season which may be relatively long. Although the rules do not specify a specific number of seeds to be deposited to meet the requirements of these rules, the Office will consider 2500 to be a minimum number in the normal case, but will give an applicant the opportunity to provide justification why a lesser number would be suitable under the circumstances of a particular case. The Department of Agriculture requires a deposit of 2500 seeds for the grant of a Plant Variety Protection Certificate under the Plant Variety Protection Act (7 U.S.C. 2321 *et seq.*). As the reproduction of seeds will often take a substantial period of time, the Office will require, at a minimum for the grant of a patent, a number of seeds that is likely to satisfy demand for samples once the patent is granted. In one instance, the Office accepted a deposit of 600 seeds coupled with an undertaking to deposit 1900 more seeds with due diligence. The particular situation involved a “seedless” vegetable with very few seeds per “fruit;” about two growing seasons were required to provide the additional 1900 seeds.

2404 Need or Opportunity to Make a Deposit

37 CFR 1.802. Need or opportunity to make a deposit.

(a) Where an invention is, or relies on, a biological material, the disclosure may include reference to a deposit of such biological material.

(b) Biological material need not be deposited unless access to such material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. If a deposit is necessary, it shall be acceptable if made in accordance with these regulations. Biological material need not be deposited, *inter alia*, if it is known and readily available to the public or can be made or isolated without undue experimentation. Once deposited in a depository complying with these regulations, a biological material will be considered to be readily available even though some requirement of law or regulation of the United States or of the country in which the depository institution is located permits access to the material only under conditions imposed for safety, public health or similar reasons.

(c) The reference to a biological material in a specification disclosure or the actual deposit of such material by an applicant or patent owner does not create any presumption that such material is

necessary to satisfy 35 U.S.C. 112 or that deposit in accordance with these regulations is or was required.

37 CFR 1.802(a) permits a deposit of a biological material to be referenced in a patent application where an invention is, or relies on, a biological material. The invention may rely on a biological material for the purposes of making or using the invention, either as a preferred mode or an alternative mode of operation. A reference to a deposit may be included in a specification even though the deposit is not required to satisfy the requirements of 35 U.S.C. 112.

There is no necessary implication or presumption that can or should be made about the need for a deposit simply because reference to a deposit is made in an application disclosure, as noted in paragraph (c). As noted in paragraph (b), biological material need not be deposited unless access to such material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112 and that access is not otherwise available in the absence of a deposit. Where a deposit is required to provide the necessary access, a deposit is acceptable for patent purposes only where it is made in accordance with these regulations. Even where access to biological material is required to satisfy these statutory requirements, a deposit may not be necessary if access sufficient to satisfy these requirements is otherwise available.

2404.01 Biological Material That Is Known and Readily Available to the Public

In an application where the invention required access to specific biological material, an applicant could show that the biological material is accessible because it is known and readily available to the public. The concepts of “known and readily available” are considered to reflect a level of public accessibility to a necessary component of an invention disclosure that is consistent with an ability to make and use the invention. To avoid the need for a deposit on this basis, the biological material must be both known and readily available - neither concept alone is sufficient. A material may be known in the sense that its existence has been published, but is not available to those who wish to obtain that particular known biological material. Likewise, a biological material may be

available in the sense that those having possession of it would make it available upon request, but no one has been informed of its existence.

The Board of Patent Appeals and Interferences has held that a description of the precise geographic location of marine tunicates, as a biological material, used in a claimed invention was adequate to satisfy the enablement requirement of 35 U.S.C. 112. *Ex Parte Rinehart*, 10 USPQ2d 1719 (Bd. Pat. App. & Int. 1985). The term “readily” used in the phrase “known and readily available” is considered appropriate to define that degree of availability which would be reasonable under the circumstances. If the biological material and its natural location can be adequately described so that one skilled in the art could obtain it using ordinary skill in the art, the disclosure would appear to be sufficient to meet the enablement requirement of 35 U.S.C. 112 without a deposit so long as its degree of availability is reasonable under the circumstances.

By showing that a biological material is known and readily available or by making a deposit in accordance with these rules, applicant does not guarantee that such biological material will be available forever. Public access during the term of the patent may affect the enforceability of the patent. Although there is a public interest in the availability of a deposited biological material during and after the period of enforceability of the patent, there should not be any undue concern about continued access to the public. See 37 CFR 1.806 (the term of deposit is “at least thirty (30) years and at least five (5) years after the most recent request” for a sample; the agreement sufficiently ensures that the deposit will be “available beyond the enforceable life of the patent”). Unless there is a reasonable basis to believe that the biological material will cease to be available during the enforceable life of the patent, current availability would satisfy the requirement. The incentives provided by the patent system should not be constrained by the mere possibility that a disclosure that was once enabling would become non-enabling over a period of time through no fault of the patentee. *In re Metcalfe*, 410 F.2d 1378, 161 USPQ 789 (CCPA 1969).

If an applicant has adequately established that a biological material is known and readily available, the Office will accept that showing. In those instances, however, the applicant takes the risk that the material

may cease to be known and readily available. Such a defect cannot be cured by reissue after the grant of a patent.

On the other hand, *Ex parte Humphreys*, 24 USPQ2d 1255 (Bd. Pat. App. & Int. 1992), held that the only manner in which applicants could satisfy their burden of assuring public access to the needed biological material, and, thereby, compliance with the enablement requirement of 35 U.S.C. 112, was by making an appropriate deposit. The fact that applicants and other members of the public were able to obtain the material in question from a given depository prior to and after the filing date of the application in issue did not establish that upon issuance of a patent on the application that such material would continue to be accessible to the public. The applicants did not make of record any of the facts and circumstances surrounding their access to the material in issue from the depository, nor was there any evidence as to the depository’s policy regarding the material if a patent would have been granted. Further, there was no assurance that the depository would have allowed unlimited access to the material if the application had matured into a patent.

There are many factors that may be used as indicia that a biological material is known and readily available to the public. Relevant factors include commercial availability, references to the biological material in printed publications, declarations of accessibility by those working in the field, evidence of predictable isolation techniques, or an existing deposit made in accordance with these rules. Each factor alone may or may not be sufficient to demonstrate that the biological material is known and readily available. Those applicants that rely on evidence of accessibility other than a deposit take the risk that the patent may no longer be enforceable if the biological material necessary to satisfy the requirements of 35 U.S.C. 112 ceases to be accessible.

The Office will accept commercial availability as evidence that a biological material is known and readily available only when the evidence is clear and convincing that the public has access to the material. See the final rule entitled “Deposit of Biological Materials for Patent Purposes,” 54 FR 34864, 34875 (August 22, 1989). A product could be commercially available but only at a price that effectively eliminates accessibility to those desiring to obtain a sample. The

relationship between the applicant relying on a biological material and the commercial supplier is one factor that would be considered in determining whether the biological material was known and readily available. However, the mere fact that the biological material is commercially available only through the patent holder or the patent holder's agents or assigns shall not, by itself, justify a finding that the necessary material is not readily available, absent reason to believe that access to the biological material would later be improperly restricted.

The mere reference to a deposit or the biological material itself in any document or publication does not necessarily mean that the deposited biological material is readily available. Even a deposit made under the Budapest Treaty and referenced in a United States or foreign patent document would not necessarily meet the test for known and readily available unless the deposit was made under conditions that are consistent with those specified in these rules, including the provision that requires, with one possible exception (37 CFR 1.808(b)), that all restrictions on the accessibility be irrevocably removed by the applicant upon the granting of the patent. *Ex parte Hildebrand*, 15 USPQ2d 1662 (Bd. Pat. App. & Int. 1990).

A Budapest Treaty deposit cited in a U.S. patent need not be made available if it was not required to satisfy 35 U.S.C. 112. For this reason, 37 CFR 1.808(c) provides that upon request made to the Office, the Office will certify whether a deposit has been stated to have been made under conditions which make it available to the public as of the issue date. See 37 CFR 1.808(c) and MPEP § 2410.02 for the requirements of the request. The Office will not certify that the aforementioned statement has been made unless

(A) the deposit was necessary to overcome a rejection under 35 U.S.C. 112,

(B) there is, in the record, a statement by the examiner that a rejection would have been made "but for" the deposit (assumes deposit information in record, as filed), or

(C) the record otherwise clearly indicates that the deposit was made under Budapest Treaty, and that all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of the patent (with the possible exception of requiring the request

for the deposit to be in the format specified in 37 CFR 1.808(b)).

If a deposit is not made under the conditions set forth in 37 CFR 1.808(a), the deposit cannot be relied upon for other purposes, e.g., the deposit cannot be relied upon by a third party to establish "known" and "readily available" in another application. See 37 CFR 1.808 and MPEP § 2410 and § 2410.02.

Once a deposit is made in a depository complying with these rules, and under conditions complying with these rules, a biological material will be considered to be readily available even though some requirement of law or regulation in the United States or in the country where the depository institution is located permits access to the material only under conditions imposed for health, safety or similar reasons. This provision is consistent with the Budapest Treaty (Article 5) and is designed to permit the patenting of inventions involving materials having restricted distribution, where the restrictions are imposed for the public, as opposed to the private, welfare.

2404.02 Biological Material That Can Be Made or Isolated Without Undue Experimentation

Applicant may show that a deposit is not necessary even though specific biological materials are required to practice the invention if those biological materials can be made or isolated without undue experimentation. Deposits may be required to support the claims if an isolation procedure requires undue experimentation to obtain the desired biological material. *Ex Parte Jackson*, 217 USPQ 804 (Bd. App. 1982). No deposit is required, however, where the required biological materials can be obtained from publicly available material with only routine experimentation and a reliable screening test. *Tabuchi v. Nubel*, 559 F.2d 1183, 194 USPQ 521 (CCPA 1977); *Ex Parte Hata*, 6 USPQ2d 1652 (Bd. Pat. App. & Int. 1987).

2404.03 Reference to a Deposit in the Specification

37 CFR 1.802(c) specifically provides that the mere reference to a biological material in the specification disclosure or the actual deposit of such material does not create any presumption that such referenced or deposited material is necessary to satisfy 35 U.S.C.

112, or that a deposit in accordance with these regulations is or was required. It should be noted, however, that a reference to a biological material, present in an application upon filing, may form the basis for making a deposit, where required, after the filing date of a given application but that the reference to the biological material, itself, cannot be added after filing without risking the prohibited introduction of new matter (35 U.S.C. 132). See the discussion of the Lundak application in MPEP § 2406.01.

2405 Acceptable Depository

37 CFR 1.803. Acceptable depository.

(a) A deposit shall be recognized for the purposes of these regulations if made in

(1) any International Depository Authority (IDA) as established under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure, or

(2) any other depository recognized to be suitable by the Office. Suitability will be determined by the Commissioner on the basis of the administrative and technical competence, and agreement of the depository to comply with the terms and conditions applicable to deposits for patent purposes. The Commissioner may seek the advice of impartial consultants on the suitability of a depository. The depository must:

- (i) Have a continuous existence;
- (ii) Exist independent of the control of the depositor;
- (iii) Possess the staff and facilities sufficient to examine the viability of a deposit and store the deposit in a manner which ensures that it is kept viable and uncontaminated;
- (iv) Provide for sufficient safety measures to minimize the risk of losing biological material deposited with it;
- (v) Be impartial and objective;
- (vi) Furnish samples of the deposited material in an expeditious and proper manner; and
- (vii) Promptly notify depositors of its inability to furnish samples, and the reasons why.

(b) A depository seeking status under paragraph (a)(2) of this section must direct a communication to the Commissioner which shall:

- (1) Indicate the name and address of the depository to which the communication relates;
- (2) Contain detailed information as to the capacity of the depository to comply with the requirements of paragraph (a)(2) of this section, including information on its legal status, scientific standing, staff and facilities;
- (3) Indicate that the depository intends to be available, for the purposes of deposit, to any depositor under these same conditions;
- (4) Where the depository intends to accept for deposit only certain kinds of biological material, specify such kinds;
- (5) Indicate the amount of any fees that the depository will, upon acquiring the status of suitable depository under para-

graph (a)(2) of this section, charge for storage, viability statements and furnishings of samples of the deposit.

(c) A depository having status under paragraph (a)(2) of this section limited to certain kinds of biological material may extend such status to additional kinds of biological material by directing a communication to the Commissioner in accordance with paragraph (b) of this section. If a previous communication under paragraph (b) of this section is of record, items in common with the previous communication may be incorporated by reference.

(d) Once a depository is recognized to be suitable by the Commissioner or has defaulted or discontinued its performance under this section, notice thereof will be published in the Official Gazette of the Patent and Trademark Office.

37 CFR 1.803 indicates that a depository will be recognized as acceptable for the purposes of these regulations if it is either an International Depository Authority (IDA) established under the Budapest Treaty, or if it is a depository recognized as suitable by the Commissioner. After the effective date of these regulations, a deposit of biological material which is made in a depository which is not recognized as acceptable under this regulation will not be considered as satisfying the requirements of 35 U.S.C. 112. See *Ex parte Humphreys*, 24 USPQ2d 1255 (Bd. Pat. App. & Int. 1992). On the other hand, if a deposit is not required to satisfy the requirements of 35 U.S.C. 112, it is permissible to make reference to such a deposit even though it may not be in a depository or made under the conditions which are acceptable under these regulations. As new depositories are recognized as suitable by the Commissioner, their identity will be announced in the *Official Gazette*.

An organization may be recognized as suitable by the Office if the procedure and conditions specified in 37 CFR 1.803(a)(2) and 37 CFR 1.803(b) are followed. Generally, it is not the intention of the Office to recognize as suitable any organization where the need for a suitable depository for patent purposes is being met by depositories recognized as IDAs under the Budapest Treaty. Suitability will be judged by the Commissioner, based on need and the information supplied by the organization seeking status, and information obtained from other sources that may be consulted.

While there is a desire to provide flexibility to a patent applicant in selecting an appropriate depository, these rules are not intended to permit each patent applicant to become its own depository since both the patent owner and the public have an interest in the continued availability and accessibility of the deposit

during the enforceable life of the patent, and the public has a continuing interest in its availability when the patent is no longer enforceable. The concept of a depository independent of the control of the depositor or an IDA as an acceptable depository is based on the need and desire to ensure the safe and reliable storage of a deposited biological material under circumstances that are substantially free of the opportunity for intentional mishandling or negligent handling of the deposited material. The use of an independent depository or internationally recognized depository will tend to preserve the integrity of the deposit process against those that may accidentally alter the deposited material, may wish to tamper with the deposited material or may wish to resume control of its availability when the patent is no longer enforceable, and will tend to preserve the interest of the public in the access to the biological material once the term of the patent expires.

When a depository having status under 37 CFR 1.803(a)(2) seeks to change the kinds of biological materials that it will accept and maintain for the purposes of these rules, a communication requesting such a change should be directed to the Commissioner containing the information requested in 37 CFR 1.803(b). When such a change is requested, the requesting depository should provide a complete list of the kinds of biological materials it will accept.

37 CFR 1.803(d) indicates that once a depository is recognized as suitable for the purposes of this rule, or has defaulted or discontinued its performance under this section, notice thereof will be published in the *Official Gazette* of the Patent and Trademark Office. A current list (as of January, 1998) of IDAs recognized under the Budapest Treaty, with addresses, is included below. The mere fact that a deposit has been made in one of these depositories does not mean that the terms of the deposit meet either the requirements of the Budapest Treaty or the deposit regulations. Many of the depositories recognized under the Budapest Treaty have many different arrangements under which biological material may be stored.

The World Intellectual Property Organization (WIPO) publishes a Guide to the Deposit of Microorganisms under the Budapest Treaty (WIPO Publication No. 661 (E)) on the procedures and requirements concerning the deposit of biological material, including procedures for obtaining a sample of deposited

material, in each of the international depository authorities.

CURRENT IDAs

The following constitutes the list of IDAs recognized under the Budapest Treaty. The list is current as of July, 2001.

Advanced Biotechnology Center (ABC)
Interlab Cell Line Collection
(Biotechnology Dept.)
Largo Rossana Benzi, 10
16132 Genova
Italy

Agricultural Research Service
Culture Collection (NRRL)
1815 North University Street

2406 Time of Making an Original Deposit

37 CFR 1.804. Time of making an original deposit.

(a) Whenever a biological material is specifically identified in an application for patent as filed, an original deposit thereof may be made at any time before filing the application for patent or, subject to § 1.809, during pendency of the application for patent.

(b) When the original deposit is made after the effective filing date of an application for patent, the applicant must promptly submit a statement from a person in a position to corroborate the fact, stating that the biological material which is deposited is a biological material specifically identified in the application as filed.

37 CFR 1.804 specifies the time for making an original deposit to fulfill the requirements of 35 U.S.C. 112. For the reasons discussed throughout this section, it is recommended that a deposit be made before the filing date of the application. However, for the purposes of complying with the requirements of 35 U.S.C. 112, a deposit of a biological material may be made at any time before filing the application for patent or during the pendency of the application

subject to the conditions of 37 CFR 1.809. Where a deposit is needed to satisfy the requirements of 35 U.S.C. 112 and it is made during the pendency of the application, it must be made no later than the time period set by the examiner at the time the Notice of Allowance and Issue Fee Due is mailed. A necessary deposit need not be made by an applicant until the application is in condition for allowance so long as the applicant provides a written assurance that an acceptable deposit will be made on or before the payment of the issue fee. This written assurance must provide sufficiently detailed information to convince the examiner that there is no outstanding issue regarding deposits that needs to be resolved.

These rules are equally applicable in the cases of international and national stage applications filed under the Patent Cooperation Treaty. Insofar as the rules do not permit post-issuance original deposits, the failure to make an original deposit in an application cannot be cured by filing a reissue application or instituting a reexamination proceeding. However, if an amendment of claims in a reexamination proceeding raises the need for a deposit, an original deposit may be made during the reexamination proceeding.

2406.01 Description in Application Specification

37 CFR 1.804(a) specifies not only a permissible time frame for making an original deposit, but also specifies that the biological material deposited must be specifically identified in the application for patent as filed. The requirement for a specific identification is consistent with the description requirement of the first paragraph of 35 U.S.C. 112 and provides an antecedent basis for the biological material which either has been or will be deposited before the patent is granted.

The description in the Lundak application as filed (now patent 4,594,325) provides a suitable illustration of the specific identification and description which are required in an application as filed. In that application, an immortal B-cell line was disclosed and claimed. The cell line was referred to in the application, as filed, as WI-L2-729 HF2. The methods of obtaining and using this cell line were also described in the

application as filed. A deposit of the cell line was made with the American Type Culture Collection (ATCC) about a week after the application was filed in the United States. The United States Court of Appeals for the Federal Circuit held that the requirements of access by the Office to a sample of the cell line during pendency, and public access after grant, were met by Lundak's procedures. The Court further held that the addition of information designating the depository, accession number, and deposit date of the deposited cell line in ATCC after the filing date did not violate the prohibition against new matter in 35 U.S.C. 132. *In re Lundak*, 773 F.2d 1216, 227 USPQ 90 (Fed. Cir. 1985). However, it must be clear from the application as filed that the invention claimed and described in the specification "was fully capable of being reduced to practice (i.e., no technological problems, the resolution of which would require more than ordinary skill and reasonable time, remained in order to obtain an operative, useful process)." *Feldman v. Aunstrup*, 517 F.2d 1351, 1355, 186 USPQ 108, 113 (CCPA 1975), *cert. denied*, 424 U.S. 912 (1976).

2406.02 Deposit After Filing Date - Corroboration

When the original deposit is made after the effective filing date of an application for patent, an applicant is required to promptly submit a statement from a person in a position to corroborate that the biological material which is deposited is a biological material specifically identified in the application (the filing date of which is relied upon) as filed. The nature of this corroboration will depend on the circumstances in the particular application under consideration, including the length of time between the application filing date and the date of deposit. While few, if any, situations can be imagined where the description requirement of 35 U.S.C. 112 can be satisfied where the biological material was not in existence at the time of filing, the rules will not preclude such a situation as there is no requirement in the patent law that an actual reduction to practice occur as a condition precedent to filing a patent application.

2406.03 Possible Loss of U.S. Filing Date in Other Countries

Those applicants intending to file patent applications in a country foreign to the United States relying upon biological material that must be deposited to satisfy the requirements of 35 U.S.C. 112 when the application is filed in the United States are cautioned that in many countries the deposit must be made before the filing date of the priority application in order to obtain foreign priority rights. Thus, while the deposit of a biological material subsequent to the effective filing date of a United States application is sufficient to comply with 35 U.S.C. 112, an applicant may not be able to rely on the filing date of such a U.S. application if a patent is sought in certain countries foreign to the United States.

2407 Replacement or Supplement of Deposit

37 CFR 1.805. Replacement or supplement of deposit.

(a) A depositor, after receiving notice during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, shall notify the Office in writing, in each application for patent or patent affected. In such a case, or where the Office otherwise learns, during the pendency of an application for patent, application for reissue patent or reexamination proceeding, that the depository possessing a deposit either cannot furnish samples thereof or can furnish samples thereof but the deposit has become contaminated or has lost its capability to function as described in the specification, the need for making a replacement or supplemental deposit will be governed by the same considerations governing the need for making an original deposit under the provisions set forth in § 1.802(b). A replacement or supplemental deposit made during the pendency of an application for patent shall not be accepted unless it meets the requirements for making an original deposit under these regulations, including the requirement set forth under § 1.804(b). A replacement or supplemental deposit made in connection with a patent, whether or not made during the pendency of an application for reissue patent or a reexamination proceeding or both, shall not be accepted unless a certificate of correction under § 1.323 is requested by the patent owner which meets the terms of paragraphs (b) and (c) of this section.

(b) A request for certificate of correction under this section shall not be granted unless the certificate identifies:

- (1) The accession number for the replacement or supplemental deposit;
- (2) The date of the deposit; and
- (3) The name and address of the depository.

(c) A request for a certificate of correction under this section shall not be granted unless the request is made promptly after the replacement or supplemental deposit has been made and the request:

- (1) Includes a statement of the reason for making the replacement or supplemental deposit;
- (2) Includes a statement from a person in a position to corroborate the fact, and stating that the replacement or supplemental deposit is of a biological material which is identical to that originally deposited;
- (3) Includes a showing that the patent owner acted diligently —
 - (i) In the case of a replacement deposit, in making the deposit after receiving notice that samples could no longer be furnished from an earlier deposit; or
 - (ii) In the case of a supplemental deposit, in making the deposit after receiving notice that the earlier deposit had become contaminated or had lost its capability to function as described in the specification;
- (4) Includes a statement that the term of the replacement or supplemental deposit expires no earlier than the term of the deposit being replaced or supplemented; and
- (5) Otherwise establishes compliance with these regulations.

(d) A depositor's failure to replace a deposit, or in the case of a patent, to diligently replace a deposit and promptly thereafter request a certificate of correction which meets the terms of paragraphs (b) and (c) of this section, after being notified that the depository possessing the deposit cannot furnish samples thereof, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made.

(e) In the event a deposit is replaced according to these regulations, the Office will apply a rebuttable presumption of identity between the original and the replacement deposit where a patent making reference to the deposit is relied upon during any Office proceeding.

(f) A replacement or supplemental deposit made during the pendency of an application for patent may be made for any reason.

(g) In no case is a replacement or supplemental deposit of a biological material necessary where the biological material, in accordance with § 1.802(b), need not be deposited.

(h) No replacement deposit of a biological material is necessary where a depository can furnish samples thereof but the depository for national security, health or environmental safety reasons is unable to provide samples to requesters outside of the jurisdiction where the depository is located.

(i) The Office will not recognize in any Office proceeding a replacement deposit of a biological material made by a patent owner where the depository could furnish samples of the deposit being replaced.

37 CFR 1.805 relates to the deposit of a biological material to replace or supplement a previous deposit. The term "replacement" is directed to those situations where one deposit is being substituted for another. An applicant may have greater latitude in replacing a

deposit during the pendency of an application than after the patent is granted. Replacement will typically take place where the earlier deposit is no longer viable. The term “supplement” is directed to those situations where the earlier deposit is still viable in the sense that it is alive and capable of replication either directly or indirectly, but has lost a quality (e.g., purity, functionality) it allegedly possessed at the time the application was filed.

2407.01 In a Pending Application

37 CFR 1.805(a) relates to the procedure for replacing or supplementing a deposit with respect to a pending application or a patent. An applicant or patent owner is required to notify the Office when it obtains information that the depository possessing a deposit cannot furnish samples of the deposit to satisfy the requirements of 35 U.S.C. 112. When the Office is so informed or otherwise becomes aware that samples of the deposited material cannot be furnished by the depository, the examiner will treat the application or reexamination proceeding, whichever is applicable, as if no deposit existed. A replacement or supplemental deposit will be accepted if it meets all the requirements for making an original deposit.

It should be noted that in a pending application, an applicant need not replace the identical material previously deposited, but may make an original deposit of a biological material which is specifically identified and described in the application as filed. Whether this alternative deposit will meet the requirements of 35 U.S.C. 112 with respect to the claimed subject matter must be resolved by the examiner on a case-by-case basis. The conditions in 37 CFR 1.802(b) and 37 CFR 1.804(b) must be satisfied.

2407.02 After a Patent Has Issued

A replacement deposit made in connection with an application for reissue patent or a reexamination proceeding or both shall not be accepted unless a certificate of correction is requested which meets the terms of 37 CFR 1.805(b) and 37 CFR 1.805 (c) for replacement deposits. Any correction made to the original patent will be automatically incorporated into the reissued or reexamined patent unless changes are made during examination of the reissue application or reexamination proceeding.

37 CFR 1.805(b) and 37 CFR 1.805(c) specify the procedures that a patent owner may follow to ensure that a patent contains the appropriate information about a deposited biological material in the event that a replacement or supplemental deposit is made after the patent is granted. 37 CFR 1.805(b) describes the information which must be contained in the certificate of correction, whereas 37 CFR 1.805(c) describes the information which must be provided in the request to make the correction.

2407.03 Failure to Replace

37 CFR 1.805(d) sets forth the Office position that the failure to make a replacement deposit in a case pending before the Office, for example a reissue or reexamination proceeding, where a deposit is considered to be necessary to satisfy the requirements of 35 U.S.C. 112, shall cause the application or patent involved to be treated in any Office proceeding as if no deposit were made. The provisions of 37 CFR 1.805(g) indicate that a replacement need not be made where, at the point in time when replacement would otherwise be necessary, access to the necessary biological material was otherwise available. For example, a replacement deposit would not be required under the circumstances where access to the necessary biological material was established through commercial suppliers.

2407.04 Treatment of Replacement

37 CFR 1.805(e) indicates that the Office will apply a rebuttable presumption of identity between the replacement deposit and an original deposit where a patent making reference to the deposit is relied on during any Office proceeding. This means that where a replacement deposit is permitted and made, the examiner will assume that the same material as described in the patent is accessible from the identified depository unless evidence to the contrary comes to the attention of the Office.

An applicant for patent may make a replacement deposit during the pendency of the application for any reason. The provisions of 37 CFR 1.805(f) recognize that since an original deposit may be made during the pendency of the application subject to the conditions of 37 CFR 1.809, a replacement deposit logically cannot be held to any higher standard or any further requirements.

2407.05 Exemption From Replacement

The provisions of 37 CFR 1.805(h) indicate that a replacement deposit is not required even though the depository cannot furnish samples, under certain conditions, to those requesting a sample outside of the jurisdiction where the depository is located. The conditions are specified in this paragraph as being limited to national security, health or environmental safety reasons. See also Article 5 of the Budapest Treaty.

2407.06 Replacement May Not Be Recognized

Finally, 37 CFR 1.805(i) indicates that the Office will not recognize in any Office proceeding a replacement deposit made by the patent owner where the depository could furnish samples of the original deposit being replaced. The best evidence of what was originally deposited should not be lost through destruction or replacement if made in association with an existing patent. A supplemental deposit may be accepted in an Office proceeding, however, depending on the circumstances in each case.

2408 Term of Deposit

37 CFR 1.806. Term of deposit.

A deposit made before or during pendency of an application for patent shall be made for a term of at least thirty (30) years and at least five (5) years after the most recent request for the furnishing of a sample of the deposit was received by the depository. In any case, samples must be stored under agreements that would make them available beyond the enforceable life of the patent for which the deposit was made.

The term of deposit must satisfy the requirements of the Budapest Treaty which sets a term of at least 30 years from the date of deposit and at least 5 years after the most recent request for the furnishing of a sample of the deposit was received by the depository. In the event that the 30-year term covers the 17-year term or 20-year term of the patent plus 6 years to include the Statute of Limitations, no further requirement is necessary. Unless applicant indicates that the deposit has been made under the Budapest Treaty, applicant must indicate the term for which the deposit has been made. The mere possibility of patent term extension or extended litigation involving the patent should not be considered in this analysis.

In the event that the 30-year term of deposit measured from the date of deposit would necessarily terminate within the period of enforceability of the patent (the normal 17-year term or 20-year term plus 6 years to include the Statute of Limitations), samples must be stored under agreements that would make them available beyond the enforceable life of the patent (i.e., until 23 years after issuance or 26 years after application filing) for which the deposit was made. No requirement should be made as to any particular period of time beyond the enforceable life of the patent. The purpose of the requirement is to insure that a deposited biological material necessary for the practice of a patented invention would be available to the public after expiration of the patent for which the deposit was made. The term of the deposit must comply with the requirements of each sentence of 37 CFR 1.806 whether or not the deposit is made under the Budapest Treaty. A specific statement that the deposit complies with the second sentence of this section is required only where the 30-year term would terminate within the enforceable life of the patent.

2409 Viability of Deposit

37 CFR 1.807. Viability of deposit.

(a) A deposit of biological material that is capable of self-replication either directly or indirectly must be viable at the time of deposit and during the term of deposit. Viability may be tested by the depository. The test must conclude only that the deposited material is capable of reproduction. No evidence is necessarily required regarding the ability of the deposited material to perform any function described in the patent application.

(b) A viability statement for each deposit of a biological material defined in paragraph (a) of this section not made under the Budapest Treaty on the International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure must be filed in the application and must contain:

- (1) The name and address of the depository;
- (2) The name and address of the depositor;
- (3) The date of deposit;
- (4) The identity of the deposit and the accession number given by the depository;
- (5) The date of the viability test;
- (6) The procedures used to obtain a sample if the test is not done by the depository; and
- (7) A statement that the deposit is capable of reproduction.

(c) If a viability test indicates that the deposit is not viable upon receipt, or the examiner cannot, for scientific or other valid reasons, accept the statement of viability received from the applicant, the examiner shall proceed as if no deposit has been made.

The examiner will accept the conclusion set forth in a viability statement issued by a depository recognized under § 1.803(a).

37 CFR 1.807 requires that the deposit of biological material that is capable of self-replication either directly or indirectly must be viable at the time of deposit and during the term of deposit. This requirement for viability is essentially a requirement that the deposited material is capable of reproduction. For the purpose of making a deposit under these rules, there is no requirement that evidence be provided that the deposited material is capable or has the ability to perform any function described in the patent application. However, as with any other issue of description or enablement, if the examiner has evidence or reason to question the objective statements made in the patent application, applicants may be required to demonstrate that the deposited biological material will perform in the manner described.

Under the Budapest Treaty, there is a requirement that the deposit be tested for viability before it is accepted. Thus, a mere statement by an applicant, an authorized representative of applicant or the assignee that the deposit has been accepted under the Budapest Treaty would satisfy 37 CFR 1.807.

For each deposit which is not made under the Budapest Treaty, a viability statement must be filed in the patent application and contain the information listed in paragraph (b) of this section. Under 37 CFR 1.807(c), the examiner will accept the conclusion set forth in a viability statement which is issued by a depository recognized under 37 CFR 1.803(a). If the viability test indicates that the deposit is not viable upon receipt, or the examiner cannot, for scientific or other valid reasons, accept the statement of viability received from the applicant, the examiner shall so notify the applicant stating the reasons for not accepting the statement and proceed with the examination process as if no deposit had been made.

2410 Furnishing of Samples

37 CFR 1.808. Furnishing of samples.

(a) A deposit must be made under conditions that assure that:

(1) Access to the deposit will be available during pendency of the patent application making reference to the deposit to one determined by the Commissioner to be entitled thereto under § 1.14 and 35 U.S.C. 122, and

(2) Subject to paragraph (b) of this section, all restrictions imposed by the depositor on the availability to the public of the

deposited material will be irrevocably removed upon the granting of the patent.

(b) The depositor may contract with the depository to require that samples of a deposited biological material shall be furnished only if a request for a sample, during the term of the patent:

(1) Is in writing or other tangible form and dated;

(2) Contains the name and address of the requesting party and the accession number of the deposit; and

(3) Is communicated in writing by the depository to the depositor along with the date on which the sample was furnished and the name and address of the party to whom the sample was furnished.

(c) Upon request made to the Office, the Office will certify whether a deposit has been stated to have been made under conditions which make it available to the public as of the issue date of the patent grant provided the request contains:

(1) The name and address of the depository;

(2) The accession number given to the deposit;

(3) The patent number and issue date of the patent referring to the deposit; and

(4) The name and address of the requesting party.

2410.01 Conditions of Deposit

37 CFR 1.808 requires that the deposit of biological material be made under two conditions:

(A) access to the deposit will be available during pendency of the patent application making reference to the deposit to one determined by the Commissioner to be entitled thereto under 37 CFR 1.14 and 35 U.S.C. 122, and

(B) with one exception, that all restrictions imposed by the depositor on the availability to the public of the deposited biological material be irrevocably removed upon the granting of the patent.

The one exception that is permitted is specified in 37 CFR 1.808(b) which permits the depositor to contract with the depository to require that samples of a deposited biological material shall be furnished only if a request for a sample, during the term of the patent, meets any one or all of the three conditions specified in this paragraph. These conditions are:

(A) the request is in writing or other tangible form and dated; and/or

(B) the request contains the name and address of the requesting party and the accession number of the deposit; and/or

(C) the request is communicated in writing by the depository to the depositor along with the date on which the sample was furnished and the name and

address of the party to whom the sample was furnished.

It should be noted that this exception to the general rule that all restrictions will be removed must be strictly followed and that no variations of this explicit exception will be accepted as meeting the conditions of this section. Although this exception is consistent with the provisions in the Budapest Treaty and its implementing regulations (Rule 11.4), other conditions on accessibility are permitted under the Budapest Treaty as prescribed by national law. Consequently, the mere indication that a deposit has been made under conditions prescribed by the Budapest Treaty would satisfy all conditions of these regulations except the requirement that all restrictions on access be removed on grant of the patent. *Ex parte Hildebrand*, 15 USPQ2d 1662 (Bd. Pat. App. & Int. 1990).

2410.02 Certification of Statement of Availability of Deposit

Since the mere description of a deposit or identity of a deposit in a patent specification is not necessarily an indication that a requirement for deposit was made or that a deposit which complies with these rules has been made, accessibility to a deposited material referenced in a patent may depend on the satisfaction of conditions not apparent on the face of the patent. For these reasons, and upon request made to the U.S. Patent and Trademark Office, the Office will certify whether a deposit has been stated to have been made under conditions which would make it available to the public as of the issue date of the patent grant provided the request is made to a Director of Technology Center (TC) 1600, and contains the following information:

- (A) the name and address of the depository;
- (B) the accession number given to the deposit;
- (C) the patent number and issue date of the patent referring to the deposit; and
- (D) the name and address of the requesting party.

See also MPEP § 2404.01.

For those deposits made pursuant to the Budapest Treaty, the World Intellectual Property Organization provides a form (Form BP-12) for requesting a certification of legal entitlement to receive samples of deposited microorganisms pursuant to Rule 11.3(a) of

the Regulations under the Budapest Treaty. Copies of this form are available from a TC 1600 Director.

2411 Examination Procedures

37 CFR 1.809. Examination procedures.

(a) The examiner shall determine pursuant to § 1.104 in each application for patent, application for reissue patent or reexamination proceeding if a deposit is needed, and if needed, if a deposit actually made is acceptable for patent purposes. If a deposit is needed and has not been made or replaced or supplemented in accordance with these regulations, the examiner, where appropriate, shall reject the affected claims under the appropriate provision of 35 U.S.C. 112, explaining why a deposit is needed and/or why a deposit actually made cannot be accepted.

(b) The applicant for patent or patent owner shall reply to a rejection under paragraph (a) of this section by—

(1) In the case of an applicant for patent, either making an acceptable original, replacement, or supplemental deposit, or assuring the Office in writing that an acceptable deposit will be made; or, in the case of a patent owner, requesting a certificate of correction of the patent which meets the terms of paragraphs (b) and (c) of § 1.805, or

(2) Arguing why a deposit is not needed under the circumstances of the application or patent considered and/or why a deposit actually made should be accepted. Other replies to the examiner's action shall be considered nonresponsive. The rejection will be repeated until either paragraph (b)(1) of this section is satisfied or the examiner is convinced that a deposit is not needed.

(c) If an application for patent is otherwise in condition for allowance except for a needed deposit and the Office has received a written assurance that an acceptable deposit will be made, applicant will be notified and given a period of time within which the deposit must be made in order to avoid abandonment. This time period is not extendable under § 1.136(a) or (b) if set forth in a "Notice of Allowability" or in an Office action having a mail date on or after the mail date of a "Notice of Allowability" (see § 1.136(c)).

(d) For each deposit made pursuant to these regulations, the specification shall contain:

- (1) The accession number for the deposit;
- (2) The date of the deposit;
- (3) A description of the deposited biological material sufficient to specifically identify it and to permit examination; and
- (4) The name and address of the depository.

(e) Any amendment required by paragraphs (d)(1), (d)(2) or (d)(4) of this section must be filed before or with the payment of the issue fee (see § 1.312).

37 CFR 1.809 sets forth procedures that will be used by the examiner to address a deposit issue. The burden is initially on the Office to establish that access to a biological material is necessary for the satisfaction of the statutory requirements for patentability under 35 U.S.C. 112. Once the Office has met this burden, the burden shifts to the applicant or patent

owner to demonstrate that access to such biological material either is not necessary, or is already available, or that a deposit of such material will be made in accordance with these regulations.

2411.01 Rejections Based on Deposit Issue

Under 37 CFR 1.809(a), once the examiner has determined that access to a biological material is necessary, and there is no information that would support the conclusion that access is currently available in accordance with these regulations, the examiner should make an appropriate rejection under 35 U.S.C. 112 until such time as a deposit in accordance with these regulations is actually made or a written assurance is received in the patent application that such a deposit will be made upon an indication of allowability of the application. The examiner should clearly indicate the statutory basis for the rejection and the reasons that are relied upon by the examiner to conclude that the application does not comply with some requirement of 35 U.S.C. 112. Although not exhaustive, the following grounds of rejection may be applicable in appropriate circumstances:

(A) 35 U.S.C. 112, first paragraph - lack of an enabling disclosure without access to a specific biological material. This ground of rejection should be accompanied by evidence of scientific reasoning to support the conclusion that a person skilled in the art could not make or use the invention defined in and commensurate with the claims without access to the specific biological material.

(B) 35 U.S.C. 112, first paragraph - description requirement. This ground of rejection typically arises in the context that the application as filed does not contain a description to support an amendment to the specification or claims. An amendment to the claims that is not described in the application as filed would justify a rejection of the affected claims under 35 U.S.C. 112, first paragraph. If an amendment is made to the application, other than the claims, that is not described in the application as filed, this would justify an objection under 35 U.S.C. 112, first paragraph and/or 35 U.S.C. 132 (prohibition against the introduction of new matter) and a requirement that the amendment be canceled.

(C) 35 U.S.C. 112, first paragraph - best mode requirement. This ground of rejection will be rare in the *ex parte* examination process because it requires (1) a finding by the examiner that, at the time the application was filed, the inventor(s) knew of a specific material that was considered by the inventor(s) to be better than any other, and (2) if a best mode was contemplated at that time, that the inventor(s) concealed the best mode (accidentally or intentionally) by failing to adequately describe that best mode. See *Chemcast Corp. v. Arco Industries Corp.*, 913 F.2d 923, 16 USPQ2d 1033 (Fed. Cir. 1990). The Court of Appeals for the Federal Circuit has at least twice resolved a best mode issue arising in the context of a biotechnology invention in favor of the patentee. See *Scripps Clinic and Research Foundation v. Genentech Inc.*, 927 F.2d 1565, 18 USPQ2d 1001 (Fed. Cir. 1991) with respect to monoclonal antibodies, and *Amgen Inc. v. Chugai Pharmaceutical Co. Ltd.*, 927 F.2d 1200, 18 USPQ2d 1016 (Fed. Cir. 1991) with respect to mammalian host cells.

(D) 35 U.S.C. 112, second paragraph - indefiniteness. This ground of rejection, as applied to a deposit issue, requires the examiner to provide reasons why the terms in the claims and/or scope of the invention are unclear because of an incomplete or inaccurate description or the absence of a reference to a biological material.

(E) 35 U.S.C. 112, second paragraph - claims do not set forth what applicants regard as their invention. This ground of rejection requires the citation of some evidence, not contained in the application as filed, that the claims do not set forth what applicants regard as their invention. *In re Prater*, 415 F.2d 1393, 162 USPQ 541 (CCPA 1969). Any disagreement between the content of the application disclosure and the scope of the claims should be addressed under 35 U.S.C. 112, first paragraph. See *In re Ehrreich*, 590 F.2d 902, 200 USPQ 504 (CCPA 1979).

Where a deposit is required to satisfy 35 U.S.C. 112, a deposit must be made in accordance with these regulations. A deposit accepted in any IDA under the Budapest Treaty shall be accepted for patent purposes if made under conditions which comply with 37 CFR 1.806 and 37 CFR 1.808(a) concerning term of deposit and permissible conditions on access once the patent is granted.

2411.02 Replies to Rejections Based on Deposit Issue

Once a rejection under 35 U.S.C. 112 has been made by the examiner directed to the absence of access to a biological material, applicant may reply, pursuant to 37 CFR 1.809 (b)(1), by either making an acceptable original or replacement deposit in accordance with these regulations, or assuring the Office in writing that an acceptable deposit will be made on or before the date of payment of the issue fee, or by submitting an argument of why a deposit is not required under the circumstances of the application being considered. Other replies to such a rejection by the examiner shall be considered nonresponsive and may result in abandonment of the application. The rejection will be repeated and made final until the requirements of 37 CFR 1.809(b)(1) are satisfied or the examiner is convinced that a deposit is not required for the claimed subject matter. Once the rejection is made final, the requirements of 37 CFR 1.116 apply to further submissions. The written assurance will be accepted by the Office if it clearly states that an acceptable deposit will be made within the required time and under conditions which satisfy these rules. In the case that an acceptable written assurance has been made by the applicant, the rejection under 35 U.S.C. 112 directed to the absence of access to the biological material should be removed.

2411.03 Application in Condition for Allowance Except for Deposit

As set forth in 37 CFR 1.809(c), in the event that an application for patent is otherwise in condition for allowance except for a required deposit and the Office has received a written assurance that an acceptable deposit will be made, applicant will be notified and given a period of time within which the deposit must be made in order to avoid abandonment. This time period is not extendable under 37 CFR 1.136(a) or (b) if set forth in a "Notice of Allowability" or in an Office action having a mail date on or after the mail date of a "Notice of Allowability" (see 37 CFR 1.136(c)). Failure to make the needed deposit in accordance with this requirement will be considered a failure to prosecute the application under 35 U.S.C. 133 and result in abandonment of the application.

Once the deposit has been made, information regarding the deposit, such as the name and address of the depository, the accession number and the date of the deposit, that is to be added to the specification must be added by means of filing an amendment under the provisions of 37 CFR 1.312. Such an amendment must be filed before or with the payment of the issue fee. Therefore, applicants need to make any necessary deposit of biological material well prior to payment of the issue fee such that the accession number is received with sufficient time remaining to amend the specification as required by 37 CFR 1.809(d) on or before the date the issue fee payment is paid. See 37 CFR 1.809(e).

2411.04 After a Patent Has Been Granted

In a proceeding involving a patent, it may not be possible to request a certificate of correction of the patent which meets the terms of 37 CFR 1.805(b) and 37 CFR 1.805(c). For example, if the patent owner is on notice that samples of an original deposit can no longer be furnished by the depository, failure to diligently make a replacement deposit will preclude grant of a certificate of correction. A replacement deposit subsequently made will not be recognized by the Office nor will a request for certificate of correction, even if made promptly thereafter, be granted. It would also not be possible to request a certificate of correction of the patent which meets the terms of 37 CFR 1.805(b) and 37 CFR 1.805(c) where no original deposit was made before or during the pendency of the application which matured into the patent.

A patent defective because of lack of a necessary deposit is necessarily fatally defective for failure to comply with the first paragraph of 35 U.S.C. 112. Reissue is not available in such cases. See *In re Hay*, 534 F.2d 917, 189 USPQ 790 (CCPA 1976). Whether reissue is available where a biological material necessary for compliance with 35 U.S.C. 112 was known and readily available at the time of issuance of the patent and subsequently ceased to be readily available is problematic. Nevertheless, the rules do not provide for post-issuance original deposits.

Where an applicant for patent has any doubt as to whether access to a biological material specifically identified in the specification is necessary to satisfy 35 U.S.C. 112 or whether such a material, while currently freely available, may become unavailable in the

future, the applicant would be well-advised to make a deposit thereof before any patent issues. Similarly, where a patent owner has any doubt whether a deposit referred to in the specification is a biological material necessary to satisfy 35 U.S.C. 112 and, if the material is necessary, whether it is otherwise known and readily available, the patent owner would be well-advised to follow the procedures set forth in 37 CFR 1.805(b) and 37 CFR 1.805(c) after receiving the notice specified in those paragraphs.

2411.05 Content of Application with Respect to Deposited Material

37 CFR 1.809(d) sets forth the requirements for the content of the specification with respect to a deposited biological material. Specifically, the specification shall contain the accession number for the deposit, the date of the deposit, the name and address of the depository, and a description of the deposited biological material sufficient to specifically identify it and to permit examination. The description also must be sufficient to permit verification that the deposited biological material is in fact that disclosed. Once the patent issues, the description must be sufficient to aid in the resolution of questions of infringement. As a general rule, the more information that is provided about a particular deposited biological material, the better the examiner will be able to compare the identity and characteristics of the deposited biological material with the prior art.

2420 The Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures - the Sequence Rules

Prior to the effective date (October 1, 1990) and implementation of the sequence rules (37 CFR 1.821 through 1.825), applications for patents that included nucleotide or amino acid sequence information posed special problems for the Office. While not related to the disclosure requirements of an invention, problems existed in the presentation, examination and printing of nucleotide and amino acid sequence data that appeared in patent applications because of the lack of uniformity in submission of sequence data to the Office and the impracticality of properly searching

and examining sequences submitted in paper form. In summary, the diversity and complexity of nucleotide and amino acid sequence data resulted in searching and analysis difficulties both within the Office and outside the Office, decreased accuracy of search and reproduction and increased costs. These difficulties made the development and implementation of the sequence rules a critical necessity for the Office. As such, the Office amended its regulations to establish a standardized format for descriptions of nucleotide and amino acid sequence data submitted as a part of patent applications, in conjunction with the required submission of that data in computer readable form. The final rules were published in the *Federal Register* at 55 FR 18230 (May 1, 1990) and in the *Official Gazette* at 1114 O.G. 29 (May 15, 1990). The sequence rules went into effect on October 1, 1990. The sequence rules were subsequently revised effective July 1, 1998. See 63 FR 29634 (June 1, 1998) and 1121 O.G. 82 (June 23, 1998).

The sequence rules were further revised on September 8, 2000 to allow submissions of the nucleotide and/or amino acid sequences and associated information on compact discs. See 65 FR 54604 (Sept. 8, 2000) and 1238 O.G. 145 (Sept. 19, 2000). See also MPEP § 608.05 and § 2422.03.

2421 Overview of the Sequence Rules

2421.01 Applications Affected

The sequence rules require the use of standard symbols and a standard format for sequence data in most sequence-type patent applications. They further require the submission of that data in computer readable form. Compliance is required for most disclosures of sequence data in new applications filed on or after October 1, 1990. The revised sequence rules apply to most new applications filed on or after July 1, 1998. See the final rule publications as cited in MPEP § 2420 for more detailed applicability information.

The Office encourages voluntary compliance for applications not subject to the rules, but all aspects of the rules must be complied with before data will be entered into the database. This includes submission of all statements required by the rules. In exceptional circumstances, it should be noted that the Office may waive the rules via a 37 CFR 1.183 petition.

2421.02 Summary of the Requirements of the Sequence Rules

Basically, the sequence rules define a set of symbols and procedures that are both mandatory and the only way that an applicant is permitted to describe information about a sequence that falls within the definitions used in the rules. Thus, 37 CFR 1.821 defines a “sequence” and a “Sequence Listing” for the purpose of the rules, the requirements for specific symbols, and formats for the “Sequence Listing,” the requirement for a computer readable form (CRF) of the “Sequence Listing,” and the deadlines for complying with the requirements. 37 CFR 1.822 to 37 CFR 1.824 set forth detailed descriptions of the requirements that are mandatory for the presentation of sequence data, and 37 CFR 1.825 sets forth procedures that are available to an applicant in the event that amendments to the sequence information or replacement of the computer readable copy become necessary.

The sequence rules embrace all unbranched nucleotide sequences with ten or more bases and all unbranched, non-D amino acid sequences with four or more amino acids, provided that there are at least 4 “specifically defined” nucleotides or amino acids. The rules apply to all sequences in a given application, whether claimed or not. All such sequences are relevant for the purposes of building a comprehensive database and properly assessing prior art. It is therefore essential that all sequences, whether only disclosed or also claimed, be included in the database.

2421.03 Notification of a Failure to Comply

With respect to the Office’s determination of compliance with the sequence rules and the opportunities afforded applicants to satisfy the requirements of the rules, applicants will be notified of easily detectable deficiencies early in the application process. Applicants whose computer readable forms are damaged in the mail, are not readable, or are missing mandatory elements will be notified shortly after receipt of the application by the Office. Applications filed on or after November 29, 2000, will be retained in the Office of Initial Patent Examination (OIPE) until any noncompliant sequence listing that renders an application unsuitable for examination is corrected. Deficien-

cies of a more sophisticated nature will likely only be detected by the examiner to whom the application is assigned. Applicant will be notified of any errors or inconsistencies detected by the examiner early in the examination process. Other errors or inconsistencies will be noted by the examiner early in the examination process.

Upon detection of damage or a deficiency, a notice will be sent to the applicant detailing the damage or deficiency and setting at least a 30-day period for reply. The period for reply will usually be 2 months when sent during the preexamination processing of an application. However, if the notice is sent out with an Office communication having a longer period for reply, the period for reply may be longer than 2 months, e.g., where the notice is sent with an Office action on the merits setting a 3-month period for reply. Extensions of time in which to reply will be available pursuant to 37 CFR 1.136. When an action by the applicant, such as a reply to a Notice to Comply from the Office, is determined to be a *bona fide* attempt to comply with the rules and it is apparent that compliance with some requirement has inadvertently been omitted, the applicant may be given a new time period to correct the omission. See 37 CFR 1.135(c). The relevant form paragraphs and a copy of the Notice to Comply to be used in applications subject to the sequence rules are included in MPEP § 2427 through § 2427.02.

A notification of a failure to comply with the sequence rules will be accompanied by an analysis of any submitted computer readable form. Any inquiries regarding a specific computer readable form that has been processed by the Office should be directed to the Systems Branch of the Chemical/Biotechnology Division of the Scientific and Technical Information Center.

2421.04 Future Changes to the Sequence Rules

With general regard to the symbols and format to be used for nucleotide and/or amino acid sequence data set forth in 37 CFR 1.822 and the form and format for sequence submissions in computer readable form set forth in 37 CFR 1.824, the Office intends to accommodate progress in the areas of both standardization and computerization as they relate to sequence data by subsequently amending the rules to take into

account any such progress. This progress will probably be reflected in the refinement of or liberalization of the rules. For example, progress in the area of the standardization of sequence data will likely result in a more comprehensive rule. For example, the D-amino acids and branched sequences that are currently excluded from the rule may, in the future, be brought within the scope of the rule once the necessary standardization technology becomes available. As a further example, the computer readable form is currently limited to certain forms of electronic media, but it can readily be seen that progress in the technology for developing databases of the type the Office has envisioned will likely permit a broadening of the permissible types of computer readable forms that may be submitted. The same can be said for the computer/operating-system configurations that are currently permitted by the rules. As the Office becomes able to provide greater refinement and liberality in these areas, the Office will do so by the publication of notices in the *Official Gazette* or formal rulemaking proposals, as appropriate.

2422 Nucleotide and/or Amino Acid Sequence Disclosures in Patent Applications

37 CFR 1.821. Nucleotide and/or amino acid sequence disclosures in patent applications.

(a) Nucleotide and/or amino acid sequences as used in §§ 1.821 through 1.825 are interpreted to mean an unbranched sequence of four or more amino acids or an unbranched sequence of ten or more nucleotides. Branched sequences are specifically excluded from this definition. Sequences with fewer than four specifically defined nucleotides or amino acids are specifically excluded from this section. "Specifically defined" means those amino acids other than "Xaa" and those nucleotide bases other than "n" defined in accordance with the World Intellectual Property Organization (WIPO) Handbook on Industrial Property Information and Documentation, Standard ST.25: Standard for the Presentation of Nucleotide and Amino Acid Sequence Listings in Patent Applications (1998), including Tables 1 through 6 in Appendix 2, herein incorporated by reference. (Hereinafter "WIPO Standard ST.25 (1998)"). This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of WIPO Standard ST.25 (1998) may be obtained from the World Intellectual Property Organization; 34 chemin des Colombettes; 1211 Geneva 20 Switzerland. Copies of ST.25 may be inspected at the Patent Search Room; Crystal Plaza 3, Lobby Level; 2021 South Clark Place; Arlington, VA 22202. Copies may also be inspected at the Office of the Federal Register, 800 North Capitol Street,

NW, Suite 700, Washington, DC. Nucleotides and amino acids are further defined as follows:

(1) *Nucleotides*: Nucleotides are intended to embrace only those nucleotides that can be represented using the symbols set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 1. Modifications, e.g., methylated bases, may be described as set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 2, but shall not be shown explicitly in the nucleotide sequence.

(2) *Amino acids*: Amino acids are those L-amino acids commonly found in naturally occurring proteins and are listed in WIPO Standard ST.25 (1998), Appendix 2, Table 3. Those amino acid sequences containing D-amino acids are not intended to be embraced by this definition. Any amino acid sequence that contains post-translationally modified amino acids may be described as the amino acid sequence that is initially translated using the symbols shown in WIPO Standard ST.25 (1998), Appendix 2, Table 3 with the modified positions; e.g., hydroxylations or glycosylations, being described as set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 4, but these modifications shall not be shown explicitly in the amino acid sequence. Any peptide or protein that can be expressed as a sequence using the symbols in WIPO Standard ST.25 (1998), Appendix 2, Table 3 in conjunction with a description in the Feature section to describe, for example, modified linkages, cross links and end caps, non-peptidyl bonds, etc., is embraced by this definition.

(b) Patent applications which contain disclosures of nucleotide and/or amino acid sequences, in accordance with the definition in paragraph (a) of this section, shall, with regard to the manner in which the nucleotide and/or amino acid sequences are presented and described, conform exclusively to the requirements of §§ 1.821 through 1.825.

(c) Patent applications which contain disclosures of nucleotide and/or amino acid sequences must contain, as a separate part of the disclosure, a paper copy disclosing the nucleotide and/or amino acid sequences and associated information using the symbols and format in accordance with the requirements of §§ 1.822 and 1.823. This paper copy is hereinafter referred to as the "Sequence Listing." Each sequence disclosed must appear separately in the "Sequence Listing." Each sequence set forth in the "Sequence Listing" shall be assigned a separate sequence identifier. The sequence identifiers shall begin with 1 and increase sequentially by integers. If no sequence is present for a sequence identifier, the code "000" shall be used in place of the sequence. The response for the numeric identifier <160> shall include the total number of SEQ ID NOs, whether followed by a sequence or by the code "000."

(d) Where the description or claims of a patent application discuss a sequence that is set forth in the "Sequence Listing" in accordance with paragraph (c) of this section, reference must be made to the sequence by use of the sequence identifier, preceded by "SEQ ID NO:" in the text of the description or claims, even if the sequence is also embedded in the text of the description or claims of the patent application.

(e) A copy of the "Sequence Listing" referred to in paragraph (c) of this section must also be submitted in computer readable form in accordance with the requirements of § 1.824. The computer readable form is a copy of the "Sequence Listing" and

will not necessarily be retained as a part of the patent application file. If the computer readable form of a new application is to be identical with the computer readable form of another application of the applicant on file in the Patent and Trademark Office, reference may be made to the other application and computer readable form in lieu of filing a duplicate computer readable form in the new application if the computer readable form in the other application was compliant with all of the requirements of these rules. The new application shall be accompanied by a letter making such reference to the other application and computer readable form, both of which shall be completely identified. In the new application, applicant must also request the use of the compliant computer readable "Sequence Listing" that is already on file for the other application and must state that the paper copy of the "Sequence Listing" in the new application is identical to the computer readable copy filed for the other application.

(f) In addition to the paper copy required by paragraph (c) of this section and the computer readable form required by paragraph (e) of this section, a statement that the content of the paper and computer readable copies are the same must be submitted with the computer readable form, *e.g.*, a statement that "the information recorded in computer readable form is identical to the written sequence listing."

(g) If any of the requirements of paragraphs (b) through (f) of this section are not satisfied at the time of filing under 35 U.S.C. 111(a) or at the time of entering the national stage under 35 U.S.C. 371, applicant will be notified and given a period of time within which to comply with such requirements in order to prevent abandonment of the application. Any submission in reply to a requirement under this paragraph must be accompanied by a statement that the submission includes no new matter.

(h) If any of the requirements of paragraphs (b) through (f) of this section are not satisfied at the time of filing an international application under the Patent Cooperation Treaty (PCT), which application is to be searched by the United States International Searching Authority or examined by the United States International Preliminary Examining Authority, applicant will be sent a notice necessitating compliance with the requirements within a prescribed time period. Any submission in reply to a requirement under this paragraph must be accompanied by a statement that the submission does not include matter which goes beyond the disclosure in the international application as filed. If applicant fails to timely provide the required computer readable form, the United States International Searching Authority shall search only to the extent that a meaningful search can be performed without the computer readable form and the United States International Preliminary Examining Authority shall examine only to the extent that a meaningful examination can be performed without the computer readable form.

37 CFR 1.821 incorporates by reference the World Intellectual Property Organization (WIPO) Handbook on Industrial Property Information and Documentation, Standard ST.25 (1998), including Tables 1 through 6 of Appendix 2. Copies may be obtained from the World Intellectual Property Organization; 34

chemin des Colombettes; 1211 Geneva 20 Switzerland. Copies may be inspected at the Patent Search Room; Crystal Plaza 3, Lobby Level; 2021 South Clark Place; Arlington, VA 22202. Copies may also be inspected at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC 20408. These tables are reproduced below.

WIPO Standard ST.25 (1998), Appendix 2, Table 1, provides that the bases of a nucleotide sequence should be represented using the following one-letter code for nucleotide sequence characters:

Table 1: List of Nucleotides

| Symbol | Meaning | Origin of designation |
|--------|---------------------------------------|--------------------------------------|
| a | a | <u>a</u> denine |
| g | g | <u>g</u> uanine |
| c | c | <u>c</u> ytosine |
| t | t | <u>t</u> hymine |
| u | u | <u>u</u> racil |
| r | g or a | <u>p</u> urine |
| y | t/u or c | <u>p</u> yrimidine |
| m | a or c | <u>a</u> mino |
| k | g or t/u | <u>k</u> eto |
| s | g or c | <u>s</u> trong interactions 3H-bonds |
| w | a or t/u | <u>w</u> eak interactions 2H-bonds |
| b | g or c or t/u | not a |
| d | a or g or t/u | not c |
| h | a or c or t/u | not g |
| v | a or g or c | not t, not u |
| n | a or g or c or t/u, unknown, or other | <u>a</u> ny |

WIPO Standard ST.25 (1998), Appendix 2, Table 2, provides that modified bases may be represented as

the corresponding unmodified bases in the sequence itself, if the modified base is one of those listed below and the modification is further described in the Feature section of the Sequence Listing. The codes from the list below may be used in the description (i.e., the specification and drawing, or in the Sequence Listing) but these codes may not be used in the sequence itself.

Table 2: List of Modified Nucleotides

| Symbol | Meaning |
|----------|--|
| ac4c | 4-acetylcytidine |
| chm5u | 5-(carboxyhydroxymethyl)uridine |
| cm | 2'-O-methylcytidine |
| cmnm5s2u | 5-carboxymethylaminomethyl-2-thiouridine |
| cmnm5u | 5-carboxymethylaminomethyluridine |
| d | dihydrouridine |
| fm | 2'-O-methylpseudouridine |
| gal q | beta, D-galactosylqueuosine |
| gm | 2'-O-methylguanosine |
| i | inosine |
| i6a | N6-isopentenyladenosine |
| m1a | 1-methyladenosine |
| m1f | 1-methylpseudouridine |
| m1g | 1-methylguanosine |
| m1i | 1-methylinosine |
| m22g | 2,2-dimethylguanosine |
| m2a | 2-methyladenosine |
| m2g | 2-methylguanosine |
| m3c | 3-methylcytidine |
| m5c | 5-methylcytidine |
| m6a | N6-methyladenosine |
| m7g | 7-methylguanosine |

| | |
|---------|--|
| mam5u | 5-methylaminomethyluridine |
| mam5s2u | 5-methoxyaminomethyl-2-thiouridine |
| man q | beta, D-mannosylqueuosine |
| mcm5s2u | 5-methoxycarbonylmethyl-2-thiouridine |
| mcm5u | 5-methoxycarbonylmethyluridine |
| mo5u | 5-methoxyuridine |
| ms2i6a | 2-methylthio-N6-isopentenyladenosine |
| ms2t6a | N-((9-beta-D-ribofuranosyl-2-methylthiopurine-6-yl)carbamoyl)threonine |
| mt6a | N-((9-beta-D-ribofuranosylpurine-6-yl)N-methylcarbamoyl)threonine |
| mv | uridine-5-oxyacetic acid-methylester |
| o5u | uridine-5-oxyacetic acid |
| osyw | wybutoxosine |
| p | pseudouridine |
| q | queuosine |
| s2t | 5-methyl-2-thiouridine |
| s2c | 2-thiocytidine |
| s2t | 5-methyl-2-thiouridine |
| s2u | 2-thiouridine |
| s4u | 4-thiouridine |
| t | 5-methyluridine |
| t6a | N-((9-beta-D-ribofuranosylpurine-6-yl)-carbamoyl)threonine |
| tm | 2'-O-methyl-5-methyluridine |
| um | 2'-O-methyluridine |
| yw | wybutosine |
| x | 3-(3-amino-3-carboxy-propyl)uridine, (acp3)u |

WIPO Standard ST.25 (1998), Appendix 2, Table 3, provides that the amino acids should be represented using the following three-letter code with the first letter as a capital.

Table 3: List of Amino Acids

| Symbol | Meaning |
|--------|------------------|
| Ala | Alanine |
| Cys | Cysteine |
| Asp | Aspartic Acid |
| Glu | Glutamic Acid |
| Phe | Phenylalanine |
| Gly | Glycine |
| His | Histidine |
| Ile | Isoleucine |
| Lys | Lysine |
| Leu | Leucine |
| Met | Methionine |
| Asn | Asparagine |
| Pro | Proline |
| Gln | Glutamine |
| Arg | Arginine |
| Ser | Serine |
| Thr | Threonine |
| Val | Valine |
| Trp | Tryptophan |
| Tyr | Tyrosine |
| Asx | Asp or Asn |
| Glx | Glu or Gln |
| Xaa | unknown or other |

WIPO Standard ST.25 (1998), Appendix 2, Table 4, provides that modified and unusual amino acids may

be represented as the corresponding unmodified amino acids in the sequence itself if the modified or unusual amino acid is one of those listed below and the modification is further described in the Feature section of the Sequence Listing. The codes from the list below may be used in the description (i.e., the specification and drawings, or in Sequence Listing) but these codes may not be used in the sequence itself.

Table 4: List of Modified and Unusual Amino Acids

| Symbol | Meaning |
|--------|--|
| Aad | 2-Aminoadipic acid |
| bAad | 3-Aminoadipic acid |
| bAla | beta-Alanine, beta-Aminopropionic acid |
| Abu | 2-Aminobutyric acid |
| 4Abu | 4-Aminobutyric acid, piperidinic acid |
| Acp | 6-Aminocaproic acid |
| Ahe | 2-Aminoheptanoic acid |
| Aib | 2-Aminoisobutyric acid |
| bAib | 3-Aminoisobutyric acid |
| Apm | 2-Aminopimelic acid |
| Dbu | 2,4-Diaminobutyric acid |
| Des | Desmosine |
| Dpm | 2,2' -Diaminopimelic acid |
| Dpr | 2,3-Diaminopropionic acid |
| EtGly | N-Ethylglycine |
| EtAsn | N-Ethylasparagine |
| Hyl | Hydroxylysine |
| aHyl | allo-Hydroxylysine |
| 3Hyp | 3-Hydroxyproline |
| 4Hyp | 4-Hydroxyproline |

| | |
|-------|----------------------------|
| Ide | Isodesmosine |
| alle | allo-Isoleucine |
| MeGly | N-Methylglycine, sarcosine |
| MeIle | N-Methylisoleucine |
| MeLys | 6-N-Methyllysine |
| MeVal | N-Methylvaline |

| | |
|-----|------------|
| Nva | Norvaline |
| Nle | Norleucine |
| Orn | Ornithine |

WIPO Standard ST.25 (1998), Appendix 2, Table 5, provides for feature keys related to DNA sequences.

Table 5: List of Feature Keys Related to Nucleotide Sequences

| Key | Description |
|-------------|---|
| allele | a related individual or strain contains stable, alternative forms of the same gene which differs from the presented sequence at this location (and perhaps others) |
| attenuator | (1) region of DNA at which regulation of termination of transcription occurs, which controls the expression of some bacterial operons; (2) sequence segment located between the promoter and the first structural gene that causes partial termination of transcription |
| C_region | constant region of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; includes one or more exons depending on the particular chain |
| CAAT_signal | CAAT box; part of a conserved sequence located about 75 bp up-stream of the start point of eukaryotic transcription units which may be involved in RNA polymerase binding; consensus=GG (C or T) CAATCT |
| CDS | coding sequence; sequence of nucleotides that corresponds with the sequence of amino acids in a protein (location includes stop codon); feature includes amino acid conceptual translation |
| conflict | independent determinations of the "same" sequence differ at this site or region |
| D-loop | displacement loop; a region within mitochondrial DNA in which a short stretch of RNA is paired with one strand of DNA, displacing the original partner DNA strand in this region; also used to describe the displacement of a region of one strand of duplex DNA by a single stranded invader in the reaction catalyzed by RecA protein |
| D-segment | diversity segment of immunoglobulin heavy chain, and T-cell receptor beta chain |
| enhancer | a cis-acting sequence that increases the utilization of (some) eukaryotic promoters, and can function in either orientation and in any location (upstream or downstream) relative to the promoter |

| Key | Description |
|-----------------|---|
| exon | region of genome that codes for portion of spliced mRNA; may contain 5'UTR, all CDSs, and 3'UTR |
| GC_signal | GC box; a conserved GC-rich region located upstream of the start point of eukaryotic transcription units which may occur in multiple copies or in either orientation; consensus=GGGCGG |
| gene | region of biological interest identified as a gene and for which a name has been assigned |
| iDNA | intervening DNA; DNA which is eliminated through any of several kinds of recombination |
| intron | a segment of DNA that is transcribed, but removed from within the transcript by splicing together the sequences (exons) on either side of it |
| J_segment | joining segment of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains |
| LTR | long terminal repeat, a sequence directly repeated at both ends of a defined sequence, of the sort typically found in retroviruses |
| mat_peptide | mature peptide or protein coding sequence; coding sequence for the mature or final peptide or protein product following post-translational modification; the location does not include the stop codon (unlike the corresponding CDS) |
| misc_binding | site in nucleic acid which covalently or non-covalently binds another moiety that cannot be described by any other Binding key (primer_bind or protein_bind) |
| misc_difference | feature sequence is different from that presented in the entry and cannot be described by any other Difference key (conflict, unsure, old_sequence, mutation, variation, allele, or modified_base) |
| misc_feature | region of biological interest which cannot be described by any other feature key; a new or rare feature |
| misc_recomb | site of any generalized, site-specific or replicative recombination event where there is a breakage and reunion of duplex DNA that cannot be described by other recombination keys (iDNA and virion) or qualifiers of source key (/insertion_seq, /transposon, /proviral) |
| misc_RNA | any transcript or RNA product that cannot be defined by other RNA keys (prim_transcript, precursor_RNA, mRNA, 5'clip, 3'clip, 5'UTR, 3'UTR, exon, CDS, sig_peptide, transit_peptide, mat_peptide, intron, polyA_site, rRNA, tRNA, scRNA, and snRNA) |
| misc_signal | any region containing a signal controlling or altering gene function or expression that cannot be described by other Signal keys (promoter, CAAT_signal, TATA_signal, -35_signal, -10_signal, GC_signal, RBS, polyA_signal, enhancer, attenuator, terminator, and rep_origin) |

| Key | Description |
|-----------------|--|
| misc_structure | any secondary or tertiary structure or conformation that cannot be described by other Structure keys (stem_loop and D-loop) |
| modified_base | the indicated nucleotide is a modified nucleotide and should be substituted for by the indicated molecule (given in the mod_base qualifier value) |
| mRNA | messenger RNA; includes 5' untranslated region (5'UTR), coding sequences (CDS, exon) and 3' untranslated region (3'UTR) |
| mutation | a related strain has an abrupt, inheritable change in the sequence at this location |
| N_region | extra nucleotides inserted between rearranged immunoglobulin segments |
| old_sequence | the presented sequence revises a previous version of the sequence at this location |
| polyA_signal | recognition region necessary for endonuclease cleavage of an RNA transcript that is followed by polyadenylation; consensus=AATAAA |
| polyA_site | site on an RNA transcript to which will be added adenine residues by post-transcriptional polyadenylation |
| precursor_RNA | any RNA species that is not yet the mature RNA product; may include 5' clipped region (5'clip), 5' untranslated region (5'UTR), coding sequences (CDS, exon), intervening sequences (intron), 3' untranslated region (3'UTR), and 3' clipped region (3'clip) |
| prim_transcript | primary (initial, unprocessed) transcript; includes 5' clipped region (5'clip), 5' untranslated region (5'UTR), coding sequences (CDS, exon), intervening sequences (intron), 3' untranslated region (3'UTR), and 3' clipped region (3'clip) |
| primer_bind | non-covalent primer binding site for initiation of replication, transcription, or reverse transcription; includes site(s) for synthetic, for example, PCR primer elements |
| promoter | region on a DNA molecule involved in RNA polymerase binding to initiate transcription |
| protein_bind | non-covalent protein binding site on nucleic acid |
| RBS | ribosome binding site |
| repeat_region | region of genome containing repeating units |
| repeat_unit | single repeat element |
| rep_origin | origin of replication; starting site for duplication of nucleic acid to give two identical copies |
| rRNA | mature ribosomal RNA; the RNA component of the ribonucleoprotein particle (ribosome) which assembles amino acids into proteins |

| Key | Description |
|-----------------|--|
| S_region | switch region of immunoglobulin heavy chains; involved in the rearrangement of heavy chain DNA leading to the expression of a different immunoglobulin class from the same B-cell |
| satellite | many tandem repeats (identical or related) of a short basic repeating unit; many have a base composition or other property different from the genome average that allows them to be separated from the bulk (main band) genomic DNA |
| scRNA | small cytoplasmic RNA; any one of several small cytoplasmic RNA molecules present in the cytoplasm and (sometimes) nucleus of a eukaryote |
| sig_peptide | signal peptide coding sequence; coding sequence for an N-terminal domain of a secreted protein; this domain is involved in attaching nascent polypeptide to the membrane; leader sequence |
| snRNA | small nuclear RNA; any one of many small RNA species confined to the nucleus; several of the snRNAs are involved in splicing or other RNA processing reactions |
| source | identifies the biological source of the specified span of the sequence; this key is mandatory; every entry will have, as a minimum, a single source key spanning the entire sequence; more than one source key per sequence is permissible |
| stem_loop | hairpin; a double-helical region formed by base-pairing between adjacent (inverted) complementary sequences in a single strand of RNA or DNA |
| STS | Sequence Tagged Site; short, single-copy DNA sequence that characterizes a mapping landmark on the genome and can be detected by PCR; a region of the genome can be mapped by determining the order of a series of STSs |
| TATA_signal | TATA box; Goldberg-Hogness box; a conserved AT-rich septamer found about 25 bp before the start point of each eukaryotic RNA polymerase II transcript unit which may be involved in positioning the enzyme for correct initiation; consensus=TATA(A or T)A(A or T) |
| terminator | sequence of DNA located either at the end of the transcript or adjacent to a promoter region that causes RNA polymerase to terminate transcription; may also be site of binding of repressor protein |
| transit_peptide | transit peptide coding sequence; coding sequence for an N-terminal domain of a nuclear-encoded organellar protein; this domain is involved in post-translational import of the protein into the organelle |
| tRNA | mature transfer RNA, a small RNA molecule (75-85 bases long) that mediates the translation of a nucleic acid sequence into an amino acid sequence |
| unsure | author is unsure of exact sequence in this region |
| V_region | variable region of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; codes for the variable amino terminal portion; can be made up from V_segments, D_segments, N_regions, and J_segments |

| Key | Description |
|------------|---|
| V_segment | variable segment of immunoglobulin light and heavy chains, and T-cell receptor alpha, beta, and gamma chains; codes for most of the variable region (V_region) and the last few amino acids of the leader peptide |
| variation | a related strain contains stable mutations from the same gene (for example, RFLPs, polymorphisms, etc.) which differ from the presented sequence at this location (and possibly others) |
| 3'clip | 3'-most region of a precursor transcript that is clipped off during processing |
| 3'UTR | region at the 3' end of a mature transcript (following the stop codon) that is not translated into a protein |
| 5'clip | 5'-most region of a precursor transcript that is clipped off during processing |
| 5'UTR | region at the 5' end of a mature transcript (preceding the initiation codon) that is not translated into a protein |
| -10_signal | pribnow box; a conserved region about 10 bp upstream of the start point of bacterial transcription units which may be involved in binding RNA polymerase; consensus=TAtAaT |
| -35_signal | a conserved hexamer about 35 bp upstream of the start point of bacterial transcription units; consensus=TTGACa [] or TGTTGACA [] |

WIPO Standard ST.25 (1998), Appendix 2, Table 6 provides for feature keys related to protein sequences

Table 6: List of Feature Keys Related to Protein Sequences

| Key | Description |
|-------------|---|
| CONFLICT | different papers report differing sequences |
| VARIANT | authors report that sequence variants exist |
| VARSPLIC | description of sequence variants produced by alternative splicing |
| MUTAGEN | site which has been experimentally altered |
| MOD_RES | post-translational modification of a residue |
| ACETYLATION | N-terminal or other |
| AMIDATION | generally at the C-terminal of a mature active peptide |
| BLOCKED | undetermined N- or C-terminal blocking group |
| FORMYLATION | of the N-terminal methionine |

| | |
|--|--|
| GAMMA-CARBOXYGLUTAMIC ACID HYDROXYLATION | of asparagine, aspartic acid, proline or lysine |
| METHYLATION | generally of lysine or arginine |
| PHOSPHORYLATION | of serine, threonine, tyrosine, aspartic acid or histidine |
| PYRROLIDONE CARBOXYLIC ACID | N-terminal glutamate which has formed an internal cyclic lactam |
| SULFATATION | generally of tyrosine |
| LIPID | covalent binding of a lipidic moiety |
| MYRISTATE | myristate group attached through an amide bond to the N-terminal glycine residue of the mature form of a protein or to an internal lysine residue |
| PALMITATE | palmitate group attached through a thioether bond to a cysteine residue or through an ester bond to a serine or threonine residue |
| FARNESYL | farnesyl group attached through a thioether bond to a cysteine residue |
| GERANYL-GERANYL | geranyl-geranyl group attached through a thioether bond to a cysteine residue |
| GPI-ANCHOR | glycosyl-phosphatidylinositol (GPI) group linked to the alpha-carboxyl group of the C-terminal residue of the mature form of a protein |
| N-ACYL DIGLYCERIDE | N-terminal cysteine of the mature form of a prokaryotic lipoprotein with an amide-linked fatty acid and a glyceryl group to which two fatty acids are linked by ester linkages |
| DISULFID | disulfide bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by an intra-chain disulfide bond; if the 'FROM' and 'TO' endpoints are identical, the disulfide bond is an interchain one and the description field indicates the nature of the cross-link |
| THIOLEST | thiolester bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by the thiolester bond |
| THIOETH | thioether bond; the 'FROM' and 'TO' endpoints represent the two residues which are linked by the thioether bond |
| CARBOHYD | glycosylation site; the nature of the carbohydrate (if known) is given in the description field |
| METAL | binding site for a metal ion; the description field indicates the nature of the metal |

| | |
|----------|---|
| BINDING | binding site for any chemical group (co-enzyme, prosthetic group, etc.); the chemical nature of the group is given in the description field |
| SIGNAL | extent of a signal sequence (prepeptide) |
| TRANSIT | extent of a transit peptide (mitochondrial, chloroplastic, or for a microbody) |
| PROPEP | extent of a propeptide |
| CHAIN | extent of a polypeptide chain in the mature protein |
| PEPTIDE | extent of a released active peptide |
| DOMAIN | extent of a domain of interest on the sequence; the nature of that domain is given in the description field |
| CA_BIND | extent of a calcium-binding region |
| DNA_BIND | extent of a DNA-binding region |
| NP_BIND | extent of a nucleotide phosphate binding region; the nature of the nucleotide phosphate is indicated in the description field |
| TRANSMEM | extent of a transmembrane region |
| ZN_FING | extent of a zinc finger region |
| SIMILAR | extent of a similarity with another protein sequence; precise information, relative to that sequence is given in the description field |
| REPEAT | extent of an internal sequence repetition |
| HELIX | secondary structure: Helices, for example, Alpha-helix, 3(10) helix, or Pi-helix |
| STRAND | secondary structure: Beta-strand, for example, Hydrogen bonded beta-strand, or Residue in an isolated beta-bridge |
| TURN | secondary structure: Turns, for example, H-bonded turn (3-turn, 4-turn, or 5-turn) |
| ACT_SITE | amino acid(s) involved in the activity of an enzyme |
| SITE | any other interesting site on the sequence |
| INIT_MET | the sequence is known to start with an initiator methionine |

| | |
|----------|---|
| NON_TER | the residue at an extremity of the sequence is not the terminal residue; if applied to position 1, this signifies that the first position is not the N-terminus of the complete molecule; if applied to the last position, it signifies that this position is not the C-terminus of the complete molecule; there is no description field for this key |
| NON_CONS | non consecutive residues; indicates that two residues in a sequence are not consecutive and that there are a number of unsequenced residues between them |
| UNSURE | uncertainties in the sequence; used to describe region(s) of a sequence for which the authors are unsure about the sequence - assignment |

FILING INTERNATIONALLY

The revisions to 37 CFR 1.821 through 1.825 are the result of an effort to harmonize the PTO, PCT, EPO and JPO Sequence Listing requirements to the extent possible. The requirements of WIPO Standard ST.25 are substantially identical to the requirements of 37 CFR 1.821 through 1.825. PatentIn Version 3.1 software, now available (see MPEP § 2430), generates sequence listings that meet all of the requirements of WIPO Standard ST.25 (1998). The requirements of 37 CFR 1.821 through 1.825, however, are less stringent than the requirements of WIPO Standard ST.25 (1998). Thus, applicants who wish to file in countries which adhere to WIPO Standard ST.25 (1998) should consider the following when not using PatentIn Version 3.1:

(A) The WIPO Standard ST.25 (1998) does not permit submissions using a Macintosh computer;

(B) The WIPO Standard ST.25 (1998) does not accept the range of media permitted by 37 CFR 1.821 through 1.825;

(C) The answers in fields <221> and <222> must use selections from Tables 5 and 6 of WIPO Standard ST.25 (1998) to comply with that standard. The terms from these Tables are considered language neutral vocabulary;

(D) Any free text in numeric identifier <223> of a Sequence Listing will not be translated and thus must also appear in the specification of applications filed under WIPO Standard ST.25 (1998) for compliance;

(E) A CRF filed after the filing of an application under the PCT is not considered to be part of the disclosure and will not be published in the pamphlet;

(F) Paragraph 39 of WIPO Standard ST.25 (1998) requires the specific wording “the information recorded on the form is identical to the written sequence listing”; and

(G) WIPO Standard ST.25 (1998), paragraph 24, requires spaces between specified numeric identifiers in the Sequence Listing.

2422.01 Definitions of Nucleotide and/or Amino Acids for Purpose of Sequence Rules

37 CFR 1.821(a) presents a definition for “nucleotide and/or amino acid sequences.” This definition sets forth limits, in terms of numbers of amino acids and/or numbers of nucleotides, at or above which compliance with the sequence rules is required. Nucleotide and/or amino acid sequences as used in 37 CFR 1.821 through 1.825 are interpreted to mean an unbranched sequence of four or more amino acids or an unbranched sequence of ten or more nucleotides. Branched sequences are specifically excluded from this definition. Sequences with fewer than four specifically defined nucleotides or amino acids are specifically excluded from this section. “Specifically defined” means those amino acids other than “Xaa” and those nucleotide bases other than “n” defined in accordance with the World Intellectual Property Organization (WIPO) Handbook on Industrial Property Information and Documentation, Standard ST.25: Standard for the Presentation of Nucleotide and Amino Acid Sequence Listings in Patent Applications (1998), including Tables 1 through 6 in Appendix 2 (see MPEP § 2422).

The limit of four or more amino acids was established for consistency with limits in place for industry database collections whereas the limit of ten or more nucleotides, while lower than certain industry database limits, was established to encompass those nucleotide sequences to which the smallest probe will bind in a stable manner. The limits for amino acids and nucleotides are also consistent with those established for sequence data exchange with the Japanese Patent Office and the European Patent Office.

37 CFR 1.821(a)(1) and 37 CFR 1.821(a)(2) present further definitions for those nucleotide and amino acid sequences that are intended to be embraced by the sequence rules. Situations in which the applicability of the rules are in issue will be resolved on a case-by-case basis.

Nucleotide sequences are further limited to those that can be represented by the symbols set forth in 37 CFR 1.822(b), which incorporates by reference WIPO Standard ST.25 (1998), Appendix 2, Table 1 (see MPEP § 2422). The presence of other than typical 5' to 3' phosphodiester linkages in a nucleotide sequence does not render the rules inapplicable. The Office does not want to exclude linkages of the type commonly found in naturally occurring nucleotides, e.g., eukaryotic end capped sequences.

Amino acid sequences are further limited to those listed in 37 CFR 1.822(b), which incorporates by reference WIPO Standard ST.25 (1998), Appendix 2, Table 3 (see MPEP § 2422), and those L-amino acids that are commonly found in naturally occurring proteins. The limitation to L-amino acids is based upon the fact that there currently exists no widely accepted standard nomenclature for representing the scope of amino acids encompassed by non-L-amino acids, and, as such, the process of meaningfully encoding these other amino acids for computerized searching and printing is not currently feasible. The presence of one or more D-amino acids in a sequence will exclude that sequence from the scope of the rules. (Voluntary compliance is, however, encouraged in these situations; the symbol "Xaa" can be used to represent D-amino acids.) The sequence rules embrace "[a]ny peptide or protein that can be expressed as a sequence using the symbols in WIPO Standard ST.25 (1998), Appendix 2, Table 3 in conjunction with a description in the Feature section to describe, for example, modified

linkages, cross links and end caps, non-peptidyl bonds, etc." 37 CFR 1.821(a)(2).

With regard to amino acid sequences, the use of the terms "peptide or protein" implies, however, that the amino acids in a given sequence are linked by at least three consecutive peptide bonds. Accordingly, an amino acid sequence is not excluded from the scope of the rules merely due to the presence of a single non-peptidyl bond. If an amino acid sequence can be represented by a string of amino acid abbreviations, with reference, where necessary, to a features table to explain modifications in the sequence, the sequence comes within the scope of the rules. However, the rules are not intended to encompass the subject matter that is generally referred to as synthetic resins.

2422.02 The Requirement for Exclusive Conformance; Sequences Presented in Drawing Figures

37 CFR 1.821(b) requires exclusive conformance, with regard to the manner in which the nucleotide and/or amino acid sequences are presented and described, with the sequence rules for all applications that include nucleotide and amino acid sequences that fall within the definitions. This requirement is necessary to minimize any confusion that could result if more than one format for representing sequence data was employed in a given application. It is also expected that the required standard format will be more readily and widely accepted and adopted if its use is exclusive, as well as mandatory.

In view of the fact that many significant sequence characteristics may only be demonstrated by a figure, the exclusive conformance requirement of this section may be relaxed for drawing figures. This is especially true in view of the fact that the representation of double stranded nucleotides is not permitted in the "Sequence Listing" and many significant nucleotide features, such as "sticky ends" and the like, will only be shown effectively by reference to a drawing figure. Further, the similarity or homology between/among sequences can only be depicted in an effective manner in a drawing figure. Similarly, drawing figures are recommended for use with amino acid sequences to depict structural features of the corresponding protein, such as finger regions and Kringle regions. The situations discussed herein are given by way of example only and there may be many other reasons for

relaxing the requirements of this section for the drawing figures. It should be noted, though, that when a sequence is presented in a drawing, regardless of the format or the manner of presentation of that sequence in the drawing, the sequence must still be included in the Sequence Listing and the sequence identifier (“SEQ ID NO:X”) must be used, either in the drawing or in the Brief Description of the Drawings.

2422.03 The Requirements for a Sequence Listing and Sequence Identifiers; Sequences Embedded in Application Text; Variants of a Presented Sequence

37 CFR 1.821(c) requires that applications containing nucleotide and/or amino acid sequences that fall within the above definitions, contain, as a separate part of the disclosure on paper or compact disc, a disclosure of the nucleotide and/or amino acid sequences, and associated information, using the format and symbols that are set forth in 37 CFR 1.822 and 37 CFR 1.823. This separate part of the disclosure is referred to as the “Sequence Listing.” The “Sequence Listing” submitted pursuant to 37 CFR 1.821(c), whether on paper or compact disc, is the official copy of the “Sequence Listing.”

37 CFR 1.821(c) requires that each sequence disclosed in the application appear separately in the “Sequence Listing,” with each sequence further being assigned a sequence identification number, referred to as “SEQ ID NO.” The sequence identifiers must begin with 1 and increase sequentially by integers. The requirement for sequence identification numbers, at a minimum, requires that each sequence be assigned a different number for purposes of identification. However, where practical and for ease of reference, sequences should be presented in the separate part of the application in numerical order and in the order in which they are discussed in the application.

If submitted on paper, the “Sequence Listing” is a separate part of the disclosure which must begin on a new page within the specification. A plurality of sequences may, if feasible, be presented on a single page; the separate presentation of both nucleotide and amino acid sequences on the same page is also permitted.

If the “Sequence Listing” is submitted on compact disc, the specification must contain an incorporation by reference of the material on the compact disc in a separate paragraph, identifying each compact disc by the names of the files contained on each of the compact discs, their date of creation and their sizes in bytes (37 CFR 1.52(e)). The total number of compact discs including duplicates and the files on each compact disc shall be specified (37 CFR 1.77(b)(4)). The compact disc used to submit the sequence listing may also contain table information if the table has more than 50 pages of text. See 37 CFR 1.823(a)(2) and 1.52(e)(1)(iii). The compact disc and duplicate copy must be labeled “Copy 1” and “Copy 2,” respectively, and a statement stating that the copies are identical must be included. If the two compact discs are not identical, the Office will use the disc labeled “Copy 1” for further processing (37 CFR 1.52(e)(4)). See also MPEP § 608.05.

The compact disc submitted under 37 CFR 1.821(c) may, if it contains no tables, be identical to the computer readable form (CRF) submitted under 37 CFR 1.821(e) and 37 CFR 1.824, if that CRF is submitted on a compact disc. Even if the compact discs submitted under both 37 CFR 1.821(c) and (e) are identical, each compact disc submitted under 37 CFR 1.821(c) must be submitted in duplicate, in addition to the CRF under 37 CFR 1.821(e).

The requirement for compliance in 37 CFR 1.821(c) is directed to “disclosures of nucleotide and/or amino acid sequences.” (Emphasis added.) All sequence information, whether claimed or not, that meets the length thresholds in 37 CFR 1.821(a) is subject to the rules. The goal of the Office is to build a comprehensive database that can be used for, inter alia, the purpose of assessing the prior art. It is therefore essential that all sequence information, whether only disclosed or also claimed, be included in the database. In those instances in which prior art sequences are only referred to in a given application by name and a publication or accession reference, they need not be included as part of the “Sequence Listing,” unless an examiner considers the referred-to sequence to be “essential material,” per MPEP § 608.01(p). However, if the applicant presents the sequence as a string of particular bases or amino acids, it is necessary to include the sequence in the “Sequence Listing,” regardless of whether the

applicant considers the sequence to be prior art. In general, any sequence that is disclosed and/or claimed as a sequence, i.e., as a string of particular bases or amino acids, and that otherwise meets the criteria of 37 CFR 1.821(a), must be set forth in the "Sequence Listing."

It is generally acceptable to present a single, general sequence in accordance with the sequence rules and to discuss and/or claim variants of that general sequence without presenting each variant as a separate sequence in the "Sequence Listing." By way of example only, the following types of sequence disclosures would be treated as noted herein by the Office. With respect to "conservatively modified variants thereof" of a sequence, the sequences may be described as SEQ ID NO:X and "conservatively modified variants thereof," if desired. With respect to a sequence that "may be deleted at the C-terminus by 1, 2, 3, 4, or 5 residues," all of the implied variations do not need to be included in the "Sequence Listing." If such a situation were encompassed by the rules, it would introduce far too much complexity into the "Sequence Listing" and the Office's database. The possible mathematical variations that could result from this type of language could reasonably require a "Sequence Listing" that would be thousands of pages in length. In this latter example, only the undeleted sequence needs to be included in the "Sequence Listing," and the sequences may be described as SEQ ID NO:X from which deletions have been made at the C-terminus by 1, 2, 3, 4, or 5 residues. The Office's database will only contain the undeleted sequence.

37 CFR 1.821(d) requires the use of the assigned sequence identifier in all instances where the description or claims of a patent application discuss sequences regardless of whether a given sequence is also embedded in the text of the description or claims of an application. This requirement is also intended to permit references, in both the description and claims, to sequences set forth in the "Sequence Listing" by the use of assigned sequence identifiers without repeating the sequence in the text of the description or claims. Sequence identifiers can also be used to discuss and/or claim parts or fragments of a properly presented sequence. For example, language such as "residues 14 to 243 of SEQ ID NO:23" is permissible and the fragment need not be separately presented in the "Sequence Listing." Where a sequence is embed-

ded in the text of an application, it must be presented in a manner that complies with the requirements of the sequence rules.

The rules do not alter, in any way, the requirements of 35 U.S.C. 112. The implementation of the rules has had no effect on disclosure and/or claiming requirements. The rules, in general, or the use of sequence identifiers throughout the specification and claims, specifically, should not raise any issues under 35 U.S.C. 112, first or second paragraphs. The use of sequence identification numbers (SEQ ID NO:X) only provides a shorthand way for applicants to discuss and claim their inventions. These identification numbers do not in any way restrict the manner in which an invention can be claimed.

2422.04 The Requirement for a Computer Readable Copy of the Official Copy of the Sequence Listing

37 CFR 1.821(e) requires the submission of a copy of the "Sequence Listing" in computer readable form. The information on the computer readable form will be entered into the Office's database for searching and printing nucleotide and amino acid sequences. This electronic database will also enable the Office to exchange patented sequence data, in electronic form, with the Japanese Patent Office and the European Patent Office. It should be noted that the Office's database complies with the confidentiality requirement imposed by 35 U.S.C. 122. Pending application sequences are maintained in the database separately from published or patented sequences. That is, the Office will not exchange or make public any information on any sequence until the patent application containing that information is published or matures into a patent, or as otherwise allowed by 35 U.S.C. 122.

The "Sequence Listing" submitted pursuant to 37 CFR 1.821(c), whether on paper or compact disc, is the official copy of the "Sequence Listing." However, the Office may permit correction of the official copy, at the least, during the pendency of a given application by reference to the computer readable copy thereof submitted pursuant to 37 CFR 1.821(e) if both the official copy and computer readable form were submitted at the time of filing of the application and the totality of the circumstances otherwise

substantiate the proposed correction. A mere discrepancy between the official copy and the computer readable form may not, in and of itself, be sufficient to justify a proposed correction. In this regard, the Office will assume that the computer readable form has been incorporated by reference into the application when the official copy and computer readable form were submitted at the time of filing of the application. The Office will attempt to accommodate or address all correction issues, but it must be kept in mind that the real burden rests with the applicant to ensure that any discrepancies between the official copy and the computer readable form are eliminated or minimized. Applicants should be aware that there will be instances where the applicant may have to suffer the consequences of any discrepancies between the two.

The Office does not desire to be bound by a requirement to permanently preserve computer readable forms for support, priority or correction purposes. For example, the Office will make corrections, where appropriate, by reference to the computer readable form as long as the computer readable form is still available to the Office. However, once use of the computer readable form by the Office for processing has ended, i.e., once the Office has entered the data contained on the computer readable form into the appropriate database, the Office does not intend to further preserve the computer readable form submitted by the applicant.

2422.05 Reference to Previously Filed Identical Computer Readable Form; Continuing or Derivative Applications; Request for Transfer of Computer Readable Form

The last three sentences of 37 CFR 1.821(e) set forth the procedure to be followed when a computer readable form of a given application is identical with a computer readable form of another application. In that situation, an applicant may make reference to the other application and computer readable form therein in lieu of filing a duplicate computer readable form in the given application. That is, additional computer readable forms will not be required in derivative or continuing applications if the sequence information is exactly the same, i.e., with no additions or deletions,

as that in a parent or previously filed application in which a complying computer readable form had been filed. If sequence information is deleted from or added to that submitted in a previously filed application, the procedure in this paragraph is not available and a new computer readable form is required. To take advantage of the procedure outlined in this section, applicants must request that the previously submitted sequence information be used in the given application. A letter must be submitted in the given application requesting use of the previously filed sequence information. The letter must completely identify the other application, by application number, and the computer readable form, by indicating whether it was the only computer readable form filed in that application or whether it was the second, or subsequent, computer readable form filed.

A sample letter requesting transfer of the previously filed sequence information is set forth below:

The paper or compact disc copy of the Sequence Listing in this application [application number], is identical to the computer readable copy of the Sequence Listing filed in application [application number], filed [date]. In accordance with 37 CFR 1.821(e), please use the [first-filed, last-filed or only, whichever is applicable] computer readable form filed in that application as the computer readable form for the instant application. It is understood that the Patent and Trademark Office will make the necessary change in application number and filing date for the instant application. A paper or compact disc copy of the Sequence Listing is [included in the originally-filed specification of the instant application, included in a separately filed preliminary amendment for incorporation into the specification, whichever is applicable].

2422.06 Requirement for Statement Regarding Content of Official and Computer Readable Copies of Sequence Listing

37 CFR 1.821(f) requires that the official "Sequence Listing" (submitted on paper or compact disc pursuant to 37 CFR 1.821(c)) and computer readable copies of the "Sequence Listing" (submitted pursuant to 37 CFR 1.821(e)) be accompanied by a statement that the content of the official and computer readable copies are the same, at the time when the computer readable form is submitted. Such a statement may be made by the applicant. See MPEP

§ 2428 for further information and Sample Statements.

2422.07 Requirements for Compliance, Statements Regarding New Matter, and Sanctions for Failure to Comply

37 CFR 1.821(g) requires compliance with the requirements of 37 CFR 1.821(b) through (f), as discussed above, if they are not satisfied at the time of filing under 35 U.S.C. 111(a) or at the time of entering the national stage of an international application under 35 U.S.C. 371, within the period of time set in a notice requiring compliance. Failure to comply will result in the abandonment of the application. Submissions in reply to requirements under this paragraph must be accompanied by a statement that the submission includes no new matter. Such a statement may be made by the applicant. Extensions of time in which to reply to a requirement under this paragraph are available pursuant to 37 CFR 1.136. When an action by the applicant is a *bona fide* attempt to comply with these rules and it is apparent that compliance with some requirement has inadvertently been omitted, the applicant may be given a new time period to correct the omission. See 37 CFR 1.135(c).

Provisional applications filed under 35 U.S.C. 111(b) need not comply with 37 CFR 1.821 through 1.825, however, applicants are encouraged to file a Sequence Listing as defined in 37 CFR 1.821(c) for ease of identification of the sequence information contained in the provisional application.

37 CFR 1.821(h) requires compliance with the requirements of 37 CFR 1.821(b) through (f), as discussed above, within the time period prescribed in a notice requiring compliance in an international application filed in the United States Receiving Office under the Patent Cooperation Treaty (PCT), if the above noted requirements are not satisfied at the time of filing. Submissions in reply to requirements under this paragraph must be accompanied by a statement that the submission does not include matter which goes beyond the disclosure in the international application as filed. Such a statement may be made by an applicant. International applications that fail to com-

ply with any of the requirements of 37 CFR 1.821(b)-(f) will be searched to the extent possible without the benefit of the information in computer readable form. See PCT Administrative Instructions Section 513(c).

The requirement to submit a statement that a submission in reply to the requirements of this section does not include new matter or matter which goes beyond the disclosure in the application as filed is not the first instance in which the applicant has been required to ensure that there is not new matter upon amendment. The requirement is analogous to that found in 37 CFR 1.125 regarding substitute specifications. When a substitute specification is required because the number or nature of amendments would make it difficult to examine the application, the applicant must include a statement that the substitute specification includes no new matter. The necessity of requiring a substitute "Sequence Listing," or pages thereof, is similar to the necessity of requiring a substitute specification and, likewise, the burden is on the applicant to ensure that no new matter is added. Applicants have a duty to comply with the statutory prohibition (35 U.S.C. 132 and 35 U.S.C. 251) against the introduction of new matter.

It should be noted that the treatment accorded errors in sequencing or any other errors prior to the implementation date of the sequence rules will be no different for those applications filed on or after the implementation date of these rules. The correction of errors in sequencing or any other errors that are made in describing an invention are, as they have always been, subject to the statutory prohibition (35 U.S.C. 132 and 35 U.S.C. 251) against the introduction of new matter.

2422.08 Presumptions Regarding Compliance

Neither the presence nor absence of information which is not required under the sequence rules will create a presumption that such information is necessary to satisfy any of the requirements of 35 U.S.C. 112. Further, the grant of a patent on an application that is subject to 37 CFR 1.821 through 37 CFR 1.825 constitutes a presumption that the granted patent complies with the requirements of these rules.

2422.09 Box Sequence; Hand Delivery of Sequence Listings and Computer Readable Forms

To facilitate administrative processing of all papers and compact discs associated with sequence rule compliance, all computer readable forms, compact discs, fees, and papers accompanying them filed in the Office should be marked "Box SEQUENCE."

Correspondence relating to the sequence rules may also be hand-delivered to the Technology Center (TC). In cases of hand delivery to the Customer Service Window or to the TC, the compact disc, floppy disk or tape should be placed in a protective mailer labeled with at least the application number, if available. The labeling requirements of 37 CFR 1.52(e) and 1.824(a)(6) must also be complied with. The use of staples and clips, if any, should be confined to carefully attaching the mailer to the submitted papers without contact or compression of the magnetic media which may cause the disk or tape to be unreadable. In no situations should additional or complimentary electronic copies be delivered to examiners or other Office personnel.

2423 Symbols and Format To Be Used for Nucleotide and/or Amino Acid Sequence Data

37 CFR 1.822. *Symbols and format to be used for nucleotide and/or amino acid sequence data.*

(a) The symbols and format to be used for nucleotide and/or amino acid sequence data shall conform to the requirements of paragraphs (b) through (e) of this section.

(b) The code for representing the nucleotide and/or amino acid sequence characters shall conform to the code set forth in the tables in WIPO Standard ST.25 (1998), Appendix 2, Tables 1 and 3. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies of ST.25 may be obtained from the World Intellectual Property Organization; 34 chemin des Colombettes; 1211 Geneva 20 Switzerland. Copies of ST.25 may be inspected at the Patent Search Room; Crystal Plaza 3, Lobby Level; 2021 South Clark Place; Arlington, VA 22202. Copies may also be inspected at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC. No code other than that specified in these sections shall be used in nucleotide and amino acid sequences. A modified base or modified or unusual amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or modified or unusual amino acid is one of those listed in WIPO Standard ST.25 (1998), Appendix 2, Tables 2 and 4, and the modification is also

set forth in the Feature section. Otherwise, each occurrence of a base or amino acid not appearing in WIPO Standard ST.25 (1998), Appendix 2, Tables 1 and 3, shall be listed in a given sequence as "n" or "Xaa," respectively, with further information, as appropriate, given in the Feature section, preferably by including one or more feature keys listed in WIPO Standard ST.25 (1998), Appendix 2, Tables 5 and 6.

(c) *Format representation of nucleotides.* (1) A nucleotide sequence shall be listed using the lower-case letter for representing the one-letter code for the nucleotide bases set forth in WIPO Standard ST.25 (1998), Appendix 2, Table 1.

(2) The bases in a nucleotide sequence (including introns) shall be listed in groups of 10 bases except in the coding parts of the sequence. Leftover bases, fewer than 10 in number, at the end of noncoding parts of a sequence shall be grouped together and separated from adjacent groups of 10 or 3 bases by a space.

(3) The bases in the coding parts of a nucleotide sequence shall be listed as triplets (codons). The amino acids corresponding to the codons in the coding parts of a nucleotide sequence shall be typed immediately below the corresponding codons. Where a codon spans an intron, the amino acid symbol shall be typed below the portion of the codon containing two nucleotides.

(4) A nucleotide sequence shall be listed with a maximum of 16 codons or 60 bases per line, with a space provided between each codon or group of 10 bases.

(5) A nucleotide sequence shall be presented, only by a single strand, in the 5 to 3 direction, from left to right.

(6) The enumeration of nucleotide bases shall start at the first base of the sequence with number 1. The enumeration shall be continuous through the whole sequence in the direction 5 to 3. The enumeration shall be marked in the right margin, next to the line containing the one-letter codes for the bases, and giving the number of the last base of that line.

(7) For those nucleotide sequences that are circular in configuration, the enumeration method set forth in paragraph (c)(6) of this section remains applicable with the exception that the designation of the first base of the nucleotide sequence may be made at the option of the applicant.

(d) *Representation of amino acids.* (1) The amino acids in a protein or peptide sequence shall be listed using the three-letter abbreviation with the first letter as an upper case character, as in WIPO Standard ST.25 (1998), Appendix 2, Table 3.

(2) A protein or peptide sequence shall be listed with a maximum of 16 amino acids per line, with a space provided between each amino acid.

(3) An amino acid sequence shall be presented in the amino to carboxy direction, from left to right, and the amino and carboxy groups shall not be presented in the sequence.

(4) The enumeration of amino acids may start at the first amino acid of the first mature protein, with the number 1. When presented, the amino acids preceding the mature protein, *e.g.*, pre-sequences, pro-sequences, pre-pro-sequences and signal sequences, shall have negative numbers, counting backwards starting with the amino acid next to number 1. Otherwise, the enumeration of amino acids shall start at the first amino acid at the amino terminal as number 1. It shall be marked below the sequence every 5 amino acids. The enumeration method for amino

acid sequences that is set forth in this section remains applicable for amino acid sequences that are circular in configuration, with the exception that the designation of the first amino acid of the sequence may be made at the option of the applicant.

(5) An amino acid sequence that contains internal terminator symbols (*e.g.*, “Ter”, “*”, or “.”, etc.) may not be represented as a single amino acid sequence, but shall be presented as separate amino acid sequences.

(e) A sequence with a gap or gaps shall be presented as a plurality of separate sequences, with separate sequence identifiers, with the number of separate sequences being equal in number to the number of continuous strings of sequence data. A sequence that is made up of one or more noncontiguous segments of a larger sequence or segments from different sequences shall be presented as a separate sequence.

Tables 1-6 of WIPO Standard ST.25 (1998), Appendix 2, are reproduced in MPEP § 2422.

2423.01 Format and Symbols To Be Used in Sequence Listings

37 CFR 1.822 sets forth the format and symbols to be used for listing nucleotide and/or amino acid sequence data. The codes for representing the nucleotide and/or amino acid characters in the sequences are set forth in the tables of WIPO Standard ST.25 (1998), Appendix 2, Tables 1 and 3. See MPEP § 2422. No other symbols shall be used in nucleotide and amino acid sequences. The “modified base” and “modified and unusual amino acid” codes appearing in WIPO Standard ST.25 (1998), Appendix 2, Tables 2 and 4 (see 37 CFR 1.822 and MPEP § 2422) are not to be set forth in the sequences recited in the Sequence Listing. However, “modified base” or “modified and unusual amino acid” codes may be used in the written description and/or drawing portions of the specification. To properly enter notations for modified codes in the Sequence Listing, the Feature section of the Sequence Listing should be used. That is, a modified base or amino acid may be presented in a given sequence as the corresponding unmodified base or amino acid if the modified base or amino acid is one of those listed in WIPO Standard ST.25 (1998), Appendix 2, Table 2 or 4 and the modification is also set forth in the Feature section of the Sequence Listing. Otherwise, all bases or amino acids not appearing in WIPO Standard ST.25 (1998), Appendix 2, Table 1 or 3 must be listed in a given sequence as “n” or “Xaa,” respectively, with further

information given in the Feature section of the “Sequence Listing.” See 37 CFR 1.823(b).

In 37 CFR 1.822(b) and 37 CFR 1.822(d), the use of three-letter codes for amino acids is required. The use of the three-letter codes for amino acids is preferred over the one-letter codes from the perspective of facilitating the examiner’s review of the application papers, including the “Sequence Listing”, and the public’s, as well as the examiner’s, use of the printed patents. The three-letter codes must be presented using the upper case for the first character and lower case for the remaining two characters.

37 CFR 1.822(c) through (e) set forth the format for presenting sequence data. These paragraphs set forth the manner in which the characters in sequences are to be grouped, spaced, presented and numbered.

2423.02 Depiction of Coding Regions

If applicant chooses to depict coding regions, 37 CFR 1.822 (c)(3) requires the amino acids corresponding to the codons in the coding parts of a nucleotide sequence to be typed immediately below the corresponding codons. Further, in 37 CFR 1.822 (c)(3), the situation in which a codon spans an intron has been addressed. In those situations, the “amino acid symbol shall be typed below the portion of the codon containing two nucleotides.” This requirement clarifies the representation of an amino acid that corresponds to a codon that spans an intron.

It should be noted that the sequence rules do not, in any way, require the depiction of coding regions or the amino acids corresponding to the codons in those coding regions. 37 CFR 1.822 (d) only requires that where amino acids corresponding to the codons in the coding parts of a nucleotide sequence are depicted, they must be depicted below the corresponding codons. There is absolutely no requirement in the rules to depict coding regions. Nor is there a requirement to separately list the amino acids corresponding to the codons in the coding parts of a nucleotide sequence unless the applicant desires to discuss the amino acids as a separate sequence. That is, when the coding parts of a nucleotide sequence and their corresponding amino acids have been identified, if applicant desires to discuss those amino acids in the coding parts of the nucleotide as a separate sequence, those amino acids must also be set forth as a separate sequence. The separate submission of the amino acid

sequence that corresponds to the coding parts of a nucleotide sequence is, however, recommended and encouraged because the amino acid sequence may not be captured in the sequence database if it is only presented in the “Sequence Listing” as a mixed nucleotide and amino acid sequence.

2423.03 Presentation and Enumeration of Sequences

37 CFR 1.822(c)(5) provides that nucleotide sequences shall only be represented by a single strand, in the 5' to 3' direction, from left to right. That is, double stranded nucleotides shall not be represented in the “Sequence Listing.” A double stranded nucleotide may be represented as two single stranded nucleotides, and any relationship between the two may be shown in the drawings.

The procedures for presenting and numbering amino acid sequences are set forth in 37 CFR 1.822(d). Two alternatives are presented for numbering amino acid sequences. Amino acid sequences may be numbered with respect to the identification of the first amino acid of the first mature protein or with respect to the first amino acid appearing at the amino terminal. The enumeration procedure for nucleotides is set forth in 37 CFR 1.822(c)(6). Sequences that are circular in configuration are intended to be encompassed by these rules, and numbering procedures for them are provided in 37 CFR 1.822(c)(7) and (d)(4). The numbering procedures set forth in 37 CFR 1.822(c) and (d) are not necessarily intended to be consistent with all currently employed numbering procedures. The objective here is to establish a reasonable numbering procedure that can readily be followed and adhered to. These formatting procedures also reflect those that have been agreed to for electronic data exchange with the JPO and the EPO.

In 37 CFR 1.822(e) the procedures for presenting and numbering hybrid and gapped sequences are set forth. A sequence that is made up of one or more non-contiguous segments of a larger sequence or segments from different sequences, i.e., a hybrid sequence, shall be presented as a separate sequence. A “gap” for the purpose of this section is not intended to embrace a gap or gaps that is/are introduced into the presentation of otherwise continuous sequence information in, e.g., a drawing figure, to show alignments or similarities

with other sequences. The “gaps” referred to in this section are gaps representing unknown or undisclosed regions in a sequence between regions that are known or disclosed. In the situation where a contiguous fragment of a sequence that has already been properly set forth in a “Sequence Listing” is discussed and/or claimed, the fragment does not need to be separately included in the “Sequence Listing.” It may be referred to in the specification, claims or drawings as, e.g., “residues 2 through 33 of SEQ ID NO:12,” assuming that SEQ ID NO:12 has been properly included in the “Sequence Listing.”

2424 Requirements for Nucleotide and/or Amino Acid Sequences as Part of the Application Papers

37 CFR 1.823. Requirements for nucleotide and/or amino acid sequences as part of the application.

(a)(1) If the “Sequence Listing” required by § 1.821(c) is submitted on paper: The “Sequence Listing,” setting forth the nucleotide and/or amino acid sequence and associated information in accordance with paragraph (b) of this section, must begin on a new page and must be titled “Sequence Listing.” The pages of the “Sequence Listing” preferably should be numbered independently of the numbering of the remainder of the application. Each page of the “Sequence Listing” shall contain no more than 66 lines and each line shall contain no more than 72 characters. A fixed-width font should be used exclusively throughout the “Sequence Listing.”

(2) If the “Sequence Listing” required by § 1.821(c) is submitted on compact disc: The “Sequence Listing” must be submitted on a compact disc in compliance with § 1.52(e). The compact disc may also contain table information if the application contains table information that may be submitted on a compact disc (§ 1.52(e)(1)(iii)). The specification must contain an incorporation-by-reference of the Sequence Listing as required by § 1.52(e)(5). The presentation of the “Sequence Listing” and other materials on compact disc under § 1.821(c) does not substitute for the Computer Readable Form that must be submitted on disk, compact disc, or tape in accordance with § 1.824.

(b) The “Sequence Listing” shall, except as otherwise indicated, include the actual nucleotide and/or amino acid sequence, the numeric identifiers and their accompanying information as shown in the following table. The numeric identifier shall be used only in the “Sequence Listing.” The order and presentation of the items of information in the “Sequence Listing” shall conform to the arrangement given below. Each item of information shall begin on a new line and shall begin with the numeric identifier enclosed in angle brackets as shown. The submission of those items of information designated with an “M” is mandatory. The submission of those items of information designated with an “O” is optional. Numeric identifiers <110> through <170> shall only

be set forth at the beginning of the "Sequence Listing." The following table illustrates the numeric identifiers.

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|--------------------------------|--|---|
| <110> | Applicant..... | Preferably max. of 10 names; one name per line; preferable format: Surname, Other Names and/or Initials. | M. |
| <120> | Title of Invention..... | | M. |
| <130> | File Reference..... | Personal file reference..... | M when filed prior to assignment or appl. number |
| <140> | Current Application Number. | Specify as: US 07/999,999 or PCT/US96/99999. | M, if available. |
| <141> | Current Filing Date..... | Specify as: yyyy-mm-dd..... | M, if available. |
| <150> | Prior Application Number. | Specify as: US 07/999,999 or PCT/US96/99999. | M, if applicable include priority documents under 35 U.S.C. 119 and 120 |
| <151> | Prior Application Filing Date. | Specify as: yyyy-mm-dd..... | M, if applicable |
| <160> | Number of SEQ ID NOs. | Count includes total number of SEQ ID NOs..... . | M. |
| <170> | Software..... | Name of software used to create the Sequence Listing. | O. |
| <210> | SEQ ID NO:#:..... | Response shall be an integer representing the SEQ ID NO shown. | M. |
| <211> | Length..... | Respond with an integer expressing the number of bases or amino acid residues. | M. |

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|------------------------|--|--|
| <212> | Type..... ... | Whether presented sequence molecule is DNA, RNA, or PRT (protein). If a nucleotide sequence contains both DNA and RNA fragments, the type shall be "DNA." In addition, the combined DNA/RNA molecule shall be further described in the <220> to <223> feature section. | M. |
| <213> | Organism..... | Scientific name, i.e. Genus/ species, Unknown or Artificial Sequence. In addition, the "Unknown" or "Artificial Sequence" organisms shall be further described in the <220> to <223> feature section. | M. |
| <220> | Feature..... | Leave blank after <220>. <221-223> provide for a description of points of biological significance in the sequence. | M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is "Artificial Sequence" or "Unknown"; if molecule is combined DNA/RNA. |
| <221> | Name/ Key..... | Provide appropriate identifier for feature, preferably from WIPO Standard ST.25 (1998), Appendix 2, Tables 5 and 6. | M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence. |
| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
| <222> | Location..... | Specify location within sequence; where appropriate state number of first and last bases/amino acids in feature. | M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence. |
| <223> | Other Information..... | Other relevant information; four lines maximum..... | M, under the following conditions: if "n," "Xaa," or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is "Artificial Sequence" or "Unknown"; if molecule is combined DNA/RNA. |

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|----------------------------|--|-------------------------------|
| <300> | Publication Information | Leave blank after <300> | O. |
| <301> | Authors..... ... | Preferably max. of ten named authors of publication; specify one name per line; preferable format: Surname, Other Names and/or Initials. | O. |
| <302> | Title..... | | O. |
| <303> | Journal..... | | O. |
| <304> | Volume | | O. |
| <305> | Issue | | O. |
| <306> | Pages | | O. |
| <307> | Date..... | Journal date on which data published; specify as yyyy- mm-dd, MMM-yyyy or Season- yyyy. | O. |
| <308> | Database Accession Number. | Accession number assigned by database including database name. | O. |
| <309> | Database Entry Date..... | Date of entry in database; specify as yyyy-mm-dd or MMM-yyyy. | O. |
| <310> | Patent Document Number. | Document number; for patent-type citations only. Specify as, for example, US 07/ 999,999. | O. |
| <311> | Patent Filing Date..... | Document filing date, for patent-type citations only; specify as yyyy-mm-dd. | O. |
| <312> | Publication Date..... | Document publication date, for patent-type citations only; specify as yyyy-mm-dd. | O. |
| <313> | Relevant Residues..... | FROM (position) TO (position)..... | O. |

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|-----------------------|---|-------------------------------|
| <400> | Sequence..... | SEQ ID NO should follow the numeric identifier and should appear on the line preceding the actual sequence. | M. |

2424.01 Informational Requirements for the Sequence Listing

37 CFR 1.823 sets forth the informational requirements for inclusion in the separate part of the disclosure on paper or compact disc (the “Sequence Listing”) that must be submitted in accordance with 37 CFR 1.821(c). 37 CFR 1.823(a)(1) sets forth page and line length requirements for any “Sequence Listing” submitted on paper. The requirement to use a fixed width font to present sequence data is also set forth therein. This latter requirement is made to ensure that the desired sequence character spacing and numbering is maintained. 37 CFR 1.823(a)(2) requires any “Sequence Listing” submitted on compact disc to be in compliance with 37 CFR 1.52(e). The compact disc “Sequence Listing” submitted under 37 CFR 1.821(c) may also contain table information if the application contains table information that is over 50 pages. See 37 CFR 1.52(e)(1)(iii). 37 CFR 1.823(b) lists the items of information that are to be included in the “Sequence Listing” in the order in which those items are to appear. The numeric identi-

fier for each item of information shall not include the explanatory information included in 37 CFR 1.823(b).

2424.02 Sequence Listing Numeric Identifiers

37 CFR 1.823(b) sets forth the order and presentation of the items of information in the Sequence Listing. Each item of information in the Sequence Listing must include the appropriate numeric identifier and its accompanying information as shown in the table below. Each item of information must begin on a new line with the numeric identifier enclosed in angle brackets. The submission of those items of information designated with an “M” is mandatory. The submission of those items of information designated with an “O” is optional. Numeric identifiers <110> through <170> must be set forth at the beginning of the Sequence Listing.

The following table illustrates the numeric identifiers. See MPEP § 2431 for a sample Sequence Listing.

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|-----------------------------|--|--|
| <110> | Applicant..... | Preferably max. of 10 names; one name per line; preferable format: Surname, Other Names and/or Initials. | M. |
| <120> | Title of Invention..... | | M. |
| <130> | File Reference..... | Personal file reference..... | M when filed prior to assignment or appl. number |
| <140> | Current Application Number. | Specify as: US 07/999,999 or PCT/US96/99999. | M, if available. |

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|--------------------------------|--|---|
| <141> | Current Filing Date..... | Specify as: yyyy-mm-dd..... | M, if available. |
| <150> | Prior Application Number. | Specify as: US 07/999,999 or PCT/US96/99999. | M, if applicable include priority documents under 35 U.S.C. 119 and 120 |
| <151> | Prior Application Filing Date. | Specify as: yyyy-mm-dd..... | M, if applicable |
| <160> | Number of SEQ ID NOs. | Count includes total number of SEQ ID NOs..... | M. |
| <170> | Software..... | Name of software used to create the Sequence Listing. | O. |
| <210> | SEQ ID NO:#:..... | Response shall be an integer representing the SEQ ID NO shown. | M. |
| <211> | Length..... | Respond with an integer expressing the number of bases or amino acid residues. | M. |
| <212> | Type..... | Whether presented sequence molecule is DNA, RNA, or PRT (protein). If a nucleotide sequence contains both DNA and RNA fragments, the type shall be "DNA." In addition, the combined DNA/RNA molecule shall be further described in the <220> to <223> feature section. | M. |
| <213> | Organism..... | Scientific name, i.e. Genus/ species, Unknown or Artificial Sequence. In addition, the "Unknown" or "Artificial Sequence" organisms shall be further described in the <220> to <223> feature section. | M. |

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|-------------------------|--|--|
| <220> | Feature..... | Leave blank after <220>. <221-223> provide for a description of points of biological significance in the sequence. | M, under the following conditions: if “n,” “Xaa,” or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is “Artificial Sequence” or “Unknown”; if molecule is combined DNA/RNA. |
| <221> | Name/Key..... | Provide appropriate identifier for feature, preferably from WIPO Standard ST.25 (1998), Appendix 2, Tables 5 and 6. | M, under the following conditions: if “n,” “Xaa,” or a modified or unusual L-amino acid or modified base was used in a sequence. |
| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
| <222> | Location..... | Specify location within sequence; where appropriate state number of first and last bases/amino acids in feature. | M, under the following conditions: if “n,” “Xaa,” or a modified or unusual L-amino acid or modified base was used in a sequence. |
| <223> | Other Information..... | Other relevant information; four lines maximum..... | M, under the following conditions: if “n,” “Xaa,” or a modified or unusual L-amino acid or modified base was used in a sequence; if ORGANISM is “Artificial Sequence” or “Unknown”; if molecule is combined DNA/RNA. |
| <300> | Publication Information | Leave blank after <300> | O. |
| <301> | Authors..... ... | Preferably max. of ten named authors of publication; specify one name per line; preferable format: Surname, Other Names and/or Initials. | O. |
| <302> | Title..... | | O. |
| <303> | Journal..... | | O. |
| <304> | Volume | | O. |
| <305> | Issue | | O. |

| Numeric Identifier | Definition | Comments and format | Mandatory (M) or Optional (O) |
|--------------------|----------------------------|---|-------------------------------|
| <306> | Pages | | O. |
| <307> | Date..... | Journal date on which data published; specify as yyyy- mm-dd, MMM-yyyy or Season- yyyy. | O. |
| <308> | Database Accession Number. | Accession number assigned by database including database name. | O. |
| <309> | Database Entry Date..... | Date of entry in database; specify as yyyy-mm-dd or MMM-yyyy. | O. |
| <310> | Patent Document Number. | Document number; for patent-type citations only. Specify as, for example, US 07/ 999,999. | O. |
| <311> | Patent Filing Date..... | Document filing date, for patent-type citations only; specify as yyyy-mm-dd. | O. |
| <312> | Publication Date..... | Document publication date, for patent-type citations only; specify as yyyy-mm-dd. | O. |
| <313> | Relevant Residues..... | FROM (position) TO (position)..... | O. |
| <400> | Sequence..... | SEQ ID NO should follow the numeric identifier and should appear on the line preceding the actual sequence. | M. |

2424.03 Additional Miscellaneous Requirements

Throughout 37 CFR 1.823(b), the items of information relating to patent applications and patent publications should be provided keeping in mind the appropriate standards that have been established by the World Intellectual Property Organization (WIPO). In general, an application should be identified by a country code, a number and a filing date, while a published patent document should be identified by a country code, a number and kind code. Proper citation of priority patent applications is covered in MPEP § 201.14(d). For published patent documents, the country code, number and kind code will appear on

the front page of the document. Unpublished PCT applications are identified by the letters PCT, the country code of the Receiving Office, the last two digits of the year of filing and a number, e.g., PCT/AT81/00033, PCT/FR88/00100. A published PCT application is identified by the letters WO, the last two digits of the year of publication, a number and a kind code, e.g., WO82/02827A, WO88/06811A. Country codes from WIPO Standard ST.3 Annex A and kind codes from WIPO Standard ST.16 are reproduced in MPEP § 1851. Questions on proper citation of patent documents should be directed to the Search and Information Resources Administration, International Liaison Staff.

In 37 CFR 1.823(b), numeric identifier <110>, the item of information relating to “APPLICANT” should be limited to a maximum of the first ten named applicants in the application. Similarly, in numeric identifier <301>, the item of information relating to “AUTHORS” should be limited to a maximum of the first ten named authors in the publication.

In 37 CFR 1.823(b) “yyyy-mm-dd” is the format for the presentation of patent related date information in the “Sequence Listing.” Other date information may also be presented as MMM-yyyy or Season-yyyy. The lower case letters designate numeric responses and the upper case letters designate alphabetical responses. As such, March 2, 1988, would be presented as 1988-03-02 or MAR 1988.

In numeric identifiers <220> - <223>, relating to “Features” or the description of the points of biological significance in a given sequence, it is recommended, but not required, that the information that is provided by the applicant conform to the controlled vocabulary that is set forth in GenBank's “Feature Representation in Nucleotide Sequence Data Libraries,” Release 57.0, as may be amended. Further, the feature “LOCATION” should be specified using the syntax of the DDBJ/EMBL/GenBank Feature Table Definition. See MPEP § 2422 when filing in countries which adhere to WIPO Standard ST.25.

In numeric identifiers <300> - <312>, publication information for a given sequence is collected. The publication information encompasses both patent-type publications and non-patent literature publications. Numeric identifier <313>, Relevant Residues, is intended to collect information relating to the correspondence between a sequence set forth in the “Sequence Listing” and published sequence information. The starting (FROM) and end (TO) positions in the listed sequence that correspond to the published sequence information should be set forth.

2425 Form and Format for Nucleotide and/or Amino Acid Sequence Submissions in Computer Readable Form

37 CFR 1.824. Form and format for nucleotide and/or amino acid sequence submissions in computer readable form.

(a) The computer readable form required by § 1.821(e) shall meet the following requirements:

(1) The computer readable form shall contain a single “Sequence Listing” as either a diskette, series of diskettes, or other permissible media outlined in paragraph (c) of this section.

(2) The “Sequence Listing” in paragraph (a)(1) of this section shall be submitted in American Standard Code for Information Interchange (ASCII) text. No other formats shall be allowed.

(3) The computer readable form may be created by any means, such as word processors, nucleotide/amino acid sequence editors' or other custom computer programs; however, it shall conform to all requirements detailed in this section.

(4) File compression is acceptable when using diskette media, so long as the compressed file is in a self-extracting format that will decompress on one of the systems described in paragraph (b) of this section.

(5) Page numbering must not appear within the computer readable form version of the “Sequence Listing” file.

(6) All computer readable forms must have a label permanently affixed thereto on which has been hand-printed or typed: the name of the applicant, the title of the invention, the date on which the data were recorded on the computer readable form, the operating system used, a reference number, and an application number and filing date, if known. If multiple diskettes are submitted, the diskette labels must indicate their order (*e.g.*, “1 of X”).

(b) Computer readable form submissions must meet these format requirements:

(1) Computer Compatibility: IBM PC/XT/AT or Apple Macintosh;

(2) Operating System Compatibility: MS-DOS, MS-Windows, Unix or Macintosh;

(3) Line Terminator: ASCII Carriage Return plus ASCII Line Feed; and

(4) Pagination: Continuous file (no “hard page break” codes permitted).

(c) Computer readable form files submitted may be in any of the following media:

(1) Diskette: 3.50 inch, 1.44 Mb storage; 3.50 inch, 720 Kb storage; 5.25 inch, 1.2 Mb storage; 5.25 inch, 360 Kb storage.

(2) Magnetic tape: 0.5 inch, up to 24000 feet; Density: 1600 or 6250 bits per inch, 9 track; Format: Unix tar command; specify blocking factor (not “block size”); Line Terminator: ASCII Carriage Return plus ASCII Line Feed.

(3) 8mm Data Cartridge: Format: Unix tar command; specify blocking factor (not “block size”); Line Terminator: ASCII Carriage Return plus ASCII Line Feed.

(4) Compact disc: Format: ISO 9660 or High Sierra Format.

(5) Magneto Optical Disk: Size/Storage Specifications: 5.25 inch, 640 Mb.

(d) Computer readable forms that are submitted to the Office will not be returned to the applicant.

37 CFR 1.824 sets forth the requirements for sequence submissions in computer readable form. Any computer operating system may be utilized to produce a sequence submission, provided that the system is capable of producing a file having the characteristics specified in 37 CFR 1.824, and is capable of

writing the properly formatted file to one of the acceptable electronic media. If a given sequence and its associated information cannot practically or possibly fit on the electronic media required in 37 CFR 1.824(c), an exception via a non-fee petition to waive this provision will normally be granted. As set forth in 37 CFR 1.824(d), the computer readable forms that are submitted in accordance with these rules will not be returned to the applicant. 37 CFR 1.824(a)(6) requires the labeling, with appropriate identifying information, of the computer readable forms that are submitted in accordance with these rules.

2426 Amendments to or Replacement of Sequence Listing and Computer Readable Copy Thereof

37 CFR 1.825. Amendments to or replacement of sequence listing and computer readable copy thereof.

(a) Any amendment to a paper copy of the "Sequence Listing" (§ 1.821(c)) must be made by the submission of substitute sheets and include a statement that the substitute sheets include no new matter. Any amendment to a compact disc copy of the "Sequence Listing" (§ 1.821(c)) must be made by the submission of a replacement compact disc (2 copies) in compliance with § 1.52(e). Amendments must also be accompanied by a statement that indicates support for the amendment in the application, as filed, and a statement that the replacement compact disc includes no new matter.

(b) Any amendment to the paper copy of the "Sequence Listing," in accordance with paragraph (a) of this section, must be accompanied by a substitute copy of the computer readable form (§ 1.821(e)) including all previously submitted data with the amendment incorporated therein, accompanied by a statement that the copy in computer readable form is the same as the substitute copy of the "Sequence Listing."

(c) Any appropriate amendments to the "Sequence Listing" in a patent; *e.g.*, by reason of reissue or certificate of correction, must comply with the requirements of paragraphs (a) and (b) of this section.

(d) If, upon receipt, the computer readable form is found to be damaged or unreadable, applicant must provide, within such time as set by the Commissioner, a substitute copy of the data in computer readable form accompanied by a statement that the substitute data is identical to that originally filed.

37 CFR 1.825 sets forth the procedures for amending the "Sequence Listing" and the computer readable copy thereof. The procedures that have been defined in 37 CFR 1.825 involve the submission of either substitute sheets or substitute compact discs of the "Sequence Listing" or substitute copies of the computer readable form, in conjunction with statements

that indicate support for the amendment in the application, as filed, and that the substitute sheets or copies include no new matter. (See MPEP § 608.05 and § 2428 for further information.) An amendment to the material on a compact disc must be done by submitting a replacement compact disc with the amended file(s). The amendment should include a corresponding amendment to the description of the compact disc and the files contained thereon in the paper portion of the specification. *A replacement compact disc containing the amended files also must contain all of the files of the original compact disc that were not amended.* This will insure that the Office, printer, and public can quickly access all of the current files in an application or patent by referencing only the latest compact disc. The requirement for statements regarding the absence of new matter follows current practice relating to the submission of substitute specifications, as set forth in 37 CFR 1.125. 37 CFR 1.825 (c) addresses the situation where amendments to the "Sequence Listing" are made after a patent has been granted, *e.g.*, by a certificate of correction, reissue or reexamination. 37 CFR 1.825 (d) addresses the possibility and presents a remedy for the situation where the computer readable form may be found by the Office to be damaged or unreadable.

2427 Form Paragraphs and Notice to Comply

2427.01 Form Paragraphs

See MPEP § 608.05 for form paragraphs which should be used when notifying applicant that a compact disc submitted in accordance with 37 CFR 1.52(e) (*i.e.*, containing a computer program listing, Sequence Listing, and/or table) does not comply with all of the requirements of the 37 CFR 1.52(e). See also MPEP § 608.05(b) for form paragraphs which should be used when a table submitted on compact disc does not comply with 37 CFR 1.52(e).

In order to expedite the processing of applications, minor errors pertaining to compliance with the sequence rules may be handled with the first Office action. Examples of minor errors are: when the "Sequence Listing" under 37 CFR 1.821(c) is submitted on compact disc, missing statement in the transmittal letter stating that the two compact discs are identical, missing an incorporation-by-reference of

the “Sequence Listing” in the specification, or missing a listing of the files and required information in the transmittal letter; missing statement in the transmittal letter stating that the sequence listing information in computer readable form is identical to the written (on paper or compact disc) “Sequence Listing,” etc. Since the application is ready for examination, the examiner may act on the application and include any objections to the application based on minor errors related to the “Sequence Listing” with his/her Office action. In addition to the form paragraphs reproduced in MPEP § 608.05 and § 608.05(b), the following form paragraphs are particular to Sequence Listings and should be used as appropriate when notifying applicant of errors in the Sequence Listing:

24.01 - This form paragraph should be used for the first mailing of a Notice to Comply.

24.02 - This form paragraph should be used for the first mailing of a CRF Diskette Problem Report.

24.03 - This form paragraph should be used when an applicant has made a *bona fide* attempt to comply but the reply generates an error listing from the Scientific and Technical Information Center (STIC). This should be used for a second mailing to applicant unless it is evident that there has been a deliberate omission; this form paragraph may also be used to extend the period for reply for the initially mailed notice.

24.04 - This form paragraph should be used when there has been a deliberate omission in the reply or where the reason the reply is incomplete cannot be characterized as an apparent oversight or instance of inadvertence.

24.05 – This form paragraph should be used whenever there is no statement in the transmittal letter that the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing.

24.05.01 – This form paragraph should be used whenever an amendment is filed with a CRF and there is no statement in the transmittal letter stating that the Sequence Listing information recorded in the CRF is identical to the written sequence listing.

¶ 24.01 *Cover Letter for Use With Notice To Comply With Sequence Rules*

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth below or on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures. [1]

Applicant is given ONE MONTH, or THIRTY DAYS, whichever is longer, from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the reply.

Examiner Note:

1. Use this form paragraph **only for the initial communication to the applicant**. Use either form paragraph 24.03 or 24.04 for subsequent communications.
2. In bracket 1, insert how the application fails to comply with the requirements of 37 CFR 1.821 through 1.825.
3. Conclude action with appropriate form paragraph(s) 7.100-7.102.
4. When mailing the Office action, attach a Notice To Comply With Requirements for Patent Applications Containing Nucleotide And/Or Amino Acid Sequence Disclosures, along with a marked-up copy of the Raw Sequence Listing, if any.

¶ 24.02 *Cover Letter for Use with CRF Diskette Problem Report*

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). A computer readable form (CRF) of the sequence listing was submitted. However, the CRF could not be processed by the Scientific and Technical Information Center (STIC) for the reason(s) set forth on the attached CRF Diskette Problem Report.

Applicant is given ONE MONTH, or THIRTY DAYS, whichever is longer, from the mailing date of this letter within which to comply with the sequence rules, 37 CFR 1.821 - 1.825. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period. Direct the reply to the undersigned. Applicant is requested to return a copy of the attached CRF Diskette Problem Report with the reply.

Examiner Note:

1. Use this form paragraph **only for the initial communication to the applicant**. Use either form paragraph 24.03 or 24.04 for subsequent communications.
2. Conclude action with appropriate form paragraph(s) 7.100-7.102.
3. When mailing the Office action, attach the CRF Diskette Problem Report.

¶ *24.03 Compact Disc/CRF Submission Is Not Fully Responsive, Bona Fide Attempt*

The reply filed [1] is not fully responsive to the Office communication mailed [2] for the reason(s) set forth below or on the attached Notice To Comply With The Sequence Rules or CRF Diskette Problem Report.

Since the above-mentioned reply appears to be *bona fide*, applicant is given a TIME PERIOD of **ONE (1) MONTH** or **THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

Examiner Note:

1. This form paragraph may be used whether or not the six-month period for reply has expired. It is intended for use whenever a **bona fide** reply has been submitted. This practice does not apply where there has been a deliberate omission of some necessary part of a complete reply or where the reason the reply is incomplete cannot be characterized as an apparent oversight or apparent inadvertence. Under such cases the examiner has no authority to grant an extension if the six-month period for reply has expired. Use form paragraph 24.04 under such circumstances.
2. In bracket 1, insert the date of the reply and in bracket 2, insert the mail date of the communication requiring compliance.
3. When mailing the Office action, attach a Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures, if any, along with a marked-up copy of the Raw Sequence Listing, or CRF Diskette Problem Report.
4. See 37 CFR 1.135(c), 1.821(g); MPEP §§ 710.02(c), 711.02(a), 714.02 and 714.03.

¶ *24.04 Compact Disc/CRF Submission Is Not Fully Responsive*

The communication filed [1] is not fully responsive to the communication mailed [2] for the reason(s) set forth below or on the attached Notice To Comply With The Sequence Rules or CRF Diskette Problem Report.

If a complete reply has not been submitted by the time the shortened statutory period set in the communication mailed [3] has expired, this application will become abandoned unless applicant corrects the deficiency and obtains an extension of time

under 37 CFR 1.136(a). In no case may an applicant extend the period for reply beyond the SIX MONTH statutory period.

Examiner Note:

1. This form paragraph may not be used when the six month period for reply has expired. Use this form paragraph in the situation where, in the reply (within the six-months), there has been a deliberate omission of some necessary part of a complete reply. When the reply appears to be *bona fide*, but through an apparent oversight or inadvertence failed to provide a complete reply, use form paragraph 24.03.
2. In bracket 1, insert the date of the reply and in brackets 2 and 3, insert the mail date of the communication requiring compliance.
3. When mailing the Office action, attach a Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures, if any, along with a marked-up copy of the Raw Sequence Listing, or CRF Diskette Problem Report.

¶ *24.05 CD-ROM/CD-R Requirements (Missing Sequence Listing/CRF Statement)*

This application is objected to because it does not include the statement "the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing" and, where applicable, a statement that the submission includes no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d). Correction is required.

Examiner Note:

Use this form paragraph when there is no statement in the transmittal letter stating that the sequence listing information recorded in the CRF is identical to the written sequence listing

¶ *24.05.01 CD-ROM/CD-R Requirements (Missing Sequence Listing/CRF Statement in an Amendment Filed with a CRF)*

The amendment filed [1] is objected to because it does not include the statement "the sequence listing information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing" and, where applicable, a statement that the submission includes no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d). A statement that the sequence listing information is identical is required.

Examiner Note:

1. Use this form paragraph when there is no statement in the transmittal letter stating that the sequence listing information recorded in the CRF is identical to the written sequence listing.
2. In bracket 1, insert the date of the amendment.

2427.02 Notice To Comply

The text of the Notice to Comply With Requirements For Patent Applications Containing Nucleotide Sequence and for Amino Acid Sequence Disclosures, Form PTO-1661, follows. The appropriate box on the notice should be checked depending upon the particular deficiencies that have been identified. In the alter-

native, a letter may be written notifying applicant of any deficiencies that have been identified. A copy of the "Raw Sequence Listing," where available, should also be sent to the applicant. The "Raw Sequence Listing" should also be entered into the application file upon receipt from STIC.

**NOTICE TO COMPLY WITH REQUIREMENTS FOR PATENT APPLICATIONS
 CONTAINING NUCLEOTIDE SEQUENCE AND/OR AMINO ACID SEQUENCE DISCLOSURES**

The nucleotide and/or amino acid sequence disclosure contained in this application does not comply with the requirements for such a disclosure as set forth in 37 CFR 1.821–1.825 for the following reason(s):

- 1. This application fails to comply with the requirements of 37 CFR 1.821–1.825.
- 2. This application does not contain, as a separate part of the disclosure on paper copy, a "Sequence Listing" as required by 37 CFR 1.821(c).
- 3. A copy of the "Sequence Listing" in computer readable form has not been submitted as required by 37 CFR 1.821(e).
- 4. A copy of the "Sequence Listing" in computer readable form has been submitted. The content of the computer readable form, however, does not comply with the requirements of 37 CFR 1.822 and/or 1.832, as indicated on the attached marked-up copy of the "Raw Sequence Listing."
- 5. The computer readable form that has been filed with this application has been found to be damaged and/or unreadable as indicated on the attached CRF Diskette Problem Report. A substitute computer readable form must be submitted as required by 37 CFR 1.825(d).
- 6. The paper copy of the "Sequence Listing" is not the same as the computer readable form of the "Sequence Listing" as required by 37 CFR 1.821(e).
- 7. OTHER: _____

APPLICANT MUST PROVIDE:

- An initial or substitute computer readable form (CRF) copy of the "Sequence Listing."
- An initial or substitute paper copy of the "Sequence Listing," as well as an amendment directing its entry into the specification.
- A statement that the content of the paper and computer readable copies are the same and, where applicable, include no new matter, as required by 37 CFR 1.821(e), 1.821(f), 1.821(g), 1.825(b) or 1.825(d).

FOR QUESTIONS REGARDING COMPLIANCE WITH THESE REQUIREMENTS, PLEASE CONTACT:

- For Rules Interpretation, call (703) 308–1123.
- For CRF submission help, call (703) 308–4212.
- For PatentIn software help, call (703) 308–6856.

FORMPTO–166 (Rev. 7/97)

PART 1 – ATTORNEY/APPLICANT COPY

2428 Sample Statements

Sample language for the statements required to support sequence rule submissions is provided below. These statements are given by way of example only; other language may, of course, be used. For the statements that relate to the assertion that the content of the paper or compact disc and computer readable copies are the “same,” it is acknowledged that there may be some nonsubstantive differences between the two, e.g., page numbers and page breaks may be present in the paper copy but not in the computer readable copy thereof. This requirement for sameness relates to the informational content of the paper or compact disc and computer readable copies relevant to the requirements of the sequence rules.

37 CFR 1.821(f) - I hereby state that the information recorded in computer readable form is identical to the written (on paper or compact disc) sequence listing.

37 CFR 1.52(e)(4) - I hereby state that the two compact discs are identical.

37 CFR 1.821(g) [or (h)] - I hereby state that the submission, filed in accordance with 37 CFR 1.821(g) [or (h)], herein does not include new matter [or matter which goes beyond the disclosure in the international application].

37 CFR 1.825(a) - I hereby state that the amendments, made in accordance with 37 CFR 1.825(a), included in the substitute sheet(s) or compact disc(s) of the Sequence Listing are supported in the application, as filed, at _____. I hereby state that the substitute sheet(s) of the Sequence Listing does (do) not include new matter.

37 CFR 1.825(b) - I hereby state that the substitute copy of the computer readable form, submitted in accordance with 37 CFR 1.825(b), is the same as the amended Sequence Listing.

37 CFR 1.825(d) - I hereby state that the substitute copy of the computer readable form, submitted in accordance with 37 CFR 1.825(d), is identical to that originally filed.

2429 Helpful Hints for Compliance

The Office has now had a good deal of experience in the implementation of the sequence rules. The following list sets forth helpful hints, for both examiners

and applicants, for compliance. For the most part, the list is a compilation of frequently asked questions.

—Compliance is not a filing date issue.

—Compliance is not a 35 U.S.C. 112 issue.

—Compliance is not a 35 U.S.C. 119/120 issue.

—Compliance is not *per se* a new matter issue. The standard for resolution of inconsistencies between the official “Sequence Listing” (submitted on paper or compact disc pursuant to 37 CFR 1.821(c)) and the computer readable form thereof and/or errors in the official copy of sequence information is based on the new matter standard. If there are inconsistencies in compact discs submitted in accordance with 37 CFR 1.52(e) between “Copy 1” and “Copy 2”, the compact disc labeled “Copy 1” will be used for further processing.

—Compliance can be achieved via amendment.

—The paper or compact disc copy of the Sequence Listing is an integral part of the application. If submitted on paper, the Sequence Listing must begin on a new page, should appear at the end of the application, and preferably should be numbered independently of the numbering of the remainder of the application. The new page that begins the “Sequence Listing” should be entitled “Sequence Listing.” If not submitted as such at filing, the Sequence Listing must be inserted into the application via amendment, e.g., by preliminary amendment. If submitted on compact disc, the specification must contain an incorporation by reference of the material on the compact disc in a separate paragraph identifying each compact disc.

—Substitute pages or replacement compact discs must be used for changes to the Sequence Listing for each respective format.

—Angle brackets and numeric identifiers listed in 37 CFR 1.823 are very important for our database. Extra punctuation should not be used in Sequence Listings.

—The computer readable form cannot contain page numbers. Page numbers should only be placed on the paper copy of the Sequence Listing. Page numbers should not be placed on the compact disc copy of the Sequence Listing.

—The PatentIn computer program is not the only means by which to comply with the rules. Any word processing program can be used to generate a Sequence Listing if it has the capability to convert a file into ASCII text.

—If a word processing program is used to generate a “Sequence Listing,” hard page break controls should not be used and margins should be adjusted to the smallest setting.

—Word processing files should not be submitted to the Office; the Sequence Listing generated by a word processing file should be saved as an ASCII text file for submission. Most word processing programs provide this feature.

—Statements in accordance with 37 CFR 1.821(f), (g), (h) and 37 CFR 1.825 and proper labeling in accordance with 37 CFR 1.824(a)(6) should be noted. Sample statements to support filings and submissions in accordance with 37 CFR 1.821 through 1.825 are provided in MPEP § 2428 Sample Statements.

—Use Box SEQUENCE.

—Three and a half inch disks are less fragile than five and a quarter inch disks.

—On nucleotide sequences, since only single strands may be depicted in the “Sequence Listing,” show strands in 5' to 3' direction.

—The single stranded nucleotide depicted in the “Sequence Listing” may represent a strand of a nucleotide sequence that may be single or double stranded which may be, further, linear or circular. An amino acid sequence or peptide may be linear or circular. In some instances, a sequence may be both single stranded and double stranded and/or both linear and circular. The response “not relevant” is also an acceptable response for both “Strandedness” and “Topology.”

—Numeric identifiers “<140>, Current Application Number,” “<141>, Current Filing Date,” “<150>, Prior Application Number,” and “<151>, Prior Application Filing Date,” should appear in the “Sequence Listing” in all cases. If the information about the current application is not known or is unavailable at the time of completing the Sequence Listing, then the lines following numeric identifiers <140> and <141> should be left blank. This would normally be the case when the “Sequence Listing” is included in a newly filed application. Similarly, if information regarding prior applications is inapplicable, or not known at the time of completing the “Sequence Listing” but will be later filed, then the numeric identifiers <150> and <151> should appear with the line following the numeric identifiers left blank.

—If you receive a Notice to Comply that should not have been sent to you, send a letter in the form of a request for reconsideration of the notice to the organization sending the notice.

—There are a limited number of mandatory items of information. They are identified in MPEP § 2424.02 Sequence Listing Numeric Identifiers.

—Figures can be used to convey information not readily conveyed by the Sequence Listing. The exclusive conformance requirement of 37 CFR 1.821(b) will be relaxed for drawing figures. However, the sequence information so conveyed must still be included in a “Sequence Listing” and the sequence identifier (“SEQ ID NO:X”) must be used, either in the drawing or in the “Brief Description of the Drawings.”

—Extra copies of computer readable forms should not be sent to examiners.

—Inosine may be represented by the use of “I” in the features section, otherwise use “n.”

—Stop codons, represented by an asterisk, are not permitted in amino acid sequences.

—Punctuation should not be used in a sequence to indicate unknown nucleotide bases or amino acid residues nor should punctuation be used to delimit active or functional regions of a sequence. These regions should be noted as Features of the sequence per 37 CFR 1.823(b) (see numeric identifiers <220> - <223>).

—The presence of an unnatural amino acid in a sequence does not have the same effect as the presence of a D-amino acid. The sequence may still be subject to the rules even though one or more of the amino acids is not naturally occurring.

—Cyclic and branched peptides are causing some confusion in the application of the rules. Specific questions should be directed to Group 1650 personnel.

—A cyclic peptide with a tail is regarded as a branched sequence, and thereby exempt from the rules, if all bonds adjacent to the amino acid from which the tail emanates are normal peptide bonds.

—Sequences that have variable-length regions depicted as, for example, Ala Ala Leu Leu (Xaa Xaa)_n Ile Pro where n=0-234 or agccttgggaca(nnnnn)_mgtcatt where m=0-354 or Ser Met Ala Xaa Ser where Xaa could be 1, 2, 3, 4 and/or 5 amino acids must still comply with the Sequence Rules. The method to use

is to repeat the variable-length region as many times as the maximum length and specify in the Features section that the amino acid (or nucleotide) at a specified position is either absent or present. The variables Xaa and n may stand for only one residue, hence the need to repeat the variable. The correct way to submit the third example is Ser Met Ala Xaa Xaa Xaa Xaa Xaa Ser combined with an explanation in the Features section of the listing that any one or all of amino acids 4-8 can either be present or absent.

—Single letter amino acid abbreviations are not acceptable within the Sequence Listing but may appear elsewhere in the application.

—Zero (0) is not used when the numbering of amino acids uses negative numbers to distinguish the mature protein.

—Subscripts or superscripts are not permitted in a Sequence Listing.

—If a “Sequence Listing” is amended, an entirely new computer readable form is required regardless of the triviality of the amendment. Amendments to the paper copy of the “Sequence Listing” must be made by replacement section in compliance with 37 CFR 1.121. Amendments to the compact disc copy of the “Sequence Listing” must be made by replacement discs.

—Note field length limitations. For specific instances, they may be waived, but compliance is encouraged.

—The exclusive conformance requirement of 37 CFR 1.821(b) requires that any amendment of the sequence information in a “Sequence Listing” be accompanied by an amendment to the corresponding information, if any, embedded in the text of the specification or presented in a drawing figure.

—Any inquiries regarding a specific computer readable form that has been processed by the Office should be directed to the Systems Branch of the Chemical/Biotechnology Division of the Scientific and Technical Information Center.

2430 PatentIn Information; Utilities Programs; Training

In those areas of biotechnology in which nucleotide and/or amino acid sequence information is significant, many patent applicants are accustomed to, or familiar with, the submission of such sequence information, in electronic form, to various sequence databases, such

as GenBank, which is produced by the National Institutes of Health. In order to facilitate such submissions, or merely for the purpose of researching and developing sequence information, many eventual patent applicants also generate or encode sequence information in computer readable form. In order to further facilitate compliance with the sequence rules, the Office previously made available to the public an input program based on the AuthorIn program produced by GenBank. This input program, called PatentIn version 1.3, was specifically tailored to the requirements of the sequence rules which were in effect between October 1, 1990 and July 1, 1998.

The current sequence rules, which are embodied in 37 CFR 1.821-1.825 and World Intellectual Property Organization (WIPO) Standard ST.25, became effective July 1, 1998. The rules simplify the Sequence Listing requirements, and harmonize the format among all Trilateral Offices and many other patent offices around the world. The Office deployed PatentIn versions 2.0 and 2.1, in 1998 and 1999, respectively, incorporating changes in the required format for the Sequence Listing to ensure compliance with the sequence rules that became effective July 1, 1998. These versions operated under Microsoft Windows 3.1x, 95, 98 and NT. By using PatentIn version 2.0 or 2.1, customers were able to generate a Sequence Listing once and use that same listing to file at multiple patent offices worldwide. Applications filed in the U.S. after July 1, 1998 containing Sequence Listings prepared using PatentIn version 1.3 will not be in compliance with the U.S. sequence rules. Applications filed in the member countries of WIPO after July 1, 1998 containing Sequence Listings prepared using PatentIn version 1.3 will not be in compliance with ST.25.

In June 2000 another update of PatentIn was deployed, version 3.0. This version differs from earlier versions in that the capabilities have been extended. PatentIn 3.0 has several advantages over PatentIn 2.1. PatentIn 3.0 processes large sequences (over one million bases) and applications with a large number of sequences (over 100,000); it imports multiple sequences from a single file as well as multiple sequences from multiple files. Features defined for nucleic acid sequences are carried over to the supplemental amino acid sequences generated by the CDS feature. PatentIn 3.0 is more user-friendly than

PatentIn 2.1 and looks and feels more like other Windows-based programs. Unlike PatentIn 2.1, projects are portable from one computer to another provided PatentIn 3.0 is installed. From a programming viewpoint, the advantages include that the overall lines of code have been reduced to 25 percent of that required by PatentIn 2.1, maintenance of the code is easier since it is written in Visual C++ and it is easier to modify the code.

In March of 2001 PatentIn 3.1 was released. This newest version builds on the success of PatentIn 3.0 and expands its capabilities. One difference is that the capability to import a single sequence from a single file without a header has been added. The definition of variable characters has been enhanced in PatentIn 3.1. If the nucleotide sequence has the variable "n" and the CDS feature is selected, PatentIn 3.1 will calculate the position of the necessary Xaa in the supplemental protein sequence and provide the definition automatically based on the codon in which the "n" appears.

PatentIn version 3.1, and the companion User's Manual, are available on the Office World Wide Web site (www.uspto.gov) for free downloading. Copies of both the program and the user manual may also be purchased from the Office on 3 1/2-inch floppy diskette or compact disc. PatentIn 3.1 operates in a Windows 95/98/NT/2000 environment and has similar space, memory and system requirements as those for PatentIn version 3.0. A minimum of 64 MB of memory is recommended for smaller projects. Otherwise

128 MB is recommended. Even more additional memory may be required for larger sequence listings. The disk space required to install PatentIn 3.0 is 1.6 MB. Additional disk space is required to store project files and sequence listing files.

See MPEP § 1730 for additional information regarding ordering and using PatentIn.

While use of the PatentIn program is not required for compliance with the sequence rules, its use is highly recommended as Office experience has shown that submissions developed with PatentIn are far less likely to include errors than those developed without the program. The many automatic features of the PatentIn program also greatly ease the generation of Sequence Listings when compared to generating them by hand in a word processing environment. This is especially true for Sequence Listings that include many sequences and/or sequences having great lengths.

The Office provides hands-on training in the use of the PatentIn and associated utilities programs. The classes are held in Washington D.C. as demand warrants. In addition, on site training may be arranged at locations outside Washington, D.C. To express interest in such classes, please contact the Search and Information Resources Administration.

2434 Examination of Patent Applications Claiming Large Numbers of Nucleotide Sequences

The U.S. Patent and Trademark Office published its policy for the examination of patent applications that claim large numbers of nucleotide sequences in the *Official Gazette*, 1192 O.G. 68 (November 19, 1996). Nucleotide sequences encoding different proteins are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141. In establishing the new policy, the Commissioner has partially waived the requirements of 37 CFR 1.141 and will permit a reasonable number of such nucleotide sequences to be claimed in a single application. Under this policy, in most cases, up to 10 independent and distinct nucleotide sequences will be examined in a single application without restriction. Those sequences which are patentably indistinct from the sequences selected by the applicant will also be examined. Nucleotide sequences encoding the same protein are not considered to be independent and distinct and will continue to be examined together. In some exceptional cases, the complex nature of the claimed mate-

rial may necessitate that the reasonable number of sequences to be selected be less than 10. In other cases, applicants may petition pursuant to 37 CFR 1.181 for examination of additional nucleotide sequences by providing evidence that the different nucleotide sequences do not cover independent and distinct inventions. For examples of typical nucleotide sequence claims and additional information on the search and examination procedures, see the above cited O.G. Notice. See also MPEP § 803.04.

2435 Publishing of Patents and Patent Application Publications with Lengthy Sequence Listings

Due to the high cost and limited usefulness of the printed paper or composed electronic image versions of nucleotide and/or amino acid sequences, if the "Sequence Listing" portion is lengthy (i.e., at least 600 Kb (about 300 typed pages)), it will no longer be printed with the paper and composed electronic image (page image) versions of patents and patent application publications. The "Sequence Listing" will only be published in electronic form and will be available on the USPTO sequence homepage (<http://seqdata.uspto.gov>) as an ASCII text file.

Neither the paper copies of patents and patent application publications that are in the search rooms nor those sold through the Office of Public Records, Certification Division, will include a sequence listing if the sequence listing is not included in the composed

electronic image (page image) version of the patent or patent application publication. Furthermore, any copy used as a reference in an Office action will include only the paper portion of the document. If an applicant requires an electronic copy of a “Sequence Listing” that was not printed in the document, applicant must specifically request and pay for the electronic copy. Both applicants and members of the general public can obtain an electronic copy of the “Sequence Listing” through the Certification Division for a separate fee as set forth in 37 CFR 1.19(b)(3). See the paragraph entitled “Copies of Documents” in MPEP § 1730 for contact information for Certification Division.

The patent mailed to applicant will include a copy of the patent on paper and a copy of the sequence listing on an electronic medium (e.g., compact disc), if the “Sequence Listing” is not printed in the patent.

If the “Sequence Listing” is not included in the page images of a patent or patent application publication, a standardized statement will appear. Additionally, in the electronic text version of the patent or patent application publication, the statement will include an active hyperlink to a web page containing the “Sequence Listing.” The standardized statement for a patent will read, for example:

SEQUENCE LISTING

The patent contains a lengthy “Sequence Listing” section. A copy of the “Sequence Listing” is available in electronic form

from the USPTO web site (<http://seqdata.uspto.gov/sequence.html?DocID=6183957B1>). An electronic copy of the “Sequence Listing” will also be available from the USPTO upon request and payment of the fee set forth in 37 CFR 1.19(b)(3).

The standardized statement for a patent application publication will read, for example:

SEQUENCE LISTING

The patent application contains a lengthy “Sequence Listing” section. A copy of the “Sequence Listing” is available in electronic form from the USPTO web site (<http://seqdata.uspto.gov/sequence.html?DocID=20010000241>). An electronic copy of the “Sequence Listing” will also be available from the USPTO upon request and payment of the fee set forth in 37 CFR 1.19(b)(3).

Sequence data may also be accessed in a more readily searchable manner from the National Center for Biotechnology Information (NCBI) at <http://www.ncbi.nlm.nih.gov> or from a commercial vendor. The USPTO forwards a copy of the sequence data to NCBI when a patent including a “Sequence Listing” is granted, and when an application containing a sequence is published pursuant to 35 U.S.C. 122(b). If NCBI elects to include the sequence data in one of its databases, NCBI indexes the sequence data according to patent or patent application publication number. There is currently no fee for the public to use the NCBI site.

2501 Introduction [R-2]

35 U.S.C. 41. Patent fees; patent and trademark search systems.

(b) The Director shall charge the following fees for maintaining in force all patents based on applications filed on or after December 12, 1980:

- (1) 3 years and 6 months after grant, \$830 [* >\$910.00<].
- (2) 7 years and 6 months after grant, \$1,900 [* >\$2,090.00<].
- (3) 11 years and 6 months after grant, \$2,910 [* >\$3,220.00<].

Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as of the end of such grace period. The Director may require the payment of a surcharge as a condition of accepting within such 6-month grace period the payment of an applicable maintenance fee. No fee may be established for maintaining a design or plant patent in force.

(c)(1)The Director may accept the payment of any maintenance fee required by subsection (b) of this section which is made within twenty-four months after the six-month grace period if the delay is shown to the satisfaction of the Director to have been unintentional, or at any time after the six-month grace period if the delay is shown to the satisfaction of the Director to have been unavoidable. The Director may require the payment of a surcharge as a condition of accepting payment of any maintenance fee after the six-month grace period. If the Director accepts payment of a maintenance fee after the six-month grace period, the patent shall be considered as not having expired at the end of the grace period.

(2) A patent, the term of which has been maintained as a result of the acceptance of a payment of a maintenance fee under this subsection, shall not abridge or affect the right of any person or that person's successors in business who made, purchased, offered to sell, or used anything protected by the patent within the United States, or imported anything protected by the patent into the United States after the 6-month grace period but prior to the acceptance of a maintenance fee under this subsection, to continue the use of, to offer for sale, or to sell to others to be used, offered for sale, or sold, the specific thing so made, purchased, offered for sale, used, or imported. The court before which such matter is in question may provide for the continued manufacture, use, offer for sale, or sale of the thing made, purchased, offered for sale, or used within the United States, or imported into the United States, as specified, or for the manufacture, use, offer for sale, or sale in the United States of which substantial preparation was made after the 6-month grace period but before the acceptance of a maintenance fee under this subsection, and the court may also provide for the continued practice of any process that is practiced, or for the practice of which substantial preparation was made, after the 6-month grace period but before the acceptance of a maintenance fee under this subsection, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the 6-month grace period but before the acceptance of a maintenance fee under this subsection.

Note: The fees in brackets in 35 U.S.C. 41(b) as reproduced above are the fees that went into effect on October 1, * >2003<. See 37 CFR 1.20(e)-(g) for the current fee amounts.

Public Law 96-517, enacted December 12, 1980, established the requirement to pay maintenance fees for applications filed on or after that date. The statutory provisions regarding maintenance fees have been subsequently modified by Public Law 97-247, enacted August 27, 1982; Public Law 98-622, enacted November 8, 1984; Public Law 102-204, enacted December 10, 1991; Public Law 102-444, enacted October 23, 1992; Public Law 105-358, enacted November 10, 1998; and Public Law 106-113, enacted November 29, 1999.

**** >MAINTENANCE FEE BRANCH<**

The ** >Maintenance Fee Branch of the Receipts Accounting Division of the Office of Finance< provides specialized advice and guidance to the public on maintenance fee matters.

The ** >Maintenance Fee Branch< determines the proper status of issued patents which are subject to payment of maintenance fees, receives and processes fee transmittals, determines small entity status, responds to public inquiries on post-issuance status and maintenance fees, determines if patents have expired, and determines if maintenance fees are timely and properly computed. This * >Branch< also generates the data necessary to produce *Official Gazette* notices of maintenance fees due and of expiration of patents due to failure to pay maintenance fees.

OFFICE OF PUBLIC RECORDS DOCUMENT SERVICES DIVISION SPECIAL HANDLING BRANCH

The Special Handling Branch updates patent post issuance automated files with the following information:

- (A) Changes of Address
- (B) Powers of Attorney and Revocations Thereof
- (C) Withdrawals of Attorneys and Agents
- (D) Changes to Small Entity Status

The official mailing address for submitting requests to update all post-issuance patent information is:

** >Director of the United States Patent and Trademark Office
 Mail Stop Document Services
 P.O. Box 1450
 Alexandria, Virginia 22313-1450<

2504 Patents Subject to Maintenance Fees [R-2]

37 CFR 1.362. Time for payment of maintenance fees.

(a) Maintenance fees as set forth in §§ 1.20(e) through (g) are required to be paid in all patents based on applications filed on or after December 12, 1980, except as noted in paragraph (b) of this section, to maintain a patent in force beyond 4, 8 and 12 years after the date of grant.

(b) Maintenance fees are not required for any plant patents or for any design patents. Maintenance fees are not required for a

reissue patent if the patent being reissued did not require maintenance fees.

(c) The application filing dates for purposes of payment of maintenance fees are as follows:

(1) For an application not claiming benefit of an earlier application, the actual United States filing date of the application.

(2) For an application claiming benefit of an earlier foreign application under 35 U.S.C. 119, the United States filing date of the application.

(3) For a continuing (continuation, division, continuation-in-part) application claiming the benefit of a prior patent application under 35 U.S.C. 120, the actual United States filing date of the continuing application.

(4) For a reissue application, including a continuing reissue application claiming the benefit of a reissue application under 35 U.S.C. 120, the United States filing date of the original non-reissue application on which the patent reissued is based.

(5) For an international application which has entered the United States as a Designated Office under 35 U.S.C. 371, the international filing date granted under Article 11(1) of the Patent Cooperation Treaty which is considered to be the United States filing date under 35 U.S.C. 363.

(d) Maintenance fees may be paid in patents without surcharge during the periods extending respectively from:

(1) 3 years through 3 years and 6 months after grant for the first maintenance fee,

(2) 7 years through 7 years and 6 months after grant for the second maintenance fee, and

(3) 11 years through 11 years and 6 months after grant for the third maintenance fee.

(e) Maintenance fees may be paid with the surcharge set forth in § 1.20(h) during the respective grace periods after:

(1) 3 years and 6 months and through the day of the 4th anniversary of the grant for the first maintenance fee.

(2) 7 years and 6 months and through the day of the 8th anniversary of the grant for the second maintenance fee, and

(3) 11 years and 6 months and through the day of the 12th anniversary of the grant for the third maintenance fee.

(f) If the last day for paying a maintenance fee without surcharge set forth in paragraph (d) of this section, or the last day for paying a maintenance fee with surcharge set forth in paragraph (e) of this section, falls on a Saturday, Sunday, or a federal holiday within the District of Columbia, the maintenance fee and any necessary surcharge may be paid under paragraph (d) or paragraph (e) respectively on the next succeeding day which is not a Saturday, Sunday, or Federal holiday.

(g) Unless the maintenance fee and any applicable surcharge is paid within the time periods set forth in paragraphs (d), (e) or (f) of this section, the patent will expire as of the end of the grace period set forth in paragraph (e) of this section. A patent which expires for the failure to pay the maintenance fee will expire at the end of the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant.

(h) The periods specified in §§1.362 (d) and (e) with respect to a reissue application, including a continuing reissue application thereof, are counted from the date of grant of the original non-reissue application on which the reissued patent is based.

Maintenance fees are required to be paid on all patents based on applications filed on or after December 12, 1980, except for plant patents and design patents. Furthermore, maintenance fees are not required for a reissue patent if the patent being reissued did not require maintenance fees. >No payment of additional maintenance fees is required for second or subsequent reissue patents, i.e., continuation or divisional reissues (see MPEP 1451), which are derived from a first reissue patent which has issued.<

Application filing dates for purposes of determining whether a patent is subject to payment of maintenance fees are as follows:

(A) For an application not claiming benefit of an earlier application, the actual United States filing date of the application.

(B) For an application claiming benefit of an earlier foreign application under 35 U.S.C. 119(a)-(d), the actual United States filing date of the application.

(C) For a continuing (continuation, division, continuation-in-part) application claiming the benefit of a prior patent application under 35 U.S.C. 120, the actual United States filing date of the continuing application.

(D) For a reissue application, including a continuing reissue application claiming the benefit of a reissue application under 35 U.S.C. 120, the United States filing date of the original nonreissue application on which the patent reissued is based.

(E) For an international application that has entered the United States as a Designated Office under 35 U.S.C. 371, the international filing date granted under Article 11(1) of the Patent Cooperation Treaty which is considered to be the United States filing date under 35 U.S.C. 363.

2506 Times for Submitting Maintenance Fee Payments [R-2]

>Maintenance fees cannot be paid in advance since 35 U.S.C. 41(f) permits maintenance fees to be adjusted every year on October 1 to reflect any fluctuations during the previous 12 months in the Consumer Price Index as determined by the Secretary of Labor.<

37 CFR 1.362(d) sets forth the time periods when the maintenance fees for a utility patent can be paid without surcharge. Those periods, referred to generally as the “window period,” are the 6-month periods

preceding each due date. The “due dates” are defined in 35 U.S.C. 41(b). The window periods are (1) 3 years to 3 1/2 years after the date of issue for the first maintenance fee payment, (2) 7 years to 7 1/2 years after the date of issue for the second maintenance fee payment, and (3) 11 years to 11 1/2 years after the date of issue for the third and final maintenance fee payment. A maintenance fee paid on the last day of a window period can be paid without surcharge. The last day of a window period is the same day of the month the patent was granted 3 years and 6 months, 7 years and 6 months, or 11 years and 6 months after grant of the patent.

37 CFR 1.362(e) sets forth the time periods when the maintenance fees for a utility patent can be paid with surcharge. Those periods, referred to generally as the “grace period,” are the 6-month periods immediately following each due date. The grace periods are (1) 3 1/2 years and through the day of the 4th anniversary of the grant of the patent, (2) 7 1/2 years and through the day of the 8th anniversary of the grant of the patent and, (3) 11 1/2 years and through the day of the 12th anniversary of the grant of the patent. A maintenance fee may be paid with the surcharge on the same date (anniversary date) the patent was granted in the 4th, 8th, or 12th year after grant to prevent the patent from expiring.

Maintenance fees for a reissue patent are due based upon the schedule established for the original utility patent. The filing of a request for *ex parte* or *inter partes* reexamination and/or the publication of a reexamination certificate does not alter the schedule of maintenance fee payments of the original patent.

If the day for paying a maintenance fee falls on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the maintenance fee may be paid on the next succeeding day that is not a Saturday, Sunday, or Federal holiday. For example, if the window period for paying a maintenance fee without a surcharge ended on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the maintenance fee can be paid without surcharge on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. Likewise, if the grace period for paying a maintenance fee with a surcharge ended on a Saturday, Sunday, or a Federal holiday within the District of Columbia, the maintenance fee can be paid with sur-

charge on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia. In the latter situation, the failure to pay the maintenance fee and surcharge on the next succeeding day that is not a Saturday, Sunday, or a Federal holiday within the District of Columbia will result in the patent expiring on a date (4, 8, or 12 years after the date of grant) earlier than the last date on which the maintenance fee and surcharge could be paid. This situation results from the provisions of 35 U.S.C. 21, but those provisions do not extend the expiration date of the patent if the maintenance fee and any required surcharge are not paid when required. For example, if the grace period for paying a maintenance fee with a surcharge ended on a Saturday, the maintenance fee and surcharge could be paid on the next succeeding business day, e.g., Monday, but the patent will have expired at midnight on Saturday if the maintenance fee and surcharge were not paid on the following Monday. Therefore, if the maintenance fee and any applicable surcharge are not paid, the patent will expire as of the end of the grace period as listed above. A patent that expires for failure of payment will expire on the anniversary date the patent was granted in the 4th, 8th, or 12th year after the grant.

2510 Submission of Maintenance Fee >Payments and< Documents [R-2]

**** >SUBMISSION OVER THE INTERNET**

Maintenance fee payments can be made quickly and easily over the Internet at www.uspto.gov by electronic funds transfer (EFT), credit card or deposit account payment methods. See MPEP § 509 and § 2522 for additional information pertaining to payments by credit card and payments by deposit account.

SUBMISSION BY MAIL

As provided in 37 CFR 1.1(d)(1), the mailing address for maintenance fee payments not electronically submitted over the Internet is:

United States Patent and Trademark Office
P.O. Box 371611
Pittsburgh, Pennsylvania 15250-1611

Correspondence related to maintenance fees other than payments of maintenance fees in patents must be mailed to:

Mail Stop M Correspondence

Director of the United States Patent and Trademark Office
Alexandria, Virginia 22313-1450<

37 CFR 1.366(b) provides that the certificate of mailing procedures of 37 CFR 1.8 or the mailing by "Express Mail" provisions of 37 CFR 1.10 may be utilized in paying maintenance fees. The specific requirements of either 37 CFR 1.8 or 1.10 must be fully complied with if the benefits of either are desired. See MPEP § 512 and § 513.

SUBMISSION BY FACSIMILE

Payment of a maintenance fee is accepted via facsimile, when charged to a deposit account or to a credit card. ** >Credit Card Payment Form (PTO-2038)< should be used if payment is made by credit card. See MPEP § 509 and § 2522. In addition, requests pertaining to post-issuance documents, such as change of correspondence address, assignment of fee address, etc., may be submitted by facsimile.

37 CFR 1.366(b) provides that the certificate of transmission procedure of 37 CFR 1.8 may be utilized in paying maintenance fees. The specific requirements of 37 CFR 1.8 must be fully complied with if the benefits thereof are desired. See MPEP § 512.

**

2515 Information Required for Submission of Maintenance Fee Payment [R-2]

37 CFR 1.366. Submission of maintenance fees.

(a) The patentee may pay maintenance fees and any necessary surcharges, or any person or organization may pay maintenance fees and any necessary surcharges on behalf of a patentee. Authorization by the patentee need not be filed in the Patent and Trademark Office to pay maintenance fees and any necessary surcharges on behalf of the patentee.

**>

(b) A maintenance fee and any necessary surcharge submitted for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid. A maintenance fee or surcharge may be paid in the manner set forth in § 1.23 or by an authorization to charge a deposit account estab-

lished pursuant to § 1.25. Payment of a maintenance fee and any necessary surcharge or the authorization to charge a deposit account must be submitted within the periods set forth in § 1.362(d), (e), or (f). Any payment or authorization of maintenance fees and surcharges filed at any other time will not be accepted and will not serve as a payment of the maintenance fee except insofar as a delayed payment of the maintenance fee is accepted by the Director in an expired patent pursuant to a petition filed under § 1.378. Any authorization to charge a deposit account must authorize the immediate charging of the maintenance fee and any necessary surcharge to the deposit account. Payment of less than the required amount, payment in a manner other than that set forth § 1.23, or in the filing of an authorization to charge a deposit account having insufficient funds will not constitute payment of a maintenance fee or surcharge on a patent. The procedures set forth in § 1.8 or § 1.10 may be utilized in paying maintenance fees and any necessary surcharges.<

(c) In submitting maintenance fees and any necessary surcharges, identification of the patents for which maintenance fees are being paid must include the patent number, and the application number of the United States application for the patent on which the maintenance fee is being paid. If the payment includes identification of only the patent number (*i.e.*, does not identify the application number of the United States application for the patent on which the maintenance fee is being paid), the Office may apply the payment to the patent identified by patent number in the payment or may return the payment.

(d) Payment of maintenance fees and any surcharges should identify the fee being paid for each patent as to whether it is the 3 1/2-, 7 1/2-, or 11 1/2-year fee, whether small entity status is being changed or claimed, the amount of the maintenance fee and any surcharge being paid, and any assigned customer number. If the maintenance fee and any necessary surcharge is being paid on a reissue patent, the payment must identify the reissue patent by reissue patent number and reissue application number as required by paragraph (c) of this section and should also include the original patent number.

(e) Maintenance fee payments and surcharge payments relating thereto must be submitted separate from any other payments for fees or charges, whether submitted in the manner set forth in § 1.23 or by an authorization to charge a deposit account. If maintenance fee and surcharge payments for more than one patent are submitted together, they should be submitted on as few sheets as possible with the patent numbers listed in increasing patent number order. If the payment submitted is insufficient to cover the maintenance fees and surcharges for all the listed patents, the payment will be applied in the order the patents are listed, beginning at the top of the listing.

(f) Notification of any change in status resulting in loss of entitlement to small entity status must be filed in a patent prior to paying, or at the time of paying, the earliest maintenance fee due after the date on which status as a small entity is no longer appropriate. See § 1.27(g).

(g) Maintenance fees and surcharges relating thereto will not be refunded except in accordance with §§1.26 and 1.28(a).

37 CFR 1.366 establishes the guidelines and procedures for submission of maintenance fees, including any necessary surcharges. The patentee may pay maintenance fees and any necessary surcharges or any person or organization may pay maintenance fees and any necessary surcharges on behalf of the patentee without filing in the Office evidence of authorization by the patentee to pay maintenance fees. This will enable patentees to pay the maintenance fees and any necessary surcharges themselves or authorize some person or organization to pay maintenance fees and any necessary surcharges on their behalf. No verification of the authority to pay maintenance fees and any necessary surcharges in a particular patent will be made by the Office. While anyone may pay the maintenance fees and any necessary surcharges on a patent, if the payment is accepted by the Office, any Office notices relating to maintenance fees and any necessary surcharges will be mailed to the “fee address” set forth in 37 CFR 1.363. If the payment is not accepted by the Office, it will be returned to the person who submitted the payment if a return address is available. It is >strongly< recommended that the payor should include a return address along with his or her telephone number since the Office may contact the payor in some instances when it is unclear to which patent the fees are to be applied. See MPEP § 2530.

A maintenance fee and any necessary surcharge for a patent must be submitted in the amount due on the date the maintenance fee and any necessary surcharge are paid, and at the proper time, *i.e.*, within the periods set forth in 37 CFR 1.362. If the amount of the maintenance fee is correct on the date it is paid and credited to the patent, a later change in the maintenance fees to reflect a new fee amount will not require a modification in the amount paid. **

37 CFR 1.366(c) provides that a maintenance fee payment must include the patent number and the application number on which the maintenance fee is being paid. If the payment includes identification of only the patent number (*i.e.*, does not identify the application number for the patent on which the maintenance fee is being paid), the Office may apply the payment to the patent identified by patent number in the payment or may return the payment. See MPEP § 2530. The application number required to be submitted is not that of a prior parent application, but

rather the application number of the actual application that matured into the patent for which maintenance fees are to be paid. If the maintenance fee and any necessary surcharge is being paid on a reissue patent, the application number required is that of the reissue application.

If a patent expires because the maintenance fee and any necessary surcharge have not been paid in the manner required by 37 CFR 1.366, the patentee could proceed under 37 CFR 1.378 (see MPEP § 2590), if appropriate, or could file a petition under 37 CFR 1.377 (see MPEP § 2580) within the period set therein seeking to have the maintenance fee accepted as timely even though not all of the required identifying data was present prior to expiration of the grace period.

Under 37 CFR 1.366(d), the following information should also be submitted for each patent on which a maintenance fee or surcharge is paid (37 CFR 1.366(d)):

(A) the Fee Year (e.g., 3 1/2, 7 1/2, or 11 1/2 year fee);

(B) the amount of the maintenance fee and any surcharge being submitted;

(C) any assigned customer number; and

(D) whether small entity status is being changed or claimed with the payment.

Where the payment is a maintenance fee and any necessary surcharge on a reissue patent, in addition to the information requested for all payments, it is requested that the original patent number be furnished. Although the submission of the information requested under 37 CFR 1.366(d) is not mandatory, it would expedite the processing of maintenance fee payments.

The Maintenance Fee Transmittal Form, PTO/SB/45 should be used when submitting maintenance fees. This form is available, upon request, from the ** >Maintenance Fee Branch<. It is also available from the USPTO website (<http://www.uspto.gov>).

The Office processes fees in the order in which they are presented. If the payment submitted is insufficient to cover the maintenance fees and surcharges for all patents listed, and there is no >general< authorization to charge a deposit account **, the payment will be applied in the order the patents are listed, beginning at the top of the listing.

2520 Maintenance Fee Amounts [R-2]

37 CFR 1.20(e)-(h) sets the fee amounts for the maintenance fees and the grace period surcharge. The maintenance fee amounts are subject to adjustment to reflect fluctuations occurring in the Consumer Price Index pursuant to 35 U.S.C. 41(f). The maintenance fee amounts (37 CFR 1.20(e)-(h)) are subject to a 50% reduction for small entities pursuant to 35 U.S.C. 41(h). The >Maintenance Fee Branch< and the USPTO website (www.uspto.gov) may be contacted for the current maintenance fee amounts.

>The term of a patent might be shortened, e.g., by a terminal disclaimer. If a patent will expire part way between the due dates set in 35 U.S.C. 41(b), or between the latest due date and the term set in 35 U.S.C. 154, it is still required that the entire maintenance fee amount for the due date be paid. The maintenance fee amount is set by statute (subject to periodic adjustment), and cannot be prorated to cover only the amount of time past the due date before the patent expires.<

37 CFR 1.366(g) provides that maintenance fees and surcharges relating thereto will not be refunded except in accordance with 37 CFR 1.26 and 1.28(a). A patentee cannot obtain a refund of a maintenance fee which was due and payable on the patent. Any duplicate payment will be refunded to the fee address.

2522 Methods of Payment [R-2]

The method of payment for the maintenance fee and any necessary surcharge is set forth in 37 CFR 1.23. The payment shall be made in U.S. dollars and in the form of a cashier's or certified check, Treasury note, national bank notes, or United States Postal Service money order as provided in 37 CFR 1.23(a). If the maintenance fee and any necessary surcharge is sent in any other form, the Office may delay or cancel the credit until collection is made. For example, a personal or other uncertified check drawn on a U.S. bank that is not immediately negotiable, e.g., because it lacks a signature or due to insufficient funds, will not constitute payment of a maintenance fee and/or surcharge.

The maintenance fee can be charged to a credit card as set forth in 37 CFR 1.23(b), but credit for the payment is subject to actual receipt of the fee by the Office. Credit Card Payment Form (PTO-2038)

should be used for payment of fees by credit card >unless the payment is submitted over the internet<. If credit card information is provided on a form or document other than the form provided by the Office for the payment of fees by credit card, the Office will not be liable if the credit card number becomes public knowledge. See MPEP § 509.

Any remittance from a foreign country must be payable and immediately negotiable in the United States for the full amount of the maintenance fee and/or surcharge required.

37 CFR 1.366(b) provides that maintenance fees and any necessary surcharge may be paid by authorization to charge a deposit account established pursuant to 37 CFR 1.25. The authorization to charge the deposit account must be submitted within an appropriate window or grace period and must be limited to maintenance fees and surcharges payable on the date of submission. The authorization to charge the deposit account cannot be submitted prior to the third, seventh, or eleventh year after grant of the patent. If an authorization to charge a deposit account were submitted to pay the maintenance due at 3 years and 6 months after grant, a new authorization to charge a deposit account or other form of payment will have to be submitted at the appropriate time for each of the maintenance fees due at 7 years and 6 months and 11 years and 6 months. Any payment or authorization filed at any time other than that set forth in 37 CFR 1.362(d), (e), or (f) will not serve as a payment of the maintenance fee, except insofar as a delayed payment of the maintenance fee is accepted by the Commissioner pursuant to 37 CFR 1.378. See MPEP § 2590. A payment of less than the required amount, a payment in a manner other than that set forth in 37 CFR 1.23, or the filing of an authorization to charge a deposit account having insufficient funds, will not constitute payment of a maintenance fee on a patent. The authorization is required to permit the immediate charging of the maintenance fee to the deposit account. An authorization would be improper if it only authorized the maintenance fee to be charged at a later date, e.g., on the last possible day of payment without surcharge. Such an authorization would not serve as payment of the maintenance fee. Any payment which fails to result in the entire proper amount of the maintenance fee being present on the due date will not constitute payment of the maintenance fee.

Maintenance fee payments and any surcharges relating thereto must be submitted separately from any other payments for fees or charges, whether submitted in the manner set forth in 37 CFR 1.23 or by authorization to charge a deposit account. >See< 37 CFR 1.366(e). Maintenance fee payments and surcharge payments relating thereto that are commingled with payments for other fees or charges, e.g., application filing fees, issue fees, document supply fees, etc., will not be accepted. Maintenance fees require processing by a separate area of the Office and are not processed in the same manner as other fees and charges. Maintenance fees for a number of patents can be submitted together in one submission and one payment. 37 CFR 1.366(e) specifies that if maintenance fee payments for more than one patent are submitted together, they should be submitted on as few sheets as possible, listing the patent numbers in increasing patent number order. If the payment submitted is insufficient to cover the maintenance fees and any surcharges for all the listed patents, the payment will be applied in the order the patents are listed. In such a circumstance the maintenance fee and any surcharge for one or more of the last listed patents will not be paid.

Money orders and checks must be made payable to the ** >Director of the United States Patent and Trademark Office. (Checks made payable to the Commissioner of Patents and Trademarks will continue to be accepted. See 37 CFR 1.23 (a)<. Remittances from foreign countries must be payable and immediately negotiable in the United States for the full amount required.

It is not suggested that cash be sent by mail. However, if cash is sent it will be at the risk of the sender and should be sent via registered mail.

2530 >Special Acceptance of Maintenance Fee Payments Containing< Informalities [R-2]

** >It is strongly recommended that a maintenance fee submission include both a telephone number and a mailing address for the fee submitter because, provided the fee is sufficient, the Office will often attempt to contact the submitter by telephone and/or by mail to confirm the patent to which the fee is to be applied.

If a maintenance fee payment identifies only the patent number (i.e., does not identify the application number for the patent on which the maintenance fee is being paid), the Office may apply the payment to the patent identified by the patent number in the payment or may return the payment. See 37 CFR 1.366 (c). If the Office specially accepts a payment, a Notice of Special Acceptance of Patent Maintenance Fee (PTO-2143) will be mailed to the fee submitter identifying the patent number and application number to which the maintenance fee was applied and requesting the fee submitter to verify that the payment was applied as intended. The Notice of Special Acceptance of Patent Maintenance Fee (PTO-2143) will set a time period within which to file a petition under 37 CFR 1.377 along with the petition fee if the maintenance fee was not applied to the patent for which the payment was intended. The Office intends to specially accept maintenance fee payments according to the following guidelines.

I. PATENT NUMBER SUPPLIED BUT NO APPLICATION NUMBER SUPPLIED

If the maintenance fee payment is sufficient for the maintenance fee due for the patent identified by only the patent number, the Office will specially accept and apply the payment.

II. PATENT NUMBER AND APPLICATION NUMBER SUPPLIED BUT THEY DO NOT CORRESPOND

When a patent number and an application number are both supplied, but they do not correspond to the same patent, the Office will make a reasonable attempt to confirm the correct patent by telephoning the submitter (e.g., patentee or agent), provided the payment is sufficient to pay the maintenance fee due on either the patent identified by the patent number or the patent identified by the application number.

(A) If *verbal* confirmation of the patent identified by the patent number is obtained during the telephone call and the payment submitted is sufficient, the Office will specially accept and apply the payment as confirmed.

(B) If *written* (e.g., facsimile or email) confirmation of the patent identified by the application num-

ber is obtained immediately following the telephone call, and the payment submitted is sufficient, the Office will specially accept and apply the payment as confirmed.

(C) If the telephone call is not successful (e.g., no contact is made with the fee submitter) but a maintenance fee is due on the patent identified by the patent number, provided the payment submitted is sufficient, the Office may specially accept and apply the payment to the patent identified by the patent number.

III. NO PATENT NUMBER SUPPLIED BUT APPLICATION NUMBER SUPPLIED

If a maintenance fee is due on the patent identified by the application number and the payment submitted is sufficient, the Office will telephone the fee submitter to confirm the payment. If *written* (e.g., facsimile) confirmation is obtained immediately following the telephone call, the Office will specially accept and apply payment as confirmed. Otherwise, the Office will return the payment to the fee submitter.

>

2531 Payment Late or Insufficient [R-2]

Examples of when a payment of maintenance fees and any necessary surcharges will be considered to be late or insufficient include instances when:

(A) Though a payment was received, additional funds are required due to surcharge or fee increase;

(B) Though a payment was received in an amount for small entity, the patented file records do not indicate that an assertion of small entity status was received; or

(C) The payment was received after the patent expired.

If the Office considers a payment to be late or insufficient, a notice (e.g., a Notice of Non-Acceptance of Patent Maintenance Fee (PTO-2142)) will be sent to the "fee submitter." Reply to the notice is required prior to expiration of the grace period provided by 37 CFR 1.362(e) in order to avoid the expiration of the patent. If a reply is not received prior to expiration of the patent, then an appropriate petition under 37 CFR 1.377 or 37 CFR 1.378 is required. See MPEP § 2580 and § 2590.

If a payment is deemed insufficient because the payment was submitted in the small entity amount but no written assertion of entitlement to small entity status has been filed, a Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140) will be mailed to the fee submitter. See MPEP § 2550 for information on establishing or changing an entity status for the purpose of paying a maintenance fee.<

>

2532 Duplicate Payments [R-2]

In the event a maintenance fee is submitted (hereafter, duplicate payment) in the required amount (including any necessary surcharge) within the payment window for the patent identified for payment, but the same maintenance fee for that patent was already paid by a previous fee submitter (hereafter, first fee submitter), the Office intends to treat the duplicate from the second fee submitter as follows:

(A) If the duplicate payment does not comply with 37 CFR 1.366(c) by not containing both the patent number and the corroborating application number, the Office will return the duplicate payment to the second fee submitter with an indication that the maintenance fee for the patent was already paid.

(B) If the duplicate payment does comply with 37 CFR 1.366(c) by containing both the patent number and the corroborating application number, the Office will verify that the first payment was properly processed.

(1) If the first payment was properly processed, the Office will return the duplicate payment to the second fee submitter. In this event the returned payment will be accompanied by identification of the first fee submitter.

(2) If a review of the Office record of the first maintenance fee payment reveals that the first payment was not properly processed (e.g., did not comply with 37 CFR 1.366(c) or was not specially accepted in accordance with MPEP § 2530), the Office will attempt to determine whether the first payment should have been applied to a patent other than the patent identified under 37 CFR 1.366(c) by the second fee submitter. Based on this determination the Office will: (a) attempt to apply the duplicate payment (and retract the first payment); or (b) return the duplicate payment to the second fee submitter with identification of the first fee submitter.<

2540 Fee Address for Maintenance Fee Purposes [R-2]

37 CFR 1.363. *Fee address for maintenance fee purposes.*

(a) All notices, receipts, refunds, and other communications relating to payment or refund of maintenance fees will be directed to the correspondence address used during prosecution of the application as indicated in § 1.33(a) unless:

(1) A “fee address” for purposes of payment of maintenance fees is set forth when submitting the issue fee, or

(2) A change in the correspondence address for all purposes is filed after payment of the issue fee, or

(3) A “fee address” or a change in the “fee address” is filed for purposes of receiving notices, receipts and other correspondence relating to the payment of maintenance fees after the payment of the issue fee, in which instance, the latest such address will be used.

(b) An assignment of a patent application or patent does not result in a change of the “correspondence address” or “fee address” for maintenance fee purposes.

All notices, receipts, refunds and other communications relating to the payment or refund of a maintenance fee will be directed to the correspondence address used during the prosecution of the application, unless a “fee address” for the purpose of payment of the maintenance fee has been designated or a change in the correspondence address has been made (see MPEP § 2542). 37 CFR 1.33(d) allows a correspondence address or change thereto to be filed during the enforceable life of the patent. Patentees should ensure that the Office is properly notified of the proper “fee address” to which all maintenance fee communications are to be directed.

Under the statutes and rules, the Office has no duty to notify patentee of the requirement to pay maintenance fees or to notify patentee when the maintenance fee is due. It is solely the responsibility of the patentee to ensure that the maintenance fee is paid timely to prevent expiration of the patent. The failure to receive the reminder notice will not shift the burden of monitoring the time for paying a maintenance fee from the patentee to the Office. The Office will attempt to assist patentees through the mailing of a Maintenance Fee Reminder in the grace period. However, the failure to receive a Maintenance Fee Reminder will not relieve the patentee of the obligation to timely pay the appropriate maintenance fee to prevent expiration of the patent, nor will it constitute unavoidable delay if the patentee seeks to reinstate the patent under 37 CFR 1.378(b). See *In re Patent No. 4,409,763*,

7 USPQ2d 1798 (Comm'r Pat. 1988), *aff'd sub nom. Rydeen v. Quigg*, 748 F. Supp. 900, 16 USPQ2d 1876 (D.D.C. 1990), *aff'd*, 937 F.2d 623 (Fed. Cir. 1991) (table), *cert. denied*, 502 U.S. 1075 (1992). Maintenance fee correspondence will not be directed to more than one address.

** >The use of the following form(s) is suggested when requesting establishment of a fee address: a current version of the "Fee Address" Indication Form (PTO/SB/47), and if necessary, a Request for Customer Number (PTO/SB/125). The Office's record-keeping database does not permit the Office to establish a fee address for a patent or allowed application without a customer number. If a customer number was previously acquired from the Office for the address being designated as the fee address, that customer number should be entered on the "Fee Address" Indication Form (PTO/SB/47) to make the fee address designation. If no customer number exists for the address being designated as the fee address, then the "Fee Address" Indication Form (PTO/SB/47) should be accompanied by a completed Request for Customer Number (form PTO/SB/125). See MPEP § 403 concerning customer number practice.

A "Fee Address" Indication Form (PTO/SB/47) having a revision date of March 2002 reflects the requirement that a customer number be used to establish a fee address. Earlier versions of the "Fee Address" Indication Form (PTO/SB/47), however, do not reflect this requirement, and are outdated. A March 2002 revision date is shown by the notation "(03-02)" in the upper right-hand corner of the form, following the form number (PTO/SB/47). It is recommended that only a current version of the "Fee Address" Indication Form (PTO/SB/47) showing a revision date of 03-02, or more recent, be used when designating a fee address.

At the time of issue fee payment, applicants may designate a fee address by submitting a "Fee Address" Indication Form (PTO/SB/47) as an attachment to the Issue Fee Transmittal (PTOL-85B). After issue fee payment, applicants may designate a fee address by submitting a "Fee Address" Indication Form (PTO/SB/47), and if necessary, a Request for Customer Number (PTO/SB/125), to the address specified on the "Fee Address" Indication Form (PTO/SB/47).

All fee addresses established at the Office will be represented by a customer number, even if the fee

address designation lacks an explicit request that a customer number be used for this purpose (e.g., in the event that an outdated "Fee Address" Indication Form (PTO/SB/47), or equivalent form, is submitted without an accompanying Request for Customer Number (PTO/SB/125)).

The current version of the "Fee Address" Indication Form (PTO/SB/47) is available upon request from the Maintenance Fee Branch and from the USPTO website (www.uspto.gov). The Request for Customer Number (PTO/SB/125) is available upon request from the Electronic Business Center and from the USPTO website (www.uspto.gov). Requests for the establishment of a fee address should be submitted to the Maintenance Fee Branch prior to or at the time of payment of maintenance fees in order to ensure that receipt of payment is directed to the fee address.

Additional patent numbers may be assigned to a customer number at any time, upon written request.

The customer number of the fee address should be referred to on all future maintenance fee payments in order to expedite the payment.<

2542 Change of Correspondence Address [R-2]

Unless a fee address has been designated, all notices, receipts, refunds, and other communications relating to the patent will be directed to the correspondence address (37 CFR 1.33) used during the prosecution of the application. Practitioners of record when the patent issues who do not wish to receive correspondence relating to maintenance fees must change the correspondence address in the patented file or provide a fee address to which such correspondence should be sent. It is not required that a practitioner file a request for permission to withdraw pursuant to 37 CFR 1.36 solely for the purpose of changing the correspondence address in a patented file.

The correspondence address should be updated or changed as necessary to ensure that all communications are received in a timely manner. A change of correspondence address may be made as provided in 37 CFR 1.33(a). The correspondence address may be changed as provided in 37 CFR 1.33(a)(1) prior to the filing of an oath or declaration. After an oath or declaration has been executed and filed by at least one inventor, the correspondence address may be changed as provided in 37 CFR 1.33(a)(2).

Requests for a change of the correspondence address may be sent to the Office of Public Records, Document Services Division, Special Handling Branch during the enforceable life of the patent. To ensure accuracy and to expedite requests for change to the correspondence address, it is suggested that the request include both the patent number and the application number. ** >The Office form, Change of Correspondence Address, Application (PTO/SB/122)< may be used to request a change of correspondence address in a patent application. ** >The Office form, Change of Correspondence Address, Patent (PTO/SB/123)< may be used to request a change of correspondence address for an issued patent.

2550 Small Entity Status [R-2]

In order to establish small entity status for the purpose of paying a maintenance fee, a written assertion of entitlement to small entity status must be filed prior to or with the maintenance fee paid as a small entity. A written assertion is only required to be filed once and will remain effective until changed.

37 CFR 1.366(f) serves as a reminder to patentees of the necessity to check for the loss of small entity status prior to paying each maintenance fee on a patent. This is also a requirement of 37 CFR 1.27(g). The notification of any change in status resulting in loss of entitlement to small entity status must be filed in a patent prior to paying, or at the time of paying, the earliest maintenance fee due after the date on which status as a small entity is no longer appropriate. If status as a small entity has been previously established by filing an assertion of small entity status and such status is checked and found to be proper, no notification is required. It is not necessary to file a new assertion establishing small entity status at this point if the status as a small entity has been established and is still proper even if rights have been transferred to a small entity after the assertion of small entity status. The requirement is to notify the Office of the loss of entitlement and to pay the maintenance fee in the proper amount for other than a small entity where appropriate. The refund provisions of 37 CFR 1.28(a) for later submitted small entity assertions do apply to maintenance fees.

>If a payment is submitted that conflicts with the Office record of the patentee's entity status, a notice relating to entity status will be sent to the fee submit-

ter. A Notice of Overpayment of Patent Maintenance Fee (PTO-211) will be sent if the payment was submitted in the large entity amount, but Office records indicate that the patentee is a small entity. A Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140) will be sent if the payment was submitted in the small entity amount, but Office records indicate that the patentee is a large entity.

Where a Notice of Overpayment of Patent Maintenance Fee (PTO-211) is sent, the time period for reply depends on whether the reply requires additional money for sufficient payment of the large entity maintenance fee. Where no additional money is required, the fee submitter will be given a non-extendable ONE MONTH period from the mailing date of the notice to file a written notification of change in status from small to large entity. Note that if no additional money was required for sufficient payment of the large entity maintenance fee on the date the payment was received, no additional money will be required with the timely reply even if the patent entered the grace period under 37 CFR 1.362 (e) after the mailing date of the notice. Where additional money is required, the reply (including the additional money and the written notification of change in status from small to large entity) must be filed within the earlier of: (A) a non-extendable ONE MONTH period from the mailing date of the notice; or (B) any time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). Note that if a previously unpaid surcharge has come due by the time the reply requiring additional money is filed, sufficient payment will require payment of the surcharge as well as any additional money required to complete the large entity maintenance fee amount. Absent a timely reply to the Notice of Overpayment of Patent Maintenance Fee (PTO-211), the Office will apply the small entity maintenance fee payment amount to the patent and refund the overpayment amount. Accordingly, if the patentee is actually entitled to small entity status, no reply to the Notice of Overpayment of Patent Maintenance Fee (PTO-211) is necessary. In the event money was refunded by the Office as an "overpayment amount," but the patentee is a large entity, provided the patent has not already expired, the fee submitter must file a resubmission of the refunded money together with the required written notification of change in status from small to large entity within the

time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). In this situation, if the original payment amount received by the Office is less than the current amount required for sufficient payment of the large entity maintenance fee, the resubmitted money previously refunded by the Office as an “overpayment amount” must be accompanied by additional money.

Where a Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140) is sent, the reply must be filed within the earlier of: (A) a non-extendable ONE MONTH period from the mailing date of the notice; or (B) any time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). The requirements of the reply depend on whether the patentee is entitled to small entity status. If the patentee is entitled to small entity status, a written assertion of entitlement to small entity status is required together with any additional money required for sufficient payment of the small entity maintenance fee. If the patentee is a large entity patentee, the reply must include payment of the additional money required for sufficient payment of the large entity maintenance fee. Note that if a previously unpaid surcharge under 37 CFR 1.362(e) has come due by the time the reply is filed, sufficient payment will require payment of the surcharge as well as any additional money required to complete the required maintenance fee amount. Absent a timely reply to the Notice of Non-Acceptance of Small Entity Patent Maintenance Fee (PTO-2140), the Office will refund the amount received. If the amount received was refunded and the patentee is a small entity, provided the patent has not already expired, sufficient payment of the small entity maintenance fee and the required written assertion of entitlement to small entity status must be filed within the time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e). If the amount received was refunded and the patentee is a large entity, provided the patent has not already expired, sufficient payment of the large entity maintenance fee must be filed within the time remaining under 37 CFR 1.362, including the grace period provided by 37 CFR 1.362(e).<

2560 Revocation of Power of Attorney and Withdrawal of Attorney [R-2]

The revocation or withdrawal of an attorney may be submitted at any time; however, it is recommended that it be done well prior to the date a maintenance fee is due.

When processing a revocation of a power of attorney, the Office of Public Records, Document Services Division, Special Handling Branch forwards copies of the completed action to the requester and the attorney being removed. Also, a copy is placed in the * >original< file *.

When processing a withdrawal of an attorney, the Office of Public Records, Document Services Division, Special Handling Branch forwards copies of the completed action to the attorney and the patent owner. **

It should be noted that an assignment does not act as a revocation of power of attorney for authorization previously given. However, the assignee may revoke a previous power of attorney. See 37 CFR 3.71 and 3.73.

2570 >Maintenance Fee Payment< Status Requests [R-2]

The ** >Maintenance Fee Branch< will respond to requests for the >maintenance fee payment< status of patents. ** >Maintenance fee status can be requested by telephone, facsimile, or e-mail. In addition, maintenance fee status information is available over the Internet at www.uspto.gov<. Telephone status requests are limited to two patent numbers per telephone call. ** See MPEP § 1730 for the telephone and facsimile numbers.

The ** >Maintenance Fee Branch< has a form available, for the user’s convenience, when submitting requests in person or via facsimile.

2575 Notices

Under the statutes and the regulations, the Office has no duty to notify patentees when their maintenance fees are due. It is the responsibility of the patentee to ensure that the maintenance fees are paid to prevent expiration of the patent. The Office will, however, provide some notices as reminders that maintenance fees are due, but the notices, errors in the notices or in their delivery, or the lack or tardiness of

notices will in no way relieve a patentee from the responsibility to make timely payment of each maintenance fee to prevent the patent from expiring by operation of law. The notices provided by the Office are courtesies in nature and intended to aid patentees. The Office's provision of notices in no way shifts the burden of monitoring the time for paying maintenance fees on patents from the patentee to the Office.

PREPRINTED STANDARD NOTICES

The patent grant currently includes a reminder notice that maintenance fees may be due. The Notice of Allowance currently includes a reminder notice that maintenance fees may be due.

OFFICIAL GAZETTE NOTICE

A notice will appear in each issue of the *Official Gazette* which will indicate which patents have been granted 3, 7, and 11 years earlier, that the window period has opened, and that maintenance fee payments will now be accepted for those patents.

Another *Official Gazette* notice published after expiration of the grace period will indicate any patent which has expired due to nonpayment of maintenance fees and any patents which have been reinstated. An annual compilation of such expirations and reinstatements will also be published.

MAINTENANCE FEE REMINDERS

Since patentees are expected to maintain their own record and docketing systems and since it is expected that most patentees will pay their maintenance fees during the window period to avoid payment of a surcharge, the Office will not send any reminder notices to the patentee until after the grace period has begun. This will reduce and simplify the mailing of notices but still give patentees an opportunity to pay their maintenance fee with surcharge during the grace period before expiration of their patents. The Office will mail any Maintenance Fee Reminder to the fee address as set forth in 37 CFR 1.363. See MPEP § 2540.

RECEIPT NOTICES

The Office will issue a receipt for payment of maintenance fees after entry of the maintenance fee payment. Such a receipt will provide an opportunity for

the patentee to check if the Office has properly credited the payment. The original document submitted by the patentee when paying the maintenance fee will also be appropriately marked and returned to the fee address as set forth in 37 CFR 1.363

EXPIRATION NOTICES

The Office will mail a Notice of Patent Expiration to the fee address as set forth in 37 CFR 1.363 when Office records indicate that a patent has expired for failure to pay a required maintenance fee.

2580 Review of Decision Refusing to Accept and Record Payment of a Maintenance Fee Filed Prior to Expiration of Patent [R-2]

37 CFR 1.377. Review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.

**>

(a) Any patentee who is dissatisfied with the refusal of the Patent and Trademark Office to accept and record a maintenance fee which was filed prior to the expiration of the patent may petition the Director to accept and record the maintenance fee.<

(b) Any petition under this section must be filed within 2 months of the action complained of, or within such other time as may be set in the action complained of, and must be accompanied by the fee set forth in § 1.17(h). The petition may include a request that the petition fee be refunded if the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.

(c) Any petition filed under this section must comply with the requirements of § 1.181(b) and must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest.

37 CFR 1.377 provides a mechanism for review of a decision refusing to accept and record payment of a maintenance fee filed prior to the expiration of a patent. 37 CFR 1.377(a) permits a patentee who is dissatisfied with the refusal of the Office to accept and record a maintenance fee which was filed prior to the expiration of the patent to petition the * >Director< to accept and record the maintenance fee. This petition may be used, for example, in situations where an error is present in the identifying data required by 37 CFR 1.366(c) with the maintenance fee payment, i.e., either the patent number or the application number * >is< incorrect. See MPEP § 2515 and § 2530. A petition under 37 CFR 1.377 would not be appropriate

where there is a complete failure to include at least one correct mandatory identifier as required by 37 CFR 1.366(c) for the patent since no evidence would be present as to the patent on which the maintenance fee was intended to be paid. If the maintenance fee payment with an incorrect mandatory identifier was made near the end of the grace period, the patent might expire since the Office would not credit the fee to the patent. A petition under 37 CFR 1.377 would not be appropriate where the patentee paid a maintenance fee on one patent when the patentee intended to pay the maintenance fee on a different patent but through error identified the wrong patent number and application number. Likewise, a petition under 37 CFR 1.377 would not be appropriate where the entire maintenance fee payment, including any necessary surcharge, was not filed prior to expiration of the patent.

Any petition filed under 37 CFR 1.377 must be filed within 2 months of the action complained of, or within such other time as may be set in the action complained of. The petition must be accompanied by the proper petition fee. The petition may include a request that the petition fee be refunded if the refusal to accept and record the maintenance fee is determined to have resulted from an error by the Office.

Any petition filed under 37 CFR 1.377 must comply with the requirements of 37 CFR 1.181(b) and must be signed by an attorney or agent registered to practice before the Office, or by the patentee, the assignee, or other party in interest. A person or organization whose only responsibility insofar as the patent is concerned is the payment of a maintenance fee is not a party in interest for purposes 37 CFR 1.377. If the petition is signed by a person not registered to practice before the Office, the petition must indicate whether the person signing the petition is the patentee, assignee, or other party in interest. An assignee must comply with the requirements of 37 CFR 3.73(b) which is discussed in MPEP § 324.

Any petition under 37 CFR 1.377 should be marked on the front page of the communication to the attention of the Office of Petitions and addressed as follows:

** >Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450<

2590 Acceptance of Delayed Payment of Maintenance Fee in Expired Patent to Reinstate Patent [R-2]

37 CFR 1.378. *Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.*

**>

(a) The Director may accept the payment of any maintenance fee due on a patent after expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the Director to have been unavoidable (paragraph (b) of this section) or unintentional (paragraph (c) of this section) and if the surcharge required by § 1.20(i) is paid as a condition of accepting payment of the maintenance fee. If the Director accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired, but will be subject to the conditions set forth in 35 U.S.C. 41(c)(2). <

(b) Any petition to accept an unavoidably delayed payment of a maintenance fee filed under paragraph (a) of this section must include:

- (1) the required maintenance fee set forth in § 1.20 (e)-(g);
- (2) the surcharge set forth in § 1.20(i)(1); and
- (3) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent. The showing must enumerate the steps taken to ensure timely payment of the maintenance fee, the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly.

(c) Any petition to accept an unintentionally delayed payment of a maintenance fee filed under paragraph (a) of this section must be filed within twenty-four months after the six-month grace period provided in § 1.362(e) and must include:

- (1) the required maintenance fee set forth in § 1.20 (e)-(g);
- (2) the surcharge set forth in § 1.20(i)(2); and
- (3) a statement that the delay in payment of the maintenance fee was unintentional.

(d) Any petition under this section must be signed by an attorney or agent registered to practice before the Patent and Trademark Office, or by the patentee, the assignee, or other party in interest.

**>

(e) Reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a) of this section may be obtained by filing a petition for reconsideration within two months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. Any such petition for reconsideration must be accompanied by the petition fee set forth in § 1.17(h). After decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the Director. If the delayed payment of the maintenance fee is not accepted, the maintenance fee and the surcharge set forth in § 1.20(i) will be refunded following the decision on the petition for reconsideration, or after the expiration of

the time for filing such a petition for reconsideration, if none is filed. Any petition fee under this section will not be refunded unless the refusal to accept and record the maintenance fee is determined to result from an error by the Patent and Trademark Office.<

37 CFR 1.378(a) provides that the * >Director of the Office< may accept the payment of any maintenance fee due on a patent based on an expiration of the patent if, upon petition, the delay in payment of the maintenance fee is shown to the satisfaction of the * >Director of the Office< to have been unavoidable or unintentional. The appropriate surcharge set forth in § 1.20(i) must be paid as a condition of accepting payment of the maintenance fee. The surcharges set at 37 CFR 1.20(i) are established pursuant to 35 U.S.C. 41(c) and, therefore, are not subject to small entity provisions of 35 U.S.C. 41(h). No separate petition fee is required for this petition. If the * >Director of the Office< accepts payment of the maintenance fee upon petition, the patent shall be considered as not having expired but will be subject to the intervening rights and provisions of 35 U.S.C. 41(c)(2).

Any petition under 37 CFR 1.378(b) or (c) should be marked on the front page of the communication to the attention of the Office of Petitions and addressed as follows:

** >Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450<

Any petition under 37 CFR 1.378 must be signed by an attorney or agent registered to practice before the U.S. Patent and Trademark Office, or by the patentee, the assignee, or other party in interest. A person or organization whose only responsibility insofar as the patent is concerned is the payment of a maintenance fee is not a party in interest for purposes of 37 CFR 1.378. If the petition is signed by a person not registered to practice before the Office, the petition must indicate that the person signing the petition is the patentee, assignee, or other party in interest. An assignee must comply with the requirements of 37 CFR 3.73(b) which is discussed in MPEP § 324.

37 CFR 1.378(e) provides a mechanism for obtaining reconsideration of a decision refusing to accept a maintenance fee upon petition filed pursuant to paragraph (a). This mechanism is a petition for reconsider-

ation which may be filed within 2 months of, or such other time as set in, the decision refusing to accept the delayed payment of the maintenance fee. In contrast to petitions filed under paragraph (a), the petition for reconsideration requires the petition fee set forth in 37 CFR 1.17(h). After a decision on the petition for reconsideration, no further reconsideration or review of the matter will be undertaken by the * >Director of the Office<. The maintenance fee and the surcharge submitted will be refunded if the delayed payment of the maintenance fee is not accepted. The refund will be made following the decision on the petition for reconsideration, or after the expiration of the time for filing such a petition for reconsideration, if none is filed. The petition fee for filing a petition for reconsideration will not be refunded unless, on reconsideration, the refusal to accept and record the maintenance fee is determined to result from an error by the Office.

UNAVOIDABLE DELAY

37 CFR 1.378(b) provides that a patent may be reinstated at any time following expiration of the patent for failure to timely pay a maintenance fee. A petition to accept late payment of a maintenance fee, where the delay was unavoidable, must include:

- (A) the required maintenance fee set forth in 37 CFR 1.20(e)-(g);
- (B) the surcharge set forth in 37 CFR 1.20(i)(1); and
- (C) a showing that the delay was unavoidable since reasonable care was taken to ensure that the maintenance fee would be paid timely and that the petition was filed promptly after the patentee was notified of, or otherwise became aware of, the expiration of the patent.

The required showing must enumerate the steps taken to ensure timely payment of the maintenance fee, the date and the manner in which patentee became aware of the expiration of the patent, and the steps taken to file the petition promptly. Furthermore, an adequate showing requires a statement by all persons with direct knowledge of the cause of the delay, setting forth the facts as they know them. Copies of all documentary evidence referred to in a statement should be furnished as exhibits to the statement.

As language in 35 U.S.C. 41(c)(1) is identical to that in 35 U.S.C. 133 (i.e., “unavoidable” delay), a

late maintenance fee for the unavoidable delay standard is considered under the same standard for reviving an abandoned application under 35 U.S.C. 133. See *Ray v. Lehman*, 55 F.3d 606, 608-09, 34 USPQ2d 1786, 1787 (Fed. Cir. 1995) (quoting *In re Patent No. 4,409,763*, 7 USPQ2d 1798, 1800 (Comm'r Pat. 1988), *aff'd sub nom. Rydeen v. Quigg*, 748 F. Supp. 900, 16 USPQ2d 1876 (D.D.C. 1990), *aff'd*, 937 F.2d 623 (Fed. Cir. 1991) (table), *cert. denied*, 502 U.S. 1075 (1992)). See MPEP § 711.03(c) for a general discussion of the “unavoidable” delay standard.

As 35 U.S.C. 41(c) requires the payment of fees at specified intervals to maintain a patent in force, rather than some response to a specific action by the Office under 35 U.S.C. 133, a reasonably prudent person in the exercise of due care and diligence would have taken steps to ensure the timely payment of such maintenance fees. *Ray*, 55 F.3d at 609, 34 USPQ2d at 1788. That is, an adequate showing that the delay in payment of the maintenance fee at issue was “unavoidable” within the meaning of 35 U.S.C. 41(c) and 37 CFR 1.378(b)(3) requires a showing of the steps taken to ensure the timely payment of the maintenance fees for this patent. *Id.* Thus, where the record fails to disclose that the patentee took reasonable steps, or discloses that the patentee took no steps, to ensure timely payment of the maintenance fee, 35 U.S.C. 41(c) and 37 CFR 1.378(b)(3) preclude acceptance of the delayed payment of the maintenance fee under 37 CFR 1.378(b).

In view of the requirement to enumerate the steps taken to ensure timely payment of the maintenance fee, the patentee’s lack of knowledge of the need to pay the maintenance fee and the failure to receive the Maintenance Fee Reminder do not constitute unavoidable delay. See *Patent No. 4,409,763*, *supra*. See also Final Rule entitled “Final Rules for Patent Maintenance Fees,” published in the *Federal Register* at 49 *Fed. Reg.* 34716, 34722-23 (August 31, 1984), and republished in the *Official Gazette* at 1046 *Off. Gaz. Pat. Office* 28, 34 (September 25, 1984). Under the statutes and rules, the Office has no duty to notify patentees of the requirement to pay maintenance fees or to notify patentees when the maintenance fees are due. It is solely the responsibility of the patentee to assure that the maintenance fee is timely paid to prevent expiration of the patent. The lack of knowledge of the requirement to pay a maintenance fee and the

failure to receive the Maintenance Fee Reminder will not shift the burden of monitoring the time for paying a maintenance fee from the patentee to the Office.

Thus, evidence that despite reasonable care on behalf of the patentee and/or the patentee’s agents, and reasonable steps to ensure timely payment, the maintenance fee was unavoidably not paid, could be submitted in support of an argument that the delay in payment was unavoidable. For example, an error in a docketing system could possibly result in a finding that a delay in payment was unavoidable if it were shown that reasonable care was exercised in designing and operating the system and that the patentee took reasonable steps to ensure that the patent was entered into the system to ensure timely payment of the maintenance fees.

UNINTENTIONAL DELAY

** >Under 35 U.S.C. 41(c)(1), the director of the Office may< accept late payment of any maintenance fee filed within 24 months after the 6-month grace period, if the delay in payment is shown to the satisfaction of the * >Director of the Office< to have been unintentional. See MPEP § 711.03(c) for a general discussion of the “unintentional” delay standard.

In addition to the timeliness deadline set forth in the preceding paragraph, a petition filed under the unintentional standard of 37 CFR 1.378(c) must include:

- (A) the required maintenance fee set forth in 37 CFR 1.20 (e) through (g);
- (B) the surcharge for an unintentionally expired patent as set forth in 37 CFR 1.20(i)(2); and
- (C) a statement that the delay in payment of the maintenance fee was unintentional.

A person seeking reinstatement of an expired patent should not make a statement that the delay in payment of the maintenance fee was unintentional unless the entire delay was unintentional, including the period from discovery that the maintenance fee was not timely paid until payment of the maintenance fee. For example, a statement that the delay in payment of the maintenance fee was unintentional would not be proper when the patentee becomes aware of an unintentional failure to timely pay the maintenance fee and then intentionally delays filing a petition for reinstatement of the patent under 37 CFR 1.378.

2591 Intervening Rights in Reinstated Patents

Intervening rights in reinstated patents are provided by 35 U.S.C. 41(c)(2) which is reproduced in MPEP § 2501. No patent, the term of which has been maintained as a result of the acceptance of a late payment of a maintenance fee, shall abridge or affect the right of any person or his or her successors in business who made, purchased, imported, or used after the 6-month grace period but prior to the acceptance of the late maintenance fee anything protected by the patent, to continue the use or importation of, or to sell to others to be used or sold, the specific things made, purchased, imported, or used. A court before which such matter is in question may provide for the continued manufacture, use, importation, or sale of the thing made, purchased, imported, or used as specified, or for the manufacture, use, importation, or sale of which

substantial preparation was made after the 6-month grace period but before the acceptance of the late maintenance fee, and it may also provide for the continued practice of any process, practiced, or for the practice of which substantial preparation was made, after the 6-month grace period but prior to the acceptance of the late maintenance fee, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the 6-month grace period but before the acceptance of the late maintenance fee.

2595 Forms [R-2]

The following forms are suggested when submitting a maintenance fee or establishing a fee address for maintenance fee purposes. “Maintenance Fee Transmittal Form,” Form PTO/SB 45; and “Fee Address’ Indication Form,” Form PTO/SB/47.

“FEE ADDRESS” INDICATION FORM

Address to:
Mail Stop M Correspondence
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

INSTRUCTIONS : Only an address associated with a Customer Number can be established as the fee address for maintenance fee purposes (hereafter, fee address). A fee address should be specified when the patentee would like correspondence related to maintenance fees to be mailed to a different address than the correspondence address for the application. If there is a Customer Number already associated with the fee address for the patent or allowed application, check the first box below and provide the Customer Number in the space provided. If there is no Customer Number associated with the fee address for the patent or allowed application, you must check the second box below and attach a Request for Customer Number form (PTO/SB/125). For more information on Customer Numbers, see the Manual of Patent Examining Procedure (MPEP) § 403.

Please recognize as the “Fee Address” under the provisions of 37 CFR 1.363 the address associated with:

Customer Number:

OR

Request for Customer Number (PTO/SB/125) attached hereto in the following listed application(s) for which the Issue Fee has been paid for patent(s).

2601 Introduction [Added R-2]

The reexamination statute was amended on November 29, 1999 by Public Law 106-113. Public Law 106-113 expanded reexamination by providing an “*inter partes*” option; it authorized the extension of reexamination proceedings via an optional *inter partes* reexamination procedure in addition to the existing *ex parte* reexamination procedure. See Title IV, subtitle F (§§ 4601 through 4608) of the “Intellectual Property and Communications Omnibus Reform Act of 1999,” S. 1948 (106th Cong. 1st Sess. (1999)). Section 1000(a)(9), Division B, of Public Law 106-113 incorporated and enacted into law the “Intellectual Property and Communications Omnibus Reform Act of 1999” (S. 1948). As a result, new sections 311-318 of title 35 United States Code directed to the optional *inter partes* reexamination proceeding were added by Public Law 106-113.

The reexamination statute was again amended on November 2, 2002, by Public Law 107-273, 116 Stat. 1758, 1899-1906 (2002). Public Law 107-273 expanded the scope of what qualifies for a substantial new question of patentability upon which a reexamination may be based (see MPEP § 2642, POLICY IN SPECIFIC SITUATIONS, part A), expanded the third party requester's appeal rights to include appeal to the Court of Appeals for the Federal Circuit (see MPEP § 2679), and made technical corrections to the statute. See the 21st Century Department of Justice Appropriations Authorization Act, TITLE III - INTELLECTUAL PROPERTY, Subtitle A - Patent and Trademark Office, Section 13105, of the “Patent and Trademark Office Authorization Act of 2002” - Enacted as part of Public Law 107-273 on November 2, 2002.

The optional *inter partes* alternative provides third party requesters with a greater opportunity to participate in reexamination proceedings, while maintaining most of the features which make reexamination a desirable alternative to litigation in the Federal Courts (e.g., low cost relative to Court proceedings, expedited procedure).

The optional *inter partes* alternative also provides third party requesters with appeal rights to appeal to the Board of Patent Appeals and Interferences (Board) and to participate in the patent owner's appeal to the Board.

For any *inter partes* reexamination proceeding commenced on or after November 2, 2002, the third party requester also has the appeal rights to appeal to the Court of Appeals for the Federal Circuit and to participate in the patent owner's appeal to the Federal Circuit. For an *inter partes* reexamination proceeding commenced prior to November 2, 2002, however, no appeal rights are provided for the third party requester to appeal to the Court of Appeals for the Federal Circuit, nor to participate in the patent owner's appeal to the Court. See MPEP § 2683.

Exercising the *inter partes* option is conditioned (by Public Law 106-113) on the third party requester accepting a statutory estoppel against subsequent review, either by the Office or by a Federal Court, of the issues that were or could have been raised in the reexamination proceeding. These limits, which will be discussed in this Chapter are aimed at preventing *inter partes* reexamination proceedings from being used to harass patent owners.

The final rules to implement the statutory *inter partes* reexamination option was published in the Federal Register on December 7, 2000 (65 Fed. Reg. 76756) and in the *Official Gazette* on January 2, 2001 (1243 O.G. 12). The final rule notice stated that the changes to the rules of practice to implement the optional *inter partes* reexamination provisions of the American Inventors Protection Act of 1999 would become effective on February 5, 2001. The notice includes not only the text of the final rules, but also a

discussion of the rules and analysis of the comments received, which serve as guidance in the implementation of the rules.

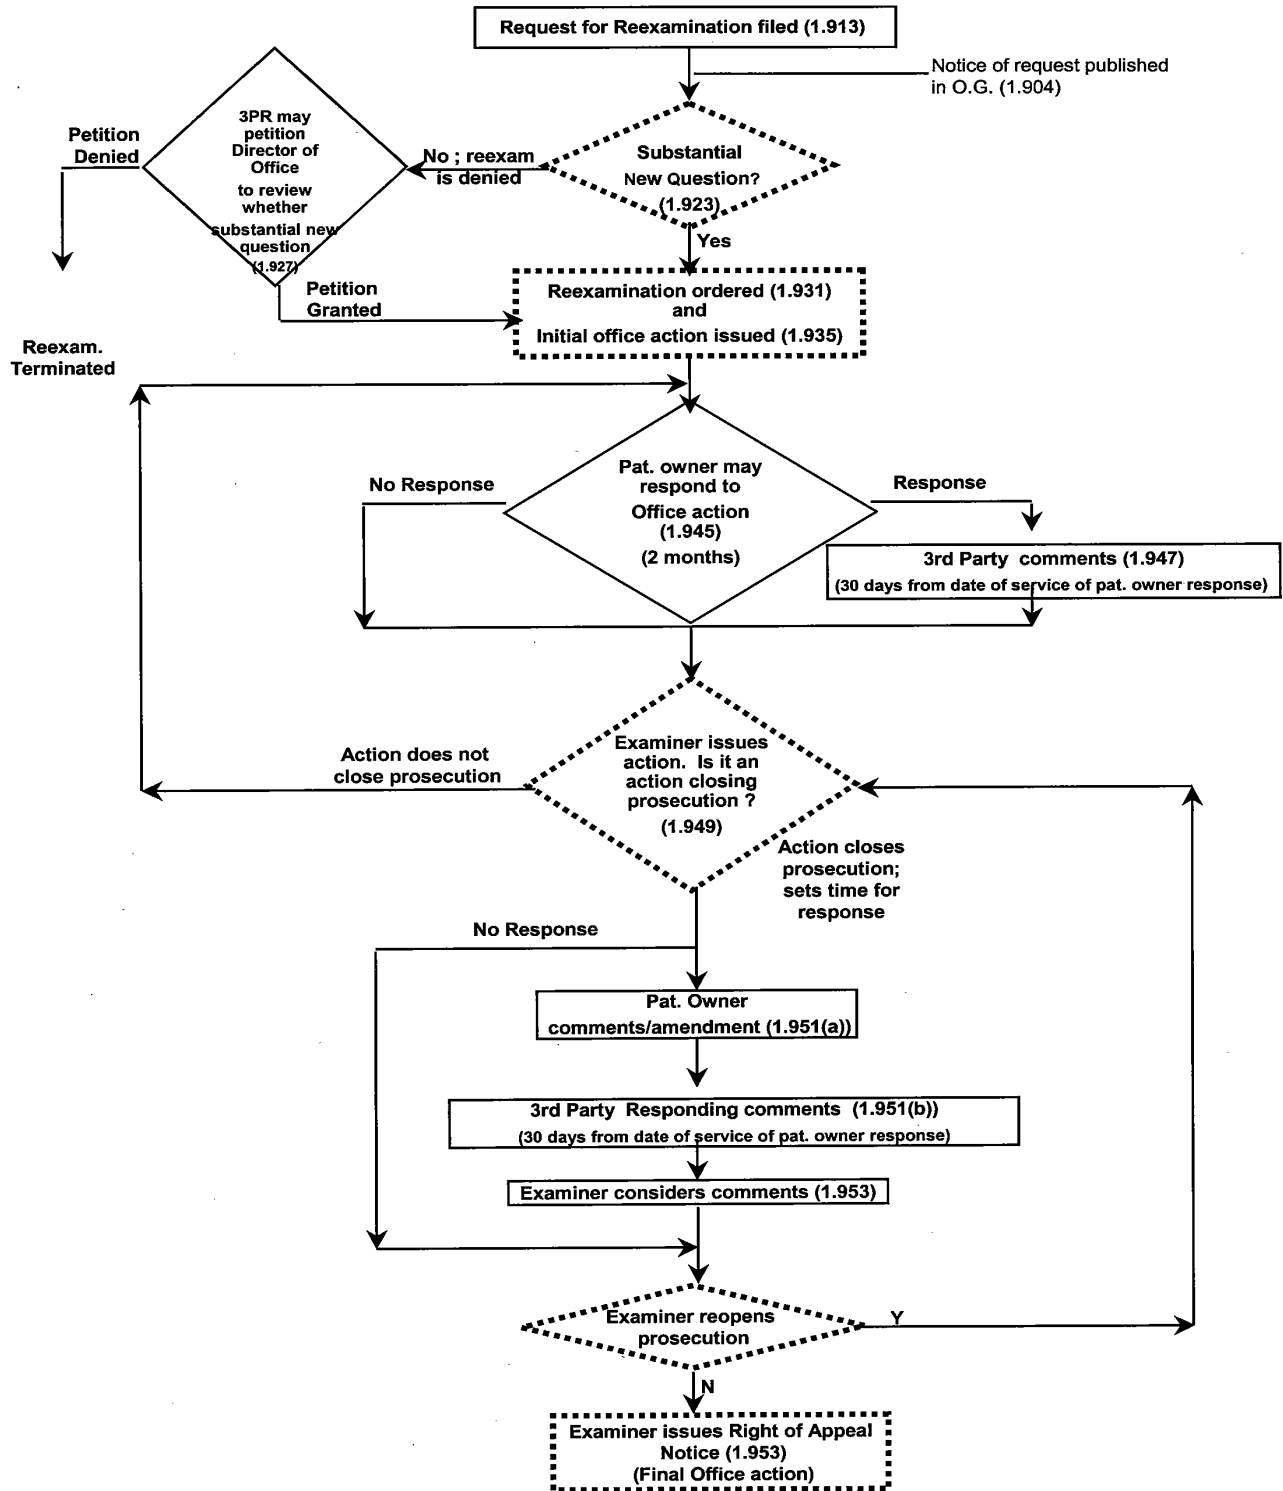

Both the statutory *inter partes* reexamination option, 35 U.S.C., Chapter 31, and the new *inter partes* reexamination rules, 37 CFR, Sub-part H, apply to all reexamination proceedings for patents issuing from applications filed on or after November 29, 1999. For a patent issued from an application filed prior to November 29, 1999, the statutory *inter partes* reexamination option is not available, only the *ex parte* reexamination is available (see 37 CFR, Sub-part D, 37 CFR 1.510 *et seq.*).

See MPEP Chapter 2200 (section 2209 *et seq.*) for guidance on the procedures for *ex parte* reexamination proceedings.

2601.01 Flowcharts [R-3]

The flowcharts show the general flow for the various stages of *inter partes* reexamination proceedings. The first flowchart shows the procedures before appeal. The second flowchart shows the appeal procedure with a single 3rd party requester. The third flowchart shows the procedures following a Board decision for reexamination proceedings commenced prior to November 2, 2002. The fourth flowchart shows the procedures following a Board decision for reexamination proceedings commenced on or after November 2, 2002.

2602 Citation of Prior Art [R-3]

35 U.S.C. 301. Citation of prior art.

Any person at any time may cite to the Office in writing prior art consisting of patents or printed publications which that person believes to have a bearing on the patentability of any claim of a particular patent. If the person explains in writing the pertinency and manner of applying such prior art to at least one claim of the patent, the citation of such prior art and the explanation thereof will become a part of the official file of the patent. At the written request of the person citing the prior art, his or her identity will be excluded from the patent file and kept confidential.

37 CFR 1.501. Citation of prior art in patent files.

(a) At any time during the period of enforceability of a patent, any person may cite, to the Office in writing, prior art consisting of patents or printed publications which that person states to be pertinent and applicable to the patent and believes to have a bearing on the patentability of any claim of the patent. If the citation is made by the patent owner, the explanation of pertinency and applicability may include an explanation of how the claims differ from the prior art. Such citations shall be entered in the patent file except as set forth in §§ 1.502 and 1.902.

(b) If the person making the citation wishes his or her identity to be excluded from the patent file and kept confidential, the citation papers must be submitted without any identification of the person making the submission.

(c) Citation of patents or printed publications by the public in patent files should either: (1) Reflect that a copy of the same has been mailed to the patent owner at the address as provided for in § 1.33(c); or in the event service is not possible (2) Be filed with the Office in duplicate.

37 CFR 1.902. Processing of prior art citations during an *inter partes* reexamination proceeding.

Citations by the patent owner in accordance with § 1.933 and by an *inter partes* reexamination third party requester under § 1.915 or § 1.948 will be entered in the *inter partes* reexamination file. The entry in the patent file of other citations submitted after the date of an order for reexamination pursuant to § 1.931 by persons other than the patent owner, or the third party requester under either § 1.915 or § 1.948, will be delayed until the *inter partes* reexamination proceeding has been terminated. See § 1.502 for processing of prior art citations in patent and reexamination files during an *ex parte* reexamination proceeding filed under § 1.510.

Public Law 106-113 did not affect the manner of the public's citation of prior art under 37 CFR 1.501 in a patent. Likewise, it did not affect the Office's handling of a 37 CFR 1.501 prior art citation in a patent where no reexamination proceeding is pending for that patent when the citation is filed.

Where an *inter partes* reexamination proceeding is pending when a prior art citation is filed, the following applies:

If the prior art citation satisfies 37 CFR 1.501 and is submitted prior to an order to reexamine, the cited documents (citations) will be considered in an *inter partes* reexamination proceeding as a prior art citation would be considered in an *ex parte* reexamination proceeding. See MPEP § 2206.

If the prior art citation satisfies 37 CFR 1.501 and is submitted **after an order to reexamine**, the citation will be considered as follows:

(A) A patent owner citation will normally be considered if it is submitted in time to do so before the reexamination certificate issues.

(B) A third party requester citation will be considered if it is submitted as part of a third party requester comments submission under 37 CFR 1.947 or 1.951(b) (made as required by 37 CFR 1.948), or in a properly filed request for reexamination under 37 CFR 1.915 or 1.510.

(C) Any other prior art citation satisfying 37 CFR 1.501 which is submitted after an order to reexamine will be retained (stored) in the Technology Center (in which the reexamination proceeding is being examined) until the reexamination is *>concluded<*, after which it will be placed in the file of the patent. 37 CFR 1.902.

See MPEP §§ 2202 through 2206 and 2208 for the manner of making such citations and Office handling of same.

2609 *Inter Partes* Reexamination [R-3]

The *inter partes* reexamination statute and rules permit any third party requester to request *inter partes* reexamination of a patent which issued from an original application was filed on or after November 29, 1999, where the request contains certain elements (see 37 CFR 1.915(b)) and is accompanied by the fee required under 37 CFR 1.20(c)(2). The Office initially determines if “a substantial new question of patentability” (35 U.S.C. 312(a)) is presented. If such a new question has been presented, reexamination will be ordered. The reexamination proceedings which follow the order for reexamination are somewhat similar to regular examination procedures in patent applications; however, there are notable differences. For example, there are certain limitations as to the kind of rejections which may be made, a third party requester may participate throughout the proceeding, there is an

“action closing prosecution” and a “right of appeal notice” rather than a final rejection, special reexamination forms are to be used, and time periods are set to provide “special dispatch.” When the prosecution of an *inter partes* reexamination proceeding is terminated, an *inter partes* reexamination certificate is issued to indicate the status of all claims following the reexamination and concludes the reexamination proceeding.

The basic characteristics of *inter partes* reexamination are as follows:

(A) Any third party requester can request *inter partes* reexamination at any time during the period of enforceability of the patent (for a patent issued from an original application filed on or after November 29, 1999);

(B) Prior art considered during reexamination is limited to prior patents or printed publications applied under the appropriate parts of 35 U.S.C. 102 and 103;

(C) A substantial new question of patentability must be present for reexamination to be ordered;

(D) If ordered, the actual reexamination proceeding is essentially *inter partes* in nature;

(E) Decision on the request must be made not later than *three months* from its filing date, and the remainder of proceedings must proceed with “special dispatch” within the Office;

(F) If ordered, a reexamination proceeding will normally be conducted to its conclusion and the issuance of an *inter partes* reexamination certificate;

(G) The scope of the patent claims cannot be enlarged by amendment;

(H) Reexamination and patent files are open to the public, but see paragraph (I) below;

(I) The reexamination file is scanned to provide an electronic copy of the file. All public access to and copying of reexamination proceedings may be had from the electronic copy. The paper file is not available to the public.

2610 Request for *Inter Partes* Reexamination [Added R-2]

35 U.S.C. 311. Request for *inter partes* reexamination

(a) IN GENERAL.— Any third-party requester at any time may file a request for *inter partes* reexamination by the Office of a patent on the basis of any prior art cited under the provisions of section 301.

(b) REQUIREMENTS.— The request shall—

(1) be in writing, include the identity of the real party in interest, and be accompanied by payment of an *inter partes* reexamination fee established by the Director under section 41; and

(2) set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested.

(c) COPY.— The Director promptly shall send a copy of the request to the owner of record of the patent.

37 CFR 1.913. Persons eligible to file request for *inter partes* reexamination.

Except as provided for in § 1.907, any person other than the patent owner or its privies may, at any time during the period of enforceability of a patent which issued from an original application filed in the United States on or after November 29, 1999, file a request for *inter partes* reexamination by the Office of any claim of the patent on the basis of prior art patents or printed publications cited under § 1.501.

37 CFR 1.915. Content of request for *inter partes* reexamination.

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

(b) A request for *inter partes* reexamination must include the following parts:

(1) An identification of the patent by patent number and every claim for which reexamination is requested.

(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability.

(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.

(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document.

(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper.

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

(7) A certification by the third party requester that the estoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination.

(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.

(c) If an *inter partes* request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from that party or be acting in a representative capacity pursuant to § 1.34(a).

(d) If the *inter partes* request does not meet all the requirements of subsection 1.915(b), the person identified as requesting *inter partes* reexamination may be so notified and given an opportunity to complete the formal requirements of the request within a specified time. Failure to comply with the notice may result in the *inter partes* reexamination proceeding being vacated.

Any third-party requester, at any time during the period of enforceability of a **patent issued from an original application filed on or after November 29, 1999**, may file a request for an *inter partes* reexamination by the Office of any claim of the patent based on prior patents or printed publications. (Note: “original application” is defined in MPEP § 2611.)

The request must include the elements set forth in 37 CFR 1.915(b) (see MPEP § 2614) and must be accompanied by the fee as set forth in 37 CFR 1.20(c)(2). See MPEP § 2612 for situations where a party may be barred from filing a request for *inter partes* reexamination.

After the request for *inter partes* reexamination, including the entire fee for requesting reexamination, is received in the Office, no abandonment, withdrawal, or striking, of the request is possible, regardless of who requests the same. In some limited circumstances, such as after a final court decision where all of the claims are held invalid, a reexamination order may be vacated. See MPEP § 2686.04.

2611 Time for Requesting *Inter Partes* Reexamination [Added R-2]

An *inter partes* reexamination can be filed for a patent issued from an original application filed on or after November 29, 1999. For a patent which issued from an original application filed prior to November 29, 1999, the statutory *inter partes* reexamination option is **not available**, only the *ex parte* reexamination is available. See Chapter 2200, section 2209 *et seq.* as to *ex parte* reexamination.

Public Law 106-113, see section 4608 of S.1948, states the effective date and applicability of the Optional *Inter Partes* Reexamination Procedure established by Subtitle F of the Act. Specifically, Section 4608 states that the changes in Subtitle F... “shall take effect on the date of enactment of this Act and

shall apply to any patent that issues from an original application filed in the United States on or after that date.” The phrase “original application” is interpreted to encompass utility, plant and design applications, including first filed applications, continuations, divisionals, continuations-in-part, continued prosecution applications (CPAs) and the national stage phase of international applications. This interpretation is consistent with the use of the phrase in 35 U.S.C. 251 and the federal rules pertaining to reexamination. In addition, MPEP § 201.04(a) defines an original application as “... an application which is not a reissue application.” MPEP § 201.04(a) further states that “[a]n original application may be a first filing or a continuing application”. Therefore, the optional *inter partes* reexamination is available to patents which issued from all applications (except for reissues) filed on or after November 29, 1999. A patent which issued from an application filed prior to November 29, 1999, in which a request for continued examination (RCE) under 37 CFR 1.114 was filed on or after May 29, 2000, however, is not eligible for optional *inter partes* reexamination. An RCE is not considered a filing of an original application; rather it is a continuation of the prosecution of the application in which it is filed. See 35 U.S.C. 132(b), 37 CFR 1.114 and MPEP § 706.07(h).

Under 37 CFR 1.913, any third-party requester may, during the period of enforceability of a patent, file a request for *inter partes* reexamination. This period of enforceability was set by rule since no useful purpose was seen for expending Office resources on deciding patent validity questions in patents which cannot be enforced. In this regard, see *Patlex Corporation v. Mossinghoff*, 758 F.2d 594, 225 USPQ 243, 249 (Fed. Cir. 1985). The period of enforceability is determined by adding 6 years to the date on which the patent expires. The patent expiration date for a utility patent, for example, is determined by taking into account the term of the patent, whether maintenance fees have been paid for the patent, whether any disclaimer was filed as to the patent to shorten its term, any patent term extensions or adjustments for delays within the Office under 35 U.S.C. 154 (see MPEP § 2710, *et seq.*), and any patent term extensions available under 35 U.S.C. 156 for premarket regulatory review (see MPEP § 2750 *et seq.*). Any other relevant information should also be taken into account. In

addition, if litigation is instituted within the period of the statute of limitations, requests for *inter partes* reexamination may be filed after the statute of limitations has expired, as long as the patent is still enforceable against someone.

2612 Persons Who May File a Request [R-3]

37 CFR 1.913. Persons eligible to file request for inter partes reexamination.

Except as provided for in § 1.907, any person other than the patent owner or its privies may, at any time during the period of enforceability of a patent which issued from an original application filed in the United States on or after November 29, 1999, file a request for *inter partes* reexamination by the Office of any claim of the patent on the basis of prior art patents or printed publications cited under § 1.501.

37 CFR 1.907. Inter partes reexamination prohibited.

(a) Once an order to reexamine has been issued under § 1.931, neither the third party requester, nor its privies, may file a subsequent request for *inter partes* reexamination of the patent until an *inter partes* reexamination certificate is issued under § 1.997, unless authorized by the Director.

(b) Once a final decision has been entered against a party in a civil action arising in whole or in part under 28 U.S.C. 1338 that the party has not sustained its burden of proving invalidity of any patent claim-in-suit, then neither that party nor its privies may thereafter request *inter partes* reexamination of any such patent claim on the basis of issues which that party, or its privies, raised or could have raised in such civil action, and an *inter partes* reexamination requested by that party, or its privies, on the basis of such issues may not thereafter be maintained by the Office.

(c) If a final decision in an *inter partes* reexamination proceeding instituted by a third party requester is favorable to patentability of any original, proposed amended, or new claims of the patent, then neither that party nor its privies may thereafter request *inter partes* reexamination of any such patent claims on the basis of issues which that party, or its privies, raised or could have raised in such *inter partes* reexamination proceeding.

As stated in 37 CFR 1.913, except as provided in 37 CFR 1.907, any person other than the patent owner may file a request for *inter partes* reexamination of a patent. The patent owner is precluded from initiating an *inter partes* reexamination of its patent because 35 U.S.C. 311(a)(as technically corrected by Section 13202 of Public Law 107-273) provides that “[a]ny third party requester at any time may file a request for *inter partes* reexamination by the Office of a patent on the basis of any prior art cited under the provisions of section 301.” *Ex parte* reexamination (see Chapter

2200) and reissue (see Chapter 1400) are available to the patent owner to have its patent reviewed.

37 CFR 1.907 defines specific situations where a third party is prohibited from filing a request for an *inter partes* reexamination. 37 CFR 1.915(b)(7) requires the third party requester to certify that the estoppel provisions of 37 CFR 1.907 do not prohibit the filing of the *inter partes* reexamination request. The certification identified in 37 CFR 1.915(b)(7) will constitute a *prima facie* showing that the party requesting the *inter partes* reexamination is not barred from doing so under 37 CFR 1.907. The Office does not intend to look beyond this required certification. It is only in the rare instance where a challenge to the accuracy of the certification is raised by the patent owner, that the question would then need to be addressed.

Some of the persons likely to use *inter partes* reexamination are: licensees, potential licensees, infringers, potential exporters, patent litigants, interference applicants, and International Trade Commission respondents. The name of the person who files the request will not be maintained in confidence, and pursuant to 37 CFR 1.915(b)(8), the filing of the request must include a “statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.”

2613 Representative of Requester [Added R-2]

37 CFR 1.915. Content of request for inter partes reexamination.

(c) If an *inter partes* request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from that party or be acting in a representative capacity pursuant to § 1.34(a).

Where an attorney or agent files a request for an *inter partes* reexamination for an identified client (the third party requester), he or she may act under a power of attorney from the client or may act in a representative capacity under 37 CFR 1.34(a). See 37 CFR 1.915(c). While the filing of the power of attorney is desirable, processing of the reexamination request will not be delayed due to its absence.

If any question of authority to act is raised, proof of authority may be required by the Office.

All correspondence for a third party requester should be addressed to the representative of the requester, unless a specific indication is made to forward correspondence to another address.

A third party requester may not be represented during a reexamination proceeding by an attorney or other person who is not registered to practice before the Office.

2614 Content of Request for *Inter Partes* Reexamination [R-3]

37 CFR 1.915. *Content of request for inter partes reexamination.*

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

(b) A request for *inter partes* reexamination must include the following parts:

(1) An identification of the patent by patent number and every claim for which reexamination is requested.

(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability.

(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.

(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document.

(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper.

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

(7) A certification by the third party requester that the estoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination.

(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.

(c) If an *inter partes* request is filed by an attorney or agent identifying another party on whose behalf the request is being filed, the attorney or agent must have a power of attorney from

that party or be acting in a representative capacity pursuant to § 1.34(a).

(d) If the *inter partes* request does not meet all the requirements of subsection 1.915(b), the person identified as requesting *inter partes* reexamination may be so notified and given an opportunity to complete the formal requirements of the request within a specified time. Failure to comply with the notice may result in the *inter partes* reexamination proceeding being vacated.

I. FEE FOR REQUEST FOR *INTER PARTES* REEXAMINATION

37 CFR 1.915(a) requires the payment of a fee specified in 37 CFR 1.20(c)(2). See MPEP § 2615 for a discussion of the fee to be paid. >It is noted that, unlike a request for *ex parte* reexamination, a request for an *inter partes* reexamination cannot be filed by the patent owner; thus, there will be no proposed amendment to generate excess claims fees under 37 CFR 1.20(c)(3) and (c)(4) at the filing of a request for *inter partes* reexamination.<

II. REQUIRED ELEMENTS OF REQUEST FOR *INTER PARTES* REEXAMINATION

37 CFR 1.915(b) sets forth the required elements of a request for *inter partes* reexamination. The elements are as follows:

“(1) An identification of the patent by patent number and every claim for which reexamination is requested.”

The request should identify the patent by stating the patent number. Although not required by rule, it is strongly suggested that the request should also state the patentee and the title of the patent, so that they are available for comparison, in the event there is an error in the typing of the patent number. The patentee who would be stated is the first named inventor on the patent.

The request should clearly identify every claim that requester wants reexamined.

“(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability.”

The patents and printed publications which are presented in the request to provide a substantial new question of patentability must be listed. A form PTO-1449, **>PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms)<, should be provided by the requester as part

of the request, and all the art (patents and printed publications) cited would be listed thereon.

“(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.”

The request must assert a substantial new question of patentability. A statement which clearly points out what the requester considers to be the substantial new question of patentability which would warrant a reexamination should be included. The statement should apply the cited art (patents and printed publications) to each claim that requester wants reexamined based on prior patents and printed publications. See also MPEP § 2616 and § 2617.

“(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document.”

A copy of each cited patent or printed publication, as well as a translation of each non-English document (or a translation of at least the portion(s) relied upon), is required so that all materials will be available to the examiner for full consideration. See MPEP § 2618.

“(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper.”

A copy of the patent, for which reexamination is requested, should be provided with the specification and claims submitted in a **double** column format. The drawing pages of the printed patent should be presented as they appear in the printed patent; the same is true for the front page of the patent. Thus, a full copy of the printed patent (including the front page) can be used to provide the abstract, drawings, specification, and claims of the patent for the reexamination request. The printed patent is to be reproduced on only one

side of the paper; a two-sided copy of the patent is not proper.

A copy of any prior disclaimer, certificate of correction, or reexamination certificate issued for the patent should also be included with the request; since these are a part of the patent. Again, the copy must have each page plainly written on only one side of a sheet of paper. See also MPEP § 2619.

“(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.”

The request must include a certification that a copy of the request papers has been served on the patent owner. The certification must set forth the name and address employed in serving patent owner. If service was not possible, a duplicate copy of the request must be supplied to the Office.

“(7) A certification by the third party requester that the stoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination.”

The third party requester must make the certification required by 37 CFR 1.915(b)(7) in order to certify that the requester is not precluded from filing the request for reexamination by: 37 CFR 1.907 and the statute upon which those rules are based (35 U.S.C. 317). See MPEP § 2612.

“(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.”

The reexamination request must identify the real party in interest who is responsible for filing the reexamination request. This information will be used by future parties requesting reexamination of the same patent, in making the certifications required by 37 CFR 1.915(b)(8).

The request should be as complete as possible, since there is no guarantee that the examiner will consider other art (patents and printed publications) when making the decision on the request.

Form PTO/SB/58, reproduced following this page, is encouraged for use as the transmittal form and cover sheet of a request for *inter partes* reexamination. The use of this form is encouraged; however, its use is not a requirement of the law nor of the rules.

Following the Form PTO/SB/58, is a sample of a statement on which the request for *inter partes* reexamination is based, which statement would be attached to the Form PTO/SB/58 cover sheet (that would be filled out by requester).

REQUEST FOR INTER PARTES REEXAMINATION TRANSMITTAL FORM

Address to:
**Mail Stop *Inter Partes* Reexam
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450**

Attorney Docket No.:

Date:

1. This is a request for *inter partes* reexamination pursuant to 37 CFR 1.913 of patent number _____ issued _____. The request is made by a third party requester, identified herein below.

2. a. The name and address of the person requesting reexamination is:

b. The real party in interest (37 CFR 1.915(b)(8)) is: _____

3. a. A check in the amount of \$ _____ is enclosed to cover the reexamination fee, 37 CFR 1.20(c)(2);

b. The Director is hereby authorized to charge the fee as set forth in 37 CFR 1.20(c)(2) to Deposit Account No. _____ (submit duplicative copy for fee processing); or

c. Payment by credit card. Form PTO-2038 is attached.

4. Any refund should be made by check or credit to Deposit Account No. _____. 37 CFR 1.26(c). If payment is made by credit card, refund must be made to credit card account.

5. A copy of the patent to be reexamined having a double column format on one side of a separate paper is enclosed. 37 CFR 1.915(b)(5)

6. CD-ROM or CD-R in duplicate, Computer Program (Appendix) or large table
 Landscape Table on CD

7. Nucleotide and/or Amino Acid Sequence Submission
If applicable, items a. – c. are required.

a. Computer Readable Form (CRF)

b. Specification Sequence Listing on:

i. CD-ROM (2 copies) or CD-R (2 copies); or

ii. paper

c. Statements verifying identity of above copies

8. A copy of any disclaimer, certificate of correction or reexamination certificate issued in the patent is included.

9. Reexamination of claim(s) _____ is requested.

10. A copy of every patent or printed publication relied upon is submitted herewith including a listing thereof on Form PTO/SB/08, PTO-1449, or equivalent.

11. An English language translation of all necessary and pertinent non-English language patents and/or printed publications is included.

[Page 1 of 2]

This collection of information is required by 37 CFR 1.915. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: **Mail Stop *Inter Partes* Reexam, Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

12. The attached detailed request includes at least the following items:

- a. A statement identifying each substantial new question of patentability based on prior patents and printed publications. 37 CFR 1.915(b)(3)
- b. An identification of every claim for which reexamination is requested, and a detailed explanation of the pertinency and manner of applying the cited art to every claim for which reexamination is requested. 37 CFR 1.915(b)(1) and (3)

13. It is certified that the estoppel provisions of 37 CFR 1.907 do not prohibit this reexamination. 37 CFR 1.915(b)(7)

14. a. It is certified that a copy of this request has been served in its entirety on the patent owner as provided in 37 CFR 1.33(c).
The name and address of the party served and the date of service are:

Date of Service: _____; or

b. A duplicate copy is enclosed since service on patent owner was not possible.

15. Correspondence Address: Direct all communications about the application to:

The address associated with Customer Number:

OR

Firm or Individual Name

Address

| | | |
|-----------|-------|-----|
| City | State | Zip |
| Country | | |
| Telephone | Email | |

16. The patent is currently the subject of the following concurrent proceeding(s):

- a. Copending reissue Application No. _____.
- b. Copending reexamination Control No. _____.
- c. Copending Interference No. _____.
- d. Copending litigation styled: _____

WARNING: Information on this form may become public. Credit card information should not be included on this form. Provide credit card information and authorization on PTO-2038.

Authorized Signature For Third Party Requester Date

Typed/Printed Name Registration Number, if applicable

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

Attachment to Request for
Inter Partes Reexamination Transmittal Form,
providing information
as to Patent No. 9,999,999

Sir:

Inter Partes reexamination under 35 U.S.C. 311-318 and 37 CFR 1.913 is requested of United States patent number 9,999,999 which issued on July 7, 2001, to Joseph Smith from an application filed November 29, 1999. This patent is still enforceable.

A: Claims for which reexamination is requested.

- Reexamination is requested of claims 1-3 of the Smith patent in view of the earlier United States Patent 594,225 to Berridge which is listed on the attached Information Disclosure form and of which a copy is enclosed.

-Reexamination is also requested of claim 4 of the Smith patent in view of the earlier Swiss Patent 80,555 to Hotopp in view of the disclosure in "American Machinist" magazine, October 16, 1950 issue, on page 169. An English translation of the (German language) Swiss document is enclosed. Copies of the Hotopp and "American Machinist" documents are also enclosed.

B: Explanation of pertinency and manner of applying cited prior art to every claim for which reexamination is requested.

Claims 1-3 of the Smith patent are considered to be fully anticipated under 35 U.S.C. 102 by the prior art patent to Berridge.

Claim 3 of the Smith patent, which is more specific than claims 1 and 2 in all features, is set forth below with an explanation as to how the prior art patent to Berridge meets all the recited feature.

Smith, claim 3:

| | |
|--|--|
| <p>"In a cutting and *>crimping< tool"</p> <p>"the combination with the cutting blades"</p> <p>"and their pivoted handles"</p> | <p>(Berridge page 1, lines 10-13 states his invention is "an improved tool for crimping metal which in preferred form of embodiment is combined with a cutting-tool or shears, forming therewith a combination-tool".)</p> <p>(elements 4 and 5 in Berridge)</p> <p>(elements 1 and 2 in Berridge)</p> |
|--|--|

“of bosses arranged at an angle to and offset from the plane of the shear blades”

(“bosses” as used in the Smith claim is used to mean a projection. The dies 6 and 7 of the Berridge prior art patent document are arranged at the same angle to the plane of the shear blades and are arranged at an angle in the same manner as shown in the drawing figures of the Smith patent.)

“and crimping dies formed meeting faces of said bosses”

(The dies 6 and 7 (bosses) of Berridge have meeting die-faces 12 and 13 (page 1, line 63) for performing crimping operations (page 1, lines 70-74).)

Claim 4 of the Smith patent is considered to be unpatentable under 35 U.S.C. 103 in view of the prior art Swiss patent document to Hotopp and further in view of the prior art magazine publication on page 169 of the October 16, 1950, issue of American Machinist magazine.

Claim 4 of Smith reads as quoted below:

“In a cutting and crimping tool,”

(The prior art Swiss patent document to Hotopp discloses cutting jaws (column 1, line 8) and dies “b” and “c” which may be used for crimping.)

“the combination of a pair of pivoted handles”

(elements “a” and “e” in the prior art document to Hotopp.)

“with cutting jaws at one end and crimping dies on the opposite side of the pivot”

(The prior art document to Hotopp discloses cutting jaws (column 1 line 8) and crimping dies “b” and “c” on the opposite side of pivot “d” from the cutting jaws.)

“and rounded prongs projecting from said cutting jaws”

(Rounded prongs are not specifically disclosed by Hotopp but are shown to be old in the art by the illustration in “American Machinist” magazine under the title “Double-Purpose Pliers Don’t Break Insulation”. To provide the cutting jaws of Hotopp with rounded prongs as shown in the “American Machinist” magazine is considered to be a matter which would have been obvious to a person having ordinary skill in the art at the time the invention was made.)

C: Statement pointing out substantial new question of patentability:

The prior art documents referred to above were not of record in the file of the Smith patent. Since claims 1-4 in the Smith patent are not patentable over these prior art documents, a substantial new question of patentability is raised. Further, these prior art documents are closer to the subject matter of Smith than any prior art which was cited during the prosecution of the Smith patent. These prior art documents provide teachings not provided during the prosecution of the Smith patent.

(Signed)
Kenneth M. Schor
Attorney for Requester
Reg. No. 29760

2615 Fee for Requesting *Inter Partes* Reexamination [Added R-2]

37 CFR 1.915. *Content of request for inter partes reexamination.*

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

37 CFR 1.919. *Filing date of request for inter partes reexamination.*

(a) The filing date of a request for *inter partes* reexamination is the date on which the request satisfies the fee requirement of § 1.915(a).

(b) If the request is not granted a filing date, the request will be placed in the patent file as a citation of prior art if it complies with the requirements of § 1.501.

In order for a request to be accepted, given a filing date, and published in the *Official Gazette*, it is necessary to have paid the fee required under 37 CFR 1.20(c)(2) for filing a request for *inter partes* reexamination. If the entire filing fee is not paid, the request will be considered to be incomplete.

If the entire fee for requesting reexamination has not been paid after requester has been given an opportunity to do so, no determination on the request will be made. The request papers will ordinarily be placed in the patent file as a prior art citation if they comply with the requirements of 37 CFR 1.501. See MPEP § 2206 for handling of prior art citations.

If the request for reexamination is denied or vacated, a refund in accordance with 37 CFR 1.26(c) will be made to the identified requester. See 37 CFR 1.925.

See MPEP § 2634 for processing of the filing fee.

2616 Substantial New Question of Patentability [Added R-2]

Under 35 U.S.C. 312 and 313, the Office must determine whether “a substantial new question of patentability” affecting any claim of the patent has been raised. 37 CFR 1.915(b)(3) requires that the request include “a statement pointing out each substantial new question of patentability based on the cited patents and printed publications....” Accordingly, it is extremely important that the request clearly set forth in detail exactly what the third party requester considers the “substantial new question of patentability” to

be. The request should point out how any questions of patentability raised are substantially different from those raised in the previous examination of the patent before the Office. If a substantial new question of patentability is found as to one claim, all claims will be reexamined during the reexamination process. See also MPEP § 2642.

Questions relating to grounds of rejection other than those based on prior art patents or printed publications should not be included in the request and will not be considered by the examiner if included. Examples of such questions that will not be considered are questions as to public use, on sale, fraud, and compliance of the claims with 35 U.S.C. 112.

Affidavits or declarations which explain the contents or pertinent dates of prior art patents or printed publications in more detail may be considered in reexamination. See MPEP § 2258.

See MPEP § 2617 for a discussion of the statement in the request which applies the prior art patents or printed publications (the art) to establish the substantial new question(s) of patentability upon which the request for reexamination is based.

2617 Statement in the Request Applying Prior Art [Added R-2]

35 U.S.C. 311(b)(2) states that the request for *inter partes* reexamination must “set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested.” 37 CFR 1.915(b)(3) requires that the request include “[a] statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.”

The prior art applied may only consist of prior art patents or printed publications. Substantial new questions of patentability may be based upon the following portions of 35 U.S.C. 102:

35 U.S.C. 102. *Conditions for patentability; novelty and loss of right to patent.*

A person shall be entitled to a patent unless —

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for patent, or

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States, or

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States, or

(e) the invention was described in — (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language; or

(f) he did not himself invent the subject matter sought to be patented, or

(g)(1) during the course of an interference conducted under section 135 or section 291, another inventor involved therein establishes, to the extent permitted in section 104, that before such person's invention thereof the invention was made by such other inventor and not abandoned, suppressed, or concealed, or (2) before such person's invention thereof, the invention was made in this country by another inventor who had not abandoned, suppressed, or concealed it. In determining priority of invention under this subsection, there shall be considered not only the respective dates of conception and reduction to practice of the invention, but also the reasonable diligence of one who was first to conceive and last to reduce to practice, from a time prior to conception by the other.

Similarly, substantial new questions of patentability may also be made under 35 U.S.C. 103 which are based on the above-indicated portions of 35 U.S.C. 102. See also Chapter 2100.

Substantial new questions of patentability must be based on prior art patents or printed publications. Other matters, such as public use or sale, inventorship, 35 U.S.C. 101, 35 U.S.C. 112, fraud, etc., will not be considered when making the determination on the request and should not be presented in the request. Further, a prior art patent or printed publication cannot be properly applied as a ground for reexamination if it is merely used as evidence of alleged prior public use or on sale. The prior art patent or printed publication must be applied directly to claims under 35 U.S.C. 103 and/or an appropriate portion of 35 U.S.C.

102 or relate to the application of other prior art patents or printed publications to claims on such grounds.

The statement applying the prior art may, where appropriate, point out that claims in the patent for which reexamination is requested are entitled only to the filing date of that patent and are not supported by an earlier foreign or United States patent application whose filing date is claimed. For example, even where a patent is a continuing application under 35 U.S.C. 120, the effective date of some of the claims could be the filing date of the child application which resulted in the patent, because those claims were not supported in the parent application. Therefore, any intervening patents or printed publications would be available as prior art. See *In re Ruschetta*, 255 F.2d 687, 118 USPQ 101 (CCPA 1958), *In re van Langenhoven*, 458 F.2d 132, 173 USPQ 426 (CCPA 1972). See also MPEP § 201.11.

Double patenting is normally proper for consideration in reexamination. See *In re Lonardo*, 119 F.3d 960, 43 USPQ2d 1262 (Fed. Cir. 1997). See also the discussion as to double patenting in MPEP § 2258.

The mere citation of new patents or printed publications without an explanation does not comply with 37 CFR 1.915(b)(3). Requester should present *an explanation of how* the cited patents or printed publications are *applied* to all claims which the requester considers to merit reexamination based on patents or printed publications. This not only sets forth the requester's position to the Office, but also to the patent owner.

Affidavits or declarations which explain the contents or pertinent dates of prior art patents or printed publications in more detail may be considered in any reexamination. See MPEP § 2258.

ADMISSIONS

The consideration under 35 U.S.C. 312 of a request for reexamination is limited to prior art patents and printed publications. See *Ex parte McGaughey*, 6 USPQ2d 1334, 1337 (Bd. Pat. App. & Inter. 1988). An admission by the patent owner of record in the file or in a court record may be utilized in combination with a patent or printed publication, for establishing a substantial new question of patentability. An admission, *per se*, may not be the basis for establishing a substantial new question of patentability.

For handling of admissions during the examination stage of a reexamination proceeding (i.e., after reexamination has been ordered), see MPEP § 2258.

The admission can reside in the patent file (made of record during the prosecution of the patent application) or may be presented during the pendency of the reexamination proceeding or in litigation. Admissions by the patent owner as to any matter affecting patentability may be utilized to determine the scope and content of the prior art **in conjunction with patents and printed publications**, whether such admissions are found in patents or printed publications or in some other source. An admission relating to any prior art established in the record of the file or in a court record may be used by the examiner in combination with patents or printed publications in a reexamination proceeding. Information supplementing or further defining the admission would be improper.

Any admission submitted by the patent owner is proper. A third party, however, may not submit admissions of the patent owner made outside the record of the file or a court record. Such a submission would be outside the scope of reexamination.

2618 Copies of Prior Art (Patents and Printed Publications) [Added R-2]

It is required that a copy of each patent or printed publication relied upon, or referred to, in the request be filed with the request (37 CFR 1.915(b)(4)). If any of the documents are not in the English language, an English language translation of all necessary and pertinent parts is also required. An English language summary, or abstract of a non-English language document, is usually **not** sufficient.

It is also helpful to include copies of the prior art considered during earlier prosecution of the patent for which reexamination is requested. The presence of both the old and the new prior art allows a comparison to be made to determine whether a substantial new question of patentability is indeed present.

Copies of parent applications should also be submitted if the parent applications relate to the alleged substantial new question of patentability. For example, a parent application relates to the alleged substantial new question where the patent is a continuation-in-part and the question of patentability relates to support in the parent application for the claims.

2619 Copy of Printed Patent [Added R-2]

The Office will prepare a separate file wrapper for each reexamination request, which will become part of the patent file. Since in some instances it may not be possible to obtain the patent file promptly, requesters are required under 37 CFR 1.915(b)(5) to include a copy of the printed patent for which reexamination is requested. The copy of the patent for which reexamination is requested should be provided in a double column format. The full copy of the printed patent (including the front page) is employed to provide the abstract, drawings, specification, and claims of the patent for the reexamination request and resulting reexamination proceeding.

A copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent must also be included, so that a complete history of the patent (for which reexamination is requested) is before the Office for consideration. A copy of any Federal Court decision, complaint in a pending civil action, or interference decision should also be submitted.

2620 Certificate of Service [Added R-2]

The third party requester must serve the owner of the patent with a copy of the request in its entirety. See 37 CFR 1.915(b)(6). The service should be made to the correspondence address as indicated in 37 CFR 1.33(c). The name and address of the person served and the certificate of service should be indicated on the request.

The most recent address of the attorney or agent of record can be determined by checking the Office's register (roster) of patent attorneys and agents maintained by the Office of Enrollment and Discipline pursuant to 37 CFR 10.5 and 10.11(a). See also MPEP §2666.06 regarding service on the requester and patent owner.

It is required that third party requester set forth the name and address of the party served and the mode method of service on the certificate of service attached to the request. Further, the requester must include a copy of the certificate of service with the copy of the request served on the patent owner.

2622 Address of Patent Owner [R-3]

37 CFR 1.33. *Correspondence respecting patent applications, reexamination proceedings, and other proceedings.*

(c) **>All notices, official letters, and other communications for the patent owner or owners in a reexamination proceeding will be directed to the attorney or agent of record (see § 1.32(b)) in the patent file at the address listed on the register of patent attorneys and agents maintained pursuant to §§ 11.5 and 11.11 of this subchapter, or, if no attorney or agent is of record, to the patent owner or owners at the address or addresses of record. Amendments and other papers filed in a reexamination proceeding on behalf of the patent owner must be signed by the patent owner, or if there is more than one owner by all the owners, or by an attorney or agent of record in the patent file, or by a registered attorney or agent not of record who acts in a representative capacity under the provisions of § 1.34. Double correspondence with the patent owner or owners and the patent owner's attorney or agent, or with more than one attorney or agent, will not be undertaken. If more than one attorney or agent is of record and a correspondence address has not been specified, correspondence will be held with the last attorney or agent made of record.<

In 37 CFR 1.33(c), it is indicated which correspondence address is to be normally used to direct correspondence to the patent owner. In most instances, this will be the address of the first named, most recent attorney or agent of record in the patent file, at his or her current address. As a general rule, the attorney-client relationship terminates when the purpose for which the attorney was employed is accomplished; e.g., the issuance of a patent to the client. However, apart from the attorney-client relationship, the Office has, by regulation, 37 CFR 10.23(c)(8), made it the responsibility of every "practitioner," by virtue of his/her registration, "to inform a client or former client... of correspondence received from the Office... when the correspondence (i) could have a significant effect on a matter pending before the Office, (ii) is received by the practitioner on behalf of a client or former client, and (iii) is correspondence of which a reasonable practitioner would believe under the circumstances the client or former client should be notified." (Emphasis added.) This responsibility of a practitioner to a former client manifestly is not eliminated by withdrawing as an attorney or agent of record. The practitioner if he/she so desires, can minimize the need for forwarding correspondence concerning

issued patents by having the correspondence address changed after the patent issues if the correspondence address is the practitioner's address, which frequently is the case where the practitioner is the attorney or agent of record.

Further, 37 CFR 10.23(c)(8) requires a practitioner to "timely notify the Office of an inability to notify a client or former client of correspondence received from the Office." (Emphasis added.) As the language of this requirement clearly indicates, the duty to notify the Office is a consequence, not of any attorney-client relationship, but rather arises by virtue of the practitioner's status as a registered patent attorney or agent.

If the patent owner desires that a different attorney or agent receive correspondence, then a new power of attorney must be filed. Correspondence will continue to be sent to the attorney or agent of record in the patent file absent a revocation of the same by the patent owner. If the attorney or agent of record specifies a correspondence address to which correspondence is to be directed, such direction should be followed. However, since a change in the correspondence address does not withdraw a power of attorney, a change of the correspondence address by the patent owner does not prevent the correspondence from being directed to the attorney or agent of record in the patent file under 37 CFR 1.33(c).

Submissions to the Office to change the correspondence address or power of attorney in the record of the patent should be addressed as follows:

Where a request for reexamination has been filed and a reexamination proceeding is accordingly pending as to a patent.

Mail Stop *Inter Partes* Reexam
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Where no request for reexamination has been filed and the patent is in storage-

Mail Stop Document Services
Director of the U.S. Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

A sample form for changing correspondence address or power of attorney is set forth below.

*Total of _____ forms are submitted.

This collection of information is required by 37 CFR 1.36. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 3 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<

See MPEP § 324 for establishing assignee's right to take action when submitting a power of attorney.

**2623 Withdrawal of Attorney or Agent
[R-3]**

Any request by an attorney or agent of record to withdraw from a patent will normally be approved

only if at least 30 days remain in any running period for response. See also MPEP § 402.06.

A sample form for a request by an attorney or agent of record to withdraw from a patent is set forth below.

**>

PTO/SB/83 (04-05)

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

**REQUEST FOR WITHDRAWAL
AS ATTORNEY OR AGENT
AND CHANGE OF
CORRESPONDENCE ADDRESS**

| | |
|------------------------|--|
| Application Number | |
| Filing Date | |
| First Named Inventor | |
| Art Unit | |
| Examiner Name | |
| Attorney Docket Number | |

**To: Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450**

Please withdraw me as attorney or agent for the above identified patent application, and

- all the attorneys/agents of record.
- the attorneys/agents (with registration numbers) listed on the attached paper(s), or
- the attorneys/agents associated with Customer Number

NOTE: This box can only be checked when the power of attorney of record in the application is to all the practitioners associated with a customer number.

The reasons for this request are:

CORRESPONDENCE ADDRESS

- 1. The correspondence address is NOT affected by this withdrawal.
- 2. Change the correspondence address and direct all future correspondence to:
 - The address associated with Customer Number:

OR

| | | | |
|--|-------|-----|------------------|
| <input type="checkbox"/> Firm or Individual Name | | | |
| Address | | | |
| City | State | Zip | |
| Country | | | |
| Telephone | | | Email |
| Signature | | | |
| Name | | | Registration No. |
| Date | | | Telephone No. |

NOTE: Withdrawal is effective when approved rather than when received. Unless there are at least 30 days between approval of withdrawal and the expiration date of a time period for response or possible extension period, the request to withdraw is normally disapproved.

This collection of information is required by 37 CFR 1.36. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. **SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.**

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Privacy Act Statement

The **Privacy Act of 1974 (P.L. 93-579)** requires that you be given certain information in connection with your submission of the attached form related to a patent application or patent. Accordingly, pursuant to the requirements of the Act, please be advised that: (1) the general authority for the collection of this information is 35 U.S.C. 2(b)(2); (2) furnishing of the information solicited is voluntary; and (3) the principal purpose for which the information is used by the U.S. Patent and Trademark Office is to process and/or examine your submission related to a patent application or patent. If you do not furnish the requested information, the U.S. Patent and Trademark Office may not be able to process and/or examine your submission, which may result in termination of proceedings or abandonment of the application or expiration of the patent.

The information provided by you in this form will be subject to the following routine uses:

1. The information on this form will be treated confidentially to the extent allowed under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a). Records from this system of records may be disclosed to the Department of Justice to determine whether disclosure of these records is required by the Freedom of Information Act.
2. A record from this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.
3. A record in this system of records may be disclosed, as a routine use, to a Member of Congress submitting a request involving an individual, to whom the record pertains, when the individual has requested assistance from the Member with respect to the subject matter of the record.
4. A record in this system of records may be disclosed, as a routine use, to a contractor of the Agency having need for the information in order to perform a contract. Recipients of information shall be required to comply with the requirements of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(m).
5. A record related to an International Application filed under the Patent Cooperation Treaty in this system of records may be disclosed, as a routine use, to the International Bureau of the World Intellectual Property Organization, pursuant to the Patent Cooperation Treaty.
6. A record in this system of records may be disclosed, as a routine use, to another federal agency for purposes of National Security review (35 U.S.C. 181) and for review pursuant to the Atomic Energy Act (42 U.S.C. 218(c)).
7. A record from this system of records may be disclosed, as a routine use, to the Administrator, General Services, or his/her designee, during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose, and any other relevant (*i.e.*, GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.
8. A record from this system of records may be disclosed, as a routine use, to the public after either publication of the application pursuant to 35 U.S.C. 122(b) or issuance of a patent pursuant to 35 U.S.C. 151. Further, a record may be disclosed, subject to the limitations of 37 CFR 1.14, as a routine use, to the public if the record was filed in an application which became abandoned or in which the proceedings were terminated and which application is referenced by either a published application, an application open to public inspection or an issued patent.
9. A record from this system of records may be disclosed, as a routine use, to a Federal, State, or local law enforcement agency, if the USPTO becomes aware of a violation or potential violation of law or regulation.

<

2624 Correspondence [R-3]

**>

All requests for *inter partes* reexamination (original request papers) and all subsequent *inter partes* reexamination correspondence mailed to the U.S. Patent and Trademark Office via the U.S. Postal Service Mail, other than correspondence to the Office of the General Counsel pursuant to 37 CFR 1.1(a)(3) and 1.302(e), should be addressed:

Mail Stop *Inter Partes* Reexam
Central Reexamination Unit
Office of Patent Legal Administration
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

All such correspondence hand carried to the Office, or submitted by delivery service (e.g., Federal Express, DHL, etc., which are commercial mail or delivery services) should be carried to:

Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

A request for *inter partes* reexamination may not be sent by facsimile transmission (FAX). See 37 CFR 1.6(d)(5). All subsequent *inter partes* reexamination correspondence, however, may be FAXed to:

Central Reexamination Unit
(571) 272-0100.<

After the filing of the request for *inter partes* reexamination, any letters sent to the Office relating to the reexamination proceeding should identify the proceeding by the number of the patent undergoing reexamination, the reexamination request control number assigned, the name of the examiner, and the examiner's Art Unit. The certificate of mailing or transmission procedures (37 CFR 1.8) and "Express Mail" procedure (37 CFR 1.10) may be used to file any paper in the existing *inter partes* reexamination proceeding.

Communications from the Office to the patent owner will be directed to the first named, most recent attorney or agent of record in the patent file at the cur-

rent address on the Office's register of patent attorneys and agents, or to the patent owner's address if no attorney or agent is of record, 37 CFR 1.33(c).

Amendments and other papers filed on behalf of patent owners must be signed by the patent owners, or the registered attorney or agent of record in the patent file, or any registered attorney or agent acting in a representative capacity under 37 CFR 1.34(a).

Double correspondence with the patent owners and the attorney or agent normally will not be undertaken by the Office.

Where no correspondence address is otherwise specified, correspondence will be with the most recent attorney or agent made of record by the patent owner.

Note MPEP § 2620 for certificate of service.

>

See MPEP § 2224 for correspondence in *ex parte* reexamination proceedings.

<

2625 Untimely Paper Filed Prior to First Office Action [R-3]

37 CFR 1.939. Unauthorized papers in inter partes reexamination

(a) If an unauthorized paper is filed by any party at any time during the *inter partes* reexamination proceeding it will not be considered and may be returned.

(b) Unless otherwise authorized, no paper shall be filed prior to the initial Office action on the merits of the *inter partes* reexamination.

37 CFR 1.902. Processing of prior art citations during an inter partes reexamination proceeding.

Citations by the patent owner in accordance with § 1.933 and by an *inter partes* reexamination third party requester under § 1.915 or § 1.948 will be entered in the *inter partes* reexamination file. The entry in the patent file of other citations submitted after the date of an order for reexamination pursuant to § 1.931 by persons other than the patent owner, or the third party requester under either § 1.915 or § 1.948, will be delayed until the *inter partes* reexamination proceeding has been terminated. See § 1.502 for processing of prior art citations in patent and reexamination files during an *ex parte* reexamination proceeding filed under § 1.510.

Pursuant to 37 CFR 1.939, after filing of a request for *inter partes* reexamination, no papers directed to the merits of the reexamination other than (A) citations of patents or printed publications under 37 CFR 1.501 and 1.933, (B) another complete request under 37 CFR 1.510 or 37 CFR 1.915, or (C) notifications pursuant to MPEP § *>2686<, should be filed with

the Office prior to the date of the first Office action in the reexamination proceeding. Any papers directed to the merits of the reexamination, other than those under 37 CFR 1.501, 1.933, 1.510 or 1.915, or under MPEP § 2686, filed prior to the date of the first Office action will be returned to the sender without consideration. A copy of the letter accompanying the returned papers will be made of record in the patent file. However, no copy of the returned papers will be retained by the Office. If the submission of the returned papers is appropriate later in the proceedings, they may be filed, and accepted by the Office, at that time. See *Patlex Corp. v. Mossinghoff*, 771 F.2d 480, 226 USPQ 985 (Fed. Cir. 1985); *In re Knight*, 217 USPQ 294 (Comm'r Pat.1982); and *In re Amp*, 212 USPQ 826 (Comm'r Pat. 1981) which addressed the situation analogous to the present situation for *ex parte* reexamination proceedings.

2626 Initial Processing of Request for *Inter Partes* Reexamination [Added R-2]

The opening of all mail marked "Mail Stop *Inter Partes* Reexam" and all initial clerical processing of requests for *inter partes* reexamination will be performed by the reexamination preprocessing staff in the Office of Patent Legal Administration, Central Reexamination Unit.

2627 Incomplete Request for *Inter Partes* Reexamination [Added R-2]

37 CFR 1.915. *Content of request for inter partes reexamination.*

(a) The request must be accompanied by the fee for requesting *inter partes* reexamination set forth in § 1.20(c)(2).

37 CFR 1.919. *Filing date of request for inter partes reexamination.*

(a) The filing date of a request for *inter partes* reexamination is the date on which the request satisfies the fee requirement of § 1.915(a).

If the required fee under 37 CFR 1.20(c)(2) is not paid in full, the request for *inter partes* reexamination is incomplete and will not be considered on its merits nor have a notice of its filing announced in the *Offi-*

cial Gazette. The request is considered to have a "filing date" under 37 CFR 1.919(a) only when the entire fee is paid. Until the entire fee is received, no control number or filing date will be assigned, and technically, no reexamination proceeding exists.

If no fee is received, or only a portion of the fee is received, the reexamination preprocessing staff of the Central Reexamination Unit (CRU) will notify the requester of the defect in writing and give the requester a specified time, normally one month, to complete the request. This notice is not entered in the system. A telephone call may also be made to the requester indicating the amount of the insufficient fee. If the request is not timely completed, any partial fee will be returned by the CRU to the requester along with a notice that the reexamination request has not been accepted and the process has been terminated. The request itself will be treated as a citation under 37 CFR 1.501 if it complies therewith. If the request does not comply with 37 CFR 1.501, the request papers will also be returned to the requester by the CRU.

2628 Informal Request for *Inter Partes* Reexamination [Added R-2]

37 CFR 1.915. *Content of request for inter partes reexamination.*

(b) A request for *inter partes* reexamination must include the following parts:

(1) An identification of the patent by patent number and every claim for which reexamination is requested.

(2) A citation of the patents and printed publications which are presented to provide a substantial new question of patentability.

(3) A statement pointing out each substantial new question of patentability based on the cited patents and printed publications, and a detailed explanation of the pertinency and manner of applying the patents and printed publications to every claim for which reexamination is requested.

(4) A copy of every patent or printed publication relied upon or referred to in paragraphs (b)(1) through (3) of this section, accompanied by an English language translation of all the necessary and pertinent parts of any non-English language document.

(5) A copy of the entire patent including the front face, drawings, and specification/claims (in double column format) for which reexamination is requested, and a copy of any disclaimer, certificate of correction, or reexamination certificate issued in the patent. All copies must have each page plainly written on only one side of a sheet of paper.

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at

the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

(7) A certification by the third party requester that the estoppel provisions of § 1.907 do not prohibit the *inter partes* reexamination.

(8) A statement identifying the real party in interest to the extent necessary for a subsequent person filing an *inter partes* reexamination request to determine whether that person is a privy.

(d) If the *inter partes* request does not meet all the requirements of subsection 1.915(b), the person identified as requesting *inter partes* reexamination may be so notified and given an opportunity to complete the formal requirements of the request within a specified time. Failure to comply with the notice may result in the *inter partes* reexamination proceeding being vacated.

All requests for *inter partes* reexamination which are accompanied with the entire fee under 37 CFR 1.20(c)(2) will be assigned a filing date. If the fee under 37 CFR 1.20(c)(2) has been paid, but the request for *inter partes* reexamination does not contain all the elements required by 37 CFR 1.915(b), the request is considered to be informal. The reexamination preprocessing staff of the Central Reexamination Unit will attempt to notify the requester of any informality in the request in order to give the requester time to respond before a decision is made on the request. If the requester does not timely respond and correct the informality, the decision on the request will be made on the information presented. The decision on the request will either:

(A) Vacate the reexamination proceeding based upon the informality of the request; or

(B) Decide the request as to whether the information which is presented raises “a substantial new question of patentability.” If yes, the request for reexamination will be granted, if not the request will be denied.

The choice as to which of the above options to exercise will be made at the Office’s sole discretion. In making the decision, the Office will take into account the nature of the informality, and how it affects or impacts the reexamination proceeding.

In the event the certification required by 37 CFR 1.915(b)(7) has not been included with the request for reexamination, and is not later provided even after request by the Office for same; the Office may (at its option) construe the filing of the reexamination

request as a constructive certification under 37 CFR 1.915(b)(7), absent evidence to the contrary. If so, the requester and patent owner shall be so-notified in the decision on the request.

2629 Notice of Request for *Inter Partes* Reexamination in *Official Gazette* [Added R-2]

37 CFR 1.11. Files open to the public.

(c) All requests for reexamination for which the fee under § 1.20(c) has been paid, will be announced in the *Official Gazette*. Any reexaminations at the initiative of the Director pursuant to § 1.520 will also be announced in the *Official Gazette*. The announcement shall include at least the date of the request, if any, the reexamination request control number or the Director initiated order control number, patent number, title, class and subclass, name of the inventor, name of the patent owner of record, and the examining group to which the reexamination is assigned.

(d) All papers or copies thereof relating to a reexamination proceeding which have been entered of record in the patent or reexamination file are open to inspection by the general public, and copies may be furnished upon paying the fee therefor.

Notice of filing of all complete requests for *inter partes* reexamination will be published in the *Official Gazette*, approximately 4-5 weeks after filing.

Under 37 CFR 1.11(c), reexamination requests will be announced in the *Official Gazette*. The reexamination preprocessing staff of the Office of Patent Legal Administration, Central Reexamination Unit (CRU) will complete a form with the information needed to print the notice. The forms are forwarded at the end of each week to the Office of Publications for printing in the *Official Gazette*. The *Official Gazette* notice will appear in the notice section of the *Official Gazette* under the heading of Requests for *Inter Partes* Reexamination Filed and will include the name of any requester along with the other items set forth in 37 CFR 1.11(c).

In addition, a record of requests filed will be located in the Patent Search Room and in the reexamination preprocessing area of the CRU. Office personnel may use the PALM system to determine if a request for reexamination has been filed in a particular patent. See MPEP § 2632.

2630 Constructive Notice to Patent Owner [Added R-2]

In some instances, it may not be possible to deliver mail to the patent owner because no current address is available. If all efforts to correspond with the patent owner fail, the reexamination proceeding will proceed without the patent owner. The publication in the Official Gazette of the notice of the filing of the *inter partes* reexamination request will serve as constructive notice to the patent owner in such an instance.

2631 Processing of Request Corrections [Added R-2]

Any payment of the balance of the *inter partes* reexamination request fee should be marked "Mail Stop *Inter Partes* Reexam," so that the fee may be promptly forwarded to the reexamination preprocessing staff of the Central Reexamination Unit (CRU). If the fee payment completes the payment of the required fee, the reexamination request will be processed, notice will be published in the *Official Gazette*, and the request will be forwarded to the appropriate Technology Center (TC) for determination.

A correction of a defect other than the fee (see 37 CFR 1.915(b)(1)-(8)) should likewise be marked "Mail Stop *Inter Partes* Reexam." The CRU, upon receipt of the correction submission, will process it and direct it to a CRU Legal Instruments Examiner (LIE). The LIE will check the correction submission for timeliness and then perform the appropriate clerical processing, including entering the submission in the file of the reexamination.

2632 Public Access [R-3]

**>Reexamination files are open to inspection by the general public by way of the Public PAIR via the USPTO Internet site. In viewing the images of the reexamination proceedings, members of the public will be able to view the entire content of the reexamination file. To access Public PAIR, a member of the public would (A) go to the USPTO web site at <http://www.uspto.gov>, (B) click on "Patents," (C) under "Check Status, View Papers..." click on "Status & IFW," and (D) under "Patent Application Information

Retrieval" enter the control number of the reexamination proceeding.

If a copy of the reexamination file is requested, it may be ordered from the Document Services Division of the Office of Public Records (OPR). Orders for such copies must indicate the control number of the reexamination proceeding. Orders should be addressed as follows:

Mail Stop Document Services
Director of the U.S. Patent and Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

Requests for a copy of a request may also be sent via e-mail to: dsd@uspto.gov, and the cost of the copy may be charged to a credit card or deposit account. Alternatively, a copy may be obtained from IFW via PAIR.

To obtain a "certified copy" of a reexamination file, a CD-ROM may be purchased from Document Services Division of OPR.

2632.01 Determining If a Reexamination Was Filed for a Patent [R-3]

<

DETERMINING ON PALM IF A REEXAMINATION REQUEST HAS BEEN FILED FOR A GIVEN PATENT NUMBER

Both the Internet and the USPTO Intranet can be accessed to determine if a reexamination request has been filed for a particular patent.

A. Using the Internet

- Log on to the Internet.
- Go to USPTO Website located at <http://www.uspto.gov>.
- Click on "Patents" located on the left side of the screen.
- **> Under "Check Status, View Papers..." click on "Status & IFW."
- On the next screen, under "Patent Application Information Retrieval" click "Patent Number" as the "Select Search Method."
- Enter the patent number (e.g., 5806063 – no commas are to be inserted) in "Enter Number" box.
- Click on "Submit."

- Click the “Continuity Data” button.<
- Scroll to “Child Continuity Data” where any related reexamination will be listed. *Ex parte* reexaminations are identified by the unique “90” series code, e.g., 90/005,727. *Inter partes* reexaminations are identified by the unique “95” series code, e.g., 95/000,001.
- Clicking on the underlined (hyper linked) reexamination number will reveal the “Contents” for the reexamination file.

B. Using the USPTO Intranet

- From the USPTO Intranet site <http://ptoweb/ptointranet/index.htm>, Office personnel can click on “PALM” and then “General Information” which opens the PALM INTRANET General Information Display.
- From here, enter the patent number in the box labeled Patent #.
- Click on “Search” and when the “Patent Number Information” appears, click on “Continuity Data” to obtain the reexamination number.

Any reexamination for the patent number will be listed.

There will be about a ten (10) day lag between filing and data entry into the PALM database.

2633 Processing in Technology Center [R-3]

The processing and handling of an *inter partes* reexamination in the Technology Center (TC) will include:

- (A) Initial Supervisory Patent Examiner (SPE) assignment of the *>reexamination< to a primary examiner;
- (B) Examination of the *>reexamination< by the patent examiner;
- (C) Clerical activity needed to support that examination;
- (D) The *inter partes* reexamination functions of the Special Program Examiners (SPREs) who are supported in these functions by the Paralegal Specialists;
- (E) The administrative functions of reexamination performed by the TC Directors and SPEs; and
- (F) Other instances that the Central Reexamination Unit (CRU) Reexamination Legal Advisor (RLA)

deems it appropriate for the TC to have possession of the *>reexamination file<.

The working groups in the TCs have designated the legal instrument examiners (LIEs) to act as reexamination clerks, as part of their assigned duties, and thus to perform those clerical duties and responsibilities in the TCs which are unique to reexamination.

Inter Partes reexamination PALM processing in the TC will be limited to charging the *>reexamination< to the examiner, PALM transactions to indicate receipt of the *>reexamination< in the TC, case flagging as needed by the SPREs, and return of the case to the CRU.

I. CRU INTERFACE WITH TECHNOLOGY CENTER OPERATION

The CRU will administer, oversee, and monitor *inter partes* reexamination. Additionally, in conjunction with and in support of TC handling of *inter partes* reexaminations, the CRU will perform, in *inter partes* reexamination proceedings, (A) all processing of papers filed by parties and entry of amendments, (B) all mailing of Office actions and other correspondence, and (C) all processing of fees. CRU personnel will be available to respond to inquiries by TC personnel as to TC handling of *inter partes* reexaminations. Such inquiries to the CRU should be forwarded via the TC SPREs, so that they will be aware of all reexamination practice in the TC and thus serve as a focal point for the TC in reexamination.

II. TECHNOLOGY CENTER HANDLING OF INTER PARTES REEXAMINATION

After the *>reexamination< file has been reviewed in the CRU to ensure it is ready for examination, the CRU will forward the *>reexamination< to the TC for docketing of the *>reexamination< to the examiner assigned to the reexamination proceeding.

In the event the SPE believes that another Art Unit should examine the *>reexamination<, see MPEP § 2637 for procedures for transferring the *>reexamination<.

After the examiner receives the new *inter partes* reexamination * file from his/her SPE, the examiner will, no later than one week after receipt of the *inter partes* reexamination file, prepare for an initial consultation conference with the RLA and notify the

SPRE that he/she is ready for the conference and specify the days and times that he/she is available. The SPRE will schedule the consultation conference >with the RLA through the CRU<. At the scheduled conference, the consultation will be conducted with the examiner, a TC SPRE, and the RLA being present. The SPE may also attend the conference but the SPEs attendance is not mandatory. At the consultation conference, the RLA will provide instructions as to preparation of the decision on the request for *inter partes* reexamination and (where reexamination is granted) a first action which would accompany an order granting reexamination. In the rare circumstances where a first action is not to be provided with the grant of reexamination (see MPEP § 2660), the RLA will so instruct the examiner. The consultation conference should be completed within two weeks of when the case was initially forwarded to the TC SPRE by the CRU.

After the consultation conference, the examiner will prepare a decision on the request for reexamination, and, where reexamination is granted, a first Office action to accompany the decision no later than two weeks from the date of the consultation conference. The decision and the Office action are typed in the TC on a “special” basis and the typed decision and Office action are forwarded to a **primary examiner** for signature. Although a non-primary examiner may be assigned a reexamination to examine (where that examiner is the only examiner who did not examine the application for the patent being reexamined and yet is familiar with the art), a primary examiner must review and sign every action in the reexamination proceeding. After the primary examiner signs the decision and/or action, the appropriate materials will be compiled and any needed copying will be performed by the TC support staff. Thereafter, the >reexamination< file will be forwarded to the TC SPRE for review. The TC SPRE will then arrange for the file to be PALMed out and >the decision and/or action to be< **hand-carried** directly to the CRU.

The SPRE will have one (1) week from the SPRE’s receipt of the >reexamination file< from the examiner to perform the review, to obtain needed corrections, and to forward the >reexamination file< to the CRU. **At the very latest**, the decision and action prepared by the examiner must be forwarded to the CRU within nine (9) weeks of the filing date of the request. After the SPRE approves the Office action, ** the

examiner’s decision and action **>are< **hand-carried** directly to the CRU for a final review and mailing. In the CRU, the RLA performs a general review of the decision and action, and then the decision and action are mailed from the CRU. In conjunction with the mailing, any appropriate processing (e.g., PALM work, update scanning) is carried out by the staff of the CRU.

After the mailing of the decision and the first action, the **>CRU will retain jurisdiction over the reexamination proceeding<. Upon receipt of a patent owner response to the action (and third party requester comments where permitted) by the CRU, or upon the expiration of the time to submit same, the SPE and the examiner will be notified and the >reexamination< file is forwarded to the TC. The examiner will review the response and comments, decide on a proposed course of action, consult with the RLA (with the SPRE being present) and then prepare the appropriate action for the >reexamination<. The action will be reviewed and mailed as discussed above. Further prosecution and examination will follow in a similar manner. See MPEP § 2671.03 for handling of patentability review conferences prior to Action Closing Prosecution (ACP) and prior to Right of Appeal Notice (RAN). See MPEP § 2676 for appeal conferences and MPEP § 2677 >for< Examiner’s Answers. **

Ordinarily, there is no counting of actions in a reexamination proceeding; all time spent on reexamination is reported as set forth in MPEP § 2638. Where the reexamination has been merged with a reissue (see MPEP § 2686.03), the reissue counting will be done by the TC.

III. TECHNOLOGY CENTER PREPARATION OF THE ACTION FOR MAILING PRIOR TO FORWARDING TO THE CRU

After an action by the examiner is completed, the TC clerical staff will make copies of references >as needed< and a copy of the Office action for the patent owner and the third party requester. Copying of the Office action and any references will be performed in the TC to ensure that copies are provided **>to< all parties entitled to receive copies.

A transmittal form PTOL-501 with the third party requester’s address will be completed, if a copy for mailing is not already **>available<. The transmittal

form PTOL-501 is used to forward copies of Office actions (and any references cited in the actions) to the third party requester. Whenever an Office action is issued, a copy of this form will be made and attached to a copy of the Office action. The use of this form removes the need to retype the third party requester's address each time a mailing is required.

2634 Fee Processing and Procedure [R-3]

All fees in an *inter partes* reexamination proceeding (including the fee for filing the request for *inter partes* reexamination (see MPEP § 2615)) are processed by the Central Reexamination Unit (CRU), prior to sending the case to the Technology Center (TC). The fees will be posted by the CRU via the Revenue Accounting and Managing (RAM) program.

In an *inter partes* reexamination proceeding, fees are due for the request (37 CFR 1.915(a)), for the addition of claims by the patent owner during the proceeding (excess claims fees under 37 CFR 1.20(c)(3) and (c)(4)), for an extension of time under 37 CFR 1.956, and for any appeal, brief, and oral hearing under 37 CFR 1.20(b). Any petitions filed under 37 CFR 1.137, 37 CFR 1.182 or 37 CFR 1.183 relating to a reexamination proceeding require fees (37 CFR 1.17(f), (l) and (m)).

No fee is required for the issuance of a reexamination certificate.

Small entity reductions under 35 U.S.C. 41(h)(1) are available to the patent owner for appeal fees, brief fees, oral hearing fees, excess claims fees, and the petition fee under 37 CFR 1.958. Small entity reductions are available to the third party requester for appeal fees, brief fees, and oral hearing fees. Small entity reductions in fees are not available for the reexamination filing fee, for extension of time fees, nor for petition fees for petitions filed under 37 CFR 1.182 and 1.183.

When a fee is required in a merged proceeding, only a single fee is needed, even though multiple copies of the submissions (one for each file) are required. See MPEP § 2686.01.

2635 Record Systems [R-3]

The Patent Application Locating and Monitoring (PALM) system is used to support the reexamination

process. The sections below delineate PALM related activities.

(A) *Reexamination File Data on PALM* - The routine PALM retrieval transactions are used to obtain data on reexamination files. From the USPTO Intranet site <http://ptoweb/ptointranet/index.htm> "PALM" and then "General Information" which opens the PALM INTRANET General Information Display. From here, enter the patent number in the box labeled Patent #. Then click on "Search" and when the "Patent Number Information" appears, click on "Continuity Data" to obtain the reexamination number.

(B) *Reexamination e-File* - The papers of a reexamination proceeding may be viewed on IFW. PALM provides information for the reexamination proceeding as to the patent owner and requester, contents, status, and related Office proceedings (applications, patents and reexamination proceedings). Some of the data entry for reexamination in PALM is different from that of a regular patent application. There are also differences in the status codes - all reexamination proceedings have status codes in the "400" or "800" range, while patent applications have status codes ranging from "020" to over "100."

(C) *Patent File Location Control for Patents Not Available on IFW, i.e., Available Only in Paper File* - The movement of patent files related to requests for reexamination throughout the Office is monitored by the PALM system in the normal fashion. The reexamination file and patent file will be kept together, from initial receipt until the reexamination is assigned to an examiner for determination. At this point, the patent file will be charged to the examiner assigned the reexamination file, and the patent file will be kept in the examiner's room until the proceeding is concluded. After the reexamination proceeding has been concluded, the patent file should be forwarded by the examiner, via the SPRE, with the reexamination file to the Central Reexamination Unit (CRU). After review and processing in the CRU and by the Office of Patent Legal Administration as appropriate, the patent and reexamination files will be forwarded to the Office of Publications. The Office of Publications will forward the patent file and the reexamination file to the Record Room after printing of the certificate.

(D) *Reporting Events to PALM* - The PALM system is used to monitor major events that take place in processing reexamination proceedings. All major

examination events are reported. The mailing of examiner's actions are reported, as well as owner's responses and third party requester comments. The CRU support staff, and the Technology Center (TC) reexamination clerks and paralegals, are responsible for reporting these events using the reexamination icon and window initiated in the PALM EXPO program. Events that will be reported include the following:

- (1) Determination Mailed-Denial of request for reexamination;
- (2) Determination Mailed-Grant of request for reexamination;
- (3) Petition for reconsideration of determination received;
- (4) Decision on petition mailed-Denied;
- (5) Decision on petition mailed-Granted;
- (6) Mailing of all examiner actions;
- (7) Patent owner responses to Office Actions
- (8) Third party requester comments after a patent owner response.

All events will be permanently recorded and displayed in the "Contents" portion of PALM. In addition, status representative of these events will also be displayed.

(E) *Status Reports* - Various weekly "tickler" reports can be generated for each TC, given the event reporting discussed above. The primary purpose of these computer outputs is to assure that reexaminations are, in fact, processed with "special dispatch".

**

2636 Assignment of Reexamination [R-3]

I. EXAMINER ASSIGNMENT OF THE RE-EXAMINATION PROCEEDING

Reexamination requests will normally be assigned to the art unit which examines the class and subclass in which the patent to be reexamined is currently classified as an original. In that art unit, the Supervisory Patent Examiner (SPE) assigns the reexamination request to a primary examiner, other than the examiner that originally examined the patent (see "Examiner Assignment Policy" below), who is most familiar with the claimed subject matter of the patent. Where no such knowledgeable primary examiner is available, the reexamination may be assigned to an assis-

tant examiner. In such an instance the SPE must sign all actions and take responsibility for all actions taken.

(A) *Examiner Assignment Policy*

It is the policy of the Office that the SPE will assign the reexamination request to an examiner different from the examiner(s) who examined the patent application. Thus, under normal circumstances, the reexamination request will not be assigned to a SPE, primary examiner, or assistant examiner who was involved in any part of the examination of the patent for which reexamination is requested (e.g., by preparing/signing an action), or was so involved in the examination of the parent of the patent. This would preclude assignment of the request to an examiner who was a conferee in an appeal conference or patentability review conference in an earlier concluded examination of the patent (e.g., the application for patent, a reissue, or a prior concluded reexamination proceeding). The conferee is considered to have participated in preparing the Office action which is preceded by the conference.

Exceptions to this general policy include cases where the SPE is the only primary examiner in the art unit, or where the original examiner is the only examiner with adequate knowledge of the relevant technology to examine the case. In the unusual case where there is a need to assign the request to the original examiner, the assignment must be approved by the *>Technology Center (TC)< Director, and the fact that such approval was given by the TC Director must be stated (by the examiner) in the decision on the request for reexamination.

It should be noted that while an examiner who examined an earlier **concluded** reexamination proceeding is generally excluded from assignment of a newly filed reexamination, *if the earlier reexamination is still ongoing, the same examiner will be assigned the new reexamination.*

Copending reissue and reexamination proceeding:

- (1) When a reissue application is pending for a patent, and a reexamination request is filed for the same patent, the reexamination request generally is assigned to a different examiner even though the examiner who examined the patent application is handling the reissue application. If the reexamination request is granted and the reissue and reexamination

proceedings are merged (see MPEP § 2686.03), the merged proceeding will be handled by the examiner assigned the reexamination proceeding. Thus, the reissue application would be transferred (reassigned) from the original examiner to the examiner who ordered reexamination

(2) When a reexamination proceeding is pending for a patent, and a reissue application is filed for the same patent:

(a) Where reexamination has already been ordered (granted) in the reexamination proceeding, the Office of Patent Legal Administration (OPLA) should be notified by e-mail, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to OPLA at the time of the e-mail notification to OPLA (see MPEP § 2686.03). If the reissue and reexamination proceedings are merged by OPLA, the reissue will be assigned in the TC (upon return of the files from OPLA) to the examiner handling the reexamination proceeding. If the reissue and reexamination proceedings are not merged by OPLA, the decision will provide guidance as to assignment of the reissue proceeding depending on the individual fact situation.

(b) If reexamination has not yet been ordered (granted) in the reexamination proceeding, the Office of the TC Special Program Examiner (SPRE) will ensure that the reissue application is not assigned nor acted on, and the decision on the reexamination request will be made. If reexamination is denied, the reexamination proceeding will be concluded pursuant to MPEP § 2694, and the reissue application assigned in accordance with MPEP § 1440. If reexamination is granted, a first Office action will not accompany the order granting reexamination. The signed order should be (after review by the TC SPRE) promptly forwarded to the OPLA for mailing. At the same time, the OPLA should be notified by e-mail that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to OPLA at the time of the e-mail notification to OPLA (see MPEP § 2686.03). If the reissue and reexamination proceedings are merged by OPLA, the reissue will be

assigned in the TC (upon return of the files from OPLA) to the examiner handling the reexamination proceeding. If the reissue and reexamination proceedings are not merged by OPLA, the decision will provide guidance as to assignment of the reissue proceeding depending on the individual fact situation.

(B) Consequences of Inadvertent Assignment to an “Original Examiner”

Should a reexamination be inadvertently assigned to an “original examiner” (in a situation where the TC Director’s approval is not stated in the decision on the request), the patent owner or the third party requester who objects must promptly file a paper alerting the Office of this fact. Any request challenging the assignment of an examiner to the case must be made within two months of the first Office action or other Office communication indicating the examiner assignment, or reassignment will not be considered. Reassignment of the reexamination to a different examiner will be addressed on a case-by-case basis. In no event will the assignment to the original examiner, by itself, be grounds for vacating any Office decision(s) or action(s) and “restarting” the reexamination.

A situation may arise where a party timely (i.e., within the two months noted above) files a paper alerting the Office to the assignment of a reexamination to the “original examiner,” but that paper does not have a right of entry under the rules (e.g., where an order granting reexamination was issued by the “original examiner” but a first action on the merits did not accompany the order, the patent owner timely files a paper alerting the Office of the fact that the “original examiner” has been assigned the reexamination proceeding. Pursuant to 37 CFR 1.939(b), that paper does not have a right of entry since a first Office action on the merits has not yet been issued.) In such situations, the Office may waive the rules to the extent that the paper directed to the examiner assignment will be entered and considered.

II. MECHANICS OF ASSIGNMENT

When a request for reexamination is received in the Office, it will be processed by the Central Reexamination Unit (CRU) support staff. After the case file has been reviewed in the CRU to ensure it is ready for examination in the TC, the CRU will forward the case

to the TC for docketing of the case to the examiner assigned to the reexamination proceeding.

In the event the SPE believes that another Art Unit should examine the case, see MPEP § 2637 for procedures for transferring the case.

2637 Transfer Procedure [R-3]

Although the number of reexamination requests which must be transferred should be very small, the following procedures have been established for an expeditious resolution of any such problems.

**>An *inter partes* reexamination request is normally assigned (in the Central Reexamination (CRU) of the Office of Patent Legal Administration (OPLA)) to the art unit which examines the class and subclass in which the patent to be reexamined is currently classified as an original. If the supervisory patent examiner (SPE) believes that the reexamination should be assigned to another art unit, he or she must obtain the consent of the SPE of the art unit to which a transfer is desired. Pursuant to 35 U.S.C. 314(c), all *inter partes* reexamination proceedings must be conducted with special dispatch within the Office. This applies to the transfer of reexamination proceedings. Accordingly, the SPE to whose art unit the reexamination has been assigned should expeditiously make any request for transfer of a reexamination proceeding by e-mailing the request for transfer to the SPE of the art unit to which a transfer is desired (the “new” art unit). A “cc” of the e-mail is to be provided to the Special Program Examiner (SPREs) of the Technology Centers (TCs) involved in the transfer request and to the CRU of OPLA. The SPE to whose art unit the reexamination has been assigned should, further hand-carry any paper patent file for the reexamination proceeding to the SPE of the art unit to which a transfer is desired. Any conflict which cannot be resolved by the SPEs will be resolved by the TC Directors involved.

If the “new” art unit accepts assignment of the reexamination request, the “new” SPE assigns the request

to an examiner, and the “new” TC’s reexamination clerk PALMs in the request. In addition, the CRU and the Offices of TC SPRE involved in the transfer request must be notified of the transfer by the respective SPEs.<

2638 Time Reporting [Added R-2]

I. CLERICAL TIME REPORTING

Both the Program Management System (PMS) and Payroll systems now used to monitor clerical time have been modified to report reexamination activities. Time devoted to processing actual reexamination files in the Technology Centers (TCs) should be reported using the appropriate PMS Code and Project Code. It should be noted that all clerical time consumed by reexamination activities must be reported in the above manner. Activities such as supervision, copying, typing, and docketing should be included.

II. CENTRAL REEXAMINATION UNIT (CRU) TIME REPORTING

CRU personnel will use 1190-55 as the code to report their time for reexamination activities on the Biweekly Time Worksheet.

III. PROFESSIONAL TIME REPORTING

Reexamination fees are based on full cost recovery, and it is essential that all time expended on reexamination activities be reported accurately. Thus, examiners, supervisory patent examiners (SPEs), special program examiners (SPREs), and paralegals should report all time spent on reexamination on their individual Time and Attendance Report.

Examiners, SPEs, SPREs and paralegals will use the following Project Codes to report their time for reexamination activities on their Biweekly Time Worksheets (PTO-690 forms) by making appropriate entries in the space for reexamination:

| Person | Activity | Charge Code |
|---|---|--------------------|
| <u>Examiner</u> (prior to order denial) | Examination activity prior to the <i>inter partes</i> reexamination order or denial. | 1121-01 |
| <u>Examiner</u> (after reexam order) | All examination activity after the <i>inter partes</i> reexamination order (including all conference times). | 1121-02 |
| <u>Examiner Conferee</u> in Patentability Review Conference | Conferee examiner's patentability review conference time in the <i>inter partes</i> reexamination. | 1121-08 |
| <u>Examiner Conferee</u> in Appeal Conference | Conferee-examiner's appeal conference time in the <i>inter partes</i> reexamination. | 1121-06 |
| <u>Supervisory Patent Examiner</u> (SPE) | <u>All time</u> applied to the <i>inter partes</i> reexamination, including training and review of examiner activity, and participation in any conferences. | 1121-03 |
| <u>Special Program Examiner</u> (SPRE) and Paralegal Specialist | All time applied to the <i>inter partes</i> reexamination, including participation in any conferences. | 1121-04 |

Where the first Office action accompanies the decision on the request granting reexamination, the examiner will estimate how much time was devoted to the preparation of each of the Office action and the decision on the request, and thereby allocate the time entered for codes 1121-01 and 1121-02 accordingly.

Note that TC SPREs and paralegals will use 1121-04 as the code to report all their time (including participation in appeal and patentability review conferences) for *inter partes* reexamination activities on the Biweekly Time Worksheet Paralegal/Special Program Examiner, PTO-690 P/S.

2640 Decision on Request [R-3]

35 U.S.C. 312. Determination of issue by Director

(a) REEXAMINATION.— Not later than 3 months after the filing of a request for *inter partes* reexamination under section 311, the Director shall determine whether a substantial new question of patentability affecting any claim of the patent concerned is raised by the request, with or without consideration of other patents or printed publications. The existence of a substantial new question of patentability is not precluded by the fact that a patent or printed publication was previously cited by or to the Office or considered by the Office.

(b) RECORD.— A record of the Director's determination under subsection (a) shall be placed in the official file of the patent, and a copy shall be promptly given or mailed to the owner of record of the patent and to the third-party requester.

(c) FINAL DECISION.— A determination by the Director under subsection (a) shall be final and non-appealable. Upon a determination that no substantial new question of patentability has been raised, the Director may refund a portion of the *inter partes* reexamination fee required under section 311.

37 CFR 1.923. Examiner's determination on the request for *inter partes* reexamination.

Within three months following the filing date of a request for *inter partes* reexamination under § 1.919, the examiner will consider the request and determine whether or not a substantial new question of patentability affecting any claim of the patent is raised by the request and the prior art citation. The examiner's determination will be based on the claims in effect at the time of the determination, will become a part of the official file of the patent, and will be mailed to the patent owner at the address as provided for in § 1.33(c) and to the third party requester. If the examiner determines that no substantial new question of patentability is present, the examiner shall refuse the request and shall not order *inter partes* reexamination.

37 CFR 1.925. Partial refund if request for *inter partes* reexamination is not ordered.

Where *inter partes* reexamination is not ordered, a refund of a portion of the fee for requesting *inter partes* reexamination will be made to the requester in accordance with § 1.26(c).

37 CFR 1.927. Petition to review refusal to order *inter partes* reexamination

The third party requester may seek review by a petition to the Director under § 1.181 within one month of the mailing date of the examiner's determination refusing to order *inter partes* reexamination. Any such petition must comply with § 1.181(b). If no petition is timely filed or if the decision on petition affirms that no substantial new question of patentability has been raised, the determination shall be final and nonappealable.

Prior to making a determination on the request for reexamination, the examiner must request a litigation computer search by the Scientific and Technical Information Center (STIC) to check if the patent has been, or is, involved in litigation. **>A copy of the STIC search is scanned into the IFW reexamination file history. The "Litigation Review" box on the reexamination IFW file jacket form is completed to indicate that the review was conducted and the results thereof, and the reexamination file jacket form is then scanned into the IFW reexamination file history.< In the rare instance where the record of the reexamination proceeding or the STIC search indicates that additional information is desirable, guidance as to making an additional litigation search may be obtained from the library of the Office of the Solicitor. If the patent is or was involved in litigation, and a paper referring to the Court proceeding has been filed, reference to the paper by number should be made in the "Litigation Review" box >of the IFW file jacket form< as, for example, "litigation; see paper *>filed 7-14-2005<." If a litigation records search is already noted on the file, the examiner need not repeat or update it.

If litigation has concluded or is taking place in the patent on which a request for reexamination has been filed, the request must be promptly brought to the attention of the Reexamination Legal Advisor assigned to the case who should review the decision on the request and any examiner's action to ensure conformance to the current Office litigation policy and guidelines. See MPEP § 2686.04.

35 U.S.C. 312 requires that the Director of the Office determine whether or not a "substantial new question of patentability" affecting any claim of the patent of which reexamination is desired, is raised in the request not later than 3 months after the filing date of a request. See also MPEP § 2641. Such a determination may be made with or without consideration of other patents or printed publications in addition to those cited in the request. No input from the patent

owner is considered prior to the determination. See *Patlex v. Mossinghoff*, 771 F.2d 480, 226 USPQ 985 (Fed. Cir. 1985).

The patent claims in effect at the time of the determination will be the basis for deciding whether a substantial new question of patentability has been raised (37 CFR 1.923). See MPEP § 2643. Amendments which (A) have been filed in a copending reexamination proceeding in which the reexamination certificate has not been issued, or (B) have been submitted in a reissue application on which no reissue patent has been issued, will not be considered or commented upon when deciding a request for reexamination.

The decision on the request for reexamination has as its main object either the granting or denial of the request for reexamination. This decision is based on whether or not “a substantial new question of patentability” is found. A final finding as to unpatentability of the claims is **not** made in the decision; rather, it is made later, during the examination stage of the reexamination proceeding. Accordingly, no *prima facie* case of unpatentability need be found to grant an order for reexamination. It should be noted that a decision to deny the request for reexamination is equivalent to a final holding (subject to a petition pursuant to 37 CFR 1.927 for review of the denial), that the patent claims are patentable over the cited art (patents and printed publications).

Where there have been prior decisions relating to the patent, see MPEP § 2642.

It is only necessary to establish that a substantial new question of patentability exists as to one of the patent claims in order to order reexamination. In the examination stage of the reexamination, usually **all** patent claims will be examined, even though the order found a substantial new question of patentability only as to (for example) one of the patent claims. Where, however, there has been a prior Federal Court decision as to some claims, see MPEP § 2642 as to whether those claims are examined.

Where there have been prior decisions relating to the patent, see MPEP § 2642.

It is only necessary to establish that a substantial new question of patentability exists as to one of the patent claims in order to order reexamination. In the examination stage of the reexamination, usually **all** patent claims will be examined, even though the order

found a substantial new question of patentability only as to (for example) one of the patent claims. Where, however, there has been a prior Federal Court decision as to some claims, see MPEP § 2642 as to whether those claims are examined.

The decision on the request for reexamination should discuss all the patent claims. The examiner should limit the discussion of the claims to whether or not a substantial new question of patentability has been raised; the examiner **SHOULD NOT** reject claims in the order for reexamination. Rather, any rejection of the claims will be made in the first Office action that normally will accompany the order for reexamination. See MPEP § 2660.

The Director of the Office has the authority to order reexamination only in those cases which raise a substantial new question of patentability. The substantial new question of patentability requirement protects patentees from having to respond to, or participate in, unjustified reexaminations. See *Patlex v. Mossinghoff*, 771 F.2d 480, 226 USPQ 985, 989 (Fed. Cir. 1985).

I. REQUEST FOR REEXAMINATION OF THE PATENT AFTER REISSUE OF THE PATENT

Where a request for reexamination is filed on a patent after a reissue patent for that patent has already issued, reexamination will be denied, because the patent on which the request for reexamination is based has been surrendered. Should reexamination of the reissued patent be desired, a new request for reexamination, including and based on the specification and claims of the reissue patent, must be filed. Where the reissue patent issues after the filing of a request for reexamination, see MPEP § 2686.03.

II. SECOND OR SUBSEQUENT REQUEST FILED DURING REEXAMINATION

See MPEP § 2686.01 for a comprehensive discussion of the situation where a first reexamination is pending at the time a second or subsequent request for reexamination is to be decided, and one of the two is an *inter partes* reexamination. The present subsection merely provides guidance on the standard for the substantial new question of patentability to be applied in the decision on the second or subsequent request.

If a second or subsequent request for reexamination is filed (by any party permitted to do so) while a first reexamination is pending, the presence of a substantial new question of patentability depends on the art (patents and printed publications) cited by the second or subsequent request. The cited art will be reviewed for a substantial new question of patentability based on the following guidelines:

A. *If one of the two reexaminations is an inter partes reexamination, the following possibilities exist:*

(1) An ordered *inter partes* reexamination is pending, and an *ex parte* reexamination request is subsequently filed.

(2) An ordered *inter partes* reexamination is pending, and an *inter partes* reexamination request is subsequently filed.

(3) An ordered *ex parte* reexamination is pending, and an *inter partes* reexamination request is subsequently filed.

In all three instances, if the subsequent request includes the art which raised a substantial new question in the earlier pending reexamination, then reexamination should be ordered only if the art cited raises a substantial new question of patentability which is different than that raised in the earlier pending reexamination. If the art cited in the subsequent request raises the same substantial new question of patentability as that raised in the earlier pending reexamination, the subsequent request should be denied. If the subsequent request does **not** include the art which raised the substantial new question of patentability in the earlier pending reexamination, reexamination may or may not be ordered, depending on whether the different art cited raises a substantial new question of patentability.

>The second or subsequent request for reexamination may raise a substantial new question of patentability with respect to any new or amended claim which has been proposed in the first (or prior) pending reexamination proceeding. The substantial new question may be directed to any proposed new or amended claim in the pending reexamination, to permit examination of the entire patent package. It would be a waste of resources to prevent addressing the proposed new or amended claims, by requiring parties to wait until the certificate issues for the proposed new

or amended claims, and only then to file a new reexamination request challenging the claims as revised via the certificate. This also prevents a patent owner from simply amending all the claims in some nominal fashion to preclude a subsequent reexamination request during the pendency of the reexamination proceeding.<

In an aggravated situation, where reexamination is granted on a second or subsequent request, but the patent owner can clearly show that the second or subsequent request was filed for purposes of harassment, the patent owner *can petition under 37 CFR 1.182* that the second or subsequent request should be suspended. If such a petition is granted, prosecution on the second or subsequent reexamination would be suspended until *>conclusion<* of proceedings in the first reexamination. In such an instance, merger of the second (or subsequent) reexamination with the first would unduly prolong the conclusion of the pending reexamination and be inconsistent with the requirement that the reexamination proceeding be conducted with special dispatch.

Where an ordered *inter partes* reexamination is pending, and an *inter partes* reexamination request is subsequently filed, the prohibition provision of 37 CFR 1.907(a) must be borne in mind. Once an order for *inter partes* reexamination has been issued, neither the third party requester of the *inter partes* reexamination, nor its privies, may file a subsequent request for *inter partes* reexamination of the patent until an *inter partes* reexamination certificate has been issued, unless expressly authorized by the Director of the Office. Note that 37 CFR 1.907(a) tracks the statutory provision of 35 U.S.C. 317(a).

2641 Time for Deciding Request [R-3]

The determination of whether or not to reexamine must be made (completed and mailed) not later than three (3) months after the filing date of a request. See 35 U.S.C. 312(a) and 37 CFR 1.923. *If the 3-month period ends on a Saturday, Sunday or Federal holiday within the District of Columbia*, then the determination must be mailed by the ***preceding*** business day.

Generally, the Central Reexamination Unit (CRU) forwards the *inter partes* reexamination case to the Technology Center (TC) Special Program Examiner (SPRE) within two (2) weeks of the filing date of the request. The SPRE processes the *>reexamination<*

as needed and forwards it to the appropriate Supervisory Patent Examiner (SPE) for docketing of the reexamination to an appropriate examiner.

(A) The examiner has one (1) week from his/her receipt of the reexamination to prepare for an initial consultation conference with a Reexamination Legal Advisor (RLA).

After the consultation with the RLA, the examiner has two (2) weeks from the date of the consultation conference to prepare the decision on the request and an Office action (if reexamination is granted), and forwards the reexamination to the TC SPRE.

The decision and the action will be reviewed by the SPRE and the reexamination file along with the decision and action will be forwarded (hand carried) to the CRU.

(B) **At the very latest**, the decision and action prepared by the examiner must be **hand carried** by the SPRE to the CRU within nine (9) weeks from the filing date of the request.

(C) It should be noted that the first Office action ordinarily accompanies an order for reexamination; however, if the issuance of the first Office action would delay the order to the extent that a critical deadline will not be met, the order will be mailed and the first action will follow in due course, as per the guidance set forth in MPEP § 2660.

2642 Criteria for Deciding Request [R-3]

I. SUBSTANTIAL NEW QUESTION OF PATENTABILITY

The presence or absence of “a substantial new question of patentability” determines whether or not reexamination is ordered. The meaning and scope of the term “a substantial new question of patentability” is not defined in the statute and must be developed to some extent on a case-by-case basis, using the case law to provide guidance as will be discussed in this section.

If the prior art patents and printed publications raise a substantial question of patentability of at least one claim of the patent, then a substantial new question of patentability is present, unless the same question of patentability has already been decided by (A) a final holding of invalidity, after all appeals, or (B) by the Office in a previous examination or pending reexamination of the patent. A “previous examination” of the

patent is: (A) the original examination of the application which matured into the patent; (B) the examination of the patent in a reissue application that has resulted in a reissue of the patent; or (C) the examination of the patent in an earlier concluded reexamination. The answer to the question of whether a “substantial new question of patentability” exists, and therefore whether reexamination may be had, is decided by the Director of the Office, and as 35 U.S.C. 312(c) provides, that determination is final, i.e., not subject to appeal on the merits of the decision. See *In re Etter*, 756 F.2d 852, 225 USPQ 1 (Fed. Cir. 1985) which was decided for the *ex parte* reexamination statute (note that 35 U.S.C. 312(c) for the *inter partes* reexamination statute contains the same language as 35 U.S.C. 303(c) for *ex parte* reexamination).

A prior art patent or printed publication raises a substantial question of patentability where there is a substantial likelihood that a reasonable examiner would consider the prior art patent or printed publication **important** in deciding whether or not the claim is patentable. If the prior art patents and/or publications would be considered important, then the examiner should find “a substantial new question of patentability” unless the same question of patentability has already been decided as to the claim in a final holding of invalidity by the Federal court system or by the Office in a previous examination. For example, the same question of patentability may have already been decided by the Office where the examiner finds the additional (newly provided) prior art patents or printed publications to be merely cumulative to similar prior art already fully considered by the Office in a previous examination of the claim.

Accordingly, for “a substantial new question of patentability” to be present, it is only necessary that:

(A) The prior art patents and/or printed publications raise a substantial question of patentability regarding at least one claim, i.e., the teaching of the prior art patents and printed publications is such that a reasonable examiner would consider the teaching to be **important** in deciding whether or not the claim is patentable; and

(B) The same question of patentability as to the claim has not been decided by the Office in a previous examination or pending reexamination of the patent

or in a final holding of invalidity by the Federal Courts in a decision on the merits involving the claim.

It is not necessary that a “*prima facie*” case of unpatentability exist as to the claim in order for “a substantial new question of patentability” to be present as to the claim. Thus, “a substantial new question of patentability” as to a patent claim could be present even if the examiner would not necessarily reject the claim as either anticipated by, or obvious in view of, the prior art patents or printed publications. The difference between “a substantial new question of patentability” and a “*prima facie*” case of unpatentability is important. See generally *In re Etter*, 756 F.2d 852, 857 n.5, 225 USPQ 1, 4 n.5 (Fed. Cir. 1985).

It should be noted that the “substantial new question of patentability” standard for granting reexamination on a request for an *inter partes* reexamination is the same as the “substantial new question of patentability” standard for granting reexamination on a request for an *ex parte* reexamination.

>Where a request for reexamination of a patent is made before the conclusion of an earlier filed reexamination proceeding pending (ongoing) for that patent, the substantial new question of patentability may be raised with respect to any new or amended claim which has been proposed in the pending reexamination proceeding. The substantial new question may be directed to any proposed new or amended claim in the pending reexamination, to permit examination of the entire patent package. It would be a waste of resources to prevent addressing the proposed new or amended claims, by requiring parties to wait until the certificate issues for the proposed new or amended claims, and only then to file a new reexamination request challenging the claims as revised via the certificate. This also prevents a patent owner from simply amending all the claims in some nominal fashion to preclude a subsequent reexamination request during the pendency of the reexamination proceeding.<

II. POLICY IN SPECIFIC SITUATIONS

In order to further clarify the meaning of “a substantial new question of patentability,” certain situations are outlined below which, if present, should be considered when making a decision as to whether or not “a substantial new question of patentability” is present.

A. *Prior Favorable Decisions by the U.S. Patent and Trademark Office on the Same or Substantially Identical Prior Art in Relation to the Same Patent.*

A “substantial new question of patentability” is not raised by the prior art if the Office has previously considered (in an earlier examination of the patent) the same question of patentability as to a patent claim favorable to the patent owner based on the same prior art patents or printed publications. *In re Recreative Technologies*, 83 F.3d 1394, 38 USPQ2d 1776 (Fed. Cir. 1996).

In deciding whether to grant a request for reexamination of a patent, the examiner should check the patent’s file history to ascertain whether any of the prior art now advanced by requester *was* previously cited/considered in an earlier concluded Office examination of the patent (e.g., in the examination of the application for the patent). For the sake of expediency, such art is referred to as “old art” throughout, since the term “old art” was coined by the Federal Circuit in its decision of *In re Hiniker Co.*, 150 F.3d 1362, 1365-66, 47 USPQ2d 1523, 1526 (Fed. Cir. 1998).

In a decision to order reexamination made on or after November 2, 2002, reliance on old art does not necessarily preclude the existence of a substantial new question of patentability (SNQ) that is based exclusively on that old art. See Public Law 107-273, 116 Stat. 1758, 1899-1906 (2002), which expanded the scope of what qualifies for a substantial new question of patentability upon which a reexamination may be based. Determinations on whether a SNQ exists in such an instance shall be based upon a fact-specific inquiry done on a case-by-case basis. For example, a SNQ may be based solely on old art where the old art is being presented/viewed in a new light, or in a different way, as compared with its use in the earlier concluded examination(s), in view of a material new argument or interpretation presented in the request.

When it is determined that a SNQ based solely on old art is raised, form paragraph 22.01.01 should be included in the order for reexamination.

¶ 22.01.01 *Criteria for Applying “Old Art” as Sole Basis for Reexamination*

The above [1] is based solely on patents and/or printed publications already cited/considered in an earlier concluded examination of the patent being reexamined. On November 2, 2002, Public Law 107-273 was enacted. Title III, Subtitle A, Section 13105,

part (a) of the Act revised the reexamination statute by adding the following new last sentence to 35 U.S.C. 303(a) and 312(a):

“The existence of a substantial new question of patentability is not precluded by the fact that a patent or printed publication was previously cited by or to the Office or considered by the Office.”

For any reexamination ordered on or after November 2, 2002, the effective date of the statutory revision, reliance on previously cited/considered art, i.e., “old art,” does not necessarily preclude the existence of a substantial new question of patentability (SNQ) that is based exclusively on that old art. Rather, determinations on whether a SNQ exists in such an instance shall be based upon a fact-specific inquiry done on a case-by-case basis.

In the present instance, there exists a SNQ based solely on [2]. A discussion of the specifics now follows:

[3]

Examiner Note:

1. In bracket 1, insert “substantial new question of patentability” if the present form paragraph is used in an order granting reexamination (or a TC Director’s decision on petition of the denial of reexamination). If this form paragraph is used in an Office action, insert “ground of rejection”.
2. In bracket 2, insert the old art that is being applied as the sole basis of the SNQ. For example, “the patent to Schor” or “the patent to Schor when taken with the Jones publication” or “the combination of the patent to Schor and the Smith publication” could be inserted. Where more than one SNQ is presented based solely on old art, the examiner would insert all such bases for SNQ.
3. In bracket 3, for each basis identified in bracket 2, explain how and why that fact situation applies in the proceeding being acted on. The explanation could be for example that the old art is being presented/viewed in a new light, or in a different way, as compared with its use in the earlier concluded examination(s), in view of a material new argument or interpretation presented in the request. See *Ex parte Chicago Rawhide Mfg. Co.*, 223 USPQ 351 (Bd. Pat. App. & Inter. 1984).
4. This form paragraph is only used the first time the “already cited/considered” art is applied, and is not repeated for the same art in subsequent Office actions.

See MPEP § 2258.01 for a discussion of the use of “old art” in the examination stage of an ordered reexamination (as a basis for rejecting patent claims).

B. Prior Adverse Decisions by the Office on the Same or Substantially Identical Prior Art in the Same Patent.

A prior decision adverse to the patentability of a claim of a patent by the Office based upon prior art patents or printed publications would usually mean that “a substantially new question of patentability” is present. Such an adverse decision by the Office could

arise from a reissue application which was abandoned after rejection of the claim and without disclaiming the patent claim.

C. Prior Adverse Reissue Application Final Decision by the Director of the Office or the Board of Patent Appeals and Interferences Based Upon Grounds Other Than Patents or Printed Publications.

Any prior adverse final decision by the Director of the Office, or the Board of Patent Appeals and Interferences, on an application seeking to reissue the same patent on which reexamination is requested will be considered by the examiner when determining whether or not a “substantial new question of patentability” is present. To the extent that such prior adverse final decision was based upon grounds other than patents or printed publications, the prior adverse final decision will not be considered in determining whether or not a “substantial new question of patentability” is present.

D. Prior Favorable or Adverse Decisions on the Same or Substantially Identical Prior Art Patents or Printed Publications in Other Cases not Involving the Patent.

While the Office would consider decisions involving substantially identical patents or printed publications in determining whether a “substantial new question of patentability” is raised, the weight to be given such decisions will depend upon the circumstances.

IV. POLICY WHERE A FEDERAL COURT DECISION HAS BEEN ISSUED ON THE PATENT

As to A - C which follow, see *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988).

A. Final Holding of Validity by the Courts.

When the initial question as to whether the prior art raises a substantial new question of patentability as to a patent claim is under consideration, the existence of a final court decision of claim *validity* in view of the same or different prior art does not necessarily mean that no new question is present, because of the different standards of proof employed by the Federal Dis-

strict Courts and the Office. While the Office may accord deference to factual findings made by the court, the determination of whether a substantial new question of patentability exists will be made independently of the court's decision on validity, because it is not controlling on the Office.

B. *Non-final Holding of Invalidity or Unenforceability by the Courts.*

A *non-final* holding of claim invalidity or unenforceability will not be controlling on the question of whether a substantial new question of patentability is present.

C. *Final Holding of Invalidity or Unenforceability by the Courts.*

A final holding of claim invalidity or unenforceability, after all appeals, is controlling on the Office. In such cases, a substantial new question of patentability would not be present as to the claims finally held invalid or unenforceable.

Note: Any situations requiring clarification should be brought to the attention of the Office of Patent Legal Administration.

2643 Claims Considered in Deciding Request [Added R-2]

The claims in effect at the time of the determination will be the basis for deciding whether “a substantial new question of patentability” is present. 37 CFR 1.923. While the examiner will ordinarily concentrate on those claims for which reexamination is requested, the finding of “a substantial new question of patentability” can be based upon a claim of the patent other than the ones for which reexamination is requested. For example, the request might seek reexamination of particular claims (i.e., claims 1-4), but the examiner is not limited to those claims. The examiner can make a determination that “a substantial new question of patentability” is present as to other claims in the patent (i.e., claims 5-7), without necessarily finding “a substantial new question” with regard to the claims requested (i.e., claims 1-4). If a substantial new question of patentability is found as to any claim, reexamination will be ordered and will normally cover all claims except for claims that have been finally held invalid in a Federal Court decision on the

merits. The decision on the request should discuss all patent claims in order to inform the patent owner of the examiner's position. See MPEP § 2642 for patent claims which have been the subject of a prior decision.

Amendments and/or new claims present in any copending reexamination or reissue proceeding for the patent (to be reexamined) will not be considered nor commented upon when deciding a request for reexamination. Accordingly, a request is decided on the wording of the claims without any amendment. Where a request for reexamination is granted and reexamination is ordered, the first Office action (which ordinarily accompanies the order) and any subsequent reexamination prosecution should be on the basis of the claims as amended by any copending reexamination or reissue proceeding.

2644 Prior Art on Which the Determination Is Based [Added R-2]

The determination of whether or not “a substantial new question of patentability” is present can be based upon any prior art patents or printed publications. 35 U.S.C. 312(a) provides that the determination on a request will be made “with or without consideration of other patents or printed publications,” i.e., other than those relied upon in the request. The examiner is not limited in making the determination based on the patents and printed publications relied upon in the request. The examiner can find “a substantial new question of patentability” based upon the prior art patents or printed publications relied upon in the request, a combination of the prior art relied upon in the request and other prior art found elsewhere, or based entirely on different patents or printed publications. The primary source of patents and printed publications used in making the determination are those relied on in the request. For reexamination ordered on or after November 2, 2002, see MPEP § 2642, subsection II.A. for a discussion of “old art.” The examiner can also consider any patents and printed publications of record in the patent file from submissions under 37 CFR 1.501 which are in compliance with 37 CFR 1.98 in making the determination. If the examiner believes that additional prior art patents and publications can be readily obtained by searching to supply any deficiencies in the prior art cited in the request, the examiner can perform such an additional search.

Such a search should be limited to that area most likely to contain the deficiency of the prior art previously considered and should be made only where there is a reasonable likelihood that prior art can be found to supply any deficiency necessary to “a substantial new question of patentability.”

The determination should be made on the claims in effect at the time the determination is made. 37 CFR 1.923.

2646 Decision Ordering Reexamination [R-3]

35 U.S.C. 313. *Inter partes reexamination order by Director*

If, in a determination made under section 312(a), the Director finds that a substantial new question of patentability affecting a claim of a patent is raised, the determination shall include an order for *inter partes* reexamination of the patent for resolution of the question. The order may be accompanied by the initial action of the Patent and Trademark Office on the merits of the *inter partes* reexamination conducted in accordance with section 314.

37 CFR 1.931. *Order for inter partes reexamination*

(a) If a substantial new question of patentability is found, the determination will include an order for *inter partes* reexamination of the patent for resolution of the question.

(b) If the order for *inter partes* reexamination resulted from a petition pursuant to § 1.927, the *inter partes* reexamination will ordinarily be conducted by an examiner other than the examiner responsible for the initial determination under § 1.923.

If a request for reexamination is granted, the examiner’s decision granting the request will conclude that a substantial new question of patentability has been raised by (A) identifying all claims and issues, (B) identifying the patents and/or printed publications relied upon, and (C) providing a brief statement of the rationale supporting each new question.

In the examiner’s decision, the examiner must identify at least one substantial new question of patentability and explain how the prior art patents and/or printed publications raise that question. In a simple case, this may entail adoption of the reasons provided by the third party requester. The references relied on by the examiner should be cited on a PTO-892 form, unless already listed on a form PTO-1449, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms) submitted by the third party requester. A copy of the reference

should be supplied only where it has not been previously supplied to the patent owner and third party requester.

As to each substantial new question of patentability identified in the decision, the decision should point out:

(A) The prior art patents and printed publications which add some new teaching as to at least one claim;

(B) What that new teaching is;

(C) The claims that the new teaching is directed to;

(D) That the new teaching was not previously considered nor addressed in the prior examination of the patent or a final holding of invalidity by the Federal Courts;

(E) That the new teaching is such that a reasonable examiner would consider the new teaching to be important in deciding to allow the claim being considered; and

(F) Where the question is raised, or where it is not clear that a patent or printed publication pre-dates the patent claims, a discussion should be provided as to why the patent or printed publication is deemed to be available against the patent claims.

If arguments are raised by the third party requester as to grounds not based on patents or printed publications, such as those based on public use or on sale under 35 U.S.C. 102(b), or abandonment under 35 U.S.C. 102(c), the examiner should note that such grounds are improper for reexamination and are not considered or commented upon. See 37 CFR 1.906(c).

In the decision on the request, the examiner will not decide, and no statement should be made as to, whether the claims are rejected over the patents and printed publications. The examiner does not decide on the question of patentability of the claims in the decision on the request. The examiner only decides whether there is a substantial new question of patentability to grant the request to order reexamination.

The decision granting the request is made using form PTOL-2063 as a cover sheet. See MPEP § 2647.01 for an example of a decision granting a request for *inter partes* reexamination.

Form Paragraph 26.01 should be used at the end of each decision letter granting reexamination.

¶ 26.01 *New Question of Patentability*

A substantial new question of patentability affecting claim [1] of United States Patent Number [2] is raised by the present request for *inter partes* reexamination.

Extensions of time under 37 CFR 1.136(a) will not be permitted in *inter partes* reexamination proceedings because the provisions of 37 CFR 1.136 apply only to “an applicant” and not to the patent owner in a reexamination proceeding. Additionally, 35 U.S.C. 314(c) requires that *inter partes* reexamination proceedings “will be conducted with special dispatch” (37 CFR 1.937). Patent owner extensions of time in *inter partes* reexamination proceedings are provided for in 37 CFR 1.956. Extensions of time are not available for third party requester comments, because a comment period of 30 days from service of patent owner’s response is set by statute. 35 U.S.C. 314(b)(3).

Upon determination that a substantial new question of patentability is present pursuant to a request under 35 U.S.C. 311, an order to reexamine is issued pursuant to 35 U.S.C. 313 >(first sentence)< which provides:

[T]he determination [that a substantial new question of patentability is raised] shall include an order for *inter partes* reexamination of the patent for resolution of the question.**

I. PETITION TO VACATE THE ORDER GRANTING REEXAMINATION

A substantive determination by the Director of the Office to institute reexamination pursuant to a finding that the prior art patents or printed publications raise a substantial new question of patentability is not subject to review by petition or otherwise. See *Joy Mfg. Co. v. Nat’l Mine Serv. Co., Inc.*, 810 F.2d 1127, 1 USPQ2d 1627 (Fed. Cir. 1987); *Heinl v. Godici*, 143 F.Supp. 2d 593 (E.D. Va. 2001). Note further the decision of *Patlex Corp. v. Quigg*, >680 F.Supp. 33,< 6 USPQ2d 1296, 1298 (D.D.C. 1988) (the legislative scheme leaves the Director’s 35 U.S.C. 303 determination entirely to his discretion and not subject to judicial review). These decisions were rendered for *ex parte* reexamination; however, the holdings of these decisions apply equally in *inter partes* reexamination proceedings, since the language of 35 U.S.C. 302(c) (i.e., the *ex parte* reexamination statute) is also found in 35 U.S.C. 312(c) (i.e., the *inter partes* reexamination statute). Because the substantive determination is not subject to review by petition or otherwise, neither the patent owner nor the third party requester has a right to petition, or request reconsideration of, a finding that the prior art patents or printed publications raise a substantial new question. There is no right to petition

such a finding even if the finding of a substantial new question is based on reasons other than those urged by the third party requester (or based on less than all the grounds urged by the third party requester). Where the examiner determines that a date of a reference is early enough such that the reference constitutes prior art, that determination is not petitionable (with respect to vacating the examiner’s finding of a substantial new question). Where the examiner determines that a reference is a printed publication (i.e., that the criteria for publication has been satisfied), that determination is also not petitionable. These matters cannot be questioned with respect to vacating the order granting reexamination until a final agency decision on the reexamination proceeding has issued. Rather, these matters can be argued by the patent owner and appealed during the examination phase of the reexamination proceeding.

A petition under 37 CFR 1.181 may, however, be filed to vacate an *ultra vires* reexamination order, such as where the order for reexamination is not based on prior art patents and printed publications. In cases where no discretion to grant a request for reexamination exists, a petition to vacate the decision to grant, or a request for reconsideration, will be entertained. “Appropriate circumstances” under 37 CFR 1.181(a)(3) exist to vacate the order granting reexamination where, for example:

- (A) the reexamination order is not based on prior art patents or printed publications;
- (B) reexamination is prohibited under 37 CFR 1.907;
- (C) all claims of the patent were held to be invalid by a final decision of a Federal Court after all appeals;
- (D) reexamination was ordered for the wrong patent;
- (E) reexamination was ordered based on a duplicate copy of the request; or
- (F) the reexamination order was based **wholly** on the same question of patentability raised by the prior art *previously considered* in an earlier concluded examination of the patent by the Office (e.g., the application which matured into the patent, a prior reexamination, an interference proceeding).

As to (F), the decision of *In re Recreative Technologies Corp.*, 83 F.3d 1394, 38 USPQ2d 1776 (Fed. Cir. 1996) is to be noted. See the discussion in MPEP

§ 2642, subsection II.A. as to the criteria for vacating a reexamination order in view of the decisions.

When a petition under 37 CFR 1.181 is filed to vacate a reexamination order, the third party requester may file a single submission in opposition to the petition. Because reexamination proceedings are conducted with special dispatch, 35 U.S.C. 314(c), any such opposition by the third party requester must be filed within two weeks of the date upon which a copy of the original 37 CFR 1.181 petition was served on the third party requester to ensure consideration. It is advisable that, upon receipt and review of the served copy of such a 37 CFR 1.181 petition which the third party requester intends to oppose, the requester should immediately place a courtesy telephone call to >both the Central Reexamination Unit of the Office of Patent Legal Administration and< the Special Program Examiner (SPRE) in the Technology Center (TC) in which the reexamination proceeding is pending to notify the Office that an opposition to the 37 CFR 1.181 petition will be filed. Whenever possible, filing of the opposition should be submitted by facsimile transmission.

The filing of a 37 CFR 1.181 petition to vacate an *ultra vires* reexamination order is limited to a single submission, even if an opposition thereto is filed by a third party requester.

II. PRIOR ART SUBMITTED AFTER THE ORDER

Any prior art citations under 37 CFR 1.501 submitted after the date of the decision ordering *inter partes* reexamination should be retained in a separate file by the TC (usually the TC SPRE) and stored until the reexamination proceeding is >concluded<, at which time the prior art citation is then entered of record in the patent file. See MPEP § 2206. Note that 37 CFR 1.902 governs submissions of prior art that can be made by *patent owners* and *third party requesters* after reexamination has been ordered.

2647 Decision Denying Reexamination [R-3]

The request for reexamination will be denied if a substantial new question of patentability is not found based on patents or printed publications.

If the examiner concludes that no substantial new question of patentability has been raised, the examiner

should prepare a decision denying the reexamination request. Form paragraph 26.02 should be used as the introductory paragraph in a decision denying reexamination.

¶ 26.02 No New Question of Patentability

No substantial new question of patentability is raised by the present request for *inter partes* reexamination and the prior art cited therein for the reasons set forth below.

The decision >denying the request< will then indicate, for each patent or publication cited in the request, why the citation:

(A) Is cumulative to the teachings of the art cited in the earlier concluded examination of the patent;

(B) Is not available against the claims (e.g., the reference is not available as prior art because of its date or the reference is not a publication);

(C) Would not be important to a reasonable examiner. Even if the citation is available against the claims and it is not cumulative, it still cannot be the basis for a substantial new question of patentability if the additional teaching of the citation would not be important to a reasonable examiner in deciding whether any claim (of the patent for which reexamination is requested) is patentable; or

(D) Is one which was cited in the record of the patent and is barred by the guidelines set forth in MPEP § 2642, subsection II.A.

The examiner should also, in the decision, respond to the substance of each argument raised by the third party requester which is based on patents or printed publications.

If arguments are presented as to grounds not based on prior art patents or printed publications, such as those based on public use or on sale under 35 U.S.C. 102(b), or abandonment under 35 U.S.C. 102(c), the examiner should note that such grounds are improper for reexamination and are not considered or commented upon. See 37 CFR 1.906(c).

See MPEP § 2647.01 for an example of a decision denying a request for *inter partes* reexamination.

The decision denying the request is mailed by the Central Reexamination Unit (CRU), and >jurisdiction over the reexamination proceeding is retained by the CRU< to await any petition seeking review of the examiner's determination refusing reexamination. If such a petition is not filed within one (1) month of the examiner's determination denying reexamination, the

CRU then processes the reexamination file to provide the partial refund set forth in 37 CFR 1.26(c) (the Office of Finance no longer processes reexamination proceedings for a refund). **>

The reexamination proceeding is then given a 420 status. A copy of the PALM “Application Number Information” screen and the “Contents” screen is printed, the printed copy is annotated by adding the comment “PROCEEDING CONCLUDED,” and the annotated copy is then scanned into IFW using the miscellaneous letter document code.

The concluded reexamination file (electronic or paper) containing the request and the decision denying the request becomes part of the patent’s record.<

2647.01 Examples of Decisions on Requests [R-3]

Examples of decisions on requests for *inter partes* reexamination are provided below. The first example is a **grant** of an *inter partes* reexamination. The second example is a **denial** of an *inter partes* reexamination. The examiner should leave the paper number blank, **>since IFW files do not have a paper number<.

**ORDER GRANTING/DENYING REQUEST FOR
 INTER PARTES REEXAMINATION**

The request for *inter partes* reexamination has been considered. Identification of the claims, the references relied on, and the rationale supporting the determination are attached.

Attachment(s): PTO-892 PTO-1449 Other: _____

1. The request for *inter partes* reexamination is GRANTED.
- An Office action is attached with this order.
- An Office action will follow in due course.

2. The request for *inter partes* reexamination is DENIED.

This decision is not appealable. 35 U.S.C. 312(c). Requester may seek review of a denial by petition to the Director of the USPTO within ONE MONTH from the mailing date hereof. 37 CFR 1.927. EXTENSIONS OF TIME ONLY UNDER 37 CFR 1.183. In due course, a refund under 37 CFR 1.26(c) will be made to requester.

All correspondence relating to this *inter partes* reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Order.

PTOL-2063 (5/03)

DECISION GRANTING *INTER PARTES* REEXAMINATION

A substantial new question of patentability affecting claims 1-3 of United States Patent Number 9,999,999 to Key is raised by the present request for *inter partes* reexamination.

Extensions of time under 37 CFR 1.136(a) will not be permitted in *inter partes* reexamination proceedings because the provisions of 37 CFR 1.136 apply only to “an applicant” and not to parties in a reexamination proceeding. Additionally, 35 U.S.C. 314(c) requires that *inter partes* reexamination proceedings “will be conducted with special dispatch” (37 CFR 1.937). Patent owner extensions of time in *inter partes* reexamination proceedings are provided for in 37 CFR 1.956. Extensions of time are not available for third party requester comments, because a comment period of 30 days from service of patent owner’s response is set by statute. 35 U.S.C. 314(b)(3).

The patent owner is reminded of the continuing responsibility under 37 CFR 1.985(a), to apprise the Office of any litigation activity, or other prior or concurrent proceeding, involving Patent 9,999,999 throughout the course of this reexamination proceeding. The third party requester is also reminded of the ability to similarly apprise the Office of any such activity or proceeding throughout the course of this reexamination proceeding. See MPEP § 2686 and 2686.04.

The request indicates that the third party requester considers claims 1-3 of the Key patent to be unpatentable over Smith taken with Jones.

The request further indicates that the requester considers claim 4 of the Key patent to be unpatentable over the Horn publication.

It is agreed that the consideration of Smith raises a substantial new question of patentability as to claims 1-3 of the Key patent. As pointed out on pages 2-3 of the request, Smith teaches using an extruder supported on springs at a 30 degree angle to the horizontal but does not teach the specific polymer of claims 1-3 which is extruded. The teaching as to spring-supporting the extruder at 30 degrees was not present in the prosecution of the application which became the Key patent. Further, there is a substantial likelihood that a reasonable examiner would consider this teaching important in deciding whether or not the claim is patentable. Accordingly, Smith raises a substantial new question of patentability as to claims 1-3, which question has not been decided in a previous examination of the Key patent.

The Horn publication does not raise a new question of patentability as to claim 4 because its teaching as to the extrusion die is a substantial equivalent of the teaching of the die by the Dorn patent which was considered in the prosecution of the application which became the Key patent. Further, the request does not present any other new question of patentability as to claim 4, and none has been found. Claim 4 will, however, be reexamined along with claims 1-3 of the Key patent.

ORDER GRANTING/DENYING REQUEST FOR INTER PARTES REEXAMINATION

The request for *inter partes* reexamination has been considered. Identification of the claims, the references relied on, and the rationale supporting the determination are attached.

Attachment(s): PTO-892 PTO-1449 Other: _____

1. The request for *inter partes* reexamination is GRANTED.

An Office action is attached with this order.

An Office action will follow in due course.

2. The request for *inter partes* reexamination is DENIED.

This decision is not appealable. 35 U.S.C. 312(c). Requester may seek review of a denial by petition to the Director of the USPTO within ONE MONTH from the mailing date hereof. 37 CFR 1.927. EXTENSIONS OF TIME ONLY UNDER 37 CFR 1.183. In due course, a refund under 37 CFR 1.26(c) will be made to requester.

All correspondence relating to this *inter partes* reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Order.

PTOL-2063 (5/03)

DECISION DENYING *INTER PARTES* REEXAMINATION

No substantial new question of patentability is raised by the present request for *inter partes* reexamination for the reasons set forth below.

The request indicates that **>Requester<** considers >that a substantial new question of patentability is raised as to< claims 1-2 of the Key patent (Patent # 9,999,999) **>**based on< Smith taken with Jones.

The request further indicates that **>Requester<** considers >that a substantial new question of patentability is raised as to< claim 3 of the Key patent **>**based on< Smith taken with Jones and when further taken with the Horn publication.

The claims of the Key patent, for which reexamination is requested, require that an extruder be supported on springs at an angle of 30 degrees to the horizontal, while a specific chlorinated polymer is extruded through a specific extrusion die.

The Smith patent does not raise a substantial new question of patentability as to the Key claims. Smith's teaching as to the extruder being spring-supported at 30 degrees is a substantial equivalent of the teaching of same by the Dorn patent which was considered in the prosecution of the application which became the Key patent.

In the request for reexamination, it is argued that Jones teaches the extrusion die. However, Jones was previously used, in the prosecution of the Key application, to teach the extrusion die. Further, there is no argument in the reexamination request that Jones is being applied in a manner different than it was applied in the prosecution of the Key application.

The Horn publication has been argued to show the connection of the support means to the extruder via bolts, as recited in claim 3 of the Key patent. Although this teaching was not provided in the prosecution of the Key application, the teaching would not be considered to be important to a reasonable examiner in deciding whether or not the Key claims are patentable.

The references set forth in the request have been considered both alone and in combination. They fail to raise a substantial new question of patentability as to any one of the Key patent claims.

In view of the above, the request for reexamination is DENIED.

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

_____/s/_____
Kenneth M. Schor
Primary Examiner
Technology Center 3700

2647.02 Processing of Decision [R-3]

After the examiner has prepared the decision (and any Office action to accompany the decision) and signed the typed decision, the case is forwarded to the Technology Center (TC) clerical staff. The TC clerical staff prepares the decision (and any Office action) for mailing, but does not mail it. See MPEP § 2670.

The clerical staff will make a copy of the decision and any Office action for the patent owner and for the third party requester. The clerical staff will also make any copies of references which are needed. Thus, the clerical staff makes $\times 2$ copies of any prior art documents not already supplied by the third party requester, $\times \times$ one for the patent owner, and one for the third party requester.

After the case is prepared for mailing, the \times file will be forwarded to the TC Special Program Examiner (SPRE) for review. Thereafter, the TC SPRE will arrange for the file to be PALMed $\times \times$ and forwarded to the Central Reexamination Unit (CRU). $\times \times$ A signed copy of the decision and any Office action is **hand-carried** directly to the CRU. The file and the decision and Office action are forwarded to the CRU for review and mailing within nine (9) weeks of the filing date of the request. The decision (and any Office action) is given a general review by a Reexamination Legal Advisor (RLA) and (if proper) mailed by the CRU support staff. The CRU staff prints the heading on the cover page (PTOL-2063) of the decision by using the computer terminal, attaches all parts of the decision, and mails it. Where the first Office action accompanies the decision, the heading is also printed on the cover page (PTOL-2064) of the first Office action, and the first Office action is mailed with the decision.

A transmittal form PTOL-501 with the third party requester's address will be completed (if a copy for mailing is not already in the case file). The transmittal form PTOL-501 is used to forward copies of Office actions and other communications to the third party requester. Whenever an Office action is issued, a copy of this form will be made and attached to a copy of the Office action. The use of this form removes the need to retype the third party requester's address each time a mailing is made.

The original signed copy of the decision, the original signed copy of any first Office action accompanying the decision, and a copy of any prior art enclosed

are made of record in the reexamination \times e-file (file history).

Where the decision is a grant of reexamination, the first Office action on the merits will ordinarily be prepared and mailed with the order granting reexamination. See MPEP § 2660.

After the CRU mails the decision, the file will be appropriately annotated, update scanning will be effected, and appropriate PALM entries will be made. $\times \times$

2648 Petition From Denial of Request [R-3]

37 CFR 1.927. *Petition to review refusal to order inter partes reexamination.*

The third party requester may seek review by a petition to the Director under § 1.181 within one month of the mailing date of the examiner's determination refusing to order *inter partes* reexamination. Any such petition must comply with § 1.181(b). If no petition is timely filed or if the decision on petition affirms that no substantial new question of patentability has been raised, the determination shall be final and nonappealable.

PROCESSING OF PETITION UNDER 37 CFR 1.927

Once a request for *inter partes* reexamination has been denied, $\times \times$ jurisdiction over the reexamination proceeding is retained by the Central Reexamination Unit (CRU) to await any petition seeking review of the examiner's determination refusing reexamination. If no petition is filed within one (1) month, the CRU will process the reexamination $\times \times$ as a concluded reexamination file. See MPEP § 2647 and § 2694. If a petition is timely filed, the petition (together with the reexamination file) is forwarded to the office of the Technology Center (TC) Director for decision. The TC Director will then review the examiner's determination that a substantial new question of patentability has not been raised. The TC Director's review will be *de novo*. Each decision by the TC Director will conclude with the following paragraph:

This decision is final and nonappealable. 37 CFR 1.927. No further communication on this matter will be acknowledged or considered.

If the petition is granted, the decision of the TC Director should include a sentence stating that an Office action will be mailed in due course.

The TC Director will sign the decision granting the petition, and then forward the reexamination file, together with the decision, to the CRU for mailing of the decision, update scanning and PALM processing. The reexamination file will then be returned to the supervisory patent examiner (SPE) of the art unit that will handle the reexamination. The SPE will ordinarily reassign the reexamination to another examiner pursuant to 37 CFR 1.931(b), notify the CRU of the assignment so that the new assignment can be entered in the PALM records, and forward the file to the new examiner to prepare a first Office action.

Reassignment to another examiner will be the general rule. Only in exceptional circumstances where no other examiner is available and capable to give a proper examination, will the case remain with the examiner who denied the request. If the denial of the request was signed by the SPE, the reexamination ordered by the TC Director will be assigned to a primary examiner.

Under normal circumstances, the reexamination proceeding will not be reassigned to a SPE, primary examiner, or assistant examiner who was involved in any part of the examination of the patent for which reexamination is requested, or was so-involved in the examination of the parent of the patent. The TC Director can make an exception to this practice and reassign the reexamination proceeding to an examiner involved with the original examination (of the patent) only where unusual circumstances are found to exist. For example, where there are no examiners other than an original examiner of the patent and the examiner who issued the denial with adequate knowledge of the relevant technology, the TC Director may permit reassignment of the reexamination proceeding to an examiner that originally examined the patent.

It should be noted that the requester may seek review of a denial of a request for reexamination only by petitioning the Director of the Office under 37 CFR 1.927 and 1.181 within one (1) month of the mailing date of the decision denying the request for reexamination. Additionally, any request for an extension of the time period to file such a petition from the denial of a request for reexamination can only be entertained by filing a petition under 37 CFR 1.183 with the appropriate fee to waive the time provisions of 37 CFR 1.927.

After the time for petition has expired without a petition having been filed, or a petition has been filed and the decision thereon affirms the denial of the request, a partial refund of the filing fee for the request for reexamination will be made to the third party requester. 35 U.S.C. 312(c) and 37 CFR 1.26(c). A decision on a petition under 37 CFR 1.927 and 1.181 is final and is not appealable.

Except for the limited *ultra vires* exception described in MPEP § 2646, no petition may be filed requesting review of a decision **granting** a request for reexamination even if the decision grants the request for reasons other than those advanced by the third party requester or as to claims other than those for which the third party requester sought reexamination. No right to review exists if reexamination is ordered in such a case, because all claims will be reexamined in view of all prior art during the reexamination under 37 CFR 1.937.

2654 Conduct of *Inter Partes* Reexamination Proceedings [Added R-2]

35 U.S.C. 314. *Conduct of inter partes reexamination proceedings*

(a) IN GENERAL.— Except as otherwise provided in this section, reexamination shall be conducted according to the procedures established for initial examination under the provisions of sections 132 and 133. In any inter partes reexamination proceeding under this chapter, the patent owner shall be permitted to propose any amendment to the patent and a new claim or claims, except that no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted.

(b) RESPONSE.—

(1) With the exception of the inter partes reexamination request, any document filed by either the patent owner or the third-party requester shall be served on the other party. In addition, the Office shall send to the third-party requester a copy of any communication sent by the Office to the patent owner concerning the patent subject to the inter partes reexamination proceeding.

(2) Each time that the patent owner files a response to an action on the merits from the Patent and Trademark Office, the third-party requester shall have one opportunity to file written comments addressing issues raised by the action of the Office or the patent owner's response thereto, if those written comments are received by the Office within 30 days after the date of service of the patent owner's response.

(c) SPECIAL DISPATCH.— Unless otherwise provided by the Director for good cause, all inter partes reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

37 CFR 1.937. Conduct of *inter partes* reexamination.

(a) All *inter partes* reexamination proceedings, including any appeals to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office, unless the Director makes a determination that there is good cause for suspending the reexamination proceeding.

(b) The *inter partes* reexamination proceeding will be conducted in accordance with §§ 1.104 through 1.116, the sections governing the application examination process, and will result in the issuance of an *inter partes* reexamination certificate under § 1.997, except as otherwise provided.

(c) All communications between the Office and the parties to the *inter partes* reexamination which are directed to the merits of the proceeding must be in writing and filed with the Office for entry into the record of the proceeding.

Once *inter partes* reexamination is ordered, a first Office action on the merits will be given (the first Office action will ordinarily be mailed with the order; see MPEP § 2660), and prosecution will proceed. Each time the patent owner responds to an Office action, the third party requester may comment on the Office action and the patent owner response, and thereby participate in the proceeding.

Reexamination will proceed even if the order is returned undelivered. As pointed out in MPEP § 2630, the notice under 37 CFR 1.11(c) is constructive notice to the patent owner, and lack of response from the patent owner will not delay reexamination.

The examination will be conducted in accordance with 37 CFR 1.104, 1.105, 1.110-1.113, 1.115, and 1.116 (35 U.S.C. 132 and 133) and will result in the issuance of a reexamination certificate under 37 CFR 1.997. The proceeding shall be conducted with special dispatch within the Office pursuant to 35 U.S.C. 314(c). The patent owner and the third party requester will be sent copies of all Office actions. Also, the patent owner and the third party requester must serve copies of all their submissions to the Office on each other. Citations of art submitted in the patent file prior to issuance of an order for reexamination will be considered by the examiner during the reexamination.

2655 Who Reexamines [Added R-2]

The examination will ordinarily be conducted by the same patent examiner in the Technology Center (TC) who made the decision on whether the reexamination request should be granted. See MPEP § 2636.

However, if a petition under 37 CFR 1.927 is granted, the reexamination will normally be conducted by another examiner. See MPEP § 2648.

2656 Prior Art Patents and Printed Publications Reviewed by Examiner in Reexamination [Added R-2]

The primary source of prior art will be the patents and printed publications cited in the request for *inter partes* reexamination.

The examiner must also consider patents and printed publications:

(A) cited by another reexamination requester under 37 CFR 1.510 or 37 CFR 1.915;

(B) cited by the patent owner under a duty of disclosure (37 CFR 1.933) in compliance with 37 CFR 1.98;

(C) discovered by the examiner in searching;

(D) of record in the patent file from earlier examination;

(E) of record in the patent file from any 37 CFR 1.501 submission prior to date of an order if it complies with 37 CFR 1.98; and

(F) cited by the third party requester under appropriate circumstances pursuant to 37 CFR 1.948.

The reexamination file must clearly indicate which prior art patents and printed publications the examiner has considered during the examination of the *inter partes* reexamination proceeding.

2657 Listing of Prior Art [Added R-2]

The examiner must list on a form PTO-892, if not already listed on a form PTO-1449, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having format equivalent to one of these forms), all prior art patents or printed publications which have been properly cited and relied upon by the reexamination requester in the request under 37 CFR 1.915.

The examiner must also list on a form PTO-892, if not already listed on a form PTO-1449, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms), all prior art patents or printed publications which have been cited in the decision on the request, applied in making rejections or cited as being pertinent during the reexamination proceedings. Such prior art patents or printed

publications may have come to the examiner's attention because they were:

(A) of record in the patent file due to a prior art submission under 37 CFR 1.501 which was received prior to the date of the order;

(B) of record in the patent file as result of earlier examination proceedings as to the patent;

(C) discovered by the examiner during a prior art search; or

(D) submitted pursuant to 37 CFR 1.948.

All citations listed on form PTO-892, and all citations not lined-through on any form PTO-1449, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms), will be printed on the reexamination certificate under "References cited."

2658 Scope of *Inter Partes* Reexamination [Added R-2]

37 CFR 1.906. *Scope of reexamination in inter partes reexamination proceeding.*

(a) Claims in an *inter partes* reexamination proceeding will be examined on the basis of patents or printed publications and, with respect to subject matter added or deleted in the reexamination proceeding, on the basis of the requirements of 35 U.S.C. 112.

(b) Claims in an *inter partes* reexamination proceeding will not be permitted to enlarge the scope of the claims of the patent.

(c) Issues other than those indicated in paragraphs (a) and (b) of this section will not be resolved in an *inter partes* reexamination proceeding. If such issues are raised by the patent owner or the third party requester during a reexamination proceeding, the existence of such issues will be noted by the examiner in the next Office action, in which case the patent owner may desire to consider the advisability of filing a reissue application to have such issues considered and resolved.

Inter partes reexamination differs from *ex parte* reexamination in matters of procedure, such as when the third party requester can participate, the types of Office actions and the timing of issuance of the Office actions, and the requirement for identification of the real party in interest. *Inter partes* reexamination also differs from *ex parte* reexamination in the estoppel effect it provides as to the third party requesters and when the initiation of a reexamination is prohibited.

Inter partes reexamination **does not**, however, differ from *ex parte* reexamination as to the substance to be considered in the proceeding.

I. PRIOR ART PATENTS OR PRINTED PUBLICATIONS

Rejections on art in reexamination proceedings may only be made on the basis of prior art patents or printed publications. See MPEP § 2258 and § 2258.01 for a discussion of art rejections in reexamination proceedings based on prior art patents or printed publications. The discussion there includes making double patenting rejections and the use of admissions.

It is to be noted that the decisions cited in MPEP §§ 2258 and 2258.01 for determining the presence or absence of "a substantial new question of patentability" in *ex parte* reexamination proceedings apply equally in *inter partes* reexamination proceedings, since the statutory language relied upon in those decisions, which is taken from the *ex parte* reexamination statute, is also found in the *inter partes* reexamination statute.

II. COMPLIANCE WITH 35 U.S.C. 112

Where new or amended claims are presented or where any part of the disclosure is amended, the claims of the reexamination proceeding are to be examined for compliance with 35 U.S.C. 112. See MPEP § 2258 for a discussion of the examination in a reexamination proceeding based upon 35 U.S.C. 112.

III. CLAIMS IN PROCEEDING MUST NOT ENLARGE SCOPE OF THE CLAIMS OF THE PATENT

Where new claims are presented, or where any part of the disclosure is amended, the claims of the *inter partes* reexamination proceeding should be examined under 35 U.S.C. 314, to determine whether they enlarge the scope of the original claims. 35 U.S.C. 314(a) states that "no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted" in an *inter partes* reexamination proceeding.

A. *Criteria for Enlargement of the Scope of the Claims*

A claim presented in a reexamination proceeding **enlarges the scope** of the claims of the patent being reexamined where the claim is broader than each and every claim of the patent. See MPEP § 1412.03 for guidance as to when the presented claim is considered

to be a broadening claim as compared with the claims of the patent, i.e., what is broadening and what is not. If a claim is considered to be a broadening claim for purposes of reissue, it is likewise considered to be a broadening claim in reexamination.

B. Amendment of the Specification

Where the specification is amended in a reexamination proceeding, the examiner should make certain that the amendment to the specification does not enlarge the scope of the claims of the patent. An amendment to the specification can enlarge the scope of the claims by redefining the scope of the terms in a claim, even where the claims are not amended in any respect.

C. Rejection of Claims Where There Is Enlargement

Any claim which enlarges the scope of the claims of the patent should be rejected under 35 U.S.C. 314(a). Form paragraph 26.03.01 is to be employed in making the rejection.

¶ 26.03.01 *Rejection, 35 U.S.C. 314(a), Claim Enlarges Scope of Patent*

Claim [1] rejected under 35 U.S.C. 314(a) as enlarging the scope of the claims of the patent being reexamined. 35 U.S.C. 314(a) states that “no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted” in an *inter partes* reexamination proceeding. A claim presented in a reexamination “enlarges the scope” of the patent claims where the claim is broader than the claims of the patent. A claim is broadened if it is broader in any one respect, even though it may be narrower in other respects. [2].

Examiner Note:

The claim limitations which are considered to broaden the scope should be identified and explained in bracket 2. See MPEP § 2658.

IV. OTHER MATTERS

A. Patent Under Reexamination Subject of a Prior Office or Court Decision

Where some of the patent claims in a patent being reexamined have been the subject of a prior Office or court decision, see MPEP § 2642. Where other proceedings involving the patent are pending with the

reexamination proceeding, see MPEP § 2686 - § 2686.04.

Patent claims not subject to reexamination because of their prior adjudication by a court should be identified. See MPEP § 2642. For handling a “live” claim dependent on a patent claim not subject to reexamination, see MPEP § 2660.03. All added claims will be examined.

Where grounds set forth in a prior Office or Federal Court decision, are not based on patents or printed publications, yet clearly raise questions as to the claims, the examiner’s Office action should clearly state that the claims have not been examined as to those grounds not based on patents or printed publications nor applicable portions of 35 U.S.C. 112 stated in the prior decision. See 37 CFR 1.906(c). See *In re Knight*, 217 USPQ 294 (Comm’r Pat. 1982). All claims under reexamination should, however, be reexamined on the basis of prior patents and printed publications.

B. All “Live” Claims Are Reexamined During Reexamination

Although a request for reexamination may not specify all claims as presenting a substantial new question, each “live” claim (i.e., each existing claim not held invalid by a final decision, after all appeals) of the patent will be reexamined. The resulting reexamination certificate will indicate the status of all of the patent claims and any added patentable claims.

C. Restriction Not Proper in Reexamination

Restriction requirements cannot be made in a reexamination proceeding since no statutory basis exists for restriction in a reexamination proceeding.

D. Ancillary Matters

There are matters ancillary to reexamination which are necessary and incident to patentability which will be considered. Amendments may be made to the specification to correct, for example, an inadvertent failure to claim foreign priority or the continuing status of the patent relative to a parent application if such correction is necessary to overcome a reference applied against a claim of the patent.

E. Claiming Foreign and Domestic Priority in Reexamination

The patent owner may obtain the right of foreign priority under 35 U.S.C. 119 (a)-(d) where a claim for priority had been made before the patent was granted, and it is only necessary for submission of the certified copy in the reexamination proceeding to perfect priority. Likewise, patent owner may obtain the right of foreign priority under 35 U.S.C. 119 (a)-(d) where it is necessary to submit for the first time both the claim for priority and the certified copy. However, where it is necessary to submit for the first time both the claim for priority and the certified copy, and the patent to be reexamined matured from a **utility or plant application filed on or after November 29, 2000**, then the patent owner will have to also file a grantable petition for an unintentionally delayed priority claim under 37 CFR 1.55(c). See MPEP § 201.14(a).

Also, patent owner may correct the failure to adequately claim (in the application for the patent to be reexamined) benefit under 35 U.S.C. 120 of an earlier filed copending U.S. patent application. For a patent to be reexamined which matured from a utility or plant applications filed on or after November 29, 2000, the patent owner will have to file a petition for an unintentionally delayed benefit claim under 37 CFR 1.78(a)(3). See MPEP § 201.11.

For a patent to be reexamined which matured from a utility or plant application filed **before** November 29, 2000, the patent owner can correct via reexamination the failure to adequately claim benefit under 35 U.S.C. 119(e) of an earlier filed provisional application. Under no circumstances can a reexamination proceeding be employed to correct or add a benefit claim under 35 U.S.C. 119(e) for a patent matured from a utility or plant application filed on or after November 29, 2000.

No renewal of previously made claims for foreign priority under 35 U.S.C. 119 or domestic benefit under 35 U.S.C. 119(e) or 120, is necessary during reexamination.

F. Correction of Inventorship

Correction of inventorship may also be made during reexamination. See 37 CFR 1.324 and MPEP § 1481 for petition for correction of inventorship in a patent. If a petition filed under 37 CFR 1.324 is granted, a Certificate of Correction indicating the

change of inventorship will not be issued, because the reexamination certificate that will ultimately issue will contain the appropriate change-of-inventorship information (i.e., the Certificate of Correction is in effect merged with the reexamination certificate).

G. Affidavits in Reexamination

Affidavits under 37 CFR 1.131 and 1.132 may be utilized in a reexamination proceeding. Note, however, that an affidavit under 37 CFR 1.131 may not be used to “swear back” of a reference patent if the reference patent is claiming the same invention as the patent undergoing reexamination. In such a situation, the patent owner may, if appropriate, seek to raise this issue via an affidavit under 37 CFR 1.130 (see MPEP § 718) or in an interference proceeding via an appropriate reissue application if such a reissue application may be filed (see MPEP § 1449.02).

H. Issues Not Considered in Reexamination

If questions other than those indicated above (for example, questions of patentability based on public use or on sale, fraud, abandonment under 35 U.S.C. 102(c), etc.) are raised by the third party requester or the patent owner during a reexamination proceeding, the existence of such questions will be noted by the examiner in the next Office action, in which case the patent owner may desire to consider the advisability of filing a reissue application to have such questions considered and resolved. Such questions could arise in a reexamination requester’s 37 CFR 1.915 request or in 37 CFR 1.947 comments by the third party requester.

Note form paragraph 26.03.

¶ 26.03 Issue Not Within Scope of Inter Partes Reexamination

It is noted that an issue not within the scope of reexamination proceedings has been raised. [1].The issue will not be considered in a reexamination proceeding. 37 CFR 1.906(c). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid.

Examiner Note:

1. In bracket 1, identify the issues.
2. This paragraph may be used either when the patent owner or the third party requester raises issues such as (but not limited to) public use or on sale, fraud, or abandonment of the invention.

Such issues should not be raised independently by the patent examiner.

If questions of patentability based on public use or on sale, fraud, abandonment under 35 U.S.C. 102(c), etc. are independently discovered by the examiner during a reexamination proceeding but were not raised by the third party requester or the patent owner, the existence of such questions will not be noted by the examiner in an Office action, because 37 CFR 1.906(c) is only directed to such questions “raised by the patent owner or the third party requester”.

I. Request for Reexamination Filed on Patent after it Has Been Reissued

Where a request for reexamination is filed on a patent after it has been reissued, reexamination will be denied because the patent on which the request for reexamination is based has been surrendered. Should reexamination of the reissued patent be desired, a new request for reexamination including, and based on, the specification and claims of the reissue patent must be filed.

Any amendment made by the patent owner in the prosecution of the reexamination proceeding, should treat the changes made by the granted reissue patent as the text of the patent, and all bracketing and underlining made with respect to the patent as changed by the reissue.

Where the reissue patent issues after the filing of a request for reexamination, see MPEP § 2686.03.

2659 *Res Judicata* and Collateral Estoppel in Reexamination Proceedings [Added R-2]

MPEP § 2642 and § 2686.04 relate to the Office policy controlling the determination on a request for reexamination and the subsequent examination phase of the reexamination, where there has been a Federal Court decision on the merits as to the patent for which reexamination is requested.

Since claims finally held invalid by a Federal Court, after all appeals, will be withdrawn from consideration and not reexamined during a reexamination proceeding, a **rejection** on the grounds of *res judicata* will not be appropriate in reexamination. In situations, where the issue decided in Court did not invalidate claims, but applies in one or more respects to the

claims being reexamined, the doctrine of collateral estoppel may be applied in reexamination to resolve the issue. Thus, for example, where a finding that reference X meets a limitation of a claim was necessary to the final decision of the Court invalidation of claim 5, collateral estoppel would attach to the same limitation in claim 2, which was not invalidated (e.g., because claim 2 contained additional limitations not found in claim 5).

2660 First Office Action [R-3]

37 CFR 1.935. Initial Office action usually accompanies order for inter partes reexamination.

The order for *inter partes* reexamination will usually be accompanied by the initial Office action on the merits of the reexamination.

37 CFR 1.104. Nature of examination.

(a) Examiner's action.

(1) On taking up an application for examination or a patent in a reexamination proceeding, the examiner shall make a thorough study thereof and shall make a thorough investigation of the available prior art relating to the subject matter of the claimed invention. The examination shall be complete with respect both to compliance of the application or patent under reexamination with the applicable statutes and rules and to the patentability of the invention as claimed, as well as with respect to matters of form, unless otherwise indicated.

(2) The applicant, or in the case of a reexamination proceeding, both the patent owner and the requester, will be notified of the examiner's action. The reasons for any adverse action or any objection or requirement will be stated in an Office action and such information or references will be given as may be useful in aiding the applicant, or in the case of a reexamination proceeding the patent owner, to judge the propriety of continuing the prosecution.

(3) An international-type search will be made in all national applications filed on and after June 1, 1978.

(4) Any national application may also have an international-type search report prepared thereon at the time of the national examination on the merits, upon specific written request therefor and payment of the international-type search report fee set forth in § 1.21(e). The Patent and Trademark Office does not require that a formal report of an international-type search be prepared in order to obtain a search fee refund in a later filed international application.

(b) Completeness of examiner's action. The examiner's action will be complete as to all matters, except that in appropriate circumstances, such as misjoinder of invention, fundamental defects in the application, and the like, the action of the examiner may be limited to such matters before further action is made. However, matters of form need not be raised by the examiner until a claim is found allowable.

(c) Rejection of claims.

(1) If the invention is not considered patentable, or not considered patentable as claimed, the claims, or those considered unpatentable will be rejected.

(2) In rejecting claims for want of novelty or for obviousness, the examiner must cite the best references at his or her command. When a reference is complex or shows or describes inventions other than that claimed by the applicant, the particular part relied on must be designated as nearly as practicable. The pertinence of each reference, if not apparent, must be clearly explained and each rejected claim specified.

(3) In rejecting claims the examiner may rely upon admissions by the applicant, or the patent owner in a reexamination proceeding, as to any matter affecting patentability and, insofar as rejections in applications are concerned, may also rely upon facts within his or her knowledge pursuant to paragraph (d)(2) of this section.

(4) ***>*Subject matter which is developed by another person which qualifies as prior art only under 35 U.S.C. 102(e), (f) or (g) may be used as prior art under 35 U.S.C. 103 against a claimed invention unless the entire rights to the subject matter and the claimed invention were commonly owned by the same person or organization or subject to an obligation of assignment to the same person or organization at the time the claimed invention was made.

(i) Subject matter developed by another person and a claimed invention shall be deemed to have been commonly owned by the same person or organization, or subject to an obligation of assignment to the same person or organization in any application and in any patent granted on or after December 10, 2004, if:

(A) The claimed invention was made by or on behalf of parties to a joint research agreement that was in effect on or before the date the claimed invention was made;

(B) The claimed invention was made as a result of activities undertaken within the scope of the joint research agreement; and

(C) The application for patent for the claimed invention discloses or is amended to disclose the names of the parties to the joint research agreement.

(ii) For purposes of paragraph (c)(4)(i) of this section, the term “joint research agreement” means a written contract, grant, or cooperative agreement entered into by two or more persons or entities for the performance of experimental, developmental, or research work in the field of the claimed invention.<

(5) The claims in any original application naming an inventor will be rejected as being precluded by a waiver in a published statutory invention registration naming that inventor if the same subject matter is claimed in the application and the statutory invention registration. The claims in any reissue application naming an inventor will be rejected as being precluded by a waiver in a published statutory invention registration naming that inventor if the reissue application seeks to claim subject matter:

(i) Which was not covered by claims issued in the patent prior to the date of publication of the statutory invention registration; and

(ii) Which was the same subject matter waived in the statutory invention registration.

(d) Citation of references.

(1) If domestic patents are cited by the examiner, their numbers and dates, and the names of the patentees will be stated. If domestic patent application publications are cited by the examiner, their publication number, publication date, and the names of the applicants will be stated. If foreign published applications or patents are cited, their nationality or country, numbers and dates, and the names of the patentees will be stated, and such other data will be furnished as may be necessary to enable the applicant, or in the case of a reexamination proceeding, the patent owner, to identify the published applications or patents cited. In citing foreign published applications or patents, in case only a part of the document is involved, the particular pages and sheets containing the parts relied upon will be identified. If printed publications are cited, the author (if any), title, date, pages or plates, and place of publication, or place where a copy can be found, will be given.

(2) When a rejection in an application is based on facts within the personal knowledge of an employee of the Office, the data shall be as specific as possible, and the reference must be supported, when called for by the applicant, by the affidavit of such employee, and such affidavit shall be subject to contradiction or explanation by the affidavits of the applicant and other persons.

(e) *Reasons for allowance.* If the examiner believes that the record of the prosecution as a whole does not make clear his or her reasons for allowing a claim or claims, the examiner may set forth such reasoning. The reasons shall be incorporated into an Office action rejecting other claims of the application or patent under reexamination or be the subject of a separate communication to the applicant or patent owner. The applicant or patent owner may file a statement commenting on the reasons for allowance within such time as may be specified by the examiner. Failure by the examiner to respond to any statement commenting on reasons for allowance does not give rise to any implication.

I. PREPARATION AND MAILING OF FIRST OFFICE ACTION

The first Office action on the merits will ordinarily be mailed together with the order granting reexamination. In some instances, however, it may not be practical or possible to mail the first Office action together with the order. For example, the reexamination file may have been provided to the examiner too late to include an Office action together with the order and still meet the deadline of ten weeks from the filing date of the request for mailing the order granting the request. Another example is where certain information or copies of prior art may not be available until after the ten week time-deadline. In these situations, the order would be prepared and mailed, and the Office action would be mailed at a later date. In addition, a first Office action is not mailed with the order where the files will be forwarded for decision on merger of a reexamination proceeding with another

reexamination proceeding and/or a reissue application. Rather, an Office action would be issued after the merger decision, as a single action for the merged proceeding. See MPEP § 2686.01 and MPEP § 2686.02.

Where the order will be mailed **without** the first Office action, the order must indicate that an Office action will issue in due course. Form paragraph 26.04 should be used to inform patent owner and requester that the action was not inadvertently left out or separated from the order.

¶ 26.04 First Action Not Mailed With Order

An Office action on the merits does not accompany this order for *inter partes* reexamination. An Office action on the merits will be provided in due course.

Where the Office action cannot be mailed with the order, the Office action should, in any event, be issued within **two months** from the mailing of the order, unless the case is awaiting merger, in which case the Office action should be issued within **one month** from the mailing of the merger decision.

II. TYPES OF FIRST ACTION ON THE MERITS

Where all of the patent claims are found patentable in the first action, the examiner will issue an Action Closing Prosecution (ACP). The ACP is discussed in MPEP § 2671.02.

Where the examiner determines that one or more of the patent claims are to be rejected, the first Office action on the merits will be similar to a first action on the merits in an application (or *ex parte* reexamination) where a rejection is made. In this situation, even though the action will follow the format of an action in an application, *inter partes* reexamination practice must be followed. Accordingly, *inter partes* reexamination forms will be used, special *inter partes* reexamination time periods will be set, *inter partes* reexamination form paragraphs will be used, and the patent owner and the third party requester must be sent a copy of the action.

III. FORM AND CONTENT OF FIRST OFFICE ACTION ON THE MERITS THAT IS NOT AN ACP

The examiner's first Office action will be a statement of the examiner's position, and it should be so

complete that the second Office action can properly be made an Action Closing Prosecution (ACP). See MPEP § 2671.02. Accordingly, it is intended that the first Office action be the primary action to establish the issues which exist, such that the patent owner response and any third party comments can place the proceeding in condition for the issuance of an ACP.

The examiner's first action should be comprehensive and address all issues as to the prior art patents and/or printed publications. The action will clearly set forth each ground of rejection and/or ground of objection, and the reasons supporting the ground. The action will also clearly set forth each determination favorable to the patentability of claims, i.e., each rejection proposed by the third party requester that the examiner refuses to adopt. Reasons why the rejection proposed by the third party requester is not appropriate (i.e., why the claim cannot be rejected under the ground proposed by the third party requester) must be clearly stated for each rejection proposed by the third party requester that the examiner refuses to adopt. Comprehensive reasons for patentability must be given for each determination favorable to patentability of claims. See MPEP § 1302.14 for examples of suitable statements of reasons.

In addition to the grounds and determinations set forth in the action, the first action should respond to the substance of each argument raised in the request by the third party requester pursuant to 37 CFR 1.915. Also, it should address any issues proper for reexamination that the examiner becomes aware of independent of the request.

Ordinarily, there will be no patent owner amendment to address in the first Office action of the *inter partes* reexamination, because 37 CFR 1.939(b) prohibits a patent owner amendment prior to first Office action. Thus, the first Office action will ordinarily contain no rejection based on 35 U.S.C. 112; a rejection based on 35 U.S.C. 112 is proper in reexamination only when it is raised by an amendment of the patent. The only exception is where the newly requested and granted reexamination is merged with an existing reexamination proceeding which already contains an amendment. In such a case, the first Office action for the new reexamination would be a subsequent action for the existing reexamination, and the amendment in the merged proceeding would be examined for any 35 U.S.C. 112 issues raised by the

amendment and any improper broadening of the claims under 35 U.S.C. 314.

In view of the requirement for “special dispatch” in *inter partes* reexamination proceedings (35 U.S.C. 314(c)), it is intended that the examiner will issue an ACP at the earliest possible time. Accordingly, the first action should include a statement cautioning the patent owner that a complete response should be made to the action, since the next action is expected to be an ACP. The first action should further caution the patent owner that the requirements of 37 CFR 1.116(b) will be strictly enforced after an ACP and that any amendment after the ACP must include “a showing of good and sufficient reasons why they are necessary and were not earlier presented” in order to be considered. Form paragraph 26.05 should be inserted at the end of the first Office action followed by form paragraph 26.73.

**>

¶ 26.05 *Papers To Be Submitted in Response to Action*

In order to ensure full consideration of any amendments, affidavits or declarations, or other documents as evidence of patentability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be an Action Closing Prosecution (ACP), will be governed by 37 CFR 1.116(b) and (d), which will be strictly enforced.

<

¶ 26.73 *Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam

Central Reexamination Unit
Office of Patent Legal Administration
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-0100
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

<

The Office action cover sheet is PTOL-2064. Where the Office action is a first Office action, the space on the PTOL-2064 for the date of the communication to which the Office action is responsive to should not be filled in, since it is the order for reexamination that responds to the request for reexamination, not the first Office action.

As with all other Office correspondence on the merits in a reexamination proceeding, the first Office action must be signed by a primary examiner.

IV. SAMPLE FIRST OFFICE ACTION

A sample of a first Office action in an *inter partes* reexamination proceeding is set forth below. The examiner should leave the paper number blank, **>since IFW files do not have a paper number<.

OPTIONAL INTER PARTES REEXAMINATION

OFFICE ACTION IN INTER PARTES REEXAMINATION

Responsive to the communication(s) filed by:
 Patent Owner on _____
 Third Party(ies) on _____

RESPONSE TIMES ARE SET TO EXPIRE AS FOLLOWS:

For Patent Owner's Response:

Two MONTH(S) from the mailing date of this action. 37 CFR 1.945. EXTENSIONS OF TIME ARE GOVERNED BY 37 CFR 1.956.

For Third Party Requester's Comments on the Patent Owner Response:

30 DAYS from the date of service of any patent owner's response. 37 CFR 1.947. NO EXTENSIONS OF TIME ARE PERMITTED. 35 U.S.C. 314(b)(3).

All correspondence relating to this inter partes reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Office action.

This action is not an Action Closing Prosecution under 37 CFR 1.949, nor is it a Right of Appeal Notice under 37 CFR 1.953.

PART I. THE FOLLOWING ATTACHMENT(S) ARE PART OF THIS ACTION:

1. Notice of References Cited by Examiner, PTO-892.
2. Information Disclosure Citation, PTO-1449.
3. _____

PART II. SUMMARY OF ACTION:

- 1a. Claims 4-6 are subject to reexamination.
- 1b. Claims 1-3 are not subject to reexamination.
2. Claims _____ have been canceled.
3. Claims 5 are confirmed. [Unamended patent claims]
4. Claims _____ are patentable. [Amended or new claims]

PTOL-2064 (12/03)

This first Office action on the merits is being mailed together with the order granting reexamination. 37 CFR 1.935.

Claims 1-3:

Claims 1-3 of the Smith patent are not being reexamined in view of the final decision in the *ABC Corp. v. Smith*, 999 USPQ2d 99 (Fed. Cir. 2008). Claims 1-3 were held invalid by the Court of Appeals for the Federal Circuit.

Claims 4 and 6:

The following is a quotation of 35 U.S.C. 103 which forms the basis for all obviousness rejections set forth in this Office action:

35 U.S.C. 103. Conditions for patentability, non-obvious subject matter.

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 6 are rejected under 35 U.S.C. 103 as being unpatentable over Berridge in view of McGee.

Berridge teaches extruding a chlorinated polymer using the same extrusion structure recited in Claims 4 and 6 of the Smith patent. However, Berridge does not show supporting the extrusion barrel at an angle of 25-35 degrees to the horizontal, using spring supports. McGee teaches spring supporting an extrusion barrel at an angle of 30 degrees, in order to decrease imperfections in extruded chlorinated polymers. It would have been obvious to one of ordinary skill in the polymer extrusion art to support the extrusion barrel of Berridge on springs and at an angle of 30 degrees because McGee teaches this to be known in the polymer extrusion art for decreasing imperfections in extruded chlorinated polymers.

This rejection was proposed by the third party requester in the request for reexamination, and it is being adopted essentially as proposed in the request.

Claim 5:

Claim 5 is patentable over the prior art patents and printed publications because of the recitation of the specific octagonal extrusion die used with the Claim 4 spring-supported barrel. This serves to reduce imperfections in the extruded chlorinated polymers and is not taught by the art of record, alone or in combination.

Proposed third party requester rejection:

In the request, at pages 10-14, the third party requester proposes the claim 5 be rejected based upon Berridge in view of McGee, and further taken with Bupkes or Gornisht. The third party requester points out that both Bupkes and Gornisht teach the use of an octagonal extrusion die to provide a smooth unified extrusion product.

This rejection of claim 5 proposed by the third party requester is not adopted.

While Bupkes and Gornisht do in fact teach the use of an octagonal extrusion die to provide smooth unified extrusion product, Bupkes teaches such for glass making and Gornisht teaches such for a food product. Despite the argument presented at pages 12-13 of the request and the demonstration of exhibit A, the skilled artisan would not equate the advantages obtained by Bupkes and Gornisht for glass and food, respectively, to the removal of imperfections in a polymer melt being extruded to a solid plastic product. Thus, Bupkes and Gornisht are not deemed to be combinable with Berridge and McGee for purposes of rejecting claim 5.

Issue not within the scope of reexamination proceedings:

It is noted that an issue not within the scope of reexamination proceedings has been raised. In the above-cited final Court decision, a question is raised as to the possible public use of the invention of Claim 4. This was pointed out by the third party requester in the request for reexamination. The issue will not be considered in a reexamination proceeding (37 CFR 1.906(c)). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid based upon the issue.

Other art made of record:

Swiss Patent 80555 and the American Machinist article are cited to show cutting and forming extruder apparatus somewhat similar to that claimed in the Smith patent.

Conclusion:

In order to ensure full consideration of any amendments, affidavits or declarations, or other documents as evidence of patentability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be an action closing prosecution (ACP), will be governed by 37 CFR 1.116, which will be strictly enforced.

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

_____/s/
Kenneth M. Schor
Primary Examiner,
Technology Center *(571) 3700<

V. ACTIVITY AFTER THE DRAFT (TEXT) OF THE FIRST OFFICE ACTION HAS BEEN PREPARED

The examiner will prepare the action, ensure that Technology Center (TC) clerical processing is done, and forward the *>reexamination<* to the TC Special Program Examiner (SPRE) no later than two (2) weeks from the date of the consultation conference. The action is reviewed by the SPRE (see MPEP § *>2633<*), who then arranges for the *>reexamination<* to be PALMed out and hand-carried directly to the Central Reexamination Unit (CRU). The *>reexamination<* is forwarded to the Central Reexamination Unit by the SPRE within three (3) days of the SPRE's receipt of the *>reexamination<* from the examiner.

2660.02 The Title [R-3]

Normally, the title of the patent will not need to be changed during reexamination. In those very rare instances where a change of the title does become necessary, the examiner should point out the need for the change as early as possible in the prosecution, as a part of an Office action. This will give the patent owner an opportunity to comment on the change prior to the examiner's formal change in the title via an examiner's amendment accompanying the Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) at the time that the *>prosecution of the reexamination<* proceeding is to be terminated. A change in the title in a reexamination can only be effected via a formal examiner's amendment accompanying the NIRC. Changing the title and merely initialing the change is not permitted in reexamination.

While a change in the title may be commented on by the patent owner, the final decision as to the change is that of the examiner, and the examiner's decision is not subject to review. Accordingly, where the examiner notes the need for a change at the time of issuing the NIRC, the examiner may make the change at that point, even though the patent owner will not have an opportunity to comment on the change.

An example of a situation where it would be appropriate to change the title is where all the claims directed to one of the categories of invention (in the patent) are canceled via the reexamination proceed-

ing, it would be appropriate to change the title to delete reference to that category.

2660.03 Dependent Claims [Added R-2]

If an unamended base patent claim (i.e., a claim appearing in the patent) has been rejected or canceled, any claim which is directly or indirectly dependent thereon should be indicated as patentable if it is otherwise patentable. The dependent claim should not be objected to nor rejected merely because it depends upon a rejected or canceled original patent claim. *No requirement should be made for rewriting the dependent claim in independent form.* As the original patent claim numbers are not changed in a reexamination proceeding, the content of the canceled base claim would remain in the printed patent and would be available to be read as a part of the dependent claim.

If a new base claim has been canceled in a reexamination proceeding, a claim which depends thereon should be rejected as indefinite. If an *amended* base patent claim or a new base claim is rejected, a claim dependent thereon should be objected to if it is otherwise patentable, and a requirement should be made for rewriting the dependent claim in independent form.

2661 Special Status for Action [Added R-2]

35 U.S.C. 314. *Special Status For Action*

(c) SPECIAL DISPATCH.— Unless otherwise provided by the Director for good cause, all *inter partes* reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

In view of the requirement for "special dispatch," all reexamination proceedings will be "special" throughout their pendency in the Office. In order to further the requirement for special dispatch, the examiner's first Office action on the merits in an *inter partes* reexamination should ordinarily be mailed together with the order for reexamination. See MPEP § 2660.

Any cases involved in litigation, whether they are reexamination proceedings or reissue applications, will have priority over all other cases. Reexamination proceedings not involved in litigation will have prior-

ity over all other cases except for reexaminations or reissues involved in litigation.

2662 Time for Response and Comments [R-3]

The time periods for response and comments for the various stages of an *inter partes* reexamination proceeding are as follows:

(A) After an Office action that is not an Action Closing Prosecution (non-ACP Office action).

(1) Patent owner may file a patent owner's response within the time for response set in the non-ACP Office action. The time period set for response will normally be two (2) months from the mailing date of the action.

(2) Where patent owner files a timely response to the non-ACP Office action, the third party requester may once file written comments addressing issues raised by the Office action or by the patent owner response to the action. The third party requester's written comments must be submitted within 30 days from the date of service of the patent owner's response on the third party requester. The date of service can be found on the Certificate of Service that accompanies the patent owner's response.

(B) After an Office letter indicating that a response by the patent owner is not proper.

After an Office letter indicates that a response filed by the patent owner is not completely responsive to a prior Office action (i.e., an incomplete response), the patent owner is required to complete the response within the time period set in the Office letter. 37 CFR 1.957(d). A time period of 30 days or one month (whichever is longer) is normally set. Any third party requester comments on a supplemental patent owner response that completes the initial response must be filed within 30 days from the date of service of the patent owner's supplemental response on the third party requester.

(C) After an Action Closing Prosecution (ACP).

The patent owner may once file written comments and/or present a proposed amendment to the claims within the time period set in the ACP. 37 CFR 1.951(a). Normally, the ACP will set a period of 30 days or one month (whichever is longer) from the mailing date of the ACP. Where the patent owner files

comments and/or a proposed amendment, the third party requester may once file comments responsive to the patent owner's submission within 30 days from the date of service of the patent owner's submission on the third party requester. 37 CFR 1.951(b).

(D) Appeal to the Board of Patent Appeals and Interferences (Board) after the examiner issues Right of Appeal Notice.

(1) After the examiner issues a Right of Appeal Notice (RAN), the patent owner and the third party requester may each file a notice of appeal within 30 days or one month (whichever is longer) from the mailing date of the RAN. 37 CFR 1.953(c). The time for filing a notice of appeal cannot be extended. 37 CFR *41.61(e)<.

(2) A patent owner who has not filed a timely notice of appeal may file a notice of cross appeal (with respect to any decision adverse to the patentability of any claim) within fourteen days of service of a third party requester's notice of appeal. 37 CFR *41.61(b)(1)<.

A third party requester who has not filed a timely notice of appeal may file a notice of cross appeal (with respect to any final decision favorable to the patentability of any claim) within fourteen days of service of a patent owner's notice of appeal. 37 CFR *41.61(b)(2)<.

The time for filing a notice of cross-appeal cannot be extended. 37 CFR *41.61(e)<.

(E) After an Office notification of defective notice of appeal or notice of cross appeal (to the Board).

A party who is notified of a defective notice of appeal, or defective notice of cross appeal, must cure the defect within one month from the mail date of the Office letter notifying the party. (Form PTOL-2067 should be used to notify the parties.)

The time for curing a defective notice of appeal or cross-appeal cannot be extended, since the paper curing the defect is in-effect a substitute notice of appeal or cross-appeal.

(F) Filing of briefs after notice of appeal or notice of cross appeal (to the Board).

(1) Each party that filed a notice of appeal or notice of cross appeal may file an appellant brief and fee within two months after the last-filed notice of

appeal or cross appeal. Additionally, if any party to the reexamination is entitled to file an appeal or cross appeal but fails to timely do so, the appellant brief and fee may be filed within two months after the expiration of time for filing (by the last party entitled to do so) of the notice of appeal or cross appeal. 37 CFR *41.66(a).

(2) Once an appellant brief has been properly filed, an opposing party may file a respondent brief and fee within one month from the date of service of the appellant brief. 37 CFR *41.66(b).

(3) The times for filing appellant and respondent briefs may not be extended. 37 CFR *41.66(a) and (b).

(G) After an Office notification of non-compliance of appellant brief or respondent brief.

A party who is notified of non-compliance of an appellant brief or respondent brief must file an amended brief within a non-extendable time period of one month from the date of the Office letter notifying the party of the non-compliance of the brief.

(H) Rebuttal brief after the examiner issues an examiner's answer.

A third-party requester appellant and/or a patent owner appellant may each file a rebuttal brief within one month of the date of the examiner's answer. The time for filing a rebuttal brief may not be extended. 37 CFR *41.66(d).

(I) Oral Hearing.

If an appellant or a respondent (who has filed a respondent brief) desires an oral hearing by the Board, he or she must file a written request for an oral hearing accompanied by the fee set forth in 37 CFR *41.20(b)(3) within two months after the date of the examiner's answer. The time for filing a request for oral hearing may not be extended. 37 CFR *41.73(b).

(J) Appeal to Court.

The time for the patent owner and/or the third party requester to file a notice of appeal to the U.S. Court of Appeals for the Federal Circuit is two months from the date of the Board decision. If a timely request for rehearing (37 CFR *41.79) is filed, the time for the patent owner and/or the third party requester to file a notice of appeal to the Federal

Circuit is two months from final Board action on the request for rehearing. 37 CFR 1.304(a)(1).

(K) Extensions of Time.

See MPEP § 2665 as to extensions of time in *inter partes* reexamination.

2664 Mailing of Office Action [R-3]

The Technology Center (TC) does not mail the Office action for an *inter partes* reexamination *file. After an Office Action is completed and processed in a TC, the TC's Special Program Examiner (SPRE) arranges for the *reexamination to be PALMed out of the TC and the action hand-carried directly to the Central Reexamination Unit (CRU). In the CRU, the Office action is given a general review by a Reexamination Legal Advisor (RLA) and (if proper) mailed by the CRU support staff. In conjunction with mailing, any appropriate processing (e.g., PALM work, update scanning) is carried out.

Inter partes reexamination forms are structured so that the PALM printer can be used to print the identifying information for the reexamination file and the mailing address (usually the address of the patent owner's attorney or agent of record). Where there is no attorney or agent of record, the patent owner's address is printed. Only the first owner's address is printed where there are multiple partial owners; a transmittal form PTOL-2070 is also provided for each partial owner in addition to the one named on the top of the Office action.

All actions in an *inter partes* reexamination proceeding will have a copy mailed to the third party requester. A transmittal form PTOL-2070 must be used in providing the third party requester with a copy of each Office action.

A completed transmittal form PTOL-2070 will be provided for each requester (there can be multiple requesters in a merged reexamination proceeding; see MPEP § 2686.01) and each additional partial owner as discussed above, and the appropriate address will be entered on the transmittal form(s). The number of transmittal forms provides a ready reference for the number of copies of each Office action to be made, and the transmittal form permits use of the window envelopes in mailing the copies of the action to parties other than the patent owner.

2665 Extension of Time for Patent Owner Response [R-3]

37 CFR 1.956. Patent owner extensions of time in *inter partes* reexamination.

**>The time for taking any action by a patent owner in an *inter partes* reexamination proceeding will be extended only for sufficient cause and for a reasonable time specified. Any request for such extension must be filed on or before the day on which action by the patent owner is due, but in no case will the mere filing of a request effect any extension. Any request for such extension must be accompanied by the petition set forth in § 1.17(g). See § 1.304(a) for extensions of time for filing a notice of appeal to the U.S. Court of Appeals for the Federal Circuit.<

The provisions of 37 CFR 1.136(a) and 1.136(b) are NOT applicable to *inter partes* reexamination proceedings under any circumstances. Public Law 97-247 amended 35 U.S.C. 41 to authorize the Director of the USPTO to *>provide< for extensions of time to take action >which do not require a reason for the extension of time< in an “application.” An *inter partes* reexamination proceeding does not involve an “application.” The provisions of 37 CFR 1.136 authorize extensions of the time period only in an application in which an applicant must respond or take action. There is neither an “application,” nor an “applicant” involved in an *inter partes* reexamination proceeding.

The times for filing a notice of appeal or cross-appeal, an appellant brief, a respondent brief, submissions curing a defective appeal or brief, a rebuttal brief, and a request for oral hearing **cannot** be extended.

A request for an extension of time for filing an appeal to the U.S. Court of Appeals for the Federal Circuit is governed by 37 CFR 1.304(a). A request for an extension of time to petition from the denial of a request for reexamination can be obtained only by filing a grantable petition under 37 CFR 1.183 (with fee) to waive the time provisions of 37 CFR 1.927.

Extensions of time in an *inter partes* reexamination proceeding are otherwise governed by 37 CFR 1.956. It should be noted that **extensions of time under 37 CFR 1.956 are not available to the third party requester.**

An extension of time in an *inter partes* reexamination proceeding is requested, where applicable, pursuant to 37 CFR 1.956. Any request for extension of time pursuant to 37 CFR 1.956 will be decided by the

Technology Center (TC) Director of the TC conducting the reexamination. The request (A) must be filed on or before the day on which action by the patent owner is due, * (B) must set forth sufficient cause for the extension**>, and (C) must be accompanied by the petition fee set forth in 37 CFR 1.17(g)<.

Requests for an extension of time in an *inter partes* reexamination proceeding will be considered only after the first Office action on the merits in the reexamination is mailed. Any request for an extension of time filed prior to the first action will be denied.

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8), and the “Express Mail” mailing procedure (37 CFR 1.10), may be used to file a request for extension of time, as well as any other paper in an existing *inter partes* reexamination proceeding (see MPEP § 2666).

As noted above, a request for extension of time under 37 CFR 1.956 will be granted only for sufficient cause, and *the request must be filed on or before the day on which action by the patent owner is due*. In no case, will the mere filing of a request for extension of time automatically effect any extension, because the showing of cause may be insufficient or incomplete. In the prosecution of an *ex parte* reexamination, an automatic 1-month extension of time to take further action is granted upon filing a first timely response to a final Office action (see MPEP § 2272). The automatic extension given in *ex parte* reexamination does not apply to the first response to an Action Closing Prosecution (ACP) in an *inter partes* reexamination. The reason is that in *inter partes* reexamination, parties do not file an appeal in response to an ACP, and a further Office action (Right of Appeal Notice) will issue even if the parties make no response at all. Thus, there is no time period to appeal running against the parties after the ACP is issued, unlike *ex parte* reexamination where an appeal is due after final rejection and the time is thus automatically extended one month to provide time for the patent owner to review the Office’s response to the amendment before deciding whether to appeal.

Evaluation of whether “sufficient cause” has been shown for an extension must be made by **balancing** the desire to provide the patent owner with a fair opportunity to respond, **against** the requirement of the statute, 35 U.S.C. 314(c), that the proceedings be conducted with special dispatch.

Any request for an extension of time in a reexamination proceeding must fully state the reasons therefor. The reasons should include a statement of what action the patent owner has taken, and why in spite of the action taken thus far, the additional time is needed. All requests must be submitted as a separate paper, not directed to any matter other than the request for the extension.

Prosecution will be conducted by initially setting a time period of at least 30 days or one month (whichever is longer), see MPEP § 2662. First requests for extensions of these time periods will be granted for sufficient cause, and for a reasonable time specified—usually 1 month. The reasons stated in the request will be evaluated, and the request will be favorably considered where there is a factual accounting of reasonably diligent behavior by all those responsible for preparing a response or comments within the statutory time period. Second or subsequent requests for extensions of time, or requests for more than one month, will be granted only in extraordinary situations.

EXTENSIONS OF TIME TO SUBMIT AFFIDAVITS AFTER ACTION CLOSING PROSECUTION

Frequently, a request for an extension of time is made, stating as a reason therefor, that more time is needed in which to submit an affidavit. When such a request is filed after an ACP, the granting of the request for extension of time is without prejudice to the right of the examiner to question why the affidavit is now necessary and why it was not earlier presented. If the showing by the patent owner is insufficient, the examiner may deny entry of the affidavit, notwithstanding the previous grant of an extension of time to submit it. The grant of an extension of time in these circumstances serves merely to give the patent owner an extended opportunity to present the affidavit or to take other appropriate action.

Affidavits submitted after an ACP are subject to the same treatment as amendments submitted after an ACP. This is analogous to the treatment of affidavits submitted after a final rejection in an application. See *In re Affidavit Filed After Final Rejection*, 152 USPQ 292, 1966 C.D. 53 (Comm'r Pat. 1966).

2666 Patent Owner Response to Office Action [R-3]

37 CFR 1.111. Reply by applicant or patent owner to a non-final Office action.

(a)(1) If the Office action after the first examination (§ 1.104) is adverse in any respect, the applicant or patent owner, if he or she persists in his or her application for a patent or reexamination proceeding, must reply and request reconsideration or further examination, with or without amendment. See §§ 1.135 and 1.136 for time for reply to avoid abandonment.

**>

(2) *Supplemental replies.* (i) A reply that is supplemental to a reply that is in compliance with § 1.111(b) will not be entered as a matter of right except as provided in paragraph (a)(2)(ii) of this section. The Office may enter a supplemental reply if the supplemental reply is clearly limited to:

- (A) Cancellation of a claim(s);
- (B) Adoption of the examiner suggestion(s);
- (C) Placement of the application in condition for allowance;
- (D) Reply to an Office requirement made after the first reply was filed;
- (E) Correction of informalities (*e.g.*, typographical errors); or
- (F) Simplification of issues for appeal.

(ii) A supplemental reply will be entered if the supplemental reply is filed within the period during which action by the Office is suspended under § 1.103(a) or (c).<

(b) In order to be entitled to reconsideration or further examination, the applicant or patent owner must reply to the Office action. The reply by the applicant or patent owner must be reduced to a writing which distinctly and specifically points out the supposed errors in the examiner's action and must reply to every ground of objection and rejection in the prior Office action. The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. If the reply is with respect to an application, a request may be made that objections or requirements as to form not necessary to further consideration of the claims be held in abeyance until allowable subject matter is indicated. The applicant's or patent owner's reply must appear throughout to be a *bona fide* attempt to advance the application or the reexamination proceeding to final action. A general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section.

(c) In amending in reply to a rejection of claims in an application or patent under reexamination, the applicant or patent owner must clearly point out the patentable novelty which he or she thinks the claims present in view of the state of the art disclosed by the references cited or the objections made. The applicant or patent owner must also show how the amendments avoid such references or objections.

37 CFR 1.945. *Response to Office action by patent owner in inter partes reexamination.*

The patent owner will be given at least thirty days to file a response to any Office action on the merits of the *inter partes* reexamination.

I. SUBSTANCE OF THE RESPONSE

>Pursuant to 37 CFR 1.937(b):

“The *inter partes* reexamination proceeding will be conducted in accordance with §§ 1.104 through 1.116, the sections governing the application examination process...”

Accordingly, the provisions of 37 CFR 1.111 apply to the response by a patent owner in a reexamination proceeding.<

The patent owner may request reconsideration of the position stated in the Office action, with or without amendment to the claims and/or specification. As to amendments in reexamination proceedings, see MPEP § 2666.01.

Any request for reconsideration must be in writing and must distinctly and specifically point out each supposed error in the examiner’s action. A general allegation that the claims define a patentable invention, without specifically pointing out how the language of the claims patentably distinguishes them over the references, is inadequate and is not in compliance with 37 CFR 1.111(b).

Reasons must be given as to how and why the claims define over the references, and why any rejections made under 35 U.S.C. 112 are incorrect or inapplicable.

Affidavits under 37 CFR 1.131 and 1.132 may be utilized in a reexamination proceeding. Note, however, that an affidavit under 37 CFR 1.131 may not be used to “swear back” of a reference patent if the reference patent is claiming the same invention as the patent undergoing reexamination. In such a situation, the patent owner may, if appropriate, seek to raise this issue via an affidavit under 37 CFR 1.130 (see MPEP § 718) or in an interference proceeding via an appropriate reissue application if such a reissue application may be filed (see MPEP § 1449.02).

The patent owner cannot file papers on behalf of a third party. If a third party paper accompanies or is submitted as part of a timely filed response, the response and third party paper are considered to be an improper (i.e., informal) submission, and the **entire** submission shall be returned to the patent owner since

the Office will not determine which portion of the submission is the third party paper. The third party paper filed as part of the patent owner’s response will not be considered. The improper response with the third party paper in it should be returned to patent owner as a defective (informal) response, using form PTOL-2069 as the cover letter. See MPEP § 2666.50. The appropriate box on the form should be checked and an explanation for the return of the paper given. The patent owner should be provided an appropriate period of time to refile the patent owner response without the third party paper.

II. PROCEDURAL CONSIDERATIONS OF THE RESPONSE

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8), and the ‘Express Mail’ mailing procedure (37 CFR 1.10), may be used to file a patent owner’s response, as well as any other paper in an existing *inter partes* reexamination proceeding.

A copy of the response must be served on the third party requester in accordance with 37 CFR 1.248, - see also MPEP § 2666.06. Lack of service poses a problem, since a third party requester must file written comments within a period of 30 days from the date of service of the patent owner’s response, in order to be timely. Where the record does not show the response to have been served on the third party requester, see MPEP § 2666.06.

The patent owner will normally be given a period of two months to respond to an Office action. An extension of time can be obtained only in accordance with 37 CFR 1.956. Note that 37 CFR 1.136 does not apply in reexamination proceedings.

See MPEP § 2666.10 for the consequences of the failure by the patent owner to respond to the Office action.

>

III. SUPPLEMENTAL RESPONSE TO OFFICE ACTION

Pursuant to 37 CFR 1.111(a)(2), a response that is supplemental to a response that is in compliance with 37 CFR 1.111(b) will not be entered as a matter of right. The Office may enter a supplemental response if the supplemental response is clearly limited to: (A) cancellation of a claim(s); (B) adoption of the exam-

iner suggestion(s); (C) placement of the proceeding in condition for Notice of Intent to Issue Reexamination Certificate (NIRC); (D) a response to an Office requirement made after the first response was filed; (E) correction of informalities (e.g., typographical errors); or (F) simplification of issues for appeal. When a supplemental response is filed in sufficient time to be entered into the reexamination proceeding before the examiner considers the prior response, the examiner may approve the entry of a supplemental response if, after a cursory review, the examiner determines that the supplemental response is limited to meeting one or more of the conditions set forth in 37 CFR 1.111(a)(2)(i).

A supplemental response, which has not been approved for entry, will not be entered when a response to a subsequent Office action is filed, even if there is a specific request for its entry in the subsequent response. If a patent owner wishes to have the unentered supplemental response considered by the examiner, the patent owner must include the contents of the unentered supplemental response in a proper response to a subsequent Office action. If the next Office action is an Action Closing Prosecution under 37 CFR 1.949, or an action that otherwise closes prosecution, the entry of the response is governed by 37 CFR 1.116 (see 37 CFR 1.951(a)).<

2666.01 Amendment by Patent Owner [R-3]

37 CFR 1.941. Amendments by patent owner in inter partes reexamination.

Amendments by patent owner in *inter partes* reexamination proceedings are made by filing a paper in compliance with §§ 1.530(d)-(k) and 1.943.

37 CFR 1.121. Manner of making amendments in applications.

(j) *Amendments in reexamination proceedings.* Any proposed amendment to the description and claims in patents involved in reexamination proceedings must be made in accordance with § 1.530.

37 CFR 1.530. Statement by patent owner in ex parte reexamination; amendment by patent owner in ex parte or

inter partes reexamination; inventorship change in ex parte or inter partes reexamination.

(d) *Making amendments in a reexamination proceeding.* A proposed amendment in an *ex parte* or an *inter partes* reexamination proceeding is made by filing a paper directing that proposed specified changes be made to the patent specification, including the claims, or to the drawings. An amendment paper directing that proposed specified changes be made in a reexamination proceeding may be submitted as an accompaniment to a request filed by the patent owner in accordance with § 1.510(e), as part of a patent owner statement in accordance with paragraph (b) of this section, or, where permitted, during the prosecution of the reexamination proceeding pursuant to § 1.550(a) or § 1.937.

(1) *Specification other than the claims.* Changes to the specification, other than to the claims, must be made by submission of the entire text of an added or rewritten paragraph including markings pursuant to paragraph (f) of this section, except that an entire paragraph may be deleted by a statement deleting the paragraph, without presentation of the text of the paragraph. The precise point in the specification must be identified where any added or rewritten paragraph is located. This paragraph applies whether the amendment is submitted on paper or compact disc (see §§ 1.96 and 1.825).

(2) *Claims.* An amendment paper must include the entire text of each patent claim which is being proposed to be changed by such amendment paper and of each new claim being proposed to be added by such amendment paper. For any claim changed by the amendment paper, a parenthetical expression “amended,” “twice amended,” *etc.*, should follow the claim number. Each patent claim proposed to be changed and each proposed added claim must include markings pursuant to paragraph (f) of this section, except that a patent claim or proposed added claim should be canceled by a statement canceling the claim, without presentation of the text of the claim.

(3) *Drawings.* Any change to the patent drawings must be submitted as a sketch on a separate paper showing the proposed changes in red for approval by the examiner. Upon approval of the changes by the examiner, only new sheets of drawings including the changes and in compliance with § 1.84 must be filed. Amended figures must be identified as “Amended,” and any added figure must be identified as “New.” In the event a figure is canceled, the figure must be surrounded by brackets and identified as “Canceled.”

(4) The formal requirements for papers making up the reexamination proceeding other than those set forth in this section are set out in § 1.52.

(e) *Status of claims and support for claim changes.* Whenever there is an amendment to the claims pursuant to paragraph (d) of this section, there must also be supplied, on pages separate from the pages containing the changes, the status (*i.e.*, pending or canceled), as of the date of the amendment, of all patent claims and of all added claims, and an explanation of the support in the disclosure of the patent for the changes to the claims made by the amendment paper.

(f) *Changes shown by markings.* Any changes relative to the patent being reexamined which are made to the specification, including the claims, must include the following markings:

(1) The matter to be omitted by the reexamination proceeding must be enclosed in brackets; and

(2) The matter to be added by the reexamination proceeding must be underlined.

(g) *Numbering of patent claims preserved.* Patent claims may not be renumbered. The numbering of any claims added in the reexamination proceeding must follow the number of the highest numbered patent claim.

(h) *Amendment of disclosure may be required.* The disclosure must be amended, when required by the Office, to correct inaccuracies of description and definition, and to secure substantial correspondence between the claims, the remainder of the specification, and the drawings.

(i) *Amendments made relative to patent.* All amendments must be made relative to the patent specification, including the claims, and drawings, which are in effect as of the date of filing the request for reexamination.

(j) *No enlargement of claim scope.* No amendment may enlarge the scope of the claims of the patent or introduce new matter. No amendment may be proposed for entry in an expired patent. Moreover, no amendment, other than the cancellation of claims, will be incorporated into the patent by a certificate issued after the expiration of the patent.

(k) *Amendments not effective until certificate.* Although the Office actions will treat proposed amendments as though they have been entered, the proposed amendments will not be effective until the reexamination certificate is issued.

(l) *Correction of inventorship in an ex parte or inter partes reexamination proceeding.*

(1) When it appears in a patent being reexamined that the correct inventor or inventors were not named through error without deceptive intention on the part of the actual inventor or inventors, the Director may, on petition of all the parties set forth in § 1.324(b)(1)-(3), including the assignees, and satisfactory proof of the facts and payment of the fee set forth in § 1.20(b), or on order of a court before which such matter is called in question, include in the reexamination certificate to be issued under § 1.570 or § 1.977 an amendment naming only the actual inventor or inventors. The petition must be submitted as part of the reexamination proceeding and must satisfy the requirements of § 1.324.

(2) Notwithstanding the preceding paragraph (1)(1) of this section, if a petition to correct inventorship satisfying the requirements of § 1.324 is filed in a reexamination proceeding, and the reexamination proceeding is terminated other than by a reexamination certificate under § 1.570 or § 1.977, a certificate of correction indicating the change of inventorship stated in the petition will be issued upon request by the patentee.

Amendments to the patent being reexamined (where the patent has not expired) may be filed by the patent owner in the reexamination proceeding. Such amendments may be provided by the patent owners after the first Office action on the merits has been issued. The first Office action on the merits will ordi-

narily be mailed with the order. In some instances, however, it may not be practical or possible to mail the first Office action together with the order. In the event that the first Office action is mailed after the order, it would not be proper to provide an amendment prior to the first Office action. Such an amendment would not be considered, and it would be returned to the patent owner as an improper paper.

**>If an amendment is submitted to add claims to the patent being reexamined (i.e., to provide new claims), then excess claims fees pursuant to 37 CFR 1.20(c)(3) and (c)(4) may be applicable to the presentation of the added claims. See MPEP § 2666.04.< Amendments proposed in a reexamination will normally be entered if timely, and will be considered to be entered for purposes of prosecution before the Office (if they are timely and comply with the rules); however, amendments do not become effective in the patent until the certificate under 35 U.S.C. 316 is issued.

Amendments must not enlarge the scope of a claim of the patent nor introduce new matter. Amended or new claims which broaden or enlarge the scope of a claim of the patent should be rejected under 35 U.S.C. 314(a). The test for when an amended or “new claim enlarges the scope of an original claim under 35 U.S.C. 314(a) is the same as that under the 2-year limitation for reissue applications adding enlarging claims under 35 U.S.C. 251, last paragraph.” *In re Freeman*, 30 F.3d 1459, 1464, 31 USPQ2d 1444, 1447 (Fed. Cir. 1994). See MPEP § 2658 for a discussion of enlargement of the claim scope. For handling of new matter, see MPEP § 2670.

If the patent expires during the reexamination procedure, and the patent claims have been amended, the Office will hold the amendments as being improper and all subsequent reexamination will be on the basis of the unamended patent claims. This procedure is necessary since no amendments will be incorporated into the patent by certificate after the expiration of the patent. See 37 CFR 1.941 and 37 CFR 1.530(j). The patent expiration date for a utility patent, for example, is determined by taking into account the term of the patent, whether maintenance fees have been paid for the patent, whether any disclaimer was filed as to the patent to shorten its term, any patent term extensions or adjustments for delays within the USPTO under 35 U.S.C. 154 (see MPEP § 2710, *et seq.*), and any

patent term extensions available under 35 U.S.C. 156 for premarket regulatory review (see MPEP § 2750 *et seq.*). Any other relevant information should also be taken into account.

Once the patent expires, a narrow claim construction is applied. See MPEP § 2258, Part I, Subpart G “Claim Interpretation and Treatment.”

Amendment Entry - Amendments which comply with 37 CFR 1.530(d)-(j) and 37 CFR 1.943 ***>*(and are formally presented pursuant to 37 CFR 1.52(a) and (b), and contain fees required by 37 CFR 1.20(c)) will be entered in the reexamination file pursuant to the guidelines set forth in MPEP § 2234.<

Manner of Making Amendments - Amendments in an *inter partes* reexamination proceeding are made in the same manner that amendments in an *ex parte* reexamination proceeding are made. See MPEP § 2250 for guidance as to the manner of making amendments in a reexamination proceeding.

Form paragraph 22.12 may be used to advise the patent owner of the proper manner of making amendments in an *inter partes* reexamination proceeding.

***>*

¶ 22.12 *Amendments Proposed in a Reexamination - 37 CFR 1.530(d)-(j)*

Patent owner is notified that any proposed amendment to the specification and/or claims in this reexamination proceeding must comply with 37 CFR 1.530(d)-(j), must be formally presented pursuant to 37 CFR 1.52(a) and (b), and must contain any fees required by 37 CFR 1.20(c).

Examiner Note:

This paragraph may be used in the order granting reexamination and/or in the first Office action to advise patent owner of the proper manner of making amendments in a reexamination proceeding.

<

Form paragraph 26.05.01 may be used to notify patent owner in an *inter partes* reexamination proceeding that a proposed amendment in the proceeding does not comply with 37 CFR 1.530(d)-(j).

***>*

¶ 26.05.01 *Improper Amendment in an Inter Partes Reexamination - 37 CFR 1.530(d)-(j)*

The amendment filed [1] proposes amendments to [2] that do not comply with 37 CFR 1.530(d)-(j), which sets forth the manner of making amendments in reexamination proceedings. A supplemental paper correctly proposing amendments in the present *inter partes* reexamination proceeding is required.

A shortened statutory period for response to this letter is set to expire ONE MONTH or THIRTY DAYS, whichever is longer, from the mailing date of this letter. If the patent owner fails to timely correct this informality, the amendment will be held not to be an appropriate response, and the consequences set forth in 37 CFR 1.957(b) or (c) will result. See MPEP § 2666.10

Examiner Note:

This paragraph may be used for any 37 CFR 1.530(d)-(j) informality as to a proposed amendment submitted in a reexamination proceeding.

<

The cover sheet to be used for mailing the notification to the patent owner will be PTOL-2069.

As an alternative to using form paragraph 26.05.01, it would also be appropriate to use form PTOL-2069, box 4.

For clerical handling of amendments, see MPEP § 2670. For entry of an amendment in a merged reexamination proceeding, see MPEP § 2686.01 and § 2686.03. For handling of a dependent claim in reexamination proceedings, see MPEP § 2660.03.

2666.02 Correction of Patent Drawings [Added R-2]

37 CFR 1.941. *Amendments by patent owner in inter partes reexamination.*

Amendments by patent owner in *inter partes* reexamination proceedings are made by filing a paper in compliance with §§ 1.530(d)-(k) and 1.943.

37 CFR 1.530. *Statement by patent owner in ex parte reexamination; amendment by patent owner in ex parte or inter partes reexamination; inventorship change in ex parte or inter partes reexamination.*

(d) *Making amendments in a reexamination proceeding.* A proposed amendment in an *ex parte* or an *inter partes* reexamination proceeding is made by filing a paper directing that proposed specified changes be made to the patent specification, including the claims, or to the drawings. An amendment paper directing that proposed specified changes be made in a reexamination proceeding may be submitted as an accompaniment to a request filed by the patent owner in accordance with § 1.510(e), as part of a patent owner statement in accordance with paragraph (b) of this section, or, where permitted, during the prosecution of the reexamination proceeding pursuant to § 1.550(a) or § 1.937.

(3) *Drawings.* Any change to the patent drawings must be submitted as a sketch on a separate paper showing the proposed changes in red for approval by the examiner. Upon approval of the

changes by the examiner, only new sheets of drawings including the changes and in compliance with § 1.84 must be filed. Amended figures must be identified as “Amended,” and any added figure must be identified as “New.” In the event a figure is canceled, the figure must be surrounded by brackets and identified as “Canceled.”

In the reexamination proceeding, the copy of the patent drawings submitted pursuant to 37 CFR 1.915(b)(5) will be used for reexamination purposes, provided no change is made to the drawings. If there is **any** change in the drawings, a new sheet of drawing for each sheet changed must be submitted. The change may **not** be made on the original patent drawings. Drawing changes in an *inter partes* reexamination proceeding are made in the same manner that drawing changes in an *ex parte* reexamination proceeding are made. 37 CFR 1.530(d)(3) sets forth the manner of making amendments to the drawings. Any amended figure(s) must be identified as “Amended” and any added figure(s) must be identified as “New.” In the event a figure is canceled, the figure must be surrounded by brackets and identified as “Canceled.”

Where the patent owner wishes to change/amend the drawings, the patent owner should submit a sketch in permanent ink showing the proposed change(s)/ amendment(s) in red, for approval by the examiner. The submitted sketch should be presented as a separate paper, and it will be made part of the record. Once the sketch is approved, sheets of substitute formal drawings must be submitted for each drawing sheet that is to be changed/amended. After receiving the new sheets of drawings from the patent owner, the examiner may have the draftsman review the new sheets of drawings if the examiner would like the draftsman’s assistance in identifying errors in the drawings. If a draftsman reviews the drawings, and finds the drawings to be unacceptable, the draftsman should complete a PTO-948 for the examiner to include with the next Office action. A draftsman’s “stamp” to indicate approval is no longer required on patent drawings, and these stamps are no longer to be used by draftspersons. The new sheets of drawings should be entered in the reexamination file.

2666.03 Correction of Inventorship [Added R-2]

Correction of inventorship in an *inter partes* reexamination proceeding is effected in the same manner that correction of inventorship in an *ex parte* reexamination proceeding is effected. See MPEP § 2250.02 for the manner of correcting inventorship in both *inter partes* and *ex parte* reexamination proceedings.

>

2666.04 Fees for Adding Claims [R-3]

37 CFR 1.20. *Post issuance fees*

- (c) In reexamination proceedings
 - (1) For filing a request for *ex parte* reexamination (§ 1.510(a)).....\$2,520.00
 - (2) For filing a request for *inter partes* reexamination (§ 1.915(a)).....\$8,800.00
 - (3) For filing with a request for reexamination or later presentation at any other time of each claim in independent form in excess of 3 and also in excess of the number of claims in independent form in the patent under reexamination:
 - By a small entity (§ 1.27(a)).....\$100.00
 - By other than a small entity\$200.00
 - (4) For filing with a request for reexamination or later presentation at any other time of each claim (whether dependent or independent) in excess of 20 and also in excess of the number of claims in the patent under reexamination (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):
 - By a small entity (§ 1.27(a)).....\$25.00
 - By other than a small entity\$50.00
 - (5) If the excess claims fees required by paragraphs (c)(3) and (c)(4) are not paid with the request for reexamination or on later presentation of the claims for which the excess claims fees are due, the fees required by paragraphs (c)(3) and (c)(4) must be paid or the claims canceled by amendment prior to the expiration of the time period set for reply by the Office in any notice of fee deficiency in order to avoid abandonment.

Excess claims fees as specified in 35 U.S.C. 41(a)(2) as amended by the Consolidated Appropriations Act of 2005 are applicable to excess claims proposed to be added to a patent by their presentation during a reexamination proceeding. Under “former” 35 U.S.C. 41, excess claims fees were included as part of the “application” filing fee under 35 U.S.C. 41(a)(1), and thus did not apply during reexamination proceedings. The Consolidated Appropriations Act

does not include the excess claims as part of the “application” filing fee under 35 U.S.C. 41(a)(1), but separately provides for excess claims fees in 35 U.S.C. 41(a)(2) (as being in addition to the filing fee in 35 U.S.C. 41(a)(1)). 35 U.S.C. 41(a)(2) provides that an excess claims fee is due “on filing or on presentation at any other time” (e.g., during a reexamination proceeding) of an independent claim in excess of three or of a claim (whether independent or dependent) in excess of twenty.

37 CFR 1.20 was amended, effective December 8, 2004, to provide for excess claims fees in a reexamination proceeding. The excess claims fees specified in 37 CFR 1.20(c) apply to all patents eligible for *inter partes* reexamination. The fees must be submitted for any excess claims presented in a reexamination proceeding on or after December 8, 2004 (no excess claims fee was due under 35 U.S.C. 41 for any claim presented during a reexamination proceeding before December 8, 2004). Even though a reexamination proceeding was commenced prior to December 8, 2004, the excess claims fees are due for any amendment filed on or after December 8, 2004.

When a patent owner presents an amendment to the claims (on or after December 8, 2004) during an *inter partes* reexamination proceeding, excess claims fees may be applicable. If the amendment is limited to revising the existing claims, i.e., it does not provide any new claim, there is no claim fee. The excess claims fees apply only to the submission of new, i.e., “excess” claims.

The excess claims fees specified in 37 CFR 1.20(c) apply to excess claims that result from an amendment as follows:

(A) The fee designated in 37 CFR 1.20(c)(3) as the independent claims fee must be paid for each independent claim in excess of three and also in excess of the number of independent claims in the patent being reexamined. The amendment must increase the number of independent claims to be more than both of these limits, in order for the “independent excess claims fee” to apply;

(B) The fee designated in 37 CFR 1.20(c)(4) as the total claims fee must be paid for each claim (whether independent or dependent) in excess of twenty and also in excess of the number of claims in the patent being reexamined. The amendment must increase the total number of claims to be more than

both of these limits, in order for the “total excess claims fee” to apply.

The following examples illustrate the application of the excess claims fees in a patent (non-small entity) to be reexamined containing six independent claims and thirty total claims:

(A) No excess claims fee is due if the patent owner cancels ten claims, two of which are independent, and adds ten claims, two of which are independent.

(B) The 37 CFR 1.20(c)(3) excess independent claims fee for a seventh independent claim is due if the patent owner cancels ten claims, two of which are independent, and adds ten claims, three of which are independent.

(C) The 37 CFR 1.20(c)(4) excess total claims fee for a thirty-first claim is due if the patent owner cancels ten claims, two of which are independent, and adds eleven claims, two of which are independent.

(D) The 37 CFR 1.20(c)(3) excess independent claims fee for a seventh independent claim and the 37 CFR 1.20(c)(4) excess total claims fee for a thirty-first claim are due if the patent owner cancels ten claims, two of which are independent, and adds eleven claims, three of which are independent.

A claim that has been disclaimed under 35 U.S.C. 253 and 37 CFR 1.321(a) as of the date of filing of the request for reexamination is not considered to be a claim in the patent under reexamination for purposes of excess claims fee calculations. The same applies to a claim canceled via a prior Reexamination Certificate, reissue patent, or Certificate of Correction.

If the excess claims fees required by 37 CFR 1.20(c)(3) and (c)(4) are not paid with the presentation of the excess claims, a notice of fee deficiency will be issued as a Notice of Defective Paper In *Inter Partes* Reexamination, PTOL-2069. A one-month time period will be set in the form PTOL-2069 for correction of the defect, i.e., the fee deficiency. An extension of time to correct the fee deficiency may be requested under 37 CFR 1.956. If the unpaid excess claims fees required by 37 CFR 1.20(c)(3) and (c)(4) are not paid within the time period set for response to the Notice, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the particular case), to effect the “abandonment” set forth in 37 CFR 1.20(c)(5).<

2666.05 Third Party Comments After Patent Owner Response [R-3]

37 CFR 1.947. Comments by third party requester to patent owner's response in inter partes reexamination.

Each time the patent owner files a response to an Office action on the merits pursuant to § 1.945, a third party requester may once file written comments within a period of 30 days from the date of service of the patent owner's response. These comments shall be limited to issues raised by the Office action or the patent owner's response. The time for submitting comments by the third party requester may not be extended. For the purpose of filing the written comments by the third party requester, the comments will be considered as having been received in the Office as of the date of deposit specified in the certificate under § 1.8.

37 CFR 1.948. Limitations on submission of prior art by third party requester following the order for inter partes reexamination.

(a) After the *inter partes* reexamination order, the third party requester may only cite additional prior art as defined under § 1.501 if it is filed as part of a comments submission under § 1.947 or § 1.951(b) and is limited to prior art:

- (1) which is necessary to rebut a finding of fact by the examiner;
- (2) which is necessary to rebut a response of the patent owner; or
- (3) which for the first time became known or available to the third party requester after the filing of the request for *inter partes* reexamination proceeding. Prior art submitted under paragraph (a)(3) of this section must be accompanied by a statement as to when the prior art first became known or available to the third party requester and must include a discussion of the pertinency of each reference to the patentability of at least one claim.

(b) [Reserved].

I. TIMELINESS

A third party requester may once file written comments on any patent owner response to an Office action, during the examination stage of an *inter partes* reexamination proceeding. The third party requester comments must be filed within a period of 30 days from the **date of service** of the patent owner's response on the third party requester. 37 CFR 1.947. The date that the Office receives the patent owner's response has no bearing on the time period for which the third party requester must file the comments.

The certificate of mailing and the certificate of transmission procedures (37 CFR 1.8), and the "Express Mail" mailing procedure (37 CFR 1.10), may be used to file comments. Any comments by the third party requester must be served upon the patent

owner in accordance with 37 CFR 1.248, - see also MPEP § 2666.06.

If the third party requester comments are filed after 30 days from the **date of service** of the patent owner's response on the third party requester, the comments will not be considered. See 37 CFR 1.957(a).

II. CONTENT

The third party requester comments must be directed to points and issues covered by the Office action and/or the patent owner's response. The written comments filed by a third party requester should specify the issues and points in the Office action or the patent owner's response to which each comment is directed. Thus, the third party requester should (A) set forth the point or issue, (B) state the page of the Office action and/or the patent owner response where the point or issue is recited, and (C) then present the third party requester's discussion and argument as to the point or issue. If this is not done by the third party requester, the comments should not be held defective if the examiner can ascertain that all of the comments filed by the third party requester are directed to the issues and points in the Office action and/or the patent owner's response.

Third party requester comments are limited to issues covered by the Office action or the patent owner's response. New prior art can be submitted with the comments **only** where the prior art (A) is necessary to rebut a finding of fact by the examiner, (B) is necessary to rebut a response of the patent owner, or (C) for the first time became known or available to the third party requester after the filing of the request for *inter partes* reexamination. Prior art submitted under (C) must be accompanied by a statement as to when the prior art first became known or available to the third party requester, and must include a discussion of the pertinency of each reference to the patentability of at least one claim.

Where the third party requester written comments are directed to matters other than issues and points covered by the Office action or the patent owner's response, or where the prior art submitted with the comments does not satisfy at least one of (A) - (C) above, the written comments are improper. If the written comments are improper, the examiner should return the written comments (the entire paper) with an explanation of what is not proper, and should provide

a time period of 30 days for the third party requester to rectify and refile the comments. If, upon the second submission, the comments are still not proper, the comments will be returned to third party with an explanation of what is not proper, and at that point the comments can no longer be resubmitted. The loss of right to submit further comments applies only to the patent owner response at hand. See MPEP § 2666.20.

The practice of giving the third party requester a time period of 30 days to rectify and refile comments that are “responsive but informal” should not be confused with the situation where the third party requester files comments that are late (untimely), or such comments are “inappropriate” within the meaning of 37 CFR 1.957(a) and the time for response has expired. Where the comments are late or inappropriate, an additional 30 days is not given; rather, the comments must be refused consideration pursuant to 37 CFR 1.957(a).

The third party requester is not permitted to file further papers to supplement the third party requester’s written comments. Any such improper supplemental comments will not be considered, and will be returned. A third party requester may, however, file written comments to any supplemental response filed by the patent owner.

See MPEP § 2666.20 for the situation where a third party requester elects not to file written comments on a patent owner response.

Where the patent owner does not respond to an Office action, the third party requester is prohibited from filing written comments under 37 CFR 1.947.

Note that a prior art citation which is proper under 37 CFR 1.501 and is submitted by any party as a separate paper and does not include argument and comments and does not go to the merits of the case, will not be returned, but rather will be stored until the *ongoing* reexamination proceeding is *concluded*. See MPEP § 2204 and 2206. Also note that prior art returned by the examiner in connection with the third party requester comments as discussed above can be resubmitted as a separate prior art citation under 37 CFR 1.501, and it will be stored until the ongoing reexamination proceeding is *concluded*.

III. EXAMINER WITHDRAWS A GROUND OF REJECTION

If the examiner withdraws a ground of rejection at any time in the prosecution of the *inter partes* reexamination proceeding, the following guidelines apply:

(A) Where the examiner withdraws a ground of rejection originally initiated by the examiner, such withdrawal should be clearly stated in the Office action as a decision favorable to patentability with respect to the withdrawn rejection. The third party requester’s next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a “rejection proposed by the third party requester.” In the event the patent owner fails to respond to all actions leading to the Right of Appeal Notice (RAN), including the Action Closing Prosecution (ACP), and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability. See 37 CFR 41.61(a)(2).

(B) Where the claims have not been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester (e.g., based on patent owner’s argument or evidence submitted), the examiner should treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.

(C) Generally (subject to the below-stated exception), where the claims have been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester, this is not a refusal of the examiner to adopt the rejection proposed by the requester, since the rejection was never proposed as to the amended claims. The third party requester’s next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a “rejection proposed by the third party requester” as to the amended claims. In the event the patent owner fails to respond to all actions leading to the RAN, including the ACP, and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability. See 37 CFR 41.61(a)(2).

(D) If a claim is amended merely to include a dependent claim that was previously subjected to a proposed requester rejection, and the examiner with-

draws that ground of rejection as to the newly amended claim, such would be a refusal to adopt the third party requester's previously proposed rejection of the dependent claim. Thus, the examiner would treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.<

2666.06 Service of Papers [R-3]

>

37 CFR 1.915. *Content of request for inter partes reexamination.*

(b) A request for *inter partes* reexamination must include the following parts:

(6) A certification by the third party requester that a copy of the request has been served in its entirety on the patent owner at the address provided for in § 1.33(c). The name and address of the party served must be indicated. If service was not possible, a duplicate copy of the request must be supplied to the Office.

<

37 CFR 1.903. *Service of papers on parties in inter partes reexamination.*

The patent owner and the third party requester will be sent copies of Office actions issued during the *inter partes* reexamination proceeding. After filing of a request for *inter partes* reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on every other party in the reexamination proceeding in the manner provided in § 1.248. Any document must reflect service or the document may be refused consideration by the Office. The failure of the patent owner or the third party requester to serve documents may result in their being refused consideration.

Any paper filed with the Office, i.e., any submission made, by either the patent owner or the third party requester must be served on every other party in the reexamination proceeding including any other third party requester that is part of the proceeding due to merger of reexamination proceedings.

As proof of service, the party submitting the paper to the Office must attach a certificate of service to the paper. It is required that the certificate of service set forth the name and address of the party served and the method of service. Further, a copy of the certificate of

service must be attached with the copy of the paper that is served on the other party.

Papers filed in which no proof of service is included (where proof of service is required) may be denied consideration. Where no proof of service is included, the Central Reexamination Unit (CRU) will contact the party making the submission by telephone to see whether the indication of proof of service was inadvertently omitted from the party's submission (however, there was actual service).

-If service was in fact made, the party making the submission should be advised to submit a supplemental paper indicating the manner and date of service. The CRU should enter the submission for consideration, and annotate the paper with: "Service confirmed by [name of person] on [date]".

-If service was not made, or the party making the submission cannot be contacted, the submission is placed in the reexamination file and normally would not be considered. **>The submission is added to the IFW file history as an unentered paper with a "N/E" notation, along with a brief annotation as to why the paper is not entered.< The submission * shall be annotated with "no service" which also can be crossed through if service is later made.

If the party making the submission cannot be contacted, a Notice of Defective Paper (PTOL-2069) will be mailed to the party, providing the party with a time period of one month or 30 days, whichever is longer, to complete the paper via a supplemental paper indicating the manner and date of service.

If it is known that service of a submission was not made, form paragraph 26.68 should be used to give notice to the party that made the submission of the requirement for service under 37 CFR 1.903.

¶ 26.68 Lack of Service in inter partes examination-37 CFR 1.903

The submission filed [1] is defective because it appears that the submission was not served on [2]. After the filing of a request for *inter partes* reexamination by a third party requester, any document filed by either the patent owner or the third party requester must be served on the other party (or parties where two third party requester proceedings are merged) in the *inter partes* reexamination proceeding in the manner provided in 37 CFR 1.248. See 37 CFR 1.903.

It is required that service of the submission be made, and a certificate of service be provided to the Office, within ONE MONTH from the date of this letter or within the time remaining in the

response period of the last Office action (if applicable), whichever is longer.

Examiner Note:

1. This paragraph may be used where a submission to the Office was not served as required in an *inter partes* reexamination proceeding.
2. In bracket 2, insert “patent owner” or “third party requester,” whichever is appropriate.

PTOL-2071 should be used as the cover sheet for mailing the notice.

See MPEP § 2620 for service of the initial request on the patent owner.

2666.10 Patent Owner Does Not Respond to Office Action [R-3]

37 CFR 1.957. Failure to file a timely, appropriate or complete response or comment in inter partes reexamination.

(a) If the third party requester files an untimely or inappropriate comment, notice of appeal or brief in an *inter partes* reexamination, the paper will be refused consideration.

(b) If no claims are found patentable, and the patent owner fails to file a timely and appropriate response in an *inter partes* reexamination proceeding, the reexamination proceeding will be terminated and the Director will proceed to issue a certificate under § 1.997 in accordance with the last action of the Office.

(c) If claims are found patentable and the patent owner fails to file a timely and appropriate response to any Office action in an *inter partes* reexamination proceeding, further prosecution will be limited to the claims found patentable at the time of the failure to respond, and to any claims added thereafter which do not expand the scope of the claims which were found patentable at that time.

(d) When action by the patent owner is a *bona fide* attempt to respond and to advance the prosecution and is substantially a complete response to the Office action, but consideration of some matter or compliance with some requirement has been inadvertently omitted, an opportunity to explain and supply the omission may be given.

I. OFFICE ACTION PRIOR TO ACTION CLOSING PROSECUTION

If the patent owner fails to file a timely response to any Office action prior to an Action Closing Prosecution (ACP), it will result in the following consequences set forth in 37 CFR 1.957(b) or (c):

(A) Where there were no claims found patentable in the Office action, the examiner will issue a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) terminating prosecution and indicating

the status of the claims as canceled. See MPEP § 2687.

(B) Where at least one claim is found patentable, all future prosecution will be limited to the claim(s) found patentable at the time of the failure to respond and to claims which do not expand the scope of the claim(s) found patentable at that time. The patent owner will not be permitted to add claims broader in the scope than the patentable claims which remain in the proceeding at the time of the patent owner’s failure to timely respond. The examiner will proceed to issue an ACP indicating that:

(1) Any claims under rejection or objection are withdrawn from consideration and will be canceled upon publication of the certificate; and

(2) Prosecution will be limited to the claim(s) found patentable at the time of the failure to respond and to claims which do not expand the scope of the claim(s) found patentable at that time.

The ACP will set a period for the patent owner response and the third party requester comments under 37 CFR 1.951. See also MPEP § 2671.02 and § 2671.03.

II. ACTION CLOSING PROSECUTION

A response to an ACP is not required. Where the patent owner does not respond to an ACP, the Office will issue an Right of Appeal Notice (see MPEP § 2673.02) in due course. Accordingly, the consequences of 37 CFR 1.957(b) and (c), do NOT apply to the patent owner’s failure to respond to an ACP.

III. RIGHT OF APPEAL NOTICE AND APPEAL

Where the patent owner fails to make a timely appeal after the issuance of a Right of Appeal Notice, or where a timely patent owner’s appeal is subsequently dismissed, the following consequences would result:

(A) If no claim was found patentable at the time that the patent owner fails to take the timely action, a NIRC will immediately be issued. See MPEP § 2687.

(B) Where at least one claim was found patentable and the third party requester does not appeal, or fails to continue its appeal, the >prosecution of the reexamination< proceeding should be terminated in

accordance with 37 CFR 1.957(b). In order to do so, a NIRC will be issued. See MPEP § 2687.

(C) Where at least one claim was found patentable and the third party appellant continues its appeal, the claims in the proceeding will be limited to the claim(s) found patentable at the time that the patent owner fails to take the timely action, and all other claims will be withdrawn from consideration pending cancellation of same when the NIRC is issued. Any future prosecution is limited to the claims that do not expand the scope of the claim(s) found patentable at that time.

IV. FAILURE OF THIRD PARTY REQUESTER TO TIMELY SUBMIT PAPER

See MPEP § 2666.20 for a discussion of the consequences where the third party requester fails to timely submit a paper where a time period is set for same.

2666.20 Third Party Does Not Comment After Patent Owner Response [R-3]

37 CFR 1.957. Failure to file a timely, appropriate or complete response or comment in inter partes reexamination.

(a) If the third party requester files an untimely or inappropriate comment, notice of appeal or brief in an *inter partes* reexamination, the paper will be refused consideration.

Where a third party requester does not timely file written comments on a patent owner response, any subsequent submission of comments on **that response** will be refused consideration. The third party requester does not, however, lose any rights as to commenting on *future* patent owner responses. The failure to file the comments applies only to the specific response which the third party requester elects not to comment upon.

Note that where the third party requester did not file comments on a response that was determined by the Office to be incomplete, the third party requester may file comments on the response once it is completed (by patent owner's submission of a supplemental response). However, where only a fee >(other than an excess claims fee to support an amendment)< is needed to complete the response, the third party

requester may not file comments after the fee is submitted; see MPEP § 2666.40 for a detailed discussion.

Where the third party requester fails to make a timely appeal or the third party requester's appeal is dismissed, the third party requester loses further rights as **the appellant** in the appeal. However, where a patent owner appellant continues its appeal, the third party requester as the respondent can file a respondent brief. Also, the third party requester can enter the appeal pursuant to 37 CFR *>41.77(c) and (e)< (submission after a Board of Patent Appeals and Interferences decision). In addition, the third party requester can comment on any subsequent patent owner response to any Office action, where the action is issued after the appeal.

Where the third party requester fails to timely appeal, or the requester's appeal is dismissed, and *no other appeal is pending in the proceeding*, the >prosecution of the reexamination< proceeding should be terminated by the issuance of a NIRC.

2666.30 Submission Not Fully Responsive to Non-final Office Action [R-3]

37 CFR 1.957. Failure to file a timely, appropriate or complete response or comment in inter partes reexamination.

(d) When action by the patent owner is a *bona fide* attempt to respond and to advance the prosecution and is substantially a complete response to the Office action, but consideration of some matter or compliance with some requirement has been inadvertently omitted, an opportunity to explain and supply the omission may be given.

A response by the patent owner will be considered not fully responsive to a non-final Office action where a bona fide response to an examiner's Office action is filed before the expiration of the permissible response period but through an apparent oversight or inadvertence, some point necessary to a full response has been omitted (i.e., appropriate consideration of a matter that the action raised, or compliance with some requirement, has been omitted). In this situation, >the prosecution of< the reexamination proceeding should not be terminated. Rather, the examiner may, pursuant to 37 CFR 1.957(d), treat the patent owner submission which is not fully responsive to an Office action by:

(A) waiving the deficiencies (if not serious) in the response and acting on the patent owner submission;

(B) treating the amendment/response as an incomplete response to the Office action and notifying the patent owner (via a written notification action pursuant to 37 CFR 1.957(d)) that the response must be completed within the period for response set in the notification action (or within any extension pursuant to 37 CFR 1.956)) to avoid *>termination< of the prosecution (pursuant to 37 CFR 1.957(b)) or limiting prosecution of the claims to those found patentable (pursuant to 37 CFR 1.957(c)).

Discussion of Option (A). Where a patent owner submission responds to the rejections, objections, or requirements in an Office action and is a *bona fide* attempt to advance the reexamination proceeding to final action, but contains a minor deficiency (e.g., fails to treat every rejection, objection, or requirement), the examiner may simply act on the amendment and issue a new Office action. The new Office action may simply reiterate the rejection, objection, or requirement not addressed by the patent owner submission, or the action may indicate that such rejection, objection, or requirement is no longer applicable. In the new Office action, the examiner will identify the part of the previous Office action which was not responded to and clearly indicate what is needed. This course of action would not be appropriate in instances in which a patent owner submission contains a serious deficiency (e.g., the patent owner submission does not appear to have been filed in response to the Office action).

Discussion of Option (B). Where the patent owner's submission contains a serious deficiency, i.e., omission, to be dealt with prior to issuing an action on the merits and the period for response has expired, or there is insufficient time remaining to take corrective action before the expiration of the period for response, *the patent owner should be notified of the deficiency and the correction needed, and given a new time period for response (usually 1 month)* pursuant to 37 CFR 1.957(d). The patent owner must then supply the omission within the new time period for response or any extensions under 37 CFR 1.956 thereof to avoid *>termination< of the prosecution (pursuant to 37 CFR 1.957(b)) or limiting prosecution of the claims to those found patentable (pursuant to 37 CFR 1.957(c)).

Form paragraph 26.06 may be used where option (B) is employed by the examiner to obtain correction of the deficiency.

**>

¶ 26.06 *Submission Not Fully Responsive to Office Action*

The communication filed on [1] is not fully responsive to the prior Office action. [2]. The response appears to be *bona fide*, but through an apparent oversight or inadvertence, consideration of some matter or compliance with some requirement has been omitted. Patent owner is required to supply the omission or correction to thereby provide a full response to the prior Office action.

A shortened statutory period for response to this letter is set to expire (a) ONE MONTH, or THIRTY DAYS (whichever is longer), from the mailing date of this letter, or (b) after the due date for response to the last Office action, whichever of (a) or (b) is longer. THE PERIOD FOR RESPONSE SET IN THIS LETTER MAY BE EXTENDED UNDER 37 CFR 1.956.

If patent owner fails to timely supply the omission or correction and thereby provide a full response to the prior Office action, the consequences set forth in 37 CFR 1.957(b) or (c) will result. See MPEP § 2666.10.

Examiner Note:

1. In bracket 2, the examiner should explain the nature of the omitted point necessary to complete the response, i.e., what part of the Office action was not responded to. The examiner should also clearly indicate what is needed to correct the omission.
2. This paragraph may be used for a patent owner communication that is not completely responsive to the outstanding (i.e., prior) Office action. See MPEP § 2666.30.
3. This practice does not apply where there has been a deliberate omission of some necessary part of a complete response. See MPEP § 2666.30.

<

I. NO NOTIFICATION BY TELEPHONE

It should be noted that the patent owner cannot simply be notified by telephone that the omission must be supplied within the remaining time period for response. This notification would be an interview, and interviews are prohibited in *inter partes* reexamination. 37 CFR 1.955.

II. FURTHER DISCUSSION

The practice of giving the patent owner a time period to supply an omission in a *bona fide* response (pursuant to 37 CFR 1.957(d)) does not apply where there has been a deliberate omission of some necessary part of a complete response. It is applicable **only** when the missing matter or lack of compliance is considered by the examiner as being “inadvertently omit-

ted” pursuant to 37 CFR 1.957(d). Once an inadvertent omission is brought to the attention of the patent owner, the question of inadvertence no longer exists. Therefore, a second written notification action giving another new (1 month) time period to supply the omission would not be appropriate. However, if the patent owner’s response to the notification of the omission raises a **different** issue of a different inadvertently omitted matter, a second written notification action may be given.

This practice authorizes, but does not require, an examiner to give the patent owner a new time period to supply an omission. Thus, where the examiner concludes that the patent owner is attempting to abuse the practice to obtain additional time for filing a response, the practice should not be followed.

2666.40 Patent Owner Completion of Response and Third Party Comments Thereon [R-3]

In most cases, the patent owner will have 30-days or one month (whichever is longer) to complete the response. After the owner completes the response, the examiner will wait two months from the date of service of the patent owner’s completion of the response, and then take up the case for action, since the 30 days for the third party requester comments on the response as completed will have expired by that time.

The third party requester may file comments on the response as completed. This is true whether or not the third party requester filed comments on the response that was incomplete. The response as completed is treated as a new response on-the-merits to the Office action; thus, the third party requester is entitled to respond and has 30 days to do so.

In some instances, only a fee will be needed for the patent owner to complete the response. In these instances >(other than a failure to pay excess claims fees)<, any third party requester comments must be filed within 30 days from the date of service of the patent owner’s original response (which was indicated by the Office as incomplete due to the omission of the necessary fee). The third party requester is not permitted to file comments in response to the submission of the fee, because the submission of a fee clearly adds nothing on the merits. An example of this would be where a terminal disclaimer is newly required in a reexamination proceeding and is submitted, but the

fee is inadvertently omitted. The response would then be incomplete only as to the omitted fee. Any third party requester comments on the terminal disclaimer must be filed within 30 days from the date of service of the patent owner’s terminal disclaimer on the third party requester. Where the patent owner then completes the response by filing the fee, the third party requester is not permitted to then comment. However, if the patent owner’s response is not limited to the bare submission of the fee, i.e., if the response also includes argument, then the third party can comment since the patent owner has addressed the merits of the case.

>In those instances where there is a failure to pay an excess claims fee by the patent owner, the third party requester does not have the new claim “package” to comment on. Thus, the third party requester comments may be filed within 30 days from the date of service of the patent owner’s response correcting the excess claims fee deficiency.<

2666.50 Examiner Issues Notice of Defective Paper in *Inter Partes* Reexamination [R-3]

Even if the substance of a submission is complete, the submission can still be defective, i.e., an “informal submission.” Defects in the submission can be, for example:

- (A) The paper filed does not include proof of service;
- (B) The paper filed is unsigned;
- (C) The paper filed is signed by a person who is not of record; *
- (D) The amendment filed by the patent owner does not comply with 37 CFR 1.530(d)-(j)>; or
- (E) The amendment filed by the patent owner does not comply with 37 CFR 1.20(c)(3) and/or (c)(4).<

Where a submission made is defective (informal), form PTOL-2069 is used to provide notification of the defects present in the submission. >Form PTOL-2069 is reproduced below.< In many cases, it is only necessary to check the appropriate box on the form and fill in the blanks. However, if the defect denoted by one of the entries on form PTOL-2069 needs further clarification (such as the specifics of why the amendment does not comply with 37 CFR 1.530(d)-(j)), the addi-

tional information should be set forth on a separate sheet of paper which is then attached to the form PTOL-2069.

The defects identified in (A) through (E) above are specifically included in form PTOL-2069. If the submission contains a defect other than those specifically included on the form, the "Other" box on the form is to be checked and the defect explained in the space provided for the explanation. For example, a response might be presented on easily erasable paper, and thus, a new submission would be needed.

Where both the patent owner response and the third party comments are defective, a first form PTOL-2069 should be completed for the patent owner (setting forth the defects in the patent owner response), and a second form PTOL-2069 completed for the third party requester (setting forth the defects in the third party requester's comments). A copy of both completed forms would then be sent to all parties.

A time period of one month or thirty days, whichever is longer, from the mailing date of the

PTOL-2069 letter will be set in the letter for correcting the defect(s). The patent owner may request an extension of time to correct the defect(s) under 37 CFR 1.956. The third party requester, however, is barred from requesting an extension of time by statute. 35 U.S.C. 314(b)(2).

If the defect in the patent owner response or the third party requester comments is limited to a problem with the signature, claim format, or some other obvious defect (easily corrected), and such is noted by the staff of the Office of Patent Legal Administration (OPLA) processing the papers, then the staff of OPLA may, in some instances, issue form PTOL-2069 to notify parties of the defect, and obtain a response to the form, prior to forwarding the case to the examiner. Otherwise, the responsibility is with the examiner to obtain the needed correction of the defects in the papers, which defects are either identified to the examiner by the staff of OPLA in an informal memo, or noted independently by the examiner.

**>

| | | | |
|--|--------------------|-----------------------------------|--|
| NOTICE RE DEFECTIVE PAPER IN INTER PARTES REEXAMINATION | Control No. | Patent Under Reexamination | |
| | Examiner | Art Unit | |

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address. --

1. No proof of service is included with the paper filed by owner requester on _____. 37 CFR 1.248 and 1.903. Proof of service is required within a time period of 30-days or one month from the date of this letter, whichever is longer. Failure to serve the paper may result in the paper being refused consideration. If the failure to comply with this requirement results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).
2. The paper filed on _____ by the owner requester is unsigned. A duplicate paper or ratification, properly signed, is required within a time period of 30-days or one month from the date of this letter, whichever is longer. Failure to comply with this requirement will result in the paper not being considered. If the failure to comply results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).
3. The paper filed on _____ by the owner requester is signed by _____ who is not of record. A ratification or a new power of attorney with a ratification, or a duplicate paper signed by a person of record, is required within a time period of 30-days or one month from the date of this letter, whichever is longer. Failure to comply with this requirement will result in the paper not being considered. If the failure to comply results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).
4. The amendment filed by owner on _____, does not comply with 37 CFR 1.530. Patent owner is given a time period of 30-days or one month from the date of this letter, whichever is longer, to correct this informality, or the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case). The amendment will not be entered, although the argument therein will be considered as it applies to the proceeding without the amendment, should the prosecution be limited under 37 CFR 1.957(c).
5. The amendment filed by owner on _____, does not comply with 37 CFR 1.20(c)(3) and/or 1.20(c)(4), as to excess claim fees. Patent owner is given a time period of 30-days or one month from the date of this letter, whichever is longer, to correct this fee deficiency, or the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case), to effect the "abandonment" set forth in 37 CFR 1.20(c)(5).
6. Other: _____

NOTE: PATENT OWNER EXTENSIONS OF TIME ARE GOVERNED BY 37 CFR 1.956. NO EXTENSION OF TIME IS PERMITTED FOR THIRD PARTY REQUESTER. 35 U.S.C. § 314(b)(2).

All correspondence relating to this *inter partes* reexamination proceeding should be directed to the **Central Reexamination Unit** at the mail, FAX, or hand-carry addresses given at the end of this Office action.

2666.60 Response by Patent Owner/ Third Party to Notice of Defective Paper [R-3]

The patent owner and/or the third party requester will be given a time period of **>**one month or thirty days, whichever is longer,**<** from the mailing date of the notice of defective paper or the time remaining in the response/comments period set in the last Office action**>** to correct the defect in a submission. If, in response to the notice, the defect still is not corrected, the submission will not be entered. **>**If the failure to comply with the notice results in a patent owner failure to file a timely and appropriate response to any Office action, the prosecution of the reexamination proceeding will be terminated under 37 CFR 1.957(b) or limited under 37 CFR 1.957(c) (as is appropriate for the case).**<**

After the patent owner or the third party requester has provided a submission directed solely to correcting the defect, the other party is not permitted to comment on the submission correcting the defect, since the submission correcting the defect is directed to form and does not go to the merits of the case. This would be the case, for example, where the failure to provide a signature or a certificate of service is corrected, or where a permanent copy is submitted to replace an “easily erasable” paper that was originally submitted.

In the case of correcting a defective amendment, however, other issues come into play. Where for example, new claims 10-20 are improperly presented in a patent owner response (e.g., not properly underlined), they generally will not be entered and form PTOL-2069 (Box 4) will be used to notify the patent owner of the need to correct this defect. Until the defect is corrected, claims 10-20 do not yet exist in the proceeding for the third party requester to comment on. Likewise, any argument that was directed to such claims is not truly ripe for the third party requester comment. After the patent owner corrects the defect, claims 10-20 come into existence in the proceeding, and the argument presented by the patent owner becomes relevant. At this point, the third party requester has a right to provide comments in response to the patent owner’s argument, whether or not the argument that was included in the original patent owner submission is re-presented with the paper cor-

recting the defect. Thus, any third party requester comments submitted either in response to the patent owner’s initial paper (presenting the informal claims) or in response to the patent owner’s supplemental paper (correcting the informality) will be considered by the examiner.

Any submission correcting the defect which provides a discussion of the merits should (A) set forth that discussion separately from the portion of the response that corrects the defect, and (B) clearly identify the additional discussion as going to the merits. The additional discussion going to the merits must, in and of itself, have an entry right, or the entire submission will be returned to the party that submitted it, and **one** additional opportunity (30-days or one month, whichever is longer) will be provided, to correct the defect without a discussion of the merits. If the portion directed to the merits is not clearly delineated and identified, the entire submission may be returned to the party that submitted it, and **one** additional opportunity (30-days or one month, whichever is longer) is then given for that party to correct the defect without intermixed discussion of the merits. The examiner may, however, choose to permit entry of such a paper.

2667 Handling of Inappropriate or Untimely Filed Papers [R-3]

37 CFR 1.939. Unauthorized papers in inter partes reexamination.

(a) If an unauthorized paper is filed by any party at any time during the *inter partes* reexamination proceeding it will not be considered and may be returned.

(b) Unless otherwise authorized, no paper shall be filed prior to the initial Office action on the merits of the *inter partes* reexamination.

The applicable regulations (such as 37 CFR 1.501, 1.902 and 1.905, 1.948 and 1.939) provide that certain types of correspondence will not be considered. Whenever reexamination correspondence is received, a decision is required of the Office as to the action to be taken on the correspondence based on what type of paper it is and whether it is timely. In certain instances, the submitted correspondence (submission) will be entered into the reexamination file and be considered. In other instances, the correspondence will be entered into the reexamination file, but will not be considered. In still other instances, the correspondence will not be entered into the reexami-

nation file and will be returned to the party that sent it. The return of certain inappropriate submissions, not being considered, reduces the amount of paper which would ultimately have to be scanned into the record.

Where papers are filed during reexamination proceedings which are inappropriate because of some defect, such papers will either be returned to the sender or be forwarded to one of three places: the reexamination file >(paper file or IFW file history)<; the patent file >(paper file or IFW file history)<; or the storage area >(paper file)<. Any papers returned to the sender must be accompanied by a letter as to the return. The letter is prepared by the Technology Center (TC) Director (or in some instances, by the Office of Patent Legal Administration >(OPLA)<) and is forwarded to the Central Reexamination Unit (CRU) for mailing. The original of the letter returning the paper will be retained in the file and given a paper number.

I. TYPES OF PAPERS RETURNED WITH ** TECHNOLOGY CENTER DIRECTOR >OR REEXAMINATION LEGAL ADVISOR< APPROVAL REQUIRED

A. Filed by Patent Owner

1. Premature Response/Comments by Patent Owner

Any response/comments as to materials of record or any amendment filed by the patent owner prior to the first Office action is premature and will be returned and will not be considered. 37 CFR 1.939. >Where a paper is to be returned based on the above reason, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the TC Director or the Reexamination Legal Advisor will return the paper. Where the submission is accompanied by a petition under 37 CFR 1.182 or 1.183, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.<

Any petition requesting merger of a reexamination with a reexamination or reissue, or a stay of a reexamination or reissue in place of merger, that is filed prior the order to reexamine (37 CFR 1.931) will be returned and will not be considered. See MPEP § 2686.01 and § 2686.03. >The reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.<

2. Response Is Too Long

>Where the length of the patent owner submission exceeds that permitted by 37 CFR 1.943, the submission is improper. Accordingly, pursuant to 37 CFR 1.957(d), a Notice will be mailed to the patent owner. The Notice will be issued by the examiner and will permit the patent owner to exercise one of the following two options:

(A) Submit a re-drafted response that does not exceed the page limit set by 37 CFR 1.943; or

(B) File a copy of the supplemental response with pages redacted to satisfy the 37 CFR 1.943 page limit requirement.

The Notice will set a period of 15 days from the date of the notice to respond. If no response is received, the improper patent owner submission will not be considered. If the submission was necessary to respond to an outstanding Office action, the prosecution of the reexamination proceeding is either terminated pursuant to 37 CFR 1.957(b) or limited pursuant to 37 CFR 1.957(c). Any previously submitted third party comments in response to this improper patent owner submission would also not be considered, as being moot, since the patent owner did not in fact respond to the Office action in accordance with the rules.

If a response to the Notice is received, then under 37 CFR 1.947, the third party requester may once file written comments, limited to issues raised by the Office action or the patent owner's response to the Notice, within 30 days from the date of service of the patent owner's response to the Notice.<

3. Improper Patent Owner Response

The patent owner can only file once under 37 CFR 1.951(a). Any second or supplemental submission after ACP by the patent owner will be returned, unless prosecution has been reopened. See MPEP § 2672.

>Where a paper is to be returned based on the above reason or other appropriate reasons, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the TC Director or the Reexamination Legal Advisor will return the paper. Where a petition under 37 CFR 1.182 or 1.183 has been filed, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.<

B. Filed by Third Party Requester

1. Premature Comments by Third Party Requester

Any comments filed by a third party requester subsequent to the request for reexamination (i.e., not part of it) and prior to the first Office action is premature, and it will be returned and will not be considered. 37 CFR 1.939. Any petition to stay a reexamination proceeding because of an interference (MPEP § 2686.02), which is filed prior to the first Office action in the reexamination proceeding will be returned and will not be considered.

**

Any submission of comments filed by a third party requester where the patent owner has not responded to the outstanding Office action is premature, and it will be returned and will not be considered. 37 CFR 1.947.

>Where a paper is to be returned based on the above reason, and the paper is not accompanied by a petition under 37 CFR 1.182 or 1.183, the TC Director or the Reexamination Legal Advisor will return the paper. Where the premature submission is accompanied by a petition under 37 CFR 1.182 or 1.183, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.<

2. Response Is Too Long

**>Where the length of the third party requester submission exceeds that permitted by 37 CFR 1.943, the submission is improper. Accordingly, a Notice will be issued by the examiner and mailed to the third party requester permitting the third party requester to exercise one of the following two options:

(A) Submit a re-drafted response that does not exceed the page limit set by 37 CFR 1.943; or

(B) File a copy of the supplemental response with pages redacted to satisfy the 37 CFR 1.943 page limit requirement.

The Notice will set a period of 15 days from the date of the notice to respond. If no response is received, the improper third party requester submission will not be considered.<

3. Improper Comments

Where the third party requester comments are not limited to the scope provided by the rules, they are

improper and will be returned >by the examiner (or the Reexamination Legal Advisor)< and will not be considered. 37 CFR 1.947 and 1.951(b). For example, comments following the patent owner's response to a first Office action must be limited to issues and/or points covered by the first action and/or the patent owner's response (in accordance with 37 CFR 1.947); if they are not, they will be returned. See MPEP § 2666.05 for action to be taken by the examiner.

For any third party requester comments containing a submission of prior art, the prior art must be limited solely to prior art which is necessary to rebut a finding of fact by the examiner, which is necessary to rebut a response of the patent owner, or, which for the first time became known or available to the third party requester after the filing of the request for *inter partes* reexamination. Prior art submitted for the reason that it became known or available to the third party requester for the first time after the filing of the request for *inter partes* reexamination must be accompanied by a statement as to when the prior art first became known or available to the third party requester and must include a discussion of the pertinency of each reference to the patentability of at least one claim. If the prior art submission does not satisfy at least one of the criteria noted above, the comments are improper and will be returned and will not be considered. See MPEP § 2666.05 for action to be taken by the examiner.

Supplemental third party requester comments are improper since 37 CFR 1.947 states that comments can "once" be filed. Such supplemental comments are improper, will not be considered, and will be returned. However, supplemental third party comments are permitted in response to the patent owner's completion of a response, even where the initial third party comments were provided after the incomplete patent owner response. Supplemental third party comments are also permitted in response to a supplemental patent owner response.

The third party requester can only respond to a patent owner submission after an Action Closing Prosecution (ACP), and may only do so once under 37 CFR 1.951(b). Any original third party requester comments (where the patent owner does not respond) or any second or supplemental responsive comments after ACP are improper and will be returned. See MPEP § 2672.

Third party comments in response to a patent owner submission which does not respond to an Office action are not permitted, since 37 CFR 1.947 only permits comments in response to the patent owner's response to an Office action. For example, where the patent owner submits a new power of attorney, the third party requester is not permitted to submit a set of comments, because the patent owner submission is not a response to an Office action. If the third party requester does comment, it will be returned.

4. Improper Petition

Any petition to stay a reexamination proceeding because of an interference (MPEP § 2686.02), which is filed prior to the first Office action in the reexamination proceeding will be returned and will not be considered. 37 CFR 1.939.

Any petition by a third party requester to stay a reexamination proceeding because of an interference where the third party is not a party to the interference will be returned and will not be considered. See MPEP § 2686.02.

Any petition requesting merger of a reexamination with a reexamination or reissue, or a stay of a reexamination or reissue in place of merger, that is filed prior the order to reexamine (37 CFR 1.931) will be returned and will not be considered. See MPEP § 2686.01 and § 2686.03. Note, also, that a petition by the third party requester requesting that a later-filed case should not be merged (see MPEP § 2640 "Second Or Subsequent Request...") will be returned and will not be considered, where it is filed prior the order to reexamine. Prior to the order, such a petition is not ripe for decision because it is possible that reexamination will not be granted and there will be nothing to merge.

>In all these situations, the reexamination proceeding should be addressed in the OPLA, to issue a decision on the petition.<

C. Filed by Third Party Other Than Third Party Requester

No submissions on behalf of any third parties other than third party requesters as defined in 35 U.S.C. 100(e) will be considered unless such submissions are in accordance with 37 CFR 1.915 or are one of the exceptions noted below. Thus, a petition to merge a reexamination, or stay one of them because of the

other, which is filed by a party other than the patent owner or the third party requester of reexamination will not be considered, but will be returned to that party as being improper under 37 CFR 1.905. See also MPEP § 2686.01 and MPEP § 2686.03.

A paper submitted by a third party other than a third party requester must be (1) a 37 CFR 1.501 art citation limited to the citation of patents and printed publications and an explanation of the pertinency and applicability of the patents and printed publications, or (2) bare notice of suits and other proceedings involving the patent (see MPEP § 2686 and § 2686.04) which may include copies of decisions or other court papers, or papers filed in the court, from litigations or other proceedings involving the patent. Such submissions must be without additional comment and cannot include further arguments or information. If the submission by the third party is not one of the above-described two types of papers, it will be returned to an identified third party or destroyed if the submitter is unidentified. If a submission by the third party of either of the above-described two types of papers contains additional material that goes beyond the scope of what is permitted, the paper will be returned to an identified third party, or destroyed if the third party submitter is unidentified. If a proper 37 CFR 1.501 submission is filed by a third party after the order to reexamine, it will be stored in the storage area-see below.

II. TYPES OF DEFECTIVE PAPERS TO BE LOCATED IN THE "REEXAMINATION FILE"

A. Filed by Patent Owner

1. Unsigned Papers

Papers filed by the patent owner which are unsigned, or signed by less than all of the patent owners where no attorney or agent is of record or acting in representative capacity, will be denied consideration, but will be retained in the file. 37 CFR 1.33.

2. No Proof of Service

Papers filed by the patent owner in which no proof of service is included, and proof of service is required, may be denied consideration. Such papers should be denied consideration where it cannot be determined that service was in fact made and the third party

requester's response/comment/appeal/brief period is to be set by the date of service. See 37 CFR 1.248 and MPEP § 2666.06.

3. Late Papers

Where patent owner has filed a paper which was filed after the period for response set by the Office, the paper will be retained in the file but will not be considered.

A patent owner submission following a third party requester submission, where the patent owner submission is filed subsequent to the permitted time from the date of service of third party requester's submission, will be retained in the file but will not be considered. The date that the Office actually receives the third party requester's submission has no bearing here; it is the date of service on the patent owner which is critical.

4. Defective Amendment

A proposed amendment to the description and claims which does not comply with 37 CFR 1.530(d)-(k) will be retained in the file, but the amendment will not be considered. An exception to this is where the only defect in the amendment is that it enlarges the scope of the claims of the patent or introduces new matter. Such an amendment *will be considered*, and a rejection will be made in the next Office action.

5. Premature Appeal

Where a notice of appeal or notice of cross appeal is filed before a Right of Appeal Notice (RAN) has been issued, the paper will be retained in the file but will not be considered (other than to inform the parties that the appeal is not acceptable).

B. Filed by Third Party Requester

1. Unsigned Papers

Papers filed by a third party requester which are unsigned or not signed by the third party requester or requester's attorney/agent of record or attorney/agent acting in representative capacity will be denied consideration. 37 CFR 1.33.

2. No Proof of Service

Papers filed by a third party requester in which no proof of service is included as to the patent owner and/or any other third party requester, and proof of service is required, may be denied consideration. Such papers should be denied consideration where it cannot be determined that service was in fact made and another party's response/comment/appeal/brief period is to be set by the date of service. 37 CFR 1.248.

3. Late Papers

Any third party requester submission following a patent owner's submission, where the third party requester submission is filed subsequent to the permitted time from the date of service of the patent owner's submission, will be retained in the file, but will not be considered. Note, for example, a 37 CFR 1.947 submission of third party comments following the patent owner's response. Where the third party comments are submitted subsequent to 30 days from the date of service of the patent owner's response, they will be retained in the file but will not be considered. The date that the Office actually receives the patent owner's response has no bearing here; it is the date of service on the third party requester which is critical.

Where the third party requester has filed a paper which is untimely, that is, it was filed after the period set by the Office for response, the paper will be retained in the file, but will not be considered.

4. Premature Appeal

Where a notice of appeal or notice of cross appeal is filed before a Right of Appeal Notice (RAN) has been issued, the paper will be retained in the file, but will not be considered (other than to inform the parties that the appeal is not acceptable). 37 CFR *41.61<.

III. PAPERS LOCATED IN THE "STORAGE AREA"

A storage area for submissions of art citations in an *inter partes* reexamination will be maintained separate and apart from the reexamination and patent files, and at a location in the CRU.

Submission of art citations in an *inter partes* reexamination is permitted by the patent owner and the

third party requester to the extent stated in the regulations. 37 CFR 1.501 and 1.902. All other submissions of art citations based solely on prior patents or publications filed after the date of the order to reexamine are retained in the storage area. Such citations are not entered into the patent file, but rather are delayed until the reexamination proceedings have been **>concluded<*. See MPEP § 2602. (Proper timely filed submissions of art citations made prior to the order to reexamine are placed in the reexamination file.)

2668 Petition for Entry of Late Papers for Revival of Reexamination Proceeding [R-3]

35 U.S.C. 41. *Patent fees; patent and trademark search systems.*

(7) On filing each petition for the revival of an unintentionally abandoned application for a patent, for the unintentionally delayed payment of the fee for issuing each patent, or for an unintentionally delayed response by the patent owner in any reexamination proceeding, \$1,210, unless the petition is filed under section 133 or 151 of this title, in which case the fee shall be \$110.

35 U.S.C. 133. *Time for prosecuting application.*

Upon failure of the applicant to prosecute the application within six months after any action therein, of which notice has been given or mailed to the applicant, or within such shorter time, not less than thirty days, as fixed by the Director in such action, the application shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Director that such delay was unavoidable.

37 CFR 1.137. *Revival of abandoned application, terminated reexamination proceeding, or lapsed patent.*

(a) *Unavoidable.* If the delay in reply by applicant or patent owner was unavoidable, a petition may be filed pursuant to this paragraph to revive an abandoned application, a reexamination proceeding terminated under §§ 1.550(d) or 1.957(b) or (c), or a lapsed patent. A grantable petition pursuant to this paragraph must be accompanied by:

- (1) The reply required to the outstanding Office action or notice, unless previously filed;
- (2) The petition fee as set forth in § 1.17(l);
- (3) A showing to the satisfaction of the Director that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unavoidable; and
- (4) Any terminal disclaimer (and fee as set forth in § 1.20(d)) required pursuant to paragraph (d) of this section.

(b) *Unintentional.* If the delay in reply by applicant or patent owner was unintentional, a petition may be filed pursuant to this

paragraph to revive an abandoned application, a reexamination proceeding terminated under §§ 1.550(d) or 1.957(b) or (c), or a lapsed patent. A grantable petition pursuant to this paragraph must be accompanied by:

- (1) The reply required to the outstanding Office action or notice, unless previously filed;
- (2) The petition fee as set forth in § 1.17(m);
- (3) A statement that the entire delay in filing the required reply from the due date for the reply until the filing of a grantable petition pursuant to this paragraph was unintentional. The Director may require additional information where there is a question whether the delay was unintentional; and
- (4) Any terminal disclaimer (and fee as set forth in § 1.20(d)) required pursuant to paragraph (d) of this section.

(e) *Request for reconsideration.* Any request for reconsideration or review of a decision refusing to revive an abandoned application, a terminated reexamination proceeding, or lapsed patent upon petition filed pursuant to this section, to be considered timely, must be filed within two months of the decision refusing to revive or within such time as set in the decision. Unless a decision indicates otherwise, this time period may be extended under:

- (1) The provisions of § 1.136 for an abandoned application or lapsed patent;
- (2) The provisions of § 1.550(c) for a terminated *ex parte* reexamination proceeding filed under § 1.510; or
- (3) The provisions of § 1.956 for a terminated *inter partes* reexamination proceeding filed under § 1.913.

If the patent owner in an *inter partes* reexamination proceeding fails to file a timely and appropriate response to any Office action and no claims are allowable, then pursuant to 37 CFR 1.957(b), the *>prosecution<* of the reexamination proceeding is terminated, and a certificate under 37 CFR 1.997 is issued canceling all claims of the patent.

An *inter partes* reexamination **>prosecution<* terminated under 37 CFR 1.957(b) can be revived if the delay in response by the patent owner was unavoidable in accordance with 37 CFR 1.137(a), or unintentional in accordance with 37 CFR 1.137(b).

If the patent owner in an *inter partes* reexamination proceeding fails to file a timely and appropriate response to any Office action and at least one claim is allowable, then pursuant to 37 CFR 1.957(c), the proceeding continues but is limited to the claim(s) found allowable at the time of the failure to respond (i.e., in the Office action).

Rejected claims terminated under 37 CFR 1.957(c) can be revived if the delay in response by the patent owner was unavoidable in accordance with 37 CFR

1.137(a), or unintentional in accordance with 37 CFR 1.137(b).

All petitions in reexamination proceedings to accept late papers and revive will be decided in the Office of Patent Legal Administration (OPLA).

I. PETITION BASED ON UNAVOIDABLE DELAY

The unavoidable delay provisions of 35 U.S.C. 133 are imported into, and are applicable to, reexamination proceedings by 35 U.S.C. 305 and 314. See *In re Katrapat*, 6 USPQ2d 1863 (Comm'r Pat. 1988). Accordingly, the Office will consider, in appropriate circumstances, a petition showing unavoidable delay under 37 CFR 1.137(a) where untimely papers are filed by the patent owner subsequent to the order for reexamination. Any such petition must provide an adequate showing of the cause of unavoidable delay, including the details of the circumstances surrounding the unavoidable delay and evidence to support the showing. Additionally, the petition must be accompanied by a proposed response to continue prosecution (unless it has been previously filed) and by the petition fee required by 37 CFR 1.17(l).

II. PETITION BASED ON UNINTENTIONAL DELAY

The unintentional delay fee provisions of 35 U.S.C. 41(a)(7) are imported into, and are applicable to, any reexamination proceeding by Sec. 4605(a) of the American Inventors Protection Act of 1999. Accordingly, the Office will consider, in appropriate circumstances, a petition showing unintentional delay under 37 CFR 1.137(b) where untimely papers are filed by the patent owner subsequent to the order for reexamination. Any such petition must provide a verified statement that the delay was unintentional, a proposed response to continue prosecution (unless it has been previously filed), and the petition fee required by 37 CFR 1.17(m).

III. RENEWED PETITION

Reconsideration may be requested of a decision dismissing or denying a petition under 37 CFR 1.137(a) or (b) to revive a terminated reexamination *->prosecution<. The request for reconsideration must be submitted within one (1) month from the mail date of the decision for which reconsideration is requested.

An extension of time may be requested only under 37 CFR 1.956; extensions of time under 37 CFR 1.136 are not available in reexamination proceedings. Any reconsideration request which is submitted should include a cover letter entitled "Renewed Petition under 37 CFR 1.137(a)" (for an "unavoidable" petition) or "Renewed Petition under 37 CFR 1.137(b)" (for an "unintentional" petition).

IV. PETITION REQUIREMENTS

See also MPEP § 711.03(c), part III, for a detailed discussion of the requirements of petitions filed under 37 CFR 1.137(a) and 37 CFR 1.137(b).

2670 Clerical Handling [Added R-2]

I. CENTRAL REEXAMINATION UNIT PROCESSING

Central Reexamination Unit (CRU) support staff, will carry out clerical handling and processing of *inter partes* reexamination cases. When the case is in the Technology Center (TC), the TC support staff will do the clerical processing needed for the reexamination, and the Special Program Examiner (SPRE) and paralegal will oversee the clerical processing.

II. TECHNOLOGY CENTER PROCESSING

The TC clerical staff will provide support for the examiner's preparation of Office actions, and for handling the case as needed within the TC. The clerical staff will perform all PALM matters needed for the case in the TC, e.g., PALMing in the file and PALMing it to the examiner. After the examiner has completed a decision on the request for *inter partes* reexamination and/or an Office action, the TC clerical staff will make a copy of the decision and/or Office action for the patent owner and for the third party requester(s). The clerical staff will also make copies of any references which are needed. A transmittal form PTOL-2070 with the third party requester's address will be completed by the TC (if a copy for mailing is not already in the case file). The clerical staff will coordinate its activities with those of the examiner and the TC SPRE and paralegal.

III. AMENDMENT ENTRY

While amendments in an *ex parte* reexamination proceeding are entered by the TC clerical staff,

amendments in an *inter partes* reexamination proceeding (which comply with 37 CFR 1.941) are entered by the CRU. Otherwise, the entry of amendments in an *ex parte* reexamination proceeding is the same as entry of amendments in an *inter partes* reexamination proceeding. See MPEP § 2234 and § 2250 for manner of entering amendments.

For entry of amendments in a merged *inter partes* reexamination proceeding (i.e., an *inter partes* reexamination proceeding merged with another reexamination proceeding or with a reissue application), see MPEP § 2686.01 and § 2686.03.

Where an amendment is submitted in proper form and it is otherwise appropriate to enter the amendment, the amendment will be entered for purposes of the reexamination proceeding, even though the amendment does not have legal effect until the certificate is issued. Any “new matter” amendment to the disclosure (35 U.S.C. 132) will be required to be canceled, and claims containing new matter will be rejected under 35 U.S.C. 112. A “new matter” amendment to the drawing is ordinarily not entered. See MPEP § 608.04, § 608.04(a) and § 608.04(c). Where an amendment enlarges the scope of the claims of the patent, the claims will be rejected under 35 U.S.C. 314(a).

2671 Examiner Action Following Response/Comments or Expiration of Time for Same [Added R-2]

I. RECONSIDERATION

After response by the patent owner and any third party comments, the patent under reexamination will be reconsidered. The patent owner and the third party requester will be notified as to any claims rejected, any claims found patentable and any objections or requirements made. The patent owner may respond to such Office action with or without amendment, and the third party requester may provide comments after the patent owner’s response. If the patent owner response contains an amendment, the examiner will consider the amendment to determine whether the amendment raises issues of 35 U.S.C. 112 and/or broadening of the claims under 35 U.S.C. 314. The patent under reexamination will be reconsidered until the proceeding is ready for closing prosecution, at

which point the examiner will issue an Action Closing Prosecution (ACP). See MPEP § 2671.02.

II. CASE IS TAKEN UP FOR ACTION

The case should be acted on promptly, in accordance with the statutory requirement for “special dispatch within the Office” (35 U.S.C. 314(c)).

After the examiner receives the case file (having the patent owner’s response to the Office action and any third party requester comments on that response), he/she will prepare for a pre-action consultation conference with a Reexamination Legal Adviser (RLA). At the consultation conference, the RLA will provide instructions as to preparation of the Office action addressing the patent owner’s response and any third party requester comments on that response. The consultation should be completed within two (2) weeks of when the case was initially forwarded to the TC by the Central Reexamination Unit (CRU).

After the consultation conference, the examiner will promptly take up the case for action. The examiner will prepare an Office action no later than two weeks from the date of the consultation conference. The case, with the completed action, will be forwarded to the TC SPRE for review. If the SPRE returns the case to the examiner for correction/revision, the correction/revision must be handled expeditiously and returned to the SPRE within the time set for such by the SPRE.

III. OPTIONS AS TO OFFICE ACTION TO ISSUE

At this point in the proceeding, the examiner will have the following options as to the next Office action to issue:

(A) There is **no** timely response by the patent owner (since the patent owner did not respond, no third party requester comments may be filed):

(1) If **all** claims are under rejection, the examiner will issue a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC). See MPEP § 2687. All claims will be canceled by formal examiner’s amendment (attached as part of the NIRC).

(2) If at least one claim is free of rejection and objection, the examiner will issue an Action Closing Prosecution (ACP). In the ACP, it will be stated that any claims under rejection or objection are withdrawn

from consideration and will be canceled upon issuance of a NIRC. It will further be stated that the proceeding will be limited to the claims found patentable at the time of the failure to respond, and to claims (added or amended) which do not expand the scope of the claims found patentable at that time. See MPEP § 2666.10.

It should be noted that even in a situation where there has been no patent owner response, the examiner is always free to issue a supplemental Office action providing a new rejection of claims **previously found patentable**, where new information comes to the attention of the examiner warranting the new rejection. Of course, such an action would ordinarily not be made an ACP.

(B) There is a timely response by the patent owner, and the third party requester does **not** timely provide comments:

(1) If the response by the patent owner is incomplete, the examiner may issue an incomplete-response action. See MPEP § 2666.30.

(2) If there is a formality defect in the response by the patent owner, the examiner will issue a Notice of Defective Paper in Reexam. See MPEP § 2666.50.

(3) If the patent owner's response is complete and defect-free, and the proceeding is ready for closing prosecution, the examiner will issue an ACP. See MPEP § 2671.02. This is true if all claims are determined to be patentable, all claims are determined to be rejected, or if some claims are determined to be patentable and some claims are determined to be rejected. After the ACP has been issued, the patent owner can submit comments with or without a proposed amendment in accordance with MPEP § 2672, and the third party requester can then file comments responsive to the patent owner's submission.

(4) If the patent owner's response is complete and defect-free, and the proceeding is **not** ready for closing prosecution, the examiner will issue a new office action that does not close prosecution. See MPEP § 2671.01.

(C) There is a timely response by the patent owner, and the third party requester does provide timely comments:

(1) If the response by the patent owner is incomplete, the examiner may issue an incomplete-response action. See MPEP § 2666.30.

(2) If the comments by third party requester go beyond the scope of what is permitted for the third party comments, the examiner will follow the procedures set forth in MPEP § 2666.05 for improper comments.

(3) If there is a formality defect in the response by the patent owner, the examiner will issue a Notice of Defective Paper in Reexam. See MPEP § 2666.50.

(4) If there is a formality defect in the comments by the third party requester, the examiner will issue a Notice of Defective Paper in Reexam. See MPEP § 2666.50.

(5) If the response and comments are in order, and the proceeding is ready for closing prosecution, the examiner will issue an ACP. See MPEP § 2671.02. This is true if all claims are determined to be patentable, all claims are determined to be rejected, or if some claims are determined to be patentable and some claims are determined to be rejected. After the ACP has been issued, the patent owner can submit comments with or without a proposed amendment in accordance with MPEP § 2672 and the third party requester can then file comments responsive to the patent owner's submission.

(6) If the response and comments are in order and the proceeding is **not** ready for closing prosecution, the examiner will issue a new office action that does not close prosecution. See MPEP § 2671.01.

(D) There is a timely request for issuance of an Expedited Right of Appeal Notice:

37 CFR 1.953(b) provides for the issuance of an expedited Right of Appeal Notice (RAN), where the criteria for the same is satisfied. At any time after the patent owner's response to the first Office action on the merits in an *inter partes* reexamination, the patent owner and third party requester(s) may request the immediate issuance of a RAN. Where such a request is presented in the proceeding, see MPEP § 2673.02 for guidance as to whether an expedited Right of Appeal Notice will be issued.

2671.01 Examiner Issues Action on Merits That Does Not Close Prosecution [R-3]

37 CFR 1.949. Examiner's Office action closing prosecution in inter partes reexamination.

Upon consideration of the issues a second or subsequent time, or upon a determination of patentability of all claims, the exam-

iner shall issue an Office action treating all claims present in the *inter partes* reexamination, which may be an action closing prosecution. The Office action shall set forth all rejections and determinations not to make a proposed rejection, and the grounds therefor. An Office action will not usually close prosecution if it includes a new ground of rejection which was not previously addressed by the patent owner, unless the new ground was necessitated by an amendment.

I. WHEN A NON-ACP ACTION IS ISSUED

After reviewing the patent owner's response and third party requester comments (if such comments are filed), the examiner may determine that the proceeding is not ready for issuing an Action Closing Prosecution (ACP). Such a determination would be based upon the following:

(A) In accordance with 37 CFR 1.949, an action will not normally close prosecution if it includes a new ground of rejection which was not previously addressed by the patent owner, unless the new ground was necessitated by an amendment. The examiner will not close prosecution where a new ground of rejection not necessitated by an amendment is made, because the patent owner's right to amend the claims becomes limited after prosecution is closed.

(B) Where an ACP would be proper, but the examiner feels that the issues are not yet clearly defined, it is always within the discretion of the examiner to issue an Office action that does not close prosecution (rather than an ACP).

II. OVERALL CONTENT

Where the examiner determines that the proceeding is not ready for issuing an ACP, the examiner will issue an Office action that will be similar in form to a first Office action, but will differ in that it addresses the positions and argument set forth in the patent owner's response and the third party requester comments (if such comments are filed). This Office action will be a statement of the examiner's position, so complete that the next Office action can properly be made an action closing prosecution.

The action should be comprehensive. It should address all issues as to the patents or printed publications. The action will clearly set forth each ground of rejection and/or ground of objection, and the reasons supporting the ground(s). The action will also clearly set forth each rejection proposed by the third party requester that the examiner refuses to adopt. Reasons

why the rejection proposed by the third party is not appropriate (i.e., why the claim cannot be rejected under the ground proposed by the third party requester) must be clearly stated for each rejection proposed by the third party requester that the examiner refuses to adopt. Comprehensive reasons for patentability must be given for each determination favorable to patentability of claims. See MPEP § 1302.14 for examples of suitable statements of reasons for allowance.

III. REVIEW OF AMENDATORY MATTER UNDER 35 U.S.C. 112

Where an amendment has been submitted in the patent owner's response, the amendatory matter (i.e., matter revised or newly added) should be reviewed for compliance with 35 U.S.C. 112. As to the content of the patent that has not been revised, a review based upon 35 U.S.C. 112 is not proper in reexamination, and no such review should be made.

IV. *>WITHDRAWAL< OF REJECTION

Where the examiner withdraws a ground of rejection originally initiated by the examiner, such withdrawal should be clearly stated in the Office action as a decision favorable to patentability with respect to the withdrawn rejection. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester." In the event the patent owner fails to respond to all actions leading to the Right of Appeal Notice (RAN), including the ACP, and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability - see 37 CFR *>41.61(a)(2)<.

**>Where the claims have not been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester (e.g., based on the patent owner's argument or evidence submitted), the examiner should treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.

Generally (subject to the below-stated exception), where the claims have been amended and the examiner withdraws a ground of rejection previously proposed by the third party requester, this is not a refusal of the examiner to adopt the rejection that was pro-

posed by the requester, since the rejection was never proposed as to the amended claims. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester" as to the amended claims. In the event the patent owner fails to respond to all actions leading to the RAN, including the ACP, and a RAN is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability. See 37 CFR 41.61(a)(2).

If a claim is amended merely to include a dependent claim that was previously subjected to a proposed requester rejection, and the examiner withdraws that ground of rejection as to the newly amended claim, such would be a refusal to adopt the third party requester's previously proposed rejection of the dependent claim. Thus, the examiner would treat the issue as a rejection proposed by the third party requester that the examiner refuses to adopt.<

V. ISSUES NOT WITHIN SCOPE OF REEXAMINATION

If questions not within the scope of reexamination proceedings (for example, questions of patentability based on public use or on sale, fraud, abandonment under 35 U.S.C. 102(c)) have been **newly** raised by the **patent owner response** or the **third party requester comments** being addressed by the present Office action, the existence of such questions will be noted by the examiner in the Office action, using form paragraph 26.03.

¶ 26.03 Issue Not Within Scope of Inter Partes Reexamination

It is noted that an issue not within the scope of reexamination proceedings has been raised. [1].The issue will not be considered in a reexamination proceeding. 37 CFR 1.906(c). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid.

Examiner Note:

1. In bracket 1, identify the issues.
2. This paragraph may be used either when the patent owner or the third party requester raises issues such as (but not limited to) public use or on sale, fraud, or abandonment of the invention. Such issues should not be raised independently by the patent examiner.

Note that if questions of patentability based on public use or on sale, fraud, abandonment under 35 U.S.C. 102(c), etc., have been independently discovered by the examiner during a reexamination proceeding but were not raised by the third party requester or the patent owner, the existence of such questions will not be noted by the examiner in any Office action, because 37 CFR 1.906(c) is only directed to such questions "raised by the patent owner or the third party requester."

VI. COVER SHEET

Form PTOL-2064 should be used as the Office action cover sheet. Since the Office action is responsive to a patent owner response, and possibly the third party requester comments, the space on the PTOL-2064 for the date of the communication(s) to which the Office action is responsive to should be filled in. Generally, the patent owner is given two months to respond to the action, and thus "Two" should be inserted in the appropriate space.

VII. SIGNATORY AUTHORITY

As with all other Office correspondence on the merits in a reexamination proceeding, the action must be signed by a primary examiner.

VIII. CONCLUDING PARAGRAPHS

In view of the requirement for "special dispatch" in *inter partes* reexamination proceedings (35 U.S.C. 314(c)), it is intended that the examiner be able to close prosecution at the earliest possible time. Accordingly, the Office action should include a statement cautioning the patent owner that a complete response should be made to the action, since the next action is expected to be an ACP. The action should further caution the patent owner that the requirements of 37 CFR 1.116(b) will be strictly enforced after an ACP and that any amendment after an ACP must include "a showing of good and sufficient reasons why they are necessary and were not earlier presented" in order to be considered. Form paragraph 26.05 should be inserted at the end of the Office action followed by form paragraph 26.73.

**>

¶ 26.05 Papers To Be Submitted in Response to Action

In order to ensure full consideration of any amendments, affidavits or declarations, or other documents as evidence of patent-

ability, such documents must be submitted in response to this Office action. Submissions after the next Office action, which is intended to be an Action Closing Prosecution (ACP), will be governed by 37 CFR 1.116(b) and (d), which will be strictly enforced.

¶ 26.73 *Correspondence and Inquiry as to Office Actions*

All correspondence relating to this *inter partes* reexamination proceeding should be directed:

By Mail to: Mail Stop *Inter Partes* Reexam
Central Reexamination Unit
Office of Patent Legal Administration
United States Patent & Trademark Office
P.O. Box 1450
Alexandria, VA 22313-1450

By FAX to: (571) 273-0100
Central Reexamination Unit

By hand: Customer Service Window
Randolph Building
401 Dulany Street
Alexandria, VA 22314

Any inquiry concerning this communication or earlier communications from the examiner, or as to the status of this proceeding, should be directed to the Central Reexamination Unit at telephone number (571) 272-7705.

<

IX. NO RESPONSE BY PATENT OWNER

Where the patent owner fails to timely respond to an action requiring a response and there are no patentable claims, a Notice of Intent to Issue *Inter Parte* Reexamination Certificate (NIRC) will be issued as the action that does not close prosecution.

2671.02 Examiner Issues Action Closing Prosecution (ACP) [R-3]

37 CFR 1.949. *Examiner's Office action closing prosecution in inter partes reexamination.*

Upon consideration of the issues a second or subsequent time, or upon a determination of patentability of all claims, the examiner shall issue an Office action treating all claims present in the *inter partes* reexamination, which may be an action closing prosecution. The Office action shall set forth all rejections and determinations not to make a proposed rejection, and the grounds therefor. An Office action will not usually close prosecution if it includes a new ground of rejection which was not previously addressed by the patent owner, unless the new ground was necessitated by an amendment.

Although an Action Closing Prosecution (ACP) has many attributes similar to a "final rejection" made in an *ex parte* reexamination proceeding or in a non-pro-

visional application, it is not a final action, and, as such, **it cannot be appealed from**. An appeal can only be taken after the examiner issues a Right of Appeal Notice (RAN). See MPEP § 2673.02.

Before an ACP is in order, a clear issue should be developed. When all claims are found patentable in the first action, the examiner will, at that point, issue an ACP, since the patent owner has nothing to respond to. Otherwise, it is intended that the second Office action in the reexamination proceeding will ordinarily be an ACP. The criteria for issuing an ACP is analogous to that set forth in MPEP § 706.07(a) for making a rejection final in an application.

The examiner should not prematurely cut off the prosecution with a patent owner who is seeking to define the invention in the claims that will offer the patent protection to which the patent owner is entitled. However, the examiner and all other parties to the reexamination should recognize that a reexamination proceeding may result in the final cancellation of claims from the patent **and** that the patent owner does not have the right to continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d) nor by filing a Request for Continued Examination under 37 CFR 1.114, and the patent owner cannot file an *inter partes* reexamination request (see MPEP § 2612). Complete and thorough actions by the examiner, coupled with complete responses by the patent owner and complete comments by the third party requester (including early presentation of evidence under 37 CFR 1.131 or 1.132) will go far in reaching a desirable early termination of the >prosecution of the< reexamination proceeding.

In making an ACP (A) all outstanding grounds of rejection of record should be carefully reviewed, (B) all outstanding determinations of patentability (decisions to not make a proposed rejection) of record should be carefully reviewed, and (C) any grounds of rejection relied upon and any determinations of patentability relied upon should be reiterated.

I. CONTENT

The grounds of rejection and determinations of patentability must (in the ACP) be clearly developed to such an extent that the patent owner and the third party requester may readily judge the advisability of filing comments after an ACP pursuant to 37 CFR 1.951(a) and (b), respectively.

The ACP should address all issues as to the patents or printed publications. The ACP will clearly set forth each rejection proposed by the third party requester that the examiner refuses to adopt. Reasons why the rejection proposed by the third party requester is not appropriate (i.e., why the claim cannot be rejected under the ground proposed by the third party requester) must be clearly stated for each rejection proposed by the third party requester that the examiner refuses to adopt. Comprehensive reasons for patentability must be given for each determination favorable to patentability of claims. See MPEP § 1302.14 for examples of suitable statements of reasons for allowance.

Where a single previous Office action contains a complete statement of a ground of rejection or of reasons for not making a proposed rejection, the ACP may incorporate by reference that statement. In any event, the ACP must also include a rebuttal of any arguments raised in the patent owner's response and must reflect consideration of any comments made by the third party requester.

II. REVIEW OF AMENDATORY MATTER UNDER 35 U.S.C. 112

Where an amendment has been submitted in the patent owner's response, the amendatory matter (i.e., matter revised or newly added) should be reviewed for compliance with 35 U.S.C. 112. As to the content of the patent that has not been revised, a review based upon 35 U.S.C. 112 is not proper in reexamination, and no such review should be made.

III. WITHDRAWAL OF REJECTION

Where the examiner withdraws a ground of rejection originally initiated by the examiner, such withdrawal should be clearly stated in the ACP as a decision favorable to patentability with respect to the withdrawn rejection. The third party requester's next set of comments that may be filed (after a patent owner response to an action) may propose the withdrawn rejection as a "rejection proposed by the third party requester." In the event the patent owner fails to respond to the ACP and a Right of Appeal Notice (RAN) is then issued, the third party requester may appeal this withdrawal of rejection as a final decision favorable to patentability - see 37 CFR

*>41.61(a)(2)<. Where the examiner withdraws a ground of rejection previously proposed by the third party requester, the examiner should treat the issue as rejection proposed by the third party requester that the examiner refuses to adopt.

IV. ISSUES NOT WITHIN SCOPE OF REEXAMINATION

If questions not within the scope of reexamination proceedings (for example, questions of patentability based on public use or on sale, fraud, abandonment under 35 U.S.C. 102(c)) have been **newly** raised by the **patent owner** response or the **third party requester** comments being addressed by the ACP, the existence of such questions will be noted by the examiner in the ACP, using form paragraph 26.03.

¶ 26.03 Issue Not Within Scope of Inter Partes Reexamination

It is noted that an issue not within the scope of reexamination proceedings has been raised. [1]. The issue will not be considered in a reexamination proceeding. 37 CFR 1.906(c). While this issue is not within the scope of reexamination, the patentee is advised that it may be desirable to consider filing a reissue application provided that the patentee believes one or more claims to be partially or wholly inoperative or invalid.

Examiner Note:

1. In bracket 1, identify the issues.
2. This paragraph may be used either when the patent owner or the third party requester raises issues such as (but not limited to) public use or on sale, fraud, or abandonment of the invention. Such issues should not be raised independently by the patent examiner.

V. COVER SHEET

Form PTOL-2065 should be used as the cover sheet for the ACP. Since the Office action is responsive to a patent owner response, and possibly the third party requester comments, the space on the PTOL-2065 for the date of the communication(s) to which the Office action is responsive to should be filled in. Generally, the patent owner is given one month to respond to the action, and thus "One" should be inserted in the appropriate space for such.

VI. SIGNATORY AUTHORITY

As with all other Office correspondence on the merits in a reexamination proceeding, the ACP must be signed by a primary examiner.

VII. CONCLUDING PARAGRAPH

The ACP should conclude with the following form paragraph:

¶ 26.07 Action Closing Prosecution

This is an ACTION CLOSING PROSECUTION (ACP); see MPEP § 2671.02.

(1) Pursuant to 37 CFR 1.951(a), the patent owner may once file written comments limited to the issues raised in the reexamination proceeding and/or present a proposed amendment to the claims which amendment will be subject to the criteria of 37 CFR 1.116 as to whether it shall be entered and considered. Such comments and/or proposed amendments must be filed within a time period of 30 days or one month (whichever is longer) from the mailing date of this action. Where the patent owner files such comments and/or a proposed amendment, the third party requester may once file comments under 37 CFR 1.951(b) responding to the patent owner's submission within 30 days from the date of service of the patent owner's submission on the third party requester

(2) If the patent owner does not timely file comments and/or a proposed amendment pursuant to 37 CFR 1.951(a), then the third party requester is precluded from filing comments under 37 CFR 1.951(b).

(3) Appeal **cannot** be taken from this action, since it is not a final Office action.

VIII. WHERE PATENT OWNER FAILS TO RESPOND AND CLAIMS HAVE BEEN FOUND PATENTABLE

Where the patent owner fails to respond to the first Office action (or any subsequent Office action which is prior to ACP) and any claims have been found patentable in the first action (or a subsequent action), the examiner will issue an ACP (see MPEP § 2671). The ACP should repeat all determinations of patentability (decisions to not make a proposed rejection) applicable to the patentable claims and incorporate by reference the reasons for each determination (the reasons for not making each proposed rejection). If the examiner realizes that more explanation would be helpful, the examiner should include it. Since the patent owner failed to respond to the first Office action, the proceeding will be limited to the claims found patentable and to new claims which do not expand the scope of the claims found patentable (if the new claims have an entry right or are otherwise entered at the option of the examiner). See MPEP § 2666.10.

2671.03 Patentability Review Conferences [Added R-2]

A "patentability review conference" will be convened at two stages of the examination in an *inter partes* reexamination proceeding:

(A) A patentability review conference must be convened just prior to issuing an action closing prosecution (ACP); and

(B) A patentability review conference must be convened just prior to issuing a right of appeal notice which includes a final rejection (RAN).

In the patentability review conference, the examiner's preliminary decision to reject and/or allow the claims in the reexamination proceeding will be reviewed, prior to the issuance of the Office action (ACP or RAN).

I. MAKE-UP OF THE PATENTABILITY REVIEW CONFERENCE

The patentability review conference will consist of three members, one of whom may be the Supervisory Patent Examiner (SPE). The first member will be the examiner in charge of the proceeding. The SPE will select the other two members, who will be examiner-conferees. The examiner-conferees will be primary examiners, or examiners who are knowledgeable in the technology of the invention claimed in the patent being reexamined, and/or who are experienced in reexamination practice. The majority of those present at the conference will be examiners who were not involved in the examination or issuance of the patent. An "original" examiner (see MPEP § 2636) should be chosen as a conferee only if that examiner is the most knowledgeable in the art, or there is some other specific and justifiable reason to choose an original examiner as a participant in the conference.

The patentability review conference will be similar to the appeal conference carried out prior to the issuance of an examiner's answer following the filing of a Notice of Appeal and Brief. See MPEP § 1208. A patentability review conference **must** be held in each instance where an ACP is about to be issued in an *inter partes* reexamination proceeding, **and** in each instance where a RAN is about to be issued in the proceeding. When the patentability review conference results in the issuance of the ACP or the RAN, the two

conferees will place their initials, followed by the word “conferee,” below the signature of the examiner. The signature of the examiner and initials of the conferees on the resulting Office action will reflect that the patentability review conference has been conducted.

II. PATENTABILITY REVIEW CONFERENCE PROCESS

The examiner must inform his/her SPE of his/her intent to issue an ACP, or RAN. The SPE will then convene a patentability review conference and the conference members will review the patentability of the claim(s). If the conference confirms the examiner’s preliminary decision to reject and/or allow the claims, the Office action (ACP or RAN) shall be issued and signed by the examiner, with the two other conferees initialing the action (as “conferee”) to indicate their presence in the conference. Both conferees will initial, even though one of them may have dissented from the 3-party conference decision as to the patentability of claims. If the conference does not confirm the examiner’s preliminary decision, the proposed ACP or RAN will not be issued by the examiner; but rather, the examiner will issue the appropriate Office action reflecting the decision of the conference.

Where the examiner in charge of the proceeding is not in agreement with the conference decision, the SPE will generally assign the proceeding to another examiner, which would preferably be one of the other two conference members.

Patentability review conferees in *inter partes* reexamination proceedings will use 1121-08 to report time spent with respect to the conference. **The examiner in charge of the case will use the standard 1121-02 activity code to report time.** A SPE attending the conference should use 1121-03. See MPEP § 2638.

III. WHAT THE CONFERENCES SHOULD ACCOMPLISH

Each conference will provide a forum to consider all issues of patentability as well as procedural issues having an impact on patentability. Review of the patentability of the claims by more than one primary examiner should diminish any perception that the patent owner can disproportionately influence the

examiner in charge of the proceeding. The conferences will also provide greater assurance that all matters will be addressed appropriately. All issues in the proceeding will be viewed from the perspectives of three examiners. What the examiner in charge of the proceeding might have missed, one of the other two conference members would likely detect. The conference will provide for a comprehensive discussion of, and finding for, each issue.

IV. CONSEQUENCES OF FAILURE TO HOLD CONFERENCE

Should the examiner issue an ACP or RAN without holding a patentability review conference, the patent owner or the third party requester who wishes to object must promptly file a paper alerting the Office of this fact. (The failure to hold a patentability review conference would be noted by the parties where there are no conferees’ initials at the end of the ACP or RAN Office action.) Any challenge of the failure to hold a patentability review conference must be made within two months of the Office action issued, or the challenge will not be considered. In such cases, convening a patentability review conference to reconsider the examiner’s decision will be addressed on a case-by-case basis. In no event will the failure to hold a patentability review conference, by itself, be grounds for vacating any Office decision(s) or action(s) and “restarting” the reexamination proceeding.

2672 Patent Owner Comments/Amendment After ACP and Third Party Requester Responsive Comments [Added R-2]

37 CFR 1.951. Options after Office action closing prosecution in inter partes reexamination.

(a) After an Office action closing prosecution in an *inter partes* reexamination, the patent owner may once file comments limited to the issues raised in the Office action closing prosecution. The comments can include a proposed amendment to the claims, which amendment will be subject to the criteria of § 1.116 as to whether or not it shall be admitted. The comments must be filed within the time set for response in the Office action closing prosecution.

(b) When the patent owner does file comments, a third party requester may once file comments responsive to the patent owner’s comments within 30 days from the date of service of patent owner’s comments on the third party requester.

I. ONE OPPORTUNITY TO MAKE SUBMISSIONS UNDER 37 CFR 1.951(a) AND (b)

After an Action Closing Prosecution (ACP), the patent owner may once file (pursuant to 37 CFR 1.951(a)) written comments limited to the issues raised in the reexamination proceeding and/or present a proposed amendment to the claims. Where the patent owner does so, the third party requester may once file (pursuant to 37 CFR 1.951(b)) comments responsive to the patent owner's comments. Any second or supplemental submission after ACP by either the patent owner or the third party requester will thus be returned.

II. TIME FOR MAKING PATENT OWNER SUBMISSION UNDER 37 CFR 1.951(a)

The patent owner submission under 37 CFR 1.951(a) of comments and/or proposed amendment must be filed within the time period set for response to the ACP. Normally, the ACP will set a period of 30 days or one month (whichever is longer) from the mailing date of the ACP.

An extension of the time period for filing the patent owner's submission under 37 CFR 1.951(a) may be requested under 37 CFR 1.956. The time period may not, however, be extended to run past 6 months from the date of the ACP.

The examiner and all other parties to the reexamination should recognize that a reexamination proceeding may result in the final cancellation of claims from the patent **and** that the patent owner does not have the right to continue the proceeding by refileing under 37 CFR 1.53(b) or 1.53(d), nor by filing a Request for Continued Examination under 37 CFR 1.114, and the patent owner cannot file an *inter partes* reexamination request (see MPEP § 2612). Accordingly, the examiner and other parties should identify and develop all issues prior to the ACP, including the presentation of evidence under 37 CFR 1.131 and 1.132.

III. PATENT OWNER MAKES SUBMISSION AFTER ACP; LIMITATION ON PATENT OWNER'S SUBMISSION

Once an ACP that is not premature has been entered in a reexamination proceeding, the patent owner no longer has a right to unrestricted further prosecution. Consideration of the proposed amend-

ments submitted after ACP (pursuant to 37 CFR 1.951(a)) will be governed by the strict standards of 37 CFR 1.116. The patent owner's submission of comments under 37 CFR 1.951(a) must be limited to the issues raised in the ACP. If the submission addresses issues not already raised in the ACP, then the comments will be returned. No additional opportunity will be given for the patent owner to correct the defect unless a petition under 37 CFR 1.183 is granted to waive 37 CFR 1.951 as to its one opportunity limitation for the patent owner comment. If such a petition under 37 CFR 1.183 is granted and the patent owner submits corrected comments under 37 CFR 1.951(a), the third party requester may then once file supplemental comments responding to the patent owner's corrected comments within one month from the **date of service** of the patent owner's corrected comments on the third party requester.

IV. PATENT OWNER MAKES SUBMISSION AFTER ACP; THIRD PARTY REQUESTER COMMENTS ARE LIMITED TO RESPONDING TO PATENT OWNER'S SUBMISSION

Where the patent owner files comments and/or a proposed amendment pursuant to 37 CFR 1.951(a), the third party requester may once file comments (pursuant to 37 CFR 1.951(b)) responding to the patent owner's comments and/or proposed amendment. Such third party requester comments must be filed within 30 days from the **date of service** of the patent owner's comments and/or proposed amendment on the third party requester. If the third party requester's comments go beyond the scope of responding to the patent owner's comments and/or proposed amendments, then the third party requester's comments will be returned. No additional opportunity will be given for the third party requester to correct the defect unless a petition under 37 CFR 1.183 is granted to waive 37 CFR 1.951 as to its one opportunity limitation.

V. PATENT OWNER DOES NOT MAKE SUBMISSION AFTER ACP

If the patent owner does not timely file comments and/or a proposed amendment pursuant to 37 CFR 1.951(a), then the third party requester is precluded from filing comments under 37 CFR 1.951(b).

Accordingly, a Right of Appeal Notice (RAN) will be issued where the time for filing the patent owner comments and/or amendment has expired and no patent owner paper containing comments and/or amendment has been received. It should be noted that where the patent owner chooses not to file a submission pursuant to 37 CFR 1.951(a), no rights of appeal are lost.

VI. ACTION CLOSING PROSECUTION - PREMATURE

If the patent owner is of the opinion that the Office action closing prosecution in the *inter partes* reexamination proceeding is premature, the patent owner may, in addition to the comments submitted under 37 CFR 1.951(a), file a petition under 37 CFR 1.181 within the time period for filing the comments under 37 CFR 1.951(a). The third party requester may then once file, as a paper separate from any submission under 37 CFR 1.951(b), comments responsive to the patent owner's petition under 37 CFR 1.181 within 30 days from the date of service of the patent owner's petition under 37 CFR 1.181 on the third party requester.

2673 Examiner Consideration of Submissions After ACP and Further Action [Added R-2]

I. WHEN THE CASE IS TAKEN UP FOR ACTION

The patent owner is given 30 days or one month, whichever is longer, to make the 37 CFR 1.951(a) submission after Action Closing Prosecution (ACP). If no patent owner submission under 37 CFR 1.951(a) is received after two months from the ACP, the examiner will take up the case for action. The case should be acted on promptly, in accordance with the statutory requirement for "special dispatch within the Office" (35 U.S.C. 314(c)). Where a patent owner obtained an extension of time under 37 CFR 1.956, the examiner will wait until the extended time plus one month expires before taking up the case for action.

If the patent owner submission under 37 CFR 1.951(a) is received, the third party requester will then have 30 days from service of the patent owner's submission to file the third party requester's 37 CFR 1.951(b) submission. If no third party requester submission under 37 CFR 1.951(b) is received after two months from the date of service of the patent owner's

37 CFR 1.951(a) submission, the examiner will take up the case for action.

Where both the 37 CFR 1.951(a) and (b) submissions have been received, the case should be taken up for action as soon as possible.

II. OPTIONS AS TO WHICH ACTION TO ISSUE

(A) Right of Appeal Notice - Where no 37 CFR 1.951(a) submission has been filed by the patent owner, or where a submission under 37 CFR 1.951(a) (and 37 CFR 1.951(b)) has been filed and the examiner will not modify his/her position; the examiner should issue a Right of Appeal Notice (RAN). See MPEP § 2673.02. If the patent owner's submission included a proposed amendment, the RAN will indicate whether or not it was entered.

Where a submission has been filed under 37 CFR 1.951(a) (or 37 CFR 1.951(b)) and that submission is incomplete or is defective, the examiner should notify the parties, in the RAN, that the submission has not been considered, and that no additional opportunity is available to correct the defect(s) in the submission, because 37 CFR 1.951(a) and (b) provide that comments may only be filed "once."

(B) Office action reopening of prosecution - See MPEP § 2673.01 for a discussion of when the examiner should issue an action reopening prosecution.

III. ACTION TAKEN BY EXAMINER

It should be kept in mind that a patent owner cannot, as a matter of right, amend claims rejected in the ACP, add new claims after an ACP, nor reinstate previously canceled claims. A showing under 37 CFR 1.116(b) is required and will be evaluated by the examiner for all proposed amendments after the ACP, except where an amendment merely cancels claims, adopts examiner's suggestions, removes issues for appeal, or in some other way requires only a cursory review by the examiner.

Where the entry of the proposed amendment (after the ACP) would result in any ground of rejection being withdrawn or any additional claim indicated as patentable, the proposed amendment generally raises new issues requiring more than cursory review by the examiner. The examiner would need to indicate new grounds for patentability for any claim newly found

patentable and/or the reason why the rejection was withdrawn and would also need to deal with any third party requester's comments on the proposed amendment (made pursuant to 37 CFR 1.951(b) in response to owner's proposed amendment). Thus, the examiner is not required to enter the proposed amendment.

In view of the fact that the patent owner cannot continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d) nor by filing a Request for Continued Examination under 37 CFR 1.114 and the patent owner cannot file an *inter partes* reexamination request (see MPEP § 2612), the examiner should consider the feasibility of entering a proposed amendment paper, where the entirety of the amendment would result *only* in an additional claim (or claims) being indicated as patentable. The examiner is encouraged to enter such an amendment unless the entry would cause an "undue burden" on the examiner. Where the examiner does not enter the amendment, the examiner should explain the "undue burden." Where the examiner does enter the amendment, see MPEP § 2673.01 as to whether a Right of Appeal Notice (RAN) can be issued or whether there is a need to reopen prosecution.

Where multiple amendments are submitted after the ACP, all amendments except for the first one will be returned without consideration, since they are improper submissions. Thus, if prosecution is reopened, only the first amendment will be present for entry.

An amendment filed at any time after the ACP and prior to the RAN may be entered (where appropriate for entry). An amendment filed *after* the RAN will not be entered at all, in the absence of a grantable petition under 37 CFR 1.183 because 37 CFR 1.953(c) prohibits an amendment after the RAN in *inter partes* reexamination. If the examiner wishes to have the patent owner provide an amendment after the RAN, the examiner can reopen prosecution, enter the amendment, and issue a new ACP.

Where a proposed amendment is not entered, the examiner will provide a detailed explanation of the reasons for not entering the proposed amendment. For example, if the claims as amended would present a new issue requiring further consideration or search, the new issue should be identified, and an explanation provided as to why a new search is necessary and/or why more than nominal consideration is necessary.

The parties to the reexamination will be notified in the RAN, or the Office action issued in lieu of the RAN (e.g., action reopening prosecution), as to whether the proposed amendment will be entered or will not be entered.

2673.01 Reopening Prosecution After ACP [Added R-2]

I. MANDATORY REOPENING

Where a submission after Action Closing Prosecution (ACP) has been filed pursuant 37 CFR 1.951(a) (and 37 CFR 1.951(b)) and the examiner decides to modify his/her position, the examiner should ordinarily reopen prosecution, in accordance with the following guidelines.

The patent owner must be given an opportunity to adequately address any change in position adverse to the patent owner's position. A Right of Appeal Notice (RAN) cannot be issued until the patent owner has had the opportunity to address each and every rejection prior to the appeal stage. Thus, the examiner should reopen prosecution where any new ground of rejection is made or any additional claim is rejected.

Prosecution is ordinarily reopened in this situation by issuing a non-ACP action, i.e., an Office action prior to the ACP stage. If prosecution were reopened at the ACP stage, the patent owner loses rights as to amending the claims in response to the change in the examiner's position, because the patent owner's amendment rights are limited after ACP, - see MPEP § 2673.

As opposed to the examiner making a new ground of rejection, if a new finding of patentability is made (i.e., a ground of rejection is withdrawn or an additional claim is indicated as patentable), prosecution need not be reopened. The third party requester has no right to comment on and address a finding of patentability made during the reexamination proceeding *until the appeal stage*, unless the patent owner responds (after which the third party requester may file comments). Thus, the third party requester may address any new finding of patentability at the appeal stage in the same manner that it would address a finding of patentability made during the reexamination proceeding where the patent owner does not respond (e.g., all claims are allowed on the first Office action and the patent owner sees no reason to respond).

II. DISCRETIONARY REOPENING

In addition to the above situation which *requires* reopening of prosecution, the examiner should be liberal in reopening prosecution where the equities of the situation make such appropriate, because patent owner cannot continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d), nor by filing a Request for Continued Examination under 37 CFR 1.114.

An example of this would be as follows. Patent owner might submit an amendment after the ACP which would make at least one claim patentable, except for one or two minor changes needed to obviate a rejection. The examiner **cannot** telephone the owner to obtain the minor change(s) and then issue a RAN because interviews are not permitted in an *inter partes* reexamination proceeding. Also, the examiner **cannot** make the changes by issuing an examiner's amendment coupled with a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) because of the presence of the third party requester, i.e., the third party requester is entitled to a RAN so that the claims found patentable can be appealed. Yet, in this situation, it would be inequitable to send the claims to appeal based on the minor points that could be easily corrected. Accordingly, the examiner would reopen prosecution (since 37 CFR 1.953 requires reopening where a RAN is not issued) and issue a new ACP suggesting the amendment which will make the claims patentable. The third party requester would then have an opportunity to comment on the newly-found-patentable claims after the patent owner submits the suggested amendment pursuant to 37 CFR 1.951(a).

See MPEP § 2673 for a discussion of the examiner not exercising his/her discretion to reopen prosecution in those situations where an "undue burden" on the Office would result if prosecution were reopened.

2673.02 Examiner Issues Right of Appeal Notice (RAN) [R-3]

37 CFR 1.953. *Examiner's Right of Appeal Notice in inter partes reexamination.*

(a) Upon considering the comments of the patent owner and the third party requester subsequent to the Office action closing prosecution in an *inter partes* reexamination, or upon expiration of the time for submitting such comments, the examiner shall

issue a Right of Appeal Notice, unless the examiner reopens prosecution and issues another Office action on the merits.

(b) Expedited Right of Appeal Notice: At any time after the patent owner's response to the initial Office action on the merits in an *inter partes* reexamination, the patent owner and all third party requesters may stipulate that the issues are appropriate for a final action, which would include a final rejection and/or a final determination favorable to patentability, and may request the issuance of a Right of Appeal Notice. The request must have the concurrence of the patent owner and all third party requesters present in the proceeding and must identify all the appealable issues and the positions of the patent owner and all third party requesters on those issues. If the examiner determines that no other issues are present or should be raised, a Right of Appeal Notice limited to the identified issues shall be issued. Any appeal by the parties shall be conducted in accordance with §§ 1.959-1.983.

(c) The Right of Appeal Notice shall be a final action, which comprises a final rejection setting forth each ground of rejection and/or final decision favorable to patentability including each determination not to make a proposed rejection, an identification of the status of each claim, and the reasons for decisions favorable to patentability and/or the grounds of rejection for each claim. No amendment can be made in response to the Right of Appeal Notice. The Right of Appeal Notice shall set a one-month time period for either party to appeal. If no notice of appeal is filed, the *inter partes* reexamination proceeding will be terminated, and the Director will proceed to issue a certificate under § 1.997 in accordance with the Right of Appeal Notice.

A Right of Appeal Notice (RAN) is a final Office action which presents a final decision to reject the claims (i.e., a final decision that the claims are rejected) and/or a final decision favorable to patentability as to the claims (i.e., a final decision not to make a proposed rejection).

The RAN will identify the status of each claim. It will set forth:

(A) the grounds of rejection for all claims rejected in the RAN;

(B) the reasons why a proposed rejection is not made for all decisions favorable to patentability as to claims that were contested by the third party requester; and

(C) the reasons for patentability for all claims "allowed" and not contested by the third party requester.

The RAN will also advise parties of their rights of appeal at this stage in the reexamination proceeding, and the consequences of failure to appeal.

See MPEP § 2673 as to matters that should be taken into account by the examiner before deciding to issue a RAN. Before the examiner actually issues a RAN,

all outstanding grounds of rejection of record and findings of patentability that are of record should be carefully reviewed, after consideration of all submissions of record by the parties. Where it is appropriate to retain the grounds of rejection and findings of patentability, and the examiner's position will not be changed, the examiner is permitted to issue a RAN. Any grounds of rejection and findings of patentability relied upon should be restated in the RAN. The reasons for each rejection and finding should be set forth in detail. The grounds of rejection and findings of patentability should, at this point, be clearly developed to such an extent that the patent owner and the third party requester may readily judge the advisability of filing an appeal. The examiner's position as to any arguments and comments raised by the patent owner and the third party requester should be clearly set forth, so that any appeal taken can address the examiner's position as to the arguments and comments.

In the RAN, it should also be point out which submissions after the Action Closing Prosecution (ACP) have been entered and considered, and which have not. At this point, the examiner should check the record to ensure that parties have been made aware of which amendments, evidence (affidavits, declarations, exhibits, etc.), references and argument are before the examiner for consideration. The case should be ready for appeal after the RAN issues.

In the event that an amendment submitted by the patent owner after the ACP has not been entered because the amendment does not comply with the requirements of 37 CFR 1.116 (see 37 CFR 1.951(a)), the patent owner may file a petition under 37 CFR 1.181 requesting entry of the amendment. The petition under 37 CFR 1.181 must be filed within the time period for filing a notice of appeal or cross appeal, if appropriate (see 37 CFR 1.953(c)). Note that the filing of a petition under 37 CFR 1.181 does **not** toll the time period for filing a notice of appeal or cross appeal, if appropriate. Thus, in addition to the petition under 37 CFR 1.181, the patent owner is encouraged to file (1) a petition under 37 CFR 1.183 requesting waiver of the prohibition of an extension of time for filing an appeal brief (37 CFR *>41.66(a)<), and (2) a request for an extension of the period to file the appeal brief until after a decision on the petition under 37 CFR 1.181. The third party requester may once file comments responsive to the patent owner's petition

under 37 CFR 1.181 within 30 days from the date of service of the patent owner's petition under 37 CFR 1.181 on the third party requester. When rendering a decision on the petition under 37 CFR 1.181, the deciding official should be mindful that a patent owner in an *inter partes* reexamination proceeding may not be able to proceed effectively if the amendment submitted after the ACP is not entered since the patent owner in an *inter partes* reexamination proceeding does not have the right to continue the proceeding by refiling under 37 CFR 1.53(b) or 1.53(d) nor by filing a Request for Continued Examination under 37 CFR 1.114, and the patent owner cannot file an *inter partes* reexamination.

Form PTOL-2066 should be used as the cover sheet for the RAN. The RAN should conclude with the following form paragraph advising the parties of their right to appeal:

**>

¶ 26.08 Right of Appeal Notice

This is a RIGHT OF APPEAL NOTICE (RAN); see MPEP § 2673.02 and § 2674. The decision in this Office action as to the patentability or unpatentability of any original patent claim, any proposed amended claim and any new claim in this proceeding is a FINAL DECISION.

No amendment can be made in response to the Right of Appeal Notice in an *inter partes* reexamination. 37 CFR 1.953(c). Further, no affidavit or other evidence can be submitted in an *inter partes* reexamination proceeding after the right of appeal notice, except as provided in 37 CFR 1.981 or as permitted by 37 CFR 41.77(b)(1). 37 CFR 1.116(f).

Each party has a **thirty-day or one-month time period, whichever is longer**, to file a notice of appeal. The patent owner may appeal to the Board of Patent Appeals and Interferences with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent by filing a notice of appeal and paying the fee set forth in 37 CFR 41.20(b)(1). The third party requester may appeal to the Board of Patent Appeals and Interferences with respect to any decision favorable to the patentability of any original or proposed amended or new claim of the patent by filing a notice of appeal and paying the fee set forth in 37 CFR 41.20(b)(1).

In addition, a patent owner who has not filed a notice of appeal may file a notice of cross appeal within **fourteen days of service** of a third party requester's timely filed notice of appeal and pay the fee set forth in 37 CFR 41.20(b)(1). A third party requester who has not filed a notice of appeal may file a **notice of cross appeal within fourteen days of service** of a patent owner's timely filed notice of appeal and pay the fee set forth in 37 CFR 41.20(b)(1).

Any appeal in this proceeding must identify the claim(s) appealed, and must be signed by the patent owner (for a patent

owner appeal) or the third party requester (for a third party requester appeal), or their duly authorized attorney or agent.

Any party that does not file a timely notice of appeal or a timely notice of cross appeal will lose the right to appeal from any decision adverse to that party, but will not lose the right to file a respondent brief and fee where it is appropriate for that party to do so. If no party files a timely appeal, the reexamination prosecution will be terminated, and the Director will proceed to issue and publish a certificate under 37 CFR 1.997 in accordance with this Office action.

<

An amendment filed *after* the RAN will not be entered at all, in the absence of a grantable petition under 37 CFR 1.183, because 37 CFR 1.953(c) prohibits an amendment after the RAN in an *inter partes* reexamination. If the examiner wishes to have the patent owner provide an amendment after the RAN, the examiner can reopen prosecution, accept the amendment (for entry), and issue a new Action Closing Prosecution (ACP). See MPEP § 2673.01 for discussion as to discretionary reopening of prosecution.

>Note that 37 CFR 1.116(d)(1) states that no amendment other than canceling claims, where such cancellation does not affect the scope of any other pending claims in the proceeding, can be made in an *inter partes* reexamination proceeding after the RAN except as provided in 37 CFR 1.981 or as permitted by 37 CFR 41.77(b)(1). Furthermore, no affidavit or other evidence can be submitted in an *inter partes* reexamination proceeding after the RAN except as provided in 37 CFR 1.981 or as permitted by 37 CFR 41.77(b)(1). See 37 CFR 1.116(f).<

I. EXAMINER NEVER ISSUES A NIRC AFTER ACP

Once an ACP has been issued, there is no requirement for the patent owner to respond; where the patent owner does not respond to the rejection of the patent claims, a RAN will still be issued and the patent owner can appeal at that point to the Board of Patent Appeals and Interferences. Because there is no requirement for the patent owner to respond, there is no situation in which a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) can be issued after an ACP and prior to the RAN. Even if (after an ACP has been issued) the examiner finds the patent owner's subsequent argument to be persuasive as to all of the claims, a NIRC would still not be issued, but rather, a RAN would be issued to provide

the third party requester with an opportunity to appeal the "allowed" claims to the Board of Patent Appeals and Interferences.

II. EXPEDITED RIGHT OF APPEAL NOTICE

37 CFR 1.953(b) provides for an expedited RAN. At any time after the patent owner's response to the first Office action on the merits in an *inter partes* reexamination, the patent owner and the third party requester (all third party requesters, if there is more than one due to a merged proceeding) may request the immediate issuance of a RAN.

The request for an expedited RAN must:

- (A) stipulate that the issues are appropriate for a final action, which would include a final rejection and/or a final determination favorable to patentability;
- (B) state that the patent owner and the third party requester (all third party requesters, if there is more than one) join in making the request;
- (C) identify all of the appealable issues; and
- (D) identify and discuss the positions of the patent owner and the third party requester(s) on the identified issues.

If the examiner determines that no other issues are present or should be raised in the proceeding, a RAN limited to the identified issues will be issued.

If the examiner determines that other issues are in fact present, or that other issues need to be raised in the proceeding, the examiner should deny the request, and examination and prosecution will continue as if the request had not been submitted.

In no event will the request for an expedited RAN be construed to extend the time for any response/comments due at the time the request is made.

2674 Appeal in Reexamination [R-3]

35 U.S.C. 315. *Appeal.*

(a) PATENT OWNER.— The patent owner involved in an *inter partes* reexamination proceeding under this chapter—

(1) may appeal under the provisions of section 134 and may appeal under the provisions of sections 141 through 144, with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent; and

(2) may be a party to any appeal taken by a third-party requester under subsection (b).

(b) THIRD-PARTY REQUESTER.— A third-party requester—

(1) may appeal under the provisions of section 134, and may appeal under the provisions of sections 141 through 144, with respect to any final decision favorable to the patentability of any original or proposed amended or new claim of the patent; and

(2) may, subject to subsection (c), be a party to any appeal taken by the patent owner under the provisions of section 134 or sections 141 through 144.

(c) **CIVIL ACTION.**— A third-party requester whose request for an inter partes reexamination results in an order under section 313 is estopped from asserting at a later time, in any civil action arising in whole or in part under section 1338 of title 28, the invalidity of any claim finally determined to be valid and patentable on any ground which the third-party requester raised or could have raised during the inter partes reexamination proceedings. This subsection does not prevent the assertion of invalidity based on newly discovered prior art unavailable to the third-party requester and the Patent and Trademark Office at the time of the inter partes reexamination proceedings.

**>

37 CFR 1.959. Appeal in inter partes reexamination.

Appeals to the Board of Patent Appeals and Interferences under 35 U.S.C. 134(c) are conducted according to part 41 of this title.

37 CFR 41.61. Notice of appeal and cross appeal to Board.

(a)(1) Upon the issuance of a Right of Appeal Notice under § 1.953 of this title, the owner may appeal to the Board with respect to the final rejection of any claim of the patent by filing a notice of appeal within the time provided in the Right of Appeal Notice and paying the fee set forth in § 41.20(b)(1).

(2) Upon the issuance of a Right of Appeal Notice under § 1.953 of this title, the requester may appeal to the Board with respect to any final decision favorable to the patentability, including any final determination not to make a proposed rejection, of any original, proposed amended, or new claim of the patent by filing a notice of appeal within the time provided in the Right of Appeal Notice and paying the fee set forth in § 41.20(b)(1).

(b)(1) Within fourteen days of service of a requester's notice of appeal under paragraph (a)(2) of this section and upon payment of the fee set forth in § 41.20(b)(1), an owner who has not filed a notice of appeal may file a notice of cross appeal with respect to the final rejection of any claim of the patent.

(2) Within fourteen days of service of an owner's notice of appeal under paragraph (a)(1) of this section and upon payment of the fee set forth in § 41.20(b)(1), a requester who has not filed a notice of appeal may file a notice of cross appeal with respect to any final decision favorable to the patentability, including any final determination not to make a proposed rejection, of any original, proposed amended, or new claim of the patent.

(c) The notice of appeal or cross appeal in the proceeding must identify the appealed claim(s) and must be signed by the owner, the requester, or a duly authorized attorney or agent.

(d) An appeal or cross appeal, when taken, must be taken from all the rejections of the claims in a Right of Appeal Notice which the patent owner proposes to contest or from all the determinations favorable to patentability, including any final determi-

nation not to make a proposed rejection, in a Right of Appeal Notice which a requester proposes to contest. Questions relating to matters not affecting the merits of the invention may be required to be settled before an appeal is decided.

(e) The time periods for filing a notice of appeal or cross appeal may not be extended.

(f) If a notice of appeal or cross appeal is timely filed but does not comply with any requirement of this section, appellant will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended notice of appeal or cross appeal. If the appellant does not then file an amended notice of appeal or cross appeal within the set time period, or files a notice which does not overcome all the reasons for non-compliance stated in the notification of the reasons for non-compliance, that appellant's appeal or cross appeal will stand dismissed.<

An appeal cannot be taken by parties to the reexamination until a Right of Appeal Notice (RAN) has been issued. Once a RAN has been issued, the patent owner and any third party requester will have, in accordance with 37 CFR 1.953, a time period of one month or thirty days (whichever is longer) to file a notice of appeal (with the fee set forth in 37 CFR *>41.20(b)(1)<. Pursuant to 37 CFR *>41.61(e)<, the time for filing a notice of appeal may not be extended.

In the event that no party to the reexamination files a timely notice of appeal, the >prosecution of the reexamination< proceeding will be terminated, with the examiner issuing a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC); see MPEP § 2687. However, if **one** of the parties does file a notice of appeal within the one month/thirty day period, an **opposing party** can enter into the appeal by filing a notice of cross appeal pursuant to 37 CFR *>41.61(b)< within fourteen (14) days from service of the first party's notice of appeal, see MPEP § 2674.01. Pursuant to 37 CFR *>41.61(e)<, the time for filing a notice of cross appeal may not be extended.

The procedure for taking appeal is **>referenced< in 37 CFR 1.959 >and set forth in 37 CFR 41.61<.

(A) The notice of appeal must identify the appealed claim(s).

(B) The appeal must be taken from (1) the rejection(s) of the claims in the Right of Appeal Notice (RAN) which the *patent owner* proposes to contest, or (2) the finding(s) of patentability of claims in the RAN which the *third party requester* proposes to contest. Therefore:

- A notice of appeal by the patent owner must identify each claim rejected by the examiner that the patent owner intends to contest;

- A notice of appeal by a third party requester must identify each rejection *that was previously proposed by that third party requester* which the third party requester intends to contest. It is not sufficient to merely appeal from the allowance of a claim (i.e., the examiner's finding of a claim patentable); the third party requester must identify each previously proposed rejection to be contested.

(C) The notice of appeal must be signed by the patent owner or the third party requester, or their duly authorized attorney or agent.

"Appellant" and "respondent" are defined in 37 CFR 41.60. Where the patent owner appeals from the rejection of the claims, a third party requester responding to the patent owner's appeal is termed the respondent as to the rejected claims. Where a third party requester appeals from a favorable determination with respect to the claims, the patent owner responding to the third party requester's appeal is termed the respondent as to the favorable determination.

Where a party fails to file a timely notice of appeal or notice of cross appeal, that party may no longer file an appellant brief to appeal a claim determination adverse to that party; however, that party *is permitted to file a respondent brief* in accordance with 37 CFR 41.66(b) and 41.68 (with the fee as required by 37 CFR 41.68(a)), to respond to issues raised by an opposing party's appellant brief.

Where a notice of appeal or notice of cross appeal is timely filed but is defective, e.g., missing fee or missing portion of the fee, no proof of service is included, it is signed by an inappropriate party or is unsigned, failure to identify the appealed claims; 37 CFR 41.61(f) provides the appropriate party one opportunity to file, within a nonextendable period of one month, an amended notice of appeal or cross appeal that corrects the defect(s). Form PTOL-2067 should be used to provide the notification.

Where a notice of appeal or notice of cross appeal is filed before a RAN has been issued, the appropriate party will be notified in writing that the appeal is not acceptable. The paper will be placed in the file but it will not be considered at all in the proceeding, other

than to inform the party that the appeal is not acceptable.

It should be noted that under 37 CFR 41.63(a), amendments filed after the date of filing an appeal (under 37 CFR 41.61) canceling claims may be admitted, where such cancellation does not affect the scope of any other pending claim in the proceeding. However, as to all other amendments filed after the date of filing an appeal, 37 CFR 41.63(b) states that such amendments will not be admitted except as permitted where the patent owner takes action for reopening prosecution under 37 CFR 41.77(b)(1). Also, under 37 CFR 41.63(c), affidavits, declarations, or exhibits submitted after the date of filing an appeal will not be admitted except as permitted by reopening prosecution under 37 CFR 41.77(b)(1).<

2674.01 Cross Appeal After Original Appeal [R-3]

**>

37 CFR 41.61. Notice of appeal and cross appeal to Board.

(b)(1) Within fourteen days of service of a requester's notice of appeal under paragraph (a)(2) of this section and upon payment of the fee set forth in § 41.20(b)(1), an owner who has not filed a notice of appeal may file a notice of cross appeal with respect to the final rejection of any claim of the patent.

(2) Within fourteen days of service of an owner's notice of appeal under paragraph (a)(1) of this section and upon payment of the fee set forth in § 41.20 (b)(1), a requester who has not filed a notice of appeal may file a notice of cross appeal with respect to any final decision favorable to the patentability, including any final determination not to make a proposed rejection, of any original, proposed amended, or new claim of the patent.

<

The cross appeal provision of 37 CFR 41.61(b) permits a party to the reexamination to wait and see if an opposing party will appeal, before committing to the appeal process.

Within fourteen days of service of a third party requester's notice of appeal, a patent owner who has not filed a notice of appeal, may file a notice of cross appeal, the cross appeal being with respect to any final decision (i.e., decision in the RAN) **adverse** to the patentability of any claim of the patent. Pursuant

to 37 CFR *>41.61(e)<, the time for filing the patent owner's notice of cross appeal may not be extended.

Within fourteen days of service of a patent owner's notice of appeal, a third party requester who has not filed a notice of appeal may file a notice of cross appeal, the cross appeal being with respect to any final decision (i.e., decision in the RAN) **favorable** to the patentability of any claim of the patent. Pursuant to 37 CFR *>41.61(e)<, the time for filing the requester's notice of cross appeal may not be extended.

Where the notice of cross appeal is timely filed but is defective, e.g., missing fee or missing portion of the fee, no proof of service, signed by an inappropriate party or unsigned, failure to identify the appealed claims; 37 CFR *>41.61(f)< provides the appropriate party one opportunity to file, within a non-extendable period of one month, an amended cross appeal that corrects the defect(s).

Where there are more than two parties to the proceeding, i.e., the patent owner and more than one *inter partes* third party requester in a merged proceeding, then a third party cross appeal must be filed within fourteen days of service of a patent owner's notice of appeal. If a first third party requester filed an appeal later than the patent owner's appeal, then the second third party requester's time for cross appeal runs from the earlier-in-time patent owner appeal, **not** from the later-in-time first requester appeal.

In addition, 37 CFR *>41.61(b)< only provides for a cross appeal from a "notice of appeal," not from a "notice of cross appeal." Thus, if the patent owner files a notice of cross appeal after the original one month/thirty days period for appeal has expired, but within the fourteen days of a first requester's appeal (which was filed within the original period); a second third party requester does **not** have fourteen days from the patent owner's cross appeal. In such a situation, the time for the second requester to appeal (the original one month/thirty days) has expired and the second requester cannot appeal.

The content of a notice of cross appeal is the same as that for a notice of appeal, except that the notice of cross appeal is titled as such and identifies the original appeal from which the cross appeal is taken. Where a party inadvertently fails to title or identify a notice of cross appeal as such (i.e., the format for an *original* appeal is used), in an appeal filed after the original

one month/thirty days has expired but before the "fourteen days" have expired, the examiner will construe the notice of appeal as the filing of a notice of cross appeal timely filed within the fourteen days.

2675 Appellant Brief [R-3]

**>

37 CFR 41.66. Time for filing briefs.

(a) An appellant's brief must be filed no later than two months from the latest filing date of the last-filed notice of appeal or cross appeal or, if any party to the proceeding is entitled to file an appeal or cross appeal but fails to timely do so, no later than two months from the expiration of the time for filing (by the last party entitled to do so) such notice of appeal or cross appeal. The time for filing an appellant's brief or an amended appellant's brief may not be extended.

37 CFR 41.67. Appellant's brief.

(a)(1)Appellant(s) may once, within time limits for filing set forth in § 41.66, file a brief and serve the brief on all other parties to the proceeding in accordance with § 1.903 of this title.

(2) The brief must be signed by the appellant, or the appellant's duly authorized attorney or agent and must be accompanied by the requisite fee set forth in § 41.20(b)(2).

(b) An appellant's appeal shall stand dismissed upon failure of that appellant to file an appellant's brief, accompanied by the requisite fee, within the time allowed under § 41.66(a).

(c)(1)The appellant's brief shall contain the following items under appropriate headings and in the order indicated in paragraphs (c)(1)(i) through (c)(1)(xi) of this section.

(i) *Real party in interest.* A statement identifying by name the real party in interest.

(ii) *Related appeals and interferences.* A statement identifying by application, patent, appeal or interference number all other prior and pending appeals, interferences or judicial proceedings known to appellant, the appellant's legal representative, or assignee which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal. Copies of any decisions rendered by a court or the Board in any proceeding identified under this paragraph must be included in an appendix as required by paragraph (c)(1)(xi) of this section.

(iii) *Status of claims.* A statement of the status of all the claims in the proceeding (e.g., rejected, allowed or confirmed, withdrawn, objected to, canceled). If the appellant is the owner, the appellant must also identify the rejected claims whose rejection is being appealed. If the appellant is a requester, the appellant must identify the claims that the examiner has made a determination favorable to patentability, which determination is being appealed.

(iv) *Status of amendments.* A statement of the status of any amendment filed subsequent to the close of prosecution.

(v) *Summary of claimed subject matter.* A concise explanation of the subject matter defined in each of the independent

claims involved in the appeal, which shall refer to the specification by column and line number, and to the drawing(s), if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 112, sixth paragraph, must be identified and the structure, material, or acts described in the specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

(vi) *Issues to be reviewed on appeal.* A concise statement of each issue presented for review. No new ground of rejection can be proposed by a third party requester appellant, unless such ground was withdrawn by the examiner during the prosecution of the proceeding, and the third party requester has not yet had an opportunity to propose it as a third party requester proposed ground of rejection.

(vii) *Argument.* The contentions of appellant with respect to each issue presented for review in paragraph (c)(1)(vi) of this section, and the basis therefor, with citations of the statutes, regulations, authorities, and parts of the record relied on. Any arguments or authorities not included in the brief permitted under this section or §§ 41.68 and 41.71 will be refused consideration by the Board, unless good cause is shown. Each issue must be treated under a separate heading. If the appellant is the patent owner, for each ground of rejection in the Right of Appeal Notice which appellant contests and which applies to two or more claims, the claims may be argued separately or as a group. When multiple claims subject to the same ground of rejection are argued as a group by appellant, the Board may select a single claim from the group of claims that are argued together to decide the appeal with respect to the group of claims as to the ground of rejection on the basis of the selected claim alone. Notwithstanding any other provision of this paragraph, the failure of appellant to separately argue claims which appellant has grouped together shall constitute a waiver of any argument that the Board must consider the patentability of any grouped claim separately. Any claim argued separately should be placed under a subheading identifying the claim by number. Claims argued as a group should be placed under a subheading identifying the claims by number. A statement which merely points out what a claim recites will not be considered an argument for separate patentability of the claim.

(viii) *Claims appendix.* An appendix containing a copy of the claims to be reviewed on appeal.

(ix) *Evidence appendix.* An appendix containing copies of any evidence submitted pursuant to §§ 1.130, 1.131, or 1.132 of this title or of any other evidence entered by the examiner and relied upon by appellant in the appeal, along with a statement setting forth where in the record that evidence was entered in the record by the examiner. Reference to unentered evidence is not permitted in the brief. See § 41.63 for treatment of evidence submitted after appeal. This appendix may also include copies of the evidence relied upon by the examiner in any ground of rejection to be reviewed on appeal.

(x) *Related proceedings appendix.* An appendix containing copies of decisions rendered by a court or the Board in any

proceeding identified pursuant to paragraph (c)(1)(ii) of this section.

(xi) *Certificate of service.* A certification that a copy of the brief has been served in its entirety on all other parties to the reexamination proceeding. The names and addresses of the parties served must be indicated.

(2) A brief shall not include any new or non-admitted amendment, or any new or non-admitted affidavit or other evidence. See § 1.116 of this title for amendments, affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63 for amendments, affidavits or other evidence after the date of filing the appeal.

(d) If a brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (c) of this section, appellant will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended brief. If appellant does not file an amended brief within the set time period, or files an amended brief which does not overcome all the reasons for non-compliance stated in the notification, that appellant's appeal will stand dismissed.<

In order to file an appellant brief, it is necessary to have first filed a timely and proper notice of appeal or notice of cross appeal; see MPEP § 2674 and § 2674.01. Each party that filed a timely and proper notice of appeal or notice of cross appeal must then file its appellant brief with fee (set forth in 37 CFR *>41.20(b)(2)<) by the later of:

(A) within two months from the date of the last-filed notice of appeal or cross appeal; or

(B) if a patent owner or third party requester is entitled to file an appeal or cross appeal but fails to timely do so, until the expiration of time for filing (by the last party entitled to do so) such notice of appeal or cross appeal.

The time for filing an appellant brief may not be extended. 37 CFR *>41.66(a)<.

Pursuant to 37 CFR *>41.67(d)<, if a brief is filed which does not comply with all the requirements of 37 CFR *>41.67(a)< and (c), appellant will be notified and given a nonextendable period of one month within which to file an amended brief to correct the defect(s). Failure to timely file the appellant brief and fee within the time allowed will result in dismissal of the appeal of the party that failed to take the timely action. Note that if an appellant brief is late, or if an amended appellant brief is not submitted after a requirement to correct the defect(s), the respondent brief will be placed in the file**; however, it will be marked as "not entered" since it is not formally received into the record, and it will not be considered.

The same is true for an amended appellant brief which is late.

Where all parties who filed an appeal or cross appeal fail to timely file an appellant brief and fee within the time allowed, the prosecution of the reexamination proceeding is terminated by a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC), and a certificate is issued indicating the status of the claims at the time of appeal.

The appellant brief, as well as every other paper relating to an appeal, should indicate the number of the Technology Center (TC) and Art Unit to which the reexamination is assigned and the reexamination control number. When an appellant brief is received, it is scanned and then entered into the file by the Central Reexamination Unit (CRU) and then forwarded to the TC.

**A fee as set forth in 37 CFR 41.20(b)(2) is required when the appellant brief is filed for the first time in a particular reexamination proceeding, 35 U.S.C. 41(a). 37 CFR 41.67(c)(1) requires that the appellant shall provide, in the appellant brief, the authorities and arguments on which the appellant will rely to maintain the appeal, a concise explanation of subject matter defined in each of the independent claims involved in the appeal which explanation must refer to the specification by column and line number (and to the drawing, if any, by reference characters), an evidence appendix, a related proceedings appendix, and a copy of the claims involved. The copy of the claims (involved in the appeal) required in the claim appendix by 37 CFR 41.67(c)(1)(viii) should be a clean copy. The clean copy *must include* all brackets and underlining as required by 37 CFR 1.530(d) *et seq.* For the sake of convenience, the copy of the claims involved should start on a new page, and it should be double spaced.

The provisions of 37 CFR 41.67(c) should be carefully reviewed to ensure that a complete appellant brief is provided. Patent owners are reminded that their briefs in appeal cases must be responsive to every ground of rejection stated by the examiner which the patent owner-appellant contests. Third party requesters are reminded that their briefs in appeal cases must be responsive to each examiner determination of patentability (determination of inapplicability of a proposed rejection) which the third

party requester-appellant contests. Oral argument at the hearing will not remedy such a deficiency in the appellant brief.

Where the appellant brief is not complete as to the provisions of 37 CFR 41.67(a) and (c), appellant will be notified (in accordance with 37 CFR 41.67(d) by the examiner that he/she is given one (1) month to correct the defect(s) by filing a supplemental appellant brief. Where this procedure has not been followed, the Board of Patent Appeals and Interferences should remand the reexamination file to the examiner for appropriate action.

When the record clearly indicates an *intentional* failure to respond by appellant brief to any ground of rejection or determination of patentability, the examiner should so inform the Board of Patent Appeals and Interferences in his/her answer and specify the claim(s) affected. Where the failure to respond by appellant brief appears to be intentional, the Board of Patent Appeals and Interferences may dismiss the appeal (of the appropriate party) as to the claims involved. Oral argument at a hearing will not remedy such a deficiency in a brief.

It is essential that the Board of Patent Appeals and Interferences should be provided with a brief fully stating the position of the appellant with respect to each issue involved in the appeal so that no search of the record is required in order to determine that position. The fact that appellant may consider a ground or determination to be clearly improper does not justify a failure on the part of the appellant to point out to the Board the argument, i.e., reasons, for that view. A distinction must be made between the lack of any argument and the presentation of arguments which carry no conviction. In the former case, dismissal is in order, while in the latter case a decision on the merits is made, although it may well be merely an affirmance based on the grounds or determination relied upon by the examiner.

Ignoring or acquiescing in any rejection or determination, even one based upon formal matters which could be corrected by subsequent amendments, will invite a dismissal of the appeal as to the appropriate party. The prosecution of the reexamination proceedings will be considered terminated as of the date of the dismissal of the appeal of all parties who filed an appeal or cross appeal.

**>AMENDMENTS, AFFIDAVITS, DECLARATIONS, OR EXHIBITS

Pursuant to 37 CFR 41.67(c)(2), the brief is not to include any (A) new or non-admitted (non-entered) amendment, or (B) new or non-admitted (non-entered) affidavit or other evidence.

Pursuant to 37 CFR 41.63:

(A) Amendments filed after the date of filing an appeal (under 37 CFR 41.61) canceling claims may be admitted, where such cancellation does not affect the scope of any other pending claim in the proceeding;

(B) All other amendments filed after the date of filing an appeal will not be admitted, except as permitted where the patent owner takes action for reopening prosecution under 37 CFR 41.77(b)(1);

(C) Affidavits or other evidence filed after the date of filing an appeal will not be admitted, except as permitted where the patent owner takes action for reopening prosecution under 37 CFR 41.77(b)(1).

If the examiner wishes to have the patent owner provide an amendment (other than cancellation of claims as discussed above) or evidence during the appeal stage, the examiner must (A) reopen prosecution, (B) accept the amendment or evidence for entry, (C) permit timely comment on the new amendment or evidence by the third party requester, and (D) then issue a new Action Closing Prosecution (ACP). See MPEP § 2673.01.<

2675.01 Respondent Brief [R-3]

**>

37 CFR 41.66. *Time for filing briefs.*

(b) Once an appellant's brief has been properly filed, any brief must be filed by respondent within one month from the date of service of the appellant's brief. The time for filing a respondent's brief or an amended respondent's brief may not be extended.

37 CFR 41.68. *Respondent's brief.*

(a)(1) Respondent(s) in an appeal may once, within the time limit for filing set forth in § 41.66, file a respondent brief and serve the brief on all parties in accordance with § 1.903 of this title.

(2) The brief must be signed by the party, or the party's duly authorized attorney or agent, and must be accompanied by the requisite fee set forth in § 41.20(b)(2).

(3) The respondent brief shall be limited to issues raised in the appellant brief to which the respondent brief is directed.

(4) A requester's respondent brief may not address any brief of any other requester.

(b)(1) The respondent brief shall contain the following items under appropriate headings and in the order here indicated, and may include an appendix containing only those portions of the record on which reliance has been made.

(i) *Real Party in Interest.* A statement identifying by name the real party in interest.

(ii) *Related Appeals and Interferences.* A statement identifying by application, patent, appeal or interference number all other prior and pending appeals, interferences or judicial proceedings known to respondent, the respondent's legal representative, or assignee which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal. Copies of any decisions rendered by a court or the Board in any proceeding identified under this paragraph must be included in an appendix as required by paragraph (b)(1)(ix) of this section.

(iii) *Status of claims.* A statement accepting or disputing appellant's statement of the status of claims. If appellant's statement of the status of claims is disputed, the errors in appellant's statement must be specified with particularity.

(iv) *Status of amendments.* A statement accepting or disputing appellant's statement of the status of amendments. If appellant's statement of the status of amendments is disputed, the errors in appellant's statement must be specified with particularity.

(v) *Summary of claimed subject matter.* A statement accepting or disputing appellant's summary of the subject matter defined in each of the independent claims involved in the appeal. If appellant's summary of the subject matter is disputed, the errors in appellant's summary must be specified.

(vi) *Issues to be reviewed on appeal.* A statement accepting or disputing appellant's statement of the issues presented for review. If appellant's statement of the issues presented for review is disputed, the errors in appellant's statement must be specified. A counter statement of the issues for review may be made. No new ground of rejection can be proposed by a requester respondent.

(vii) *Argument.* A statement accepting or disputing the contentions of appellant with each of the issues presented by the appellant for review. If a contention of the appellant is disputed, the errors in appellant's argument must be specified, stating the basis therefor, with citations of the statutes, regulations, authorities, and parts of the record relied on. Each issue must be treated under a separate heading. An argument may be made with each of the issues stated in the counter statement of the issues, with each counter-stated issue being treated under a separate heading.

(viii) *Evidence appendix.* An appendix containing copies of any evidence submitted pursuant to §§ 1.130, 1.131, or 1.132 of this title or of any other evidence entered by the examiner and relied upon by respondent in the appeal, along with a statement setting forth where in the record that evidence was entered in the

record by the examiner. Reference to unentered evidence is not permitted in the respondent's brief. See § 41.63 for treatment of evidence submitted after appeal.

(ix) *Related proceedings appendix*. An appendix containing copies of decisions rendered by a court or the Board in any proceeding identified pursuant to paragraph (b)(1)(ii) of this section.

(x) *Certificate of service*. A certification that a copy of the respondent brief has been served in its entirety on all other parties to the reexamination proceeding. The names and addresses of the parties served must be indicated.

(2) A respondent brief shall not include any new or non-admitted amendment, or any new or non-admitted affidavit or other evidence. See § 1.116 of this title for amendments, affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63 for amendments, affidavits or other evidence filed after the date of filing the appeal.

(c) If a respondent brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (b) of this section, respondent will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended brief. If respondent does not file an amended respondent brief within the set time period, or files an amended respondent brief which does not overcome all the reasons for non-compliance stated in the notification, the respondent brief and any amended respondent brief by that respondent will not be considered.<

After an appellant brief has been properly filed, a party opposing the appellant may file a respondent brief in support of the claim determination(s) made in the Right of Appeal Notice (RAN) which are in favor of the opposing party. The respondent brief must, however, be limited to issues raised in the appellant brief to which the respondent brief is directed. 37 CFR *>41.68(a)(3)<.

The respondent brief must be accompanied by the requisite fee set forth in 37 CFR *>41.20(b)(2)<, and it must be filed within one month from the date of service of the appellant brief on the opposing party.

Pursuant to 37 CFR *>41.66(b)<, the time for filing a respondent brief may not be extended. If a respondent brief is filed which does not comply with all the requirements of 37 CFR *>41.68(a)< and (b), respondent will be notified and given a nonextendable period of one month within which to file an amended brief to correct the defect(s). See 37 CFR *>41.68(c)<. Failure to timely file a respondent brief and fee (or failure to timely complete the respondent brief, where it is noted by the examiner as being incomplete under 37 CFR *>41.68(c)<) will result in the respondent brief not being considered. Note that if the respondent brief is late, or if an amended respon-

dent brief is not submitted after a requirement to correct the defect(s) (following a timely respondent brief), the respondent brief will be placed in the file **>; however, it will be marked as "not entered" since it is not formally received into the record, and it will not be considered. The same is true for an amended respondent brief which is late.

It should be noted that where a party fails to file a timely notice of appeal or notice of cross appeal, that party may no longer file *an appellant brief* to appeal a claim determination adverse to that party; **however**, that party is permitted to file a *respondent brief* in accordance with 37 CFR *>41.66(b)<.

A fee as set forth in 37 CFR *>41.20(b)(2)< is required when the respondent brief is filed for the first time in a particular reexamination proceeding, 35 U.S.C. 41(a). **> The respondent brief should indicate the number of the Technology Center (TC) and Art Unit to which the reexamination is assigned and the reexamination control number. A statement of what in the appellant brief is accepted and what is disputed must be provided in the respondent brief. Respondent must set forth the authorities and arguments upon which he/she will rely to dispute the contentions of the appellant with respect to the issues.

The provisions of 37 CFR *>41.68(a)< and (b) should be carefully reviewed to ensure that a complete respondent brief is provided. Where the respondent brief is not complete as to the provisions of 37 CFR *>41.68(a)< and (b), respondent will be notified (in accordance with 37 CFR *>41.68(c)<) by the examiner that respondent is given a non-extendable period of one month to correct the defect(s) by filing an amended respondent brief. Where this procedure has not been followed, the Board of Patent Appeals and Interferences should remand the reexamination file to the examiner for appropriate action.

2675.02 Informalities in One or More of the Briefs [R-3]

**>

37 CFR 41.67. *Appellant's brief.*

(d) If a brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (c) of this section, appellant will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an

amended brief. If appellant does not file an amended brief within the set time period, or files an amended brief which does not overcome all the reasons for non-compliance stated in the notification, that appellant's appeal will stand dismissed.

37 CFR 41.68. *Respondent's brief.*

(c) If a respondent brief is filed which does not comply with all the requirements of paragraph (a) and paragraph (b) of this section, respondent will be notified of the reasons for non-compliance and given a non-extendable time period within which to file an amended brief. If respondent does not file an amended respondent brief within the set time period, or files an amended respondent brief which does not overcome all the reasons for non-compliance stated in the notification, the respondent brief and any amended respondent brief by that respondent will not be considered.

<

Where an appellant or respondent brief does not comply with all the requirements of 37 CFR *>41.67(a)< and (c) or 37 CFR *>41.68(a)< and (b), respectively, such as missing fee or missing portion of the fee, a missing signature, inappropriate signature, less than three copies of the brief, no proof of service on a party; the appropriate party should be notified of the reasons for non-compliance and provided with a nonextendable period of one month within which to file an amended brief. The reasons for non-compliance and/or the defect(s) will be pointed out to the appropriate party in *one comprehensive action* (notification). Form PTOL-2067 will be used as the cover sheet for the notification action. A separate PTOL-2067 with notification action will be sent to each party, where the brief(s) of more than one party are non-compliant and/or defective. Where the same party's appellant and respondent briefs are both informal, the examiner may combine the notifications for both into one notification action with PTOL-2067.

If an appellant does not file an *amended* appellant brief during the one-month period, or files an amended brief which does not overcome all the reasons for non-compliance or does not correct all defects stated in the notification, the appeal will stand dismissed **as to that party**.

If a respondent does not file an amended respondent brief during the one-month period, or files an amended brief which does not overcome all the reasons for non-compliance or does not correct all defects stated in the notification, the respondent brief

will not be formally received into the record and will not be considered (though it will be placed in the file **).

Where a party does timely file an amended brief and overcomes all the reasons for non-compliance and corrects all defects stated in the notification, the amended brief will be entered and will be considered along with the original appellant or respondent brief, when the case is taken up by the examiner.

The following form paragraphs should be used in drafting the notification:

**>

¶ 26.09 *Brief is Defective and/or is Not Complete*

The [1] brief filed [2] by [3] is defective and/or is not complete as to the provisions of 37 CFR 41.67(a) and (c) (for appellant brief) or 37 CFR 41.68(a) and (b) (for respondent brief) for the following reasons:

Examiner Note:

1. In bracket 1, fill in either "appellant" or "respondent".
2. In bracket 2, fill in the date the brief was filed.
3. In bracket 3, fill in either "the patent owner" or "the third party requester".
4. This form paragraph should be followed by a statement of all instances of non-compliance and all defects, and an explanation detailed enough for the party to understand how to deal with each non-compliance and defect noted in the letter.
5. One of form paragraphs 26.10 or 26.11 should be used at the end of this action.

¶ 26.10 *Informal Appellant Brief-Period for Response Under 37 CFR 41.67(d)*

Appellant, [1] is required to comply with the provisions of 37 CFR 41.67(a) and (c) and to correct all defects noted in this letter as to the appellant brief. Appellant, [2] is given a period of ONE MONTH from the date of this letter or the time remaining in the original two month period (whichever is the longer) for filing an amended complete appellant brief. If an amended complete brief that fully complies with the requirements of this letter is not timely submitted, the appellant's appeal will be dismissed as of the date of expiration of the presently set time period. THE PERIOD FOR RESPONSE SET IN THIS LETTER CANNOT BE EXTENDED. 37 CFR 41.67(d).

Examiner Note:

In brackets 1 and 2, fill in either "the patent owner" or "the third party requester".

¶ 26.11 *Informal Respondent Brief-Period for Response Under 37 CFR 41.68(c)*

Respondent, [1] is required to comply with the provisions of 37 CFR 41.68(a) and (b) and to correct all defects noted in this letter as to the respondent brief. Respondent [2] is given a period of ONE MONTH from the date of this letter for filing an amended complete respondent brief. If an amended complete brief that fully

complies with the requirements of this letter is not timely submitted, the respondent brief will not be formally received into the record and will not be considered. THE PERIOD FOR RESPONSE SET IN THIS LETTER CANNOT BE EXTENDED. 37 CFR 41.68(c).

Examiner Note:

1. In brackets 1 and 2, fill in either “the patent owner” or “the third party requester”.
2. In the case of the respondent brief, the new one month period will always extend longer than the original one month period, thus the longer of the two need not be given, as was done in form paragraph 26.10 where the original period for the appellant brief is two months.

<

2676 Appeal Conference [Added R-2]

All appellant and respondent briefs will be processed in the Central Reexamination Unit (CRU). The CRU will forward the reexamination file to the examiner after all appellant and respondent briefs have been filed or after the time for filing them has expired.

As long as one timely appellant brief has been filed, the case must be considered for appeal by the examiner. The examiner will consult with the Reexamination Legal Advisor (RLA) as to the procedural considerations and should then formulate an initial opinion as to whether an examiner’s answer should be prepared, or prosecution should be reopened and a non-final Office action issued.

If the examiner reaches the conclusion that the appeal should **go forward** and an examiner’s answer should be prepared, the examiner will arrange (via the Supervisory Patent Examiner) for an appeal conference to be conducted pursuant to the procedures set forth in MPEP § 1208. The SPE will notify the RLA of the appeal conference, which the RLA will attend to ensure that all issues are properly addressed in the examiner’s answer. In preparing for the appeal conference, the examiner should review the case so that he/she will be prepared to discuss the issues raised in all the briefs. The examiner should be prepared to propose to the conferees how he/she will address each issue raised in the appellant and respondent briefs. The appeal conference will be held in accordance with the procedures as set forth in MPEP § 1208 with the exception that an RLA will also attend the appeal conference. The examiner will have two weeks following the appeal conference to prepare the examiner’s answer.

If the examiner reaches the conclusion that the appeal should **not go forward**, no appeal conference is held. Prosecution is reopened, and the examiner issues of a new non-final Office action. The examiner should, at this point, consult with the RLA to discuss at what point in the prosecution the prosecution should be reopened, and then the examiner will prepare an appropriate Office action.

See MPEP § 2638 for the appropriate code to use for reporting time spent with respect to the appeal conference.

2677 Examiner’s Answer [R-3]

**>

37 CFR 41.69. Examiner’s answer.

(a) The primary examiner may, within such time as directed by the Director, furnish a written answer to the owner’s and/or requester’s appellant brief or respondent brief including, as may be necessary, such explanation of the invention claimed and of the references relied upon, the grounds of rejection, and the reasons for patentability, including grounds for not adopting any proposed rejection. A copy of the answer shall be supplied to the owner and all requesters. If the primary examiner determines that the appeal does not comply with the provisions of §§ 41.61, 41.66, 41.67 and 41.68 or does not relate to an appealable action, the primary examiner shall make such determination of record.

(b) An examiner’s answer may not include a new ground of rejection.

(c) An examiner’s answer may not include a new determination not to make a proposed rejection of a claim.

(d) Any new ground of rejection, or any new determination not to make a proposed rejection, must be made in an Office action reopening prosecution.<

Where the term “brief” is used in this section, it shall refer to any appellant briefs and/or respondent briefs in the reexamination proceeding, unless specific identification of an “appellant brief” or a “respondent brief” is made.

Before preparing an examiner’s answer, the examiner should make certain that all amendments approved for entry have in fact been physically entered by the Central Reexamination Unit (CRU). The clerk of the Board will return to the Technology Center (TC) any reexamination proceeding in which approved amendments have not been entered.

The examiner should furnish each party to the reexamination (even a party that has not filed an appellant nor respondent brief) with a comprehensive examiner’s answer that provides a written statement in answer to each appellant brief and each respondent

brief. The examiner's answer is to be completed by the examiner within two weeks after the appeal conference. After the answer is completed (and signed), the examiner obtains the initials of the appeal conference participants (the conferees) and then forwards the reexamination file with the answer to the TC Special Program Examiner (SPRE). The SPRE reviews the answer, and if the answer is in order, forwards the reexamination file with the answer to the CRU.

The examiner's answer may incorporate from any of the briefs the most accurate and most comprehensive information. It should contain a response to the allegations or arguments made in all of the briefs and should call attention to any errors in an appellant's copy of the claims. If a ground of rejection or reason for patentability is not addressed in the examiner's answer, the proceeding will be remanded by the Board of Appeals and Patent Interferences (Board) to the examiner.

The examiner should report his/her conclusions on any affidavits, declarations, or exhibits that were admitted to the record. Any affidavits or declarations in the file swearing behind a patent should be clearly identified by the examiner as being considered under either 37 CFR 1.131 or 37 CFR *41.154(a). The distinction is important since the Board will usually consider holdings on 37 CFR 1.131 affidavits or declarations but not holdings on 37 CFR *41.154(a) affidavits or declarations in appeal cases.

If the appellant brief fails to respond (in the patent owner's brief) to any or all grounds of rejection or (in the third party requester's brief) to any or all determinations of patentability made by the examiner, or otherwise fails to comply with 37 CFR *41.67(c), the procedure for handling such briefs set forth in MPEP § 2675.02 should be followed. If the respondent brief fails to give reasons for disputing any or all contentions of an appellant that are disputed in the respondent brief, or otherwise fails to comply with 37 CFR *41.68(b), the procedure for handling such briefs is also set forth in MPEP § 2675.02.

It sometimes happens that an examiner will state a position (e.g., reasoning) in the answer in a manner that represents a shift from the position stated in the Right of Appeal Notice (RAN). In such a case, the answer must indicate that the last stated position supersedes the former. Failure to do this confuses the

issue since it is not clear exactly what the examiner's ultimate position is.

If there is a complete and thorough development of the issues at the time of the RAN, it is possible to save time in preparing the examiner's answer. Examiners may incorporate in the answer their statement of the grounds of rejection or determinations of patentability merely by reference to the RAN. An examiner's answer should not refer, either directly or indirectly, to more than one prior Office action. Thus, if a statement of the ground of rejection or a determination of patentability set forth in the RAN refers back to a prior action it cannot be incorporated by reference. The page(s) and paragraph(s) of the RAN which it is desired to incorporate by reference should be explicitly identified. If the examiner feels that further explanation is necessary, he/she should include it in the answer. The examiner's answer should also include rebuttal of any and all arguments presented in all of the briefs.

All correspondence with the Board, whether by the examiner or an appellant or respondent, must be on the record. No unpublished decisions which are unavailable to the general public by reason of 35 U.S.C. 122 can be cited by the examiner or the parties.

The examiner should reevaluate his/her position in the light of the arguments presented in the briefs, and should expressly withdraw any rejections or determinations of patentability not adhered to. Such a withdrawal would be a new finding of patentability (determination not to make a rejection) or new ground of rejection, respectively. Pursuant to 37 CFR *41.69(b), an examiner's answer "may not include a new ground of rejection." Pursuant to 37 CFR *41.69(c), an examiner's answer "may not include a new determination not to make a proposed rejection of a claim." Accordingly, prosecution must be reopened for any withdrawal of a rejection or of a determination of patentability. Before issuing the action reopening prosecution, the examiner will consult with the Reexamination Legal Advisor (RLA) to discuss at what point in the prosecution the prosecution should be reopened, and then the examiner will prepare an appropriate Office action. Note that the examiner may withdraw the Action Closing Prosecution (ACP) and reopen prosecution at any time prior to the mailing of the examiner's answer.

**>If the examiner requests to be present at the oral hearing, the request must be set forth in a separate letter as noted in MPEP § 1209.<

MPEP § 1207 - § 1207.05 relate to preparation of examiner's answers on appeal in patent applications and *ex parte* reexamination proceedings.

All examiner's answers in *inter partes* reexamination proceedings must comply with the guidelines set forth below.

I. REQUIREMENTS FOR EXAMINER'S ANSWER

The examiner may incorporate from any of the briefs information required for the examiner's answer, as needed to provide accurate and comprehensive information. The examiner's answer must include, in the order indicated, the following items. Again, the term "brief" or "briefs" shall refer to any appellant briefs and/or respondent briefs in the reexamination proceeding, unless specific identification of an "appellant brief" or a "respondent brief" is made.

**>

(A) *Real Party in Interest*. For each appellant and respondent brief, a statement by the examiner acknowledging the identification by name of the real party in interest.

(B) *Related Appeals and Interferences*. A statement identifying by application, patent, appeal or interference number all other prior and pending appeals, interferences or judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal. Copies of any decisions rendered by a court or the Board in any proceeding identified under this paragraph should be included in the "*Related Proceedings Appendix*" section.

(C) *Status of Claims*. A statement of whether the examiner agrees or disagrees with the statement of the status of claims contained in the briefs. If the examiner disagrees with the statement of the status of claims contained in the briefs, the examiner must set forth a correct statement of the status of all the claims in the proceeding.

(D) *Status of Amendments*. A statement of whether the examiner agrees or disagrees with the statement of the status of amendments contained in any of the briefs, and an explanation of any disagree-

ment with any of the briefs. If there are no amendments, the examiner shall so state.

(E) *Summary of Claimed Subject Matter*. A statement of whether the examiner agrees or disagrees with the summary of claimed subject matter contained in the briefs and an explanation of any disagreement.

(F)(1) *Grounds of Rejection to be Reviewed on Appeal*. A statement of whether the examiner agrees or disagrees with the statement of the grounds of rejection to be reviewed set forth in the briefs and an explanation of any disagreement. In addition, the examiner must include the following subheadings (if appropriate):

(a) "Grounds of Rejection Not On Review" - a listing of all grounds of rejection that have not been withdrawn and have not been presented by an appellant for review in the brief; and

(b) "Non-Appealable Issues" - a listing of any non-appealable issues in the briefs.

(2) *Findings of Patentability to be Reviewed on Appeal*. A statement of whether the examiner agrees or disagrees with the statement of the findings of patentability to be reviewed set forth in the briefs and an explanation of any disagreement. In addition, the examiner must include the following subheadings (if appropriate):

(a) "Findings of Patentability Not On Review" - a listing of all grounds of rejection that have not been withdrawn and have not been presented by an appellant for review in the brief; and

(b) "Non-Appealable Issues" - a listing of any non-appealable issues in the briefs.

(G) *Claims Appendix*. A statement of whether the copy of the appealed claims contained in the appendix to the appellant briefs is correct, and if any claim is not correct in any of the briefs, a copy of the correct claim.

(H) *Evidence Relied Upon*. A listing of the evidence relied on (e.g., patents, publications, Official Notice, admitted prior art), and, in the case of non-patent references, the relevant page or pages. Note that new references cannot be applied in an examiner's answer. 37 CFR 41.69(b). If new references are to be applied, prosecution must be reopened. Also note that both the art relied upon by the examiner in making rejections, and the art relied upon by the third party requester in the proposed rejections, will be listed by the examiner.

(I) *Grounds of Rejection.* For each ground of rejection maintained by the examiner applicable to the appealed claims, an explanation of the ground of rejection.

(1) For each rejection under 35 U.S.C. 112, first paragraph, the examiner's answer must explain how the first paragraph of 35 U.S.C. 112 is not complied with, including, as appropriate, how the specification and drawings, if any,

(a) do not describe the subject matter defined by each of the rejected claims, and

(b) would not enable any person skilled in the art to make and use the subject matter defined by each of the rejected claims without undue experimentation including a consideration of the undue experimentation factors set forth in MPEP § 2164.01(a).

(2) For each rejection under 35 U.S.C. 112, second paragraph, the examiner's answer must explain how the claims do not particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(3) For each rejection under 35 U.S.C. 102, the examiner's answer must explain why the rejected claims are anticipated or not patentable under 35 U.S.C. 102, pointing out where all of the specific limitations recited in the rejected claims are found in the prior art relied upon in the rejection.

(4) For each rejection under 35 U.S.C. 103, the examiner's answer must:

(a) state the ground of rejection and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on in the rejection,

(b) identify the differences between the rejected claims and the prior art relied on (i.e., the primary reference), and

(c) explain why it would have been obvious at the time the invention was made to a person of ordinary skill in the art to have modified the primary reference to arrive at the claimed subject matter.

(5) For each rejection under 35 U.S.C. 102 or 103 where there are questions as to how limitations in the claims correspond to features in the art even after the examiner complies with the requirements of paragraphs (I)(3) and (4) above, the examiner must compare at least one of the rejected claims feature-by-feature with the art relied upon in the rejection. The comparison shall align the language of the claim side-

by-side with a reference to the specific page or column, line number, drawing reference number, and quotation from the reference, as appropriate.

(6) For each rejection, other than those referred to in paragraphs (I)(1) to (I)(5), the examiner's answer must specifically explain the basis for the particular rejection.

(J) *Determinations of Patentability.* For each determination of patentability, **i.e., each determination of inapplicability of a proposed rejection to the appealed claims**, a clear explanation of the determination.

(1) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, first paragraph; the examiner's answer must explain how the first paragraph of 35 U.S.C. 112 is complied with, including, as appropriate, how the specification and drawings, if any, do *describe* the subject matter defined by each of the proposed-for-rejection claims, and/or would in fact enable a person skilled in the art to make and use the subject matter defined by each of the proposed-for-rejection claims without undue experimentation.

(2) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, second paragraph; the examiner's answer must explain how the claims do particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(3) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 102; the examiner's answer must explain why the proposed-for-rejection claims are not anticipated and why they are patentable under 35 U.S.C. 102, pointing out which limitations recited in the patentable claims are not found in the art relied upon by the third party requester for the proposed rejection.

(4) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 103; the examiner's answer must point out which limitations recited in the proposed-for-rejection claims are not found in the art relied upon by the third party requester for the proposed rejection, shall identify the difference between the claims and the art relied upon by the third party requester and must explain why the claimed subject matter is patentable over the art relied on by the third party requester. If the third party requester's proposed rejection is based

upon a combination of references, the examiner's answer must explain the rationale for not making the combination.

(5) For each rejection proposed under 35 U.S.C. 102 or 103 where there are questions as to how limitations in the claims define over features in the art even after the examiner complies with the requirements of paragraphs (J)(3) and (J)(4) above, the examiner must compare at least one of the proposed-for-rejection claims feature-by-feature with the art relied on in the proposed rejection. The comparison must align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number, and quotation from the reference, as appropriate.

(6) For each determination of inapplicability of a proposed rejection, other than those referred to in paragraphs (J)(1) to (J)(5), the examiner's answer must specifically explain why there is insufficient basis for making that particular proposed rejection.

(K) *No New Ground of Rejection or New Finding of Patentability.* The examiner's answer must provide an explicit statement that it does not contain any new ground of rejection, and it does not contain any new finding of patentability (i.e., no new determination of inapplicability of a proposed rejection). This statement will serve as a reminder to the examiner that if a new ground of rejection or new finding of patentability is made, prosecution must be reopened. It will also provide appropriate notification to parties that no new ground of rejection or new finding of patentability was made.

(L) *Response to Argument.* A statement of whether the examiner disagrees with each of the contentions of appellants and respondents in their briefs with respect to the issues presented, and an explanation of the reasons for disagreement with any such contentions. If any ground of rejection or inapplicability of proposed rejection is not argued and responded to by the appropriate party, the examiner must point out each claim affected.

(M) *Related Proceedings Appendix.* Copies of any decisions rendered by a court or the Board in any proceeding identified by the examiner in the Related Appeals and Interferences section of the answer.

(N) *Period for Providing a Rebuttal Brief.* The examiner will set forth the period for the appropriate appellant party, or appellant parties, to file a rebuttal brief after the examiner's answer, and that no further papers will be permitted subsequent to the rebuttal brief.<

II. PROCESSING OF COMPLETED ANSWER

When the examiner's answer is complete, the examiner will sign it. On the examiner's answer, each conferee who was present at the appeal conference will place his/her initials below the signature of the examiner who prepared the answer. Thus: "John Smith (conferee)" should be typed, and "JS" should be initialed. (The initialing by the conferee does not necessarily indicate concurrence with the position taken in the examiner's answer.)

The TC clerical staff will make a copy of the examiner's answer for the patent owner and for the third party requester(s). ** TC clerical staff should attach form PTOL-2070 to the copy of the answer to be mailed to the third party requester by the CRU.

The examiner must prepare the examiner's answer, ensure that the clerical processing is done, and forward the case to the TC SPRE no later than two weeks from the date of the appeal conference. The examiner's answer is reviewed by the SPRE and the case is forwarded to the CRU within three days of the SPRE's receipt of the case from the examiner. **

If an examiner's answer is believed to contain a new interpretation or application of the existing patent law, the examiner's answer, the case file, and an explanatory memorandum should be forwarded to the Group Director for consideration. See MPEP § 1003. If approved by the Group Director, the examiner's answer should be forwarded by the SPRE to the Office of the Deputy Commissioner for Patent Examination Policy for final approval, prior to forwarding the case to the CRU.

III. FORM PARAGRAPHS

The following form paragraphs may be used to prepare an examiner's answer in an *inter partes* reexamination proceeding:

¶ 26.50 *Heading for Examiner's Answer*

EXAMINER'S ANSWER

This is in response to the following appellant (and respondent) brief(s) on appeal: [1]

Examiner Note:

In bracket 1, identify for each brief (a) the party (patent owner or third party requester), (b) the type of brief (appellant or respondent), and (c) the date it was filed. Where there is one third party requester (the usual situation), indicate "third party requester"; where there are two or more third party requesters (a merged proceeding), indicate "third party requester" followed by the name of the third party requester (e.g., "third party requester Smith" or "third party requester XYZ Corporation").

**>

¶ 26.50.01 *Real Party in Interest*(1) *Real Party in Interest***Examiner Note:**

Follow this paragraph with one or more of form paragraphs 26.50.02 and/or 26.50.03.

<

¶ 26.50.02 *Acknowledgment of Identification of a Real Party in Interest in a Brief*

A statement identifying the real party in interest is contained in [1] brief(s).

Examiner Note:

In bracket 1, identify the brief or briefs containing a statement identifying the real party in interest. For example, "the appellant third party requester Jones" or "the appellant patent owner and the respondent third party requester Smith" or "all of the" can be used where appropriate.

¶ 26.50.03 *No Identification of a Real Party in Interest in the Briefs*

In the present appeal, [1] brief(s) does/do not contain a statement identifying the real party in interest. It is presumed that the party named in the caption of the brief(s) is the real party in interest at the time the brief was filed. The Board of Patent Appeals and Interferences, however, may subsequently exercise its discretion to require an explicit statement as to the real party in interest.

Examiner Note:

In bracket 1, identify the brief or briefs not containing a statement identifying the real party in interest. For example, "the appellant third party requester Jones" or "the appellant patent owner and the respondent third party requester Smith" or "all of the" can be used where appropriate.

**>

¶ 26.50.04 *Related Appeals and Interferences*(2) *Related appeals and interferences***Examiner Note:**

Follow this paragraph with form paragraph 26.50.05 or 26.50.06.

¶ 26.50.05 *Identification of the Related Appeals and Interferences*

The following are the related appeals, interferences, and judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal:

Examiner Note:

1. Follow this form paragraph with an identification by application, patent, appeal or interference number of all other prior and pending appeals, interferences or judicial proceedings known to the examiner which may be related to, directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal.

2. Include a copy of all court and Board decisions identified in this section in a related proceeding(s) appendix using form paragraphs 26.61.01 and 26.61.03.

¶ 26.50.06 *No Related Appeals and Interferences Identified*

The examiner is not aware of any related appeals, interferences, or judicial proceedings which will directly affect or be directly affected by or have a bearing on the Board's decision in the pending appeal.

¶ 26.51 *Status of Claims*(3) *Status of claims***Examiner Note:**

Follow form paragraph 26.51 with one or more of form paragraphs 26.51.01 and/or 26.51.02.

<

¶ 26.51.01 *Agreement With Statement of Status of Claims*

The statement of the status of claims contained in the [1] brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct status of the claims. For example, "appellant third party requester Jones" or "appellant patent owner and respondent third party requester Smith" can be used where appropriate.

2. Use form paragraph 26.51.02 where there is a disagreement with the statement of status of the claims stated in the brief(s).

**>

¶ 26.51.02 *Disagreement With Statement of Status of Claims Stated in Briefs*

The statement of the status of claims contained in the [1] briefs is incorrect. [2].

A correct statement of the status of the claims is as follows: [3]

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the status of the claims. For example, “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.
2. In bracket 2, identify the area of disagreement with each brief and the reasons for the disagreement.
3. For bracket 3, see form paragraphs 12.151.03 - 12.151.10 for the type of material that should be included. Remember that a “final rejection” is not made in a reexamination. Thus, use “Action Closing Prosecution” and “Right of Appeal Notice” where each is appropriate.

¶ 26.52 *Status of Amendments*

(4) *Status of Amendments After Action Closing Prosecution*

Examiner Note:

Identify status of all amendments submitted after Action Closing Prosecution. Use one or more of form paragraphs 26.52.01 - 26.52.05, if appropriate.

<

¶ 26.52.01 *Agreement With Statement of the Status of Amendments After Action Closing Prosecution*

The statement of the status of amendments after Action Closing Prosecution contained in the [1] brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct statement of the status of amendments after Action Closing Prosecution. For example, “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.
2. Use form paragraph 26.52.02 where there is a disagreement with the statement of the status of the amendments after ACP stated in the brief(s).

**

¶ 26.52.02 *Disagreement With Statement of the Status of Amendments After Action Closing Prosecution Stated in Briefs*

The statement of the status of amendments after Action Closing Prosecution contained in the [1] brief(s) is incorrect. [2]

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the status of amendments after Action Closing Prosecution. For example, “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.
2. In bracket 2, identify the area of disagreement with each brief and the reasons for the disagreement.

¶ 26.52.03 *Amendment After Action Closing Prosecution Entered*

The amendment after Action Closing Prosecution filed on [1] has been entered.

Examiner Note:

In bracket 1, insert the date of any entered amendment.

¶ 26.52.04 *Amendment After Action Closing Prosecution Not Entered*

The amendment after Action Closing Prosecution filed on [1] has not been entered.

Examiner Note:

In bracket 1, insert the date of any amendment denied entry.

>

¶ 26.52.05 *No Amendment After Action Closing Prosecution*

No amendment after Action Closing Prosecution has been filed.

<

**>

¶ 26.53 *Summary of Claimed Subject Matter*
(5) *Summary of Claimed Subject Matter*

Examiner Note:

Follow form paragraph 26.53 with either form paragraphs 26.53.01 or 26.53.02.

¶ 26.53.01 *Agreement With the Summary of Claimed Subject Matter in Brief(s)*

The summary of claimed subject matter contained in the [1] brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect summary of claimed subject matter. For example, “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.
2. Use form paragraph 26.53.02 where there is disagreement as to the summary.

¶ 26.53.02 *Disagreement With the Summary of Claimed Subject Matter in Brief(s)*

The summary of claimed subject matter contained in the [1] brief(s) is deficient because [2].

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect summary of invention. For example, “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.

2. In bracket 2, explain the deficiency of the summary of claimed subject matter. Include a correct summary of the invention if necessary for a clear understanding of the claimed invention.

¶ *26.54 Grounds of Rejection to be Reviewed on Appeal*
(6) Grounds of Rejection to be Reviewed on Appeal

Examiner Note:

Follow form paragraph 26.54 with form paragraph 26.54.01 or 26.54.02.

¶ *26.54.01 Agreement With Statement of the Grounds of Rejection on Appeal*

The statement of the grounds of rejection contained in the [1] brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct statement of the grounds of rejection on appeal. For example, “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.
2. Follow this form paragraph with form paragraph 26.54.011 if there are grounds of rejection that have not been withdrawn and that have not been presented by an appellant for review.
3. Follow this form paragraph with form paragraph 26.54.012 to list any non-appealable issues in the brief(s).
4. Use form paragraph 26.54.02 where there is disagreement as to the statement of the grounds of rejection on appeal.

¶ *26.54.011 Grounds of Rejection Not on Review*
GROUND OF REJECTION NOT ON REVIEW

The following grounds of rejection have not been withdrawn by the examiner, and they have not been presented by an appellant for review. [1].

Examiner Note:

In bracket 1, identify each ground of rejection that has not been withdrawn and has not been presented by an appellant for review.

¶ *26.54.012 Nonappealable Issue in Brief*
NON-APPEALABLE ISSUE(S)

The [1] brief presents arguments relating to [2]. This issue relates to petitionable subject matter under 37 CFR 1.181 and not to appealable subject matter. See MPEP § 1002 and § 1201.

Examiner Note:

1. In bracket 1, identify the brief containing the petitionable issues. For example, “appellant third party requester Jones” or “appellant patent owner” can be used where appropriate.
2. When more than one brief has a petitionable issue, this form paragraph should be used for each of these briefs.

¶ *26.54.02 Disagreement With Statement of the Grounds of Rejection on Appeal*

The [1] brief(s) does/do not provide a correct statement of the grounds of rejection to be reviewed on appeal. [2] The grounds of rejection to be reviewed on appeal are as follows: [3].

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the grounds of rejection on appeal.
2. In bracket 2, indicate the area of disagreement and the reasons for the disagreement.
3. In bracket 3 set forth the correct statement of the grounds of rejection on appeal.

¶ *26.55 Findings of Patentability to be Reviewed on Appeal*

(7) Findings of Patentability to be Reviewed on Appeal

Examiner Note:

Follow form paragraph 26.55 with form paragraph 26.55.01 or 26.55.02.

¶ *26.55.01 Agreement With Statement of the Findings of Patentability on Appeal*

The statement of the findings of patentability contained in the [1] brief(s) is correct.

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the correct statement of the findings of patentability on appeal. For example “appellant third party requester Jones” or “appellant patent owner and respondent third party requester Smith” can be used where appropriate.
2. Follow this form paragraph with form paragraph 26.55.011 if there are findings of patentability that have not been withdrawn and that have not been presented by an appellant for review.
3. Form paragraph 26.54.012 may be used to list any non-appealable issues in the brief(s).
4. Use form paragraph 26.55.02 where there is disagreement as to the statement of the findings of patentability on appeal.

¶ *26.55.011 Findings of Patentability Not on Review*
FINDINGS OF PATENTABILITY NOT ON REVIEW

The following grounds of rejection have not been withdrawn by the examiner, and they have not been presented by an appellant for review. [1].

Examiner Note:

1. In bracket 1, identify each ground of rejection that has not been withdrawn and has not been presented by an appellant for review.

¶ *26.55.02 Disagreement With Statement of the Findings of Patentability on Appeal*

The [1] brief(s) does/do not provide a correct statement of the findings of patentability to be reviewed on appeal. [2] The findings of patentability to be reviewed on appeal are as follows: [3].

Examiner Note:

1. In bracket 1, identify the brief or briefs containing the incorrect statement of the findings patentability on appeal.
2. In bracket 2, indicate the area of disagreement and reasons for the disagreement.
3. In bracket 3, set forth the correct statement of the patentability to be reviewed on appeal.

¶ 26.56 *Claims Appendix*
(8) *Claims Appendix*

Examiner Note:

Follow form paragraph 26.56 with form paragraphs 26.56.01, 26.56.02, and/or 26.56.03, as is appropriate.

<

¶ 26.56.01 *Copy of the Appealed Claims in the Appendix of Appellant Brief is Correct*

The copy of the appealed claims [1] is contained in the Appendix to the appellant brief of [2] is correct.

Examiner Note:

1. In bracket 1, identify the claims appealed found in the appellant brief.
2. In bracket 2, identify the appellant brief containing the claims appealed. For example, “third party requester,” “third party requester Smith” or “patent owner” can be used where appropriate.
3. This paragraph is for appellant briefs; not for respondent briefs.
4. Where there is more than one appellant brief, the patent examiner may choose any appellant brief that has a correct copy of claims appealed. The examiner may use this form paragraph more than once, as needed to set forth each claim or group of claims appealed by the appellants. Where a claim is correct in one appellant brief but is incorrect in another appellant brief, the examiner will draw a diagonal line in pencil through the incorrect claim in the Appendix of the incorrect appellant brief, and place the date, the word “Incorrect,” and the examiner’s initials in the margin.

**>

¶ 26.56.02 *Copy of the Appealed Claims in the Appendix of Appellant Brief is Substantially Correct*

A substantially correct copy of the appealed claim(s) is contained in the Appendix of the appellant brief of [1]. Claim(s) [2] appear on pages [3] of the appendix contain minor errors. The minor errors are as follows: [4]

Examiner Note:

1. Use this paragraph where all appellant briefs contain errors in the claim(s) but at least one appellant brief is substantially correct and contains only minor errors.
2. In bracket 1, identify the appellant brief containing the substantially correct copy of the appealed claims. For example, “third party requester Smith” or “patent owner” can be used where appropriate.
3. In bracket 2, indicate the claim or claims with the minor errors.
4. In bracket 3, identify the page(s) in the Appendix where the substantially correct appealed claims appear.
5. In bracket 4, indicate the nature of the errors.
6. This paragraph is for appellant briefs; not for respondent briefs.

7. Where there is more than one appellant brief having the same claim recited incorrectly but at least one appellant brief is substantially correct and contains only minor errors, the examiner can apply the present form paragraph to the brief that has only minor errors in the appealed claim. If the application is still a paper file, the examiner should draw a diagonal line in pencil through the incorrect claim in any other (incorrect) appellant brief, and place the date, the word “Incorrect,” and the examiner’s initials in the margin.

¶ 26.56.03 *Copy of the Appealed Claims in the Appendix Contains Substantial Errors*

Claim(s) [1] contain(s) substantial errors as presented in the Appendix to all the appellant briefs. Accordingly, claim(s) [2] is/are correctly written in the Appendix to the examiner’s answer.

Examiner Note:

1. This form paragraph is used where all appellants fail to include a correct copy of an appealed claim or claims in the Appendix to the brief.
2. Attach a correct copy of the claims incorrect in all the appellant briefs as an Appendix to the examiner’s answer; and if the application is still a paper file, draw a diagonal line in pencil through the incorrect claim in the Appendix of each appellant’s appeal brief, and place the date, the word “Incorrect,” and the examiner’s initials in the margin.
3. In brackets 1 and 2, identify the claims that contain substantial errors.
4. Rather than using this form paragraph, if the errors in the claim(s) are significant, appellant(s) should be required to submit a corrected brief (amended brief). Where the brief includes arguments based upon the incorrect version of the claims (i.e., argument directed toward the errors in the claims), a corrected brief should always be required.

¶ 26.57 *Evidence Relied Upon - Heading*
(9) *Evidence Relied Upon*

Examiner Note:

Follow form paragraph 26.57 with one or more of form paragraphs 26.57.01 - 26.57.043.

¶ 26.57.01 *No Evidence Relied Upon in the Examiner’s Answer*

No evidence is relied upon by the examiner in this appeal.

¶ 26.57.02 *Listing of the Evidence Relied Upon by Examiner*

The following is a listing of the evidence (e.g., patents, publications, official notice, and admitted prior art) relied upon by the examiner in the rejection of claims under appeal.

Examiner Note:

1. Use the following format for providing information on each reference cited:

| | | |
|--------|------|------|
| Number | Name | Date |
|--------|------|------|

2. The following are example formats for listing reference citations:

| | | |
|-----------|--------|--------|
| 2,717,847 | VARIAN | 9-1955 |
|-----------|--------|--------|

1,345,890 MUTHER (Fed. Rep. of Germany) 7-1963
(Figure 2 labeled as Prior Art in this document)

3. See MPEP § 707.05(e) for additional examples.

¶ 26.57.03 *Listing of the Art of Record Relied Upon by Requester*

The following is a listing of the evidence relied upon by the third party requester(s) in the proposed rejection of claims which were not made by the examiner, and are now under appeal.

Examiner Note:

1. Use the following format for providing information on each reference cited:

| Number | Name | Date |
|--------|------|------|
|--------|------|------|

2. The following are example formats for listing reference citations:

| | | |
|-----------|--------|--------|
| 2,717,847 | VARIAN | 9-1955 |
|-----------|--------|--------|

| | | |
|-----------|-------------------------------|--------|
| 1,345,890 | MUTHER (Fed. Rep. of Germany) | 7-1963 |
|-----------|-------------------------------|--------|

(Figure 2 labeled as Prior Art in this document)

3. See MPEP § 707.05(e) for additional examples.

¶ 26.59 *Grounds of Rejection*

(10) Grounds of rejection

The following ground(s) of rejection are applicable to the appealed claims. [1].

Examiner Note:

In bracket 1, explain each ground of rejection clearly and completely as set forth in the appropriate paragraphs i-vi below:

(i) For each rejection under 35 U.S.C. 112, first paragraph, the examiner's answer shall explain why the first paragraph of 35 U.S.C. 112 is not complied with, including, as appropriate, how the specification and drawings, if any, (a) do not describe the subject matter defined by each of the rejected claims, and/or (b) would not enable a person skilled in the art to make and use the subject matter defined by each of the rejected claims without undue experimentation including a consideration of the undue experimentation factors set forth in MPEP § 2164.01(a).

(ii) For each rejection under 35 U.S.C. 112, second paragraph, the examiner's answer shall explain why the claims do not particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(iii) For each rejection under 35 U.S.C. 102, the examiner's answer shall explain why the rejected claims are anticipated or not patentable under 35 U.S.C. 102, pointing out where all of the specific limitations recited in the rejected claims are found in the art relied upon in the rejection.

(iv) For each rejection under 35 U.S.C. 103, the examiner's answer shall state the ground of rejection and point out where each of the specific limitations recited in the rejected claims is found in the prior art relied on in the rejection, shall identify any difference between the rejected claims and the prior art relied on (i.e., the primary reference) and shall explain why it would have been obvious at the time the invention was made to a person of ordinary skill in the art to have modified the primary reference to arrive at the claimed subject matter.

(v) For each rejection under 35 U.S.C. 102 or 103 where there may be questions as to how limitations in the claims correspond to

features in the prior art, the examiner, in addition to the requirements of (iii) and (iv) above, shall compare at least one of the rejected claims feature-by-feature with the prior art relied upon in the rejection. The comparison shall align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number and quotation from the reference, as appropriate.

(vi) For each rejection, other than those referred to in paragraphs (i) to (v) of this section, the examiner's answer shall specifically explain the basis for the particular rejection.

¶ 26.59.01 *Findings of Patentability*

(11) Findings of Patentability

The following findings of patentability, i.e., determinations of inapplicability of a proposed rejection, are applicable to the appealed claims.

[1]

Examiner Note:

In bracket 1, explain each determination of inapplicability of a proposed rejection, or refer to the RAN if it clearly and completely sets forth the determination of inapplicability of a proposed rejection and complies with appropriate paragraphs i-vi below:

(i) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, first paragraph; the examiner's answer shall explain how the first paragraph of 35 U.S.C. 112 is complied with, including, as appropriate, how the specification and drawings, if any, (a) do describe the subject matter defined by each of the claims proposed for rejection, and/or (b) would in fact enable any person skilled in the art to make and use the subject matter defined by each of the claims proposed for rejection without undue experimentation.

(ii) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 112, second paragraph; the examiner's answer shall explain how the claims do particularly point out and distinctly claim the subject matter which "applicant" regards as the invention.

(iii) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 102; the examiner's answer shall explain why the claims proposed for rejection are not anticipated and patentable under 35 U.S.C. 102, pointing out which limitations recited in the claims proposed for rejection are not found in the prior art relied upon in the proposed rejection.

(iv) For each determination of inapplicability of a proposed rejection of the appealed claims under 35 U.S.C. 103; the examiner's answer shall point out which limitations recited in the patentable claims are not found in the prior art relied upon in the proposed rejection, shall identify the difference between the patentable claims and the prior art relied upon by the third party requester and shall explain why the claimed subject matter is patentable over the prior art relied on by the third party requester. If the third party requester's proposed rejection is based upon a combination of references, the examiner's answer shall explain the rationale for not making the combination.

(v) For each third party requester proposed rejection under 35 U.S.C. 102 or 103 where there are questions as to how limitations in the claims define over features in the prior art even after the

examiner complies with the requirements of (iii) and (iv) above, the examiner shall compare at least one of the claims proposed for rejection feature-by-feature with the prior art relied on in the proposed rejection. The comparison shall align the language of the claim side-by-side with a reference to the specific page or column, line number, drawing reference number, and quotation from the reference, as appropriate.

(vi) For each determination of inapplicability of a proposed rejection, other than those referred to in paragraphs (i) to (v) of this section, the examiner's answer shall specifically explain why there is insufficient basis for making the particular proposed rejection.

¶ 26.60 *No New Ground of Rejection; No New Finding of Patentability*

(12) No new ground of rejection; no new finding of patentability

This examiner's answer does not contain any new ground of rejection. This examiner's answer does not contain any new finding of patentability (i.e., no new determination of inapplicability of a proposed rejection).

Examiner Note:

An examiner's answer may not include a new ground of rejection. See 37 CFR 41.69(b). An examiner's answer also may not include a new determination not to make a proposed rejection. See 37 CFR 41.69(c). If a new ground of rejection or new determination not to make a proposed rejection is made, prosecution must be reopened. See 37 CFR 41.69(d). See also MPEP § 2677.

¶ 26.61 *Response to Argument*

(13) Response to argument

Examiner Note:

A statement of whether the examiner disagrees with each of the contentions of appellants and respondents in their briefs with respect to the issues presented, and an explanation of the reasons for disagreement with any such contentions. If any ground of rejection or inapplicability of proposed rejection is not argued and responded to by the appropriate party, the examiner shall point out each claim affected.

¶ 26.61.01 *Related Proceeding(s) Appendix*

(14) Related Proceeding(s) Appendix

Examiner Note:

Follow form paragraph with either form paragraph 26.62.01 or 26.62.02.

¶ 26.61.02 *No Related Proceeding Identified*

No decision rendered by a court or the Board is identified by the examiner in the Related Appeals and Interferences section of this examiner's answer.

¶ 26.61.03 *Copies Related to Proceeding*

Copies of the court or Board decision(s) identified in the Related Appeals and Interferences section of this examiner's answer are provided herein.

¶ 26.62 *Notification Regarding Rebuttal Brief*

(15) Period for providing a Rebuttal Brief

Appellant(s) is/are given a period of ONE MONTH from the mailing date of this examiner's answer within which to file a rebuttal brief in response to the examiner's answer. Prosecution otherwise remains closed.

The rebuttal brief of the patent owner may be directed to the examiner's answer and/or any respondent brief. The rebuttal brief of the third party requester(s) may be directed to the examiner's answer and/or the respondent brief of the patent owner. The rebuttal brief must (1) clearly identify each issue, and (2) point out where the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in the respondent brief.

The time for filing the rebuttal brief may not be extended. No further submission (other than the rebuttal brief(s)) will be considered, and any such submission will be treated in accordance with 37 CFR 1.939.

¶ 26.63 *Request to Present Oral Arguments*

The examiner requests the opportunity to present arguments at the oral hearing.

Examiner Note:

1. Use this form paragraph only if:
 - a. an oral hearing has been requested by a party to the appeal; and
 - b. the primary examiner intends to present an oral argument.
2. This form paragraph must be included as a separate letter on a form PTOL-90. See MPEP § 1209.

¶ 26.64 *Examiner's Answer, Conclusion*

(16) Conclusion

For the above reasons, it is believed that the rejections and/or findings of patentability discussed above should be sustained.

Respectfully submitted,

<

2678 Rebuttal Briefs [R-3]

**>

37 CFR 41.66. *Time for filing briefs.*

(d) Any appellant may file a rebuttal brief under § 41.71 within one month of the date of the examiner's answer. The time for filing a rebuttal brief or an amended rebuttal brief may not be extended.

(e) No further submission will be considered and any such submission will be treated in accordance with § 1.939 of this title.<

**>

37 CFR 41.71. Rebuttal brief.

(a) Within one month of the examiner's answer, any appellant may once file a rebuttal brief.

(b)(1) The rebuttal brief of the owner may be directed to the examiner's answer and/or any respondent brief.

(2) The rebuttal brief of the owner shall not include any new or non-admitted amendment, or an affidavit or other evidence. See § 1.116 of this title for amendments, affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63 for amendments, affidavits or other evidence filed after the date of filing the appeal.

(c)(1) The rebuttal brief of any requester may be directed to the examiner's answer and/or the respondent brief of the owner.

(2) The rebuttal brief of a requester may not be directed to the respondent brief of any other requester.

(3) No new ground of rejection can be proposed by a requester.

(4) The rebuttal brief of a requester shall not include any new or non-admitted affidavit or other evidence. See § 1.116(d) of this title for affidavits or other evidence filed after final action but before or on the same date of filing an appeal and § 41.63(c) for affidavits or other evidence filed after the date of filing the appeal.

(d) The rebuttal brief must include a certification that a copy of the rebuttal brief has been served in its entirety on all other parties to the proceeding. The names and addresses of the parties served must be indicated.

(e) If a rebuttal brief is timely filed under paragraph (a) of this section but does not comply with all the requirements of paragraphs (a) through (d) of this section, appellant will be notified of the reasons for non-compliance and provided with a non-extendable period of one month within which to file an amended rebuttal brief. If the appellant does not file an amended rebuttal brief during the one-month period, or files an amended rebuttal brief which does not overcome all the reasons for non-compliance stated in the notification, that appellant's rebuttal brief and any amended rebuttal brief by that appellant will not be considered.<

In the examiner's answer, each appellant is given a period of one month from the mailing date of the examiner's answer within which to file a rebuttal brief in response to the issues raised in the examiner's answer and/or in the respondent brief of an opposing party. The one month period may not be extended. 37 CFR *>41.66(d)<.

The rebuttal brief must (A) clearly identify each issue, and (B) point out where the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in any respondent brief. A rebuttal brief will not be entered if it does not clearly identify each issue and/or is not limited to issues raised in the examiner's answer or in any respondent brief. Such a rebuttal brief will remain in

the file, but it will not be addressed nor considered, except to inform the appropriate party that it was not entered and why.

The rebuttal brief of a third party requester may not be directed to the respondent brief or any other third party requester. No new ground of rejection may be proposed by a third party requester.

After the examiner's answer, only a rebuttal brief (or an amended rebuttal brief, where appellant is given one opportunity to correct a defective original rebuttal brief (MPEP § 2679)) will be received into the reexamination proceeding. No other submission will be considered, and any such other submission will be returned as an improper paper. 37 CFR 1.939.

If no rebuttal brief is received within the one month period set in the examiner's answer, the Central Reexamination Unit (CRU) will issue a notification letter to parties using form paragraph 26.67, and will then forward the reexamination proceeding to the Board of Patent Appeals and Interferences for decision on the appeal(s).

¶ 26.67 No Receipt of Rebuttal Brief(s)

Appellant(s) was given a period of one month from the mailing date of the examiner's answer within which to file a rebuttal brief in response to the examiner's answer. No rebuttal brief has been received within that time period. Accordingly, the reexamination proceeding is being forwarded to the Board of Patent Appeals and Interferences for decision on the appeal(s).

Prosecution remains closed. Any further reply/comments by any party will not be considered, and may be returned to the party that submitted it.

Central Reexamination Unit

If one or more rebuttal briefs is/are timely received, see MPEP § 2679 for treatment of the rebuttal brief(s).

2679 Office Treatment of Rebuttal Brief [R-3]

When a rebuttal brief is received in response to an examiner's answer, it is entered by the Central Reexamination Unit (CRU). The reexamination case file is retained in the CRU until all potential rebuttal briefs are submitted and entered, or the time for filing a rebuttal brief has expired. The case file is then forwarded to the examiner, who will then review the submission(s) and consult with the Reexamination Legal Advisor (RLA) of the CRU. If the examiner

determines that the rebuttal brief (A) does not clearly identify each issue raised in the examiner's answer or in the respondent brief of an opposing party (and point out *where* the issue was raised in those papers), or (B) is not limited to the issues raised in the examiner's answer or the respondent brief; the examiner may *refuse* entry of the rebuttal brief. If entry is approved, the examiner will issue a notification letter to that effect. If entry is refused, the examiner will issue a notification letter that appellant is given a non-extendable period of one month to correct the defect in the rebuttal brief by filing an amended rebuttal brief. If the amended rebuttal brief filed in response to the examiner's letter does not overcome all the reasons for noncompliance with 37 CFR 41.71(a)-(d) stated in the examiner's letter, appellant will be so notified, but will not be given a second opportunity to file an amended rebuttal brief. That appellant's amended rebuttal brief will not be considered. 37 CFR 41.71(e). The examiner's notification letter will be mailed from the CRU.

After all rebuttal briefs and amended rebuttal briefs (where appellant is given an opportunity to correct a defective original rebuttal brief) have been received and the appropriate notification letters mailed, or the time for filing such briefs has expired, the proceeding will be forwarded by the CRU to the Board of Patent Appeals and Interferences.

In a very rare situation, where the examiner finds that it is essential to address a rebuttal brief, the examiner must reopen prosecution. In order to reopen prosecution after an examiner's answer, the Technology Center (TC) Director must approve the same in writing, at the end of the action that reopens prosecution.

Form paragraphs 26.65 and 26.65.01 may be used to notify the parties of receipt and entry of the rebuttal brief(s).

¶ 26.65 *Acknowledgment of Rebuttal Brief*

The rebuttal brief filed [1] by [2] has been entered.

Examiner Note:

1. Use a separate form paragraph 26.65 for each rebuttal brief that is received.
2. In bracket 1, insert the date the rebuttal brief was filed.
3. In bracket 2, insert the party that filed the rebuttal brief.

**>

¶ 26.65.01 *No Further Response*

No further response by the examiner is appropriate. Any further reply/comments by any party will be not be considered, and may be returned to the party that submitted it. The reexamination proceeding is being forwarded to the Board of Patent Appeals and Interferences for decision on the appeal(s).

<

Form paragraph 26.66 may be used to notify the parties of receipt of the rebuttal brief(s) that are defective.

¶ 26.66 *Defective Rebuttal Brief-Opportunity to Correct*

A rebuttal brief must (1) clearly identify each issue and (2) point out *where* the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in the respondent brief. The rebuttal brief of Appellant [1] is defective because [2].

Appellant [3] is given a period of ONE MONTH from the mailing date of this examiner's answer within which to file an amended rebuttal brief in response to this letter. Prosecution otherwise remains closed. The time for filing the amended rebuttal brief may not be extended.

If the amended rebuttal brief filed in response to the this letter does not remedy the defect or raises a new one, appellant will be so notified, but will not be given a second opportunity to file an amended rebuttal brief.

Examiner Note:

1. In brackets 1 and 3, insert the "patent owner" or the appropriate third party requester. Where there is one third party requester (the usual situation) insert "third party requester"; where there are two or more third party requesters (a merged proceeding), insert "third party requester" followed by the name of the third party requester (e.g., "third party requester Smith" or "third party requester XYZ Corporation").
2. This form paragraph is to be used once for each appellant filing a defective **original** rebuttal brief, to provide notification thereof.
3. For an appellant filing a defective **amended** rebuttal brief, use form paragraph 26.66.01.

Form paragraph 26.66.01 may be used to notify the appellant that the amended rebuttal brief is defective.

¶ 26.66.01 *Defective Amended Rebuttal Brief-No Opportunity to Correct*

A rebuttal brief must (1) clearly identify each issue and (2) point out *where* the issue was raised in the examiner's answer and/or in the respondent brief. In addition, the rebuttal brief must be limited to issues raised in the examiner's answer or in the respondent brief. The amended rebuttal brief of Appellant [1] is defective because [2].

The original and amended rebuttal briefs have been placed in the file but will not be considered. There is **no** opportunity to file a second amended rebuttal brief, and any such submission will be returned.

Examiner Note:

1. In bracket 1, insert the “patent owner” or the appropriate third party requester. Where there is one third party requester (the usual situation) insert “third party requester”; where there are two or more third party requesters (a merged proceeding), insert “third party requester” followed by the name of the requester (e.g., “third party requester Smith” or “third party requester XYZ Corporation”).
2. This form paragraph is to be used once for each defective **amended** rebuttal brief, to provide notification thereof. The notification letter should conclude with form paragraph 26.66.02, unless such is inappropriate for some reason.
3. For an appellant filing a defective **original** rebuttal brief, use form paragraph 26.66.

Form paragraph 26.66.02 may be used to notify the parties that the proceeding is being forwarded to the Board of Appeals and Interferences for decision on the appeal(s).

¶ 26.66.02 Forward to the Board for Decision

The reexamination proceeding is being forwarded to the Board of Patent Appeals and Interferences for decision on the appeal(s).

2680 Oral Hearing [R-3]

**>

37 CFR 41.73. Oral hearing.

(a) An oral hearing should be requested only in those circumstances in which an appellant or a respondent considers such a hearing necessary or desirable for a proper presentation of the appeal. An appeal decided on the briefs without an oral hearing will receive the same consideration by the Board as an appeal decided after an oral hearing.

(b) If an appellant or a respondent desires an oral hearing, he or she must file, as a separate paper captioned “REQUEST FOR ORAL HEARING,” a written request for such hearing accompanied by the fee set forth in § 41.20(b)(3) within two months after the date of the examiner’s answer. The time for requesting an oral hearing may not be extended. The request must include a certification that a copy of the request has been served in its entirety on all other parties to the proceeding. The names and addresses of the parties served must be indicated.

(c) If no request and fee for oral hearing have been timely filed by appellant or respondent as required by paragraph (b) of this section, the appeal will be assigned for consideration and decision on the briefs without an oral hearing.

(d) If appellant or respondent has complied with all the requirements of paragraph (b) of this section, a hearing date will be set, and notice given to the owner and all requesters. If an oral hearing is held, an oral argument may be presented by, or on behalf of, the primary examiner if considered desirable by either the primary examiner or the Board. The notice shall set a non-extendable period within which all requests for oral hearing shall be submitted by any other party to the appeal desiring to participate in the oral hearing. A hearing will be held as stated in the notice, and oral argument will be limited to thirty minutes for each appellant or respondent who has requested an oral hearing, and twenty minutes for the primary examiner unless otherwise ordered. No appellant or respondent will be permitted to participate in an oral hearing unless he or she has requested an oral hearing and submitted the fee set forth in § 41.20(b)(3).

(e)(1) At the oral hearing, each appellant and respondent may only rely on evidence that has been previously entered and considered by the primary examiner and present argument that has been relied upon in the briefs except as permitted by paragraph (e)(2) of this section. The primary examiner may only rely on argument and evidence relied upon in an answer except as permitted by paragraph (e)(2) of this section. The Board will determine the order of the arguments presented at the oral hearing.

(2) Upon a showing of good cause, appellant, respondent and/or the primary examiner may rely on a new argument based upon a recent relevant decision of either the Board or a Federal Court.

(f) Notwithstanding the submission of a request for oral hearing complying with this rule, if the Board decides that a hearing is not necessary, the Board will so notify the owner and all requesters.<

If an appellant or a respondent desires an oral hearing in an appeal of an *inter partes* reexamination proceeding, he/she must file a written request for such hearing, accompanied by the fee set forth in 37 CFR *>41.20(b)(3)<, within two months after the date of the examiner’s answer. There is no extension of the time for requesting a hearing. 37 CFR *>41.73(b)<. No appellant or respondent will be permitted to participate in an oral hearing, unless he or she has requested an oral hearing and submitted the fee set forth in 37 CFR *>41.20(b)(3)<.

**>Where the appeal involves reexamination proceedings, oral hearings are open to the public as observers (subject to the admittance procedures established by the Board), unless one of the appellants and/or the respondents (A) petitions under 37 CFR 41.3 that the hearing not be open to the public, (B) presents sufficient reasons for such a request, (C) pays the petition fee set forth in 37 CFR 41.20(a), and (D) the petition is granted.<

2681 Board of Patent Appeals and Interferences Decision [R-3]

**>

37 CFR 41.77. Decisions and other actions by the Board.

(a) The Board of Patent Appeals and Interferences, in its decision, may affirm or reverse each decision of the examiner on all issues raised on each appealed claim, or remand the reexamination proceeding to the examiner for further consideration. The reversal of the examiner's determination not to make a rejection proposed by the third party requester constitutes a decision adverse to the patentability of the claims which are subject to that proposed rejection which will be set forth in the decision of the Board of Patent Appeals and Interferences as a new ground of rejection under paragraph (b) of this section. The affirmance of the rejection of a claim on any of the grounds specified constitutes a general affirmance of the decision of the examiner on that claim, except as to any ground specifically reversed.

(b) Should the Board reverse the examiner's determination not to make a rejection proposed by a requester, the Board shall set forth in the opinion in support of its decision a new ground of rejection; or should the Board have knowledge of any grounds not raised in the appeal for rejecting any pending claim, it may include in its opinion a statement to that effect with its reasons for so holding, which statement shall constitute a new ground of rejection of the claim. Any decision which includes a new ground of rejection pursuant to this paragraph shall not be considered final for judicial review. When the Board makes a new ground of rejection, the owner, within one month from the date of the decision, must exercise one of the following two options with respect to the new ground of rejection to avoid termination of the appeal proceeding as to the rejected claim:

(1) *Reopen prosecution.* The owner may file a response requesting reopening of prosecution before the examiner. Such a response must be either an amendment of the claims so rejected or new evidence relating to the claims so rejected, or both.

(2) *Request rehearing.* The owner may request that the proceeding be reheard under § 41.79 by the Board upon the same record. The request for rehearing must address any new ground of rejection and state with particularity the points believed to have been misapprehended or overlooked in entering the new ground of rejection and also state all other grounds upon which rehearing is sought.

(c) Where the owner has filed a response requesting reopening of prosecution under paragraph (b)(1) of this section, any requester, within one month of the date of service of the owner's response, may once file comments on the response. Such written comments must be limited to the issues raised by the Board's opinion reflecting its decision and the owner's response. Any requester that had not previously filed an appeal or cross appeal and is seeking under this subsection to file comments or a reply to the comments is subject to the appeal and brief fees under § 41.20 (b)(1) and (2), respectively, which must accompany the comments or reply.

(d) Following any response by the owner under paragraph (b)(1) of this section and any written comments from a requester

under paragraph (c) of this section, the proceeding will be remanded to the examiner. The statement of the Board shall be binding upon the examiner unless an amendment or new evidence not previously of record is made which, in the opinion of the examiner, overcomes the new ground of rejection stated in the decision. The examiner will consider any owner response under paragraph (b)(1) of this section and any written comments by a requester under paragraph (c) of this section and issue a determination that the rejection is maintained or has been overcome.

(e) Within one month of the examiner's determination pursuant to paragraph (d) of this section, the owner or any requester may once submit comments in response to the examiner's determination. Within one month of the date of service of comments in response to the examiner's determination, the owner and any requesters may file a reply to the comments. No requester reply may address the comments of any other requester reply. Any requester that had not previously filed an appeal or cross appeal and is seeking under this subsection to file comments or a reply to the comments is subject to the appeal and brief fees under § 41.20 (b)(1) and (2), respectively, which must accompany the comments or reply.

(f) After submission of any comments and any reply pursuant to paragraph (e) of this section, or after time has expired, the proceeding will be returned to the Board which shall reconsider the matter and issue a new decision. The new decision is deemed to incorporate the earlier decision, except for those portions specifically withdrawn.

(g) The time period set forth in paragraph (b) of this section is subject to the extension of time provisions of § 1.956 of this title when the owner is responding under paragraph (b)(1) of this section. The time period set forth in paragraph (b) of this section may not be extended when the owner is responding under paragraph (b)(2) of this section. The time periods set forth in paragraphs (c) and (e) of this section may not be extended.<

After consideration of the record of the *inter partes* reexamination proceeding, including all briefs and the examiner's answer, the Board of Patent Appeals and Interferences (Board) issues its decision, affirming the examiner in whole or in part, or reversing the examiner's decision, sometimes also setting forth a new ground of rejection. Where there is reason to do so, the Board will sometimes remand the reexamination proceeding to the examiner for further consideration, prior to rendering a decision.

On occasion, the Board has refused to consider an appeal until after the conclusion of a pending civil action or appeal to the United States Court of Appeals for the Federal Circuit involving issues identical with, or similar to, those presented in the later appeal. Such suspension of action, postponing consideration of the appeal until the Board has the benefit of a court decision which may be determinative of the issues involved, has been recognized as sound practice.

I. BOARD DECISION MAY CONTAIN NEW GROUND OF REJECTION

37 CFR *41.77(b)< provides express authority for the Board to include, in its decision, a recommendation for rejecting any claim found patentable by the examiner that the Board believes should be again considered by the examiner. 37 CFR *41.77(b)< is not intended as an instruction to the Board to revisit every patentable claim in every appealed proceeding. It is, rather, intended to give the Board express authority to act when it becomes apparent, during the consideration of the claims, that one or more patentable claims may be subject to rejection on either the same grounds or on different grounds from those applied against the rejected claims.

It should be noted that, pursuant to 37 CFR *41.77(a)<, the reversal of the examiner's determination not to make a rejection proposed by the requester constitutes a decision adverse to the patentability of the claims which are subject to that proposed rejection. Accordingly, such reversal will be set forth in the Board's decision as a new ground of rejection under 37 CFR *41.77(b)<.

II. NON-FINAL BOARD DECISIONS

A decision of the Board which includes a new ground of rejection or a remand will not be considered as a final decision in the case. The Board, following conclusion of the proceedings before the examiner, will either adopt its earlier decision as final or will render a new decision based on all appealed claims, as it considers appropriate. In either case, final action by the Board will give rise to the alternatives available to a party to the appeal following a decision by the Board.

III. NO BOARD RECOMMENDATION OF AMENDMENT TO MAKE CLAIM PATENTABLE

It should be noted that, unlike the practice for applications and *ex parte* reexaminations, the decision of the Board of Patent Appeals and Interferences **cannot** include an explicit statement that a claim may be allowed in amended form, whereby the patent owner would have the right to amend in conformity with that

statement and it would be binding on the examiner in the absence of new references or grounds of rejection. The reason that the Board decision cannot make such a recommendation is that to permit the patent owner and the third party comment on a Board determination of the patentability of a hypothetical amended claim would be unduly complicated so late in the proceedings.

Additionally, in the absence of an express recommendation, a remark by the Board that a certain feature does not appear in a claim is **not** to be taken as a recommendation that the claim be allowed if the feature is supplied by amendment. *Ex parte Norlund*, 1913 C.D. 161, 192 O.G. 989 (Comm'r Pat. 1913).

IV. REVIEW OF BOARD DECISION BY PETITION

Since review of the decisions of the Board is committed by statute to the Court of Appeals for the Federal Circuit, the Board's decisions are properly reviewable on petition **only to the extent of** determining whether they involve a convincing showing of error, abuse of discretion, or policy issue appropriate for higher level determination. Reasonable rulings made by the Board on matters resting in its discretion will not be disturbed upon petition. Thus, for example, the Board's opinion as to whether it has employed a new ground of rejection will not be set aside on petition unless said opinion is found to be clearly unwarranted.

V. PUBLICATION OF BOARD DECISIONS

Decisions of the Board may be published at the discretion of the ** Office. >See 37 CFR 41.6(a).< Requests by members of the public or parties to the reexamination proceeding to publish a decision of the Board should be referred to the Office of the Solicitor.

2682 Action Following Decision [R-3]

**>

37 CFR 41.79. *Rehearing.*

(a) Parties to the appeal may file a request for rehearing of the decision within one month of the date of:

- (1) The original decision of the Board under § 41.77(a),
- (2) The original § 41.77(b) decision under the provisions of § 41.77(b)(2),

(3) The expiration of the time for the owner to take action under § 41.77(b)(2), or

(4) The new decision of the Board under § 41.77(f).

(b)(1) The request for rehearing must state with particularity the points believed to have been misapprehended or overlooked in rendering the Board's opinion reflecting its decision. Arguments not raised in the briefs before the Board and evidence not previously relied upon in the briefs are not permitted in the request for rehearing except as permitted by paragraphs (b)(2) and (b)(3) of this section.

(2) Upon a showing of good cause, appellant and/or respondent may present a new argument based upon a recent relevant decision of either the Board or a Federal Court.

(3) New arguments responding to a new ground of rejection made pursuant to § 41.77(b) are permitted.

(c) Within one month of the date of service of any request for rehearing under paragraph (a) of this section, or any further request for rehearing under paragraph (d) of this section, the owner and all requesters may once file comments in opposition to the request for rehearing or the further request for rehearing. The comments in opposition must be limited to the issues raised in the request for rehearing or the further request for rehearing.

(d) If a party to an appeal files a request for rehearing under paragraph (a) of this section, or a further request for rehearing under this section, the Board shall render a decision on the request for rehearing. The decision on the request for rehearing is deemed to incorporate the earlier opinion reflecting its decision for appeal, except for those portions specifically withdrawn on rehearing and is final for the purpose of judicial review, except when noted otherwise in the decision on rehearing. If the Board opinion reflecting its decision on rehearing becomes, in effect, a new decision, and the Board so indicates, then any party to the appeal may, within one month of the new decision, file a further request for rehearing of the new decision under this subsection. Such further request for rehearing must comply with paragraph (b) of this section.

(e) The times for requesting rehearing under paragraph (a) of this section, for requesting further rehearing under paragraph (c) of this section, and for submitting comments under paragraph (b) of this section may not be extended.

37 CFR 41.81. Action following decision.

The parties to an appeal to the Board may not appeal to the U.S. Court of Appeals for the Federal Circuit under § 1.983 of this title until all parties' rights to request rehearing have been exhausted, at which time the decision of the Board is final and appealable by any party to the appeal to the Board.

37 CFR 1.981. Reopening after a final decision of the Board of Patent Appeals and Interferences.

When a decision by the Board of Patent Appeals and Interferences on appeal has become final for judicial review, prosecution of the *inter partes* reexamination proceeding will not be reopened or reconsidered by the primary examiner except under the provisions of § 41.77 of this title without the written authority of the Director, and then only for the consideration of matters not already adjudicated, sufficient cause being shown.<

The provisions of 37 CFR *>41.77 through 41.79 and 37 CFR 1.979 through< 1.983 deal with action by the parties and the examiner following a decision by the Board of Patent Appeals and Interferences (Board) in an *inter partes* reexamination proceeding.

After an appeal to the Board has been decided, a copy of the decision is mailed to all parties to the reexamination proceeding, and the original of the decision is placed in the file. The clerk of the Board notes the decision **>in the file history of the reexamination proceeding< and in the record of appeals. The clerk then forwards the file to the Central Reexamination Unit (CRU), immediately, if the examiner is reversed, and after about 6 weeks if the examiner is affirmed or after a decision on a request for rehearing is rendered. The decision is processed in the CRU, and the file is then forwarded to the examiner through the office of the Technology Center (TC) Director.

The Board, in its decision, may affirm or reverse the decision of the examiner, in whole or in part, on the grounds of rejection specified by the examiner and/or on the proposed grounds presented by a third party requester but not adopted by the examiner. A rejection of claims by the examiner may also be affirmed on the basis of the argument presented by the third party requester, and a finding of patentability may also be affirmed on the basis of the arguments presented by the patent owner. Further handling of the reexamination proceeding will depend upon the nature of the Board's decision.

I. THE BOARD AFFIRMS, REVERSES A REJECTION, OR AFFIRMS-IN-PART (AND REVERSES ONLY AS TO REJECTION(S))

Where the Board decision (A) affirms the examiner in whole, (B) reverses the examiner in whole where only rejections were appealed, or (C) affirms in part and reverses in part, where the only examiner decision overturned is that of rejecting claims, in these situations, the case is forwarded to the CRU which processes the decision and then stores the case file. The CRU will retain the case file until the expiration of **both** the period for requesting rehearing of the decision by the Board (in accordance with 37 CFR *>41.79<), and the period for the patent owner seeking court review of the decision of the Board (in accordance with 37 CFR 1.983) - with no further action having been taken by any party to the appeal.

The time period for seeking review of a decision of the Board by the Court of Appeals for the Federal Circuit is 2 months from the date of the decision of the Board plus any extension obtained under 37 CFR 1.304. See MPEP § 1216. The time period for requesting rehearing under 37 CFR *41.79< is one month and the one month period may not be extended. 37 CFR **41.79(e)<.

A. *No Action Taken by Parties to the Appeal*

Two weeks after the time for action by any party (to the appeal) has expired, the CRU will forward the case (via the TC Director) to the examiner. The two week delay is to permit any information as to requesting rehearing, or the filing of an appeal, to reach the CRU. Upon receipt of the *reexamination<, the examiner will take up the reexamination proceeding for action so that a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) can be issued in accordance with MPEP § 2687, to **>terminate the prosecution of< the reexamination proceeding.

The following form paragraph should be used where the NIRC is issued:

**>

¶ 26.67.01 *Periods for Seeking Court Review or Rehearing Have Lapsed*

The periods for seeking court review of, or a rehearing of, the decision of the Board of Patent Appeals and Interferences rendered [1] have expired and no further action has been taken by any party to the appeal. Accordingly, the appeal in this reexamination proceeding is considered terminated; see 37 CFR 1.979(b). The present Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) is issued in accordance with MPEP § 2687 in order to terminate the present reexamination prosecution.

Examiner Note:

In bracket 1, enter the date of the Board decision.

<

The NIRC will indicate the status of all the claims in the case as a result of the Board decision. A red-ink line should be drawn by the examiner through any refused claims, and the notation “Board Decision” written in the margin in red ink. A statement will be included in the NIRC that “Claims ____ have been canceled as a result of the decision of the Board of Patent Appeals and Interferences dated _____.”

Claims indicated as patentable prior to appeal except for their dependency from rejected claims *not in the original patent* will be treated as if they were rejected. See MPEP § 1214.06. The following two examples should be noted:

- Claim 10 has been added to the patent during the reexamination, or claim 10 is a patent claim that was amended during the reexamination. Claim 11 depends on claim 10. If the Board affirms a rejection of claim 10 and claim 11 was objected to prior to appeal as being patentable except for its dependency from claim 10, the examiner should cancel both claims 10 and 11 by formal examiner’s amendment attached as part of the NIRC.

- On the other hand, if both claims 10 and 11 were rejected prior to the appeal, then the patent owner was never put on notice that claim 11 could be made allowable by placing it in independent form. Thus, where the Board affirms a rejection against claim 10 but reverses the rejections against dependent claim 11, the examiner should convert dependent claim 11 into independent form by formal examiner’s amendment and cancel claim 10 (for which the rejection was affirmed) in the NIRC. In this instance, the examiner could also set a time period of one month or 30 days (whichever is longer) in which the patent owner may rewrite dependent claim 11 in independent form. Extensions of time under 37 CFR 1.956 will be permitted. If no timely response is received, the examiner will cancel both claims 10 and 11 in the NIRC.

See MPEP § 2687 for further guidance in issuing the NIRC and terminating the *prosecution of the reexamination proceeding<.

B. *A Request for Rehearing of the Decision*

Any party to the appeal not satisfied with the Board decision may file a single request for rehearing of the decision. The request must be filed within one month from the date of the original decision under 37 CFR *41.77(a)< or a new decision under 37 CFR *41.77(f)<. The one month period may not be extended. 37 CFR *41.79(e)<. The provisions of 37 CFR *41.79(b)< require that any request must specifically state the points believed to have been misapprehended or overlooked in the Board’s decision, as well as all other grounds which rehearing is sought.

If a party does file a request for rehearing of the decision, any opposing party appellant or opposing

party respondent may, within one month from the date of *service* of the request for rehearing, file responsive comments on the request for rehearing. 37 CFR *41.79(c). This one month period may not be extended. 37 CFR *41.79(e).

Where at least one request for rehearing of the decision is granted, **the Board's decision on the request for rehearing is deemed to incorporate the earlier opinion reflecting its decision for appeal, except for those portions specifically withdrawn on rehearing, and the decision is final for the purpose of judicial review, except when noted otherwise in the decision on rehearing. If the Board opinion reflecting its decision on rehearing indicates that the decision is a new decision, then any party to the appeal may, within one month of the new decision, file a further request for rehearing of the new decision. Such further request for rehearing must comply with 37 CFR 41.79(b). If the Board's final decision on the request for rehearing is * not timely appealed to the Court, the case is returned to the CRU for processing and subsequent forwarding to the examiner. When the examiner receives the *reexamination from the CRU, the examiner will proceed to issue a NIRC and terminate the *prosecution of the reexamination proceeding. 37 CFR 1.979*(b).

**

II. NEW GROUND OF REJECTION BY BOARD

Pursuant to 37 CFR *41.77(b), the Board may, in its decision on appeal, make a new rejection of one or more appealed claims on grounds not raised in the appeal, in which case the patent owner has the option of:

(A) requesting rehearing under 37 CFR *41.79(a); or

(B) submitting an appropriate amendment of the rejected claims, and/or **new evidence (e.g., a showing of facts) relating to the claim.

The parties do not have the option of an immediate appeal to the U.S. Court of Appeals for the Federal Circuit because the decision under 37 CFR *41.77(b) is not a final decision.

A. A Request for Rehearing of the Decision Which Includes a New Ground of Rejection

A patent owner's request for rehearing by the Board must be filed within a nonextendable one month period set by 37 CFR *41.79(a). By proceeding in this manner, the patent owner waives his or her right to further prosecution before the examiner. *In re Greenfield*, 40 F.2d 775, 5 USPQ 474 (CCPA 1930). If the patent owner does file a request for rehearing of the decision, any third party requester that is a party to the appeal may, within a non-extendable one month period from the date of service of the request for rehearing, file responsive comments on the request. 37 CFR *41.79(c).

B. Submission of Amendment or Showing of Facts After Decision Which Includes a New Ground of Rejection

If the patent owner elects to proceed before the examiner, the patent owner must take action within the one month period for response which will be set in the Board's decision. Extensions of time under 37 CFR 1.956 are available to extend the period. 37 CFR *41.77(g). The extension(s) may not, however exceed six months from the Board's decision.

When the patent owner submits a response pursuant to 37 CFR *41.77(b)(1), prosecution and examination will then be carried out under 37 CFR *41.77(c) through 37 CFR *41.77(f). Under 37 CFR *41.77(b)(1), the patent owner may amend the claims involved, or substitute new claims to avoid the art or reasons stated by the Board. *Ex parte Burrows*, 110 O.G. 599, 1904 C.D. 155 (Comm'r Pat. 1904). Such amended or new claims must be directed to the same subject matter as the appealed claims, *Ex parte Comstock*, 317 O.G. 4, 1923 C.D. 82 (Comm'r Pat. 1923). The patent owner may also submit >evidence or< a showing of facts under 37 CFR 1.131 or 1.132, as may be appropriate. Argument without either amendment (of the claims so rejected) or the submission of >evidence or< a showing of facts (as to the claims so rejected) can result only in the examiner's determination to maintain the Board's rejection of the claims, since the examiner is without authority to find the claims patentable unless the claims are amended or unless the rejection is overcome by a showing of facts not before the Board. The new ground of rejection raised by the Board does not

“reopen the prosecution” (under 37 CFR *>41.77(b)(1)< and 37 CFR *>41.77(c)< through 37 CFR *>41.77(f)< *except as to that subject matter to which the new rejection was applied*. Accordingly, any amendment or showing of facts **not** directed to that subject matter to which the new rejection was applied will be refused entry and will not be considered.

III. BOARD DECISION REVERSES EXAMINER’S DETERMINATION NOT TO MAKE PROPOSED REJECTION

Where the Board decision reverses the examiner in whole (or affirms in part and reverses in part, with at least one examiner decision overturned as to the proposed rejections the examiner refused to adopt) as to the proposed rejections the examiner refused to adopt, pursuant to 37 CFR *>41.77(a)<, the Board’s reversal of the examiner’s determination not to adopt a rejection proposed by the third party requester constitutes a decision adverse to the patentability of the claims (which are subject to that proposed rejection). Accordingly, such reversal will be set forth in the Board’s decision as a new ground of rejection under 37 CFR *>41.77(b)<. See subsection II. above for the action taken after a new ground of rejection.

IV. REMAND BY BOARD

In accordance with 37 CFR *>41.77(a)<, the Board, in its decision, may remand the reexamination proceeding to the examiner for further consideration. A Board decision which includes a remand in accordance with 37 CFR *>41.77(a)< will not be considered a “final decision” in the case.

The Board may remand the case to an examiner where appropriate procedure has not been followed, where further information is needed, or where the examiner is to consider something which the examiner did not yet consider (or it is not clear that the examiner had considered it).

After the examiner has addressed the remand, the examiner will either return the case to the Board (via the CRU) or reopen prosecution as appropriate. The Board, following conclusion of the proceedings before the examiner, will either adopt its earlier decision as final (if the remand decision lends itself to same) or will render a new decision based on

all appealed claims, as it considers appropriate. In either case, final action by the Board will give rise to the alternatives available following a decision by the Board.

A. Reopening Prosecution of Case

Reopening prosecution of a case after decision by the Board should be a rare occurrence. Cases which have been decided by the Board will not be reopened or reconsidered by the primary examiner, unless the provisions of 37 CFR *>41.77< apply, or the written consent of the Director of the USPTO is obtained for the consideration of matters not already adjudicated, where sufficient cause has been shown. >See 37 CFR 1.981.<

A rejection under 37 CFR *>41.77(b)(1)< in effect nullifies the ACP and RAN and automatically reopens the prosecution of the subject matter of the claims so rejected by the Board. Accordingly, the written consent of the TC Director is not required on the next Office action.

The written consent of the TC Director is, however, required for an action reopening prosecution where the reexamination proceeding has been remanded to the examiner for a failure to follow appropriate procedure, to provide more information, or to consider something not yet considered, and the examiner then concludes after consideration of all the evidence and argument that a decision as to patentability made in the RAN should be changed. If so, the prosecution would be reopened with the written consent of the TC Director and an ACP issued, so that any party adversely affected by the change in the examiner’s position will have an opportunity to consider it and subsequently appeal the examiner’s new decision.

The TC Director will decide any petition to reopen prosecution of an *inter partes* reexamination proceeding after decision by the Board, where no court action has been filed. MPEP § 1002.02(c), item 1. In addition, the Director of the USPTO entertains petitions to reopen certain cases in which an appellant has sought review by the court. This procedure is restricted to cases which have been decided by the Board and which are amenable to settlement without the need for going forward with the court proceeding. See MPEP § 1214.07.

2683 Appeal to Courts [R-3]

35 U.S.C. 141. Appeal to the Court of Appeals for the Federal Circuit.

A patent owner, or a third-party requester in an inter partes reexamination proceeding, who is in any reexamination proceeding dissatisfied with the final decision in an appeal to the Board of Patent Appeals and Interferences under section 134 may appeal the decision only to the United States Court of Appeals for the Federal Circuit.

37 CFR 1.983. Appeal to the United States Court of Appeals for the Federal Circuit in inter partes reexamination.

(a) The patent owner or third party requester in an inter partes reexamination proceeding who is a party to an appeal to the Board of Patent Appeals and Interferences and who is dissatisfied with the decision of the Board of Patent Appeals and Interferences may, subject to § 1.979(e), appeal to the U.S. Court of Appeals for the Federal Circuit and may be a party to any appeal thereto taken from a reexamination decision of the Board of Patent Appeals and Interferences.

(b) The appellant must take the following steps in such an appeal:

(1) In the U.S. Patent and Trademark Office, timely file a written notice of appeal directed to the Director in accordance with §§ 1.302 and 1.304;

(2) In the U.S. Court of Appeals for the Federal Circuit, file a copy of the notice of appeal and pay the fee, as provided for in the rules of the U.S. Court of Appeals for the Federal Circuit; and

(3) Serve a copy of the notice of appeal on every other party in the reexamination proceeding in the manner provided in § 1.248.

(c) If the patent owner has filed a notice of appeal to the U.S. Court of Appeals for the Federal Circuit, the third party requester may cross appeal to the U.S. Court of Appeals for the Federal Circuit if also dissatisfied with the decision of the Board of Patent Appeals and Interferences.

(d) If the third party requester has filed a notice of appeal to the U.S. Court of Appeals for the Federal Circuit, the patent owner may cross appeal to the U.S. Court of Appeals for the Federal Circuit if also dissatisfied with the decision of the Board of Patent Appeals and Interferences.

(e) A party electing to participate in an appellant's appeal must, within fourteen days of service of the appellant's notice of appeal under paragraph (b) of this section, or notice of cross appeal under paragraphs (c) or (d) of this section, take the following steps:

(1) In the U.S. Patent and Trademark Office, timely file a written notice directed to the Director electing to participate in the appellant's appeal to the U.S. Court of Appeals for the Federal Circuit by mail to, or hand service on, the General Counsel as provided in § 104.2;

(2) In the U.S. Court of Appeals for the Federal Circuit, file a copy of the notice electing to participate in accordance with the rules of the U.S. Court of Appeals for the Federal Circuit; and

(3) Serve a copy of the notice electing to participate on every other party in the reexamination proceeding in the manner provided in § 1.248.

(f) Notwithstanding any provision of the rules, in any reexamination proceeding commenced prior to November 2, 2002, the third party requester is precluded from appealing and cross appealing any decision of the Board of Patent Appeals and Interferences to the U.S. Court of Appeals for the Federal Circuit, and the third party requester is precluded from participating in any appeal taken by the patent owner to the U.S. Court of Appeals for the Federal Circuit.

I. APPEAL TO UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT IS AVAILABLE

A. For Any Inter Partes Reexamination Proceeding "Commenced" on or After November 2, 2002

Section 13106 of Public Law 107-273, 116 Stat. 1758, 1899-1906 (2002), newly granted the *inter partes* reexamination **third party requester** the right to appeal an adverse decision of the Board of Patent Appeals and Interferences (Board) to the Court of Appeals for the Federal Circuit (Federal Circuit). 35 U.S.C. 315(b)(1). It further authorized the third party requester to be a party to any appeal taken by the patent owner to the Federal Circuit. 35 U.S.C. 315(b)(2). Also, section 13106 of Public Law 107-273 implicitly permitted the patent owner to be a party to the newly provided for appeal taken by the third party requester to the Federal Circuit. This is because 35 U.S.C. 315(a)(2) states that the patent owner involved in an *inter partes* reexamination proceeding "may be a party to any appeal taken by a third party requester under subsection (b)." The effective date for this revision to the statute is provided in section 13106 of Public Law 107-273 as follows: "The amendments made by this section apply with respect to any reexamination proceeding commenced on or after the date of enactment of this Act."

1. Appeal to the Federal Circuit

A patent owner and/or a third party requester in an *inter partes* reexamination proceeding who is a party to an appeal to the Board and who is dissatisfied with the decision of the Board may, subject to 37 CFR *41.81<, appeal to the Federal Circuit. Pursuant to 37 CFR *41.81<, the patent owner and/or third party requester may **not** appeal to the Federal Circuit until all parties' rights to request rehearing have been exhausted, at which time the decision of the Board is final and appealable to the Federal Circuit.

A patent owner or a third party requester appellant must take the following steps in such an appeal to the Federal Circuit (37 CFR 1.983(b)):

(A) In the Office, timely file a written notice of appeal directed to the Director of the USPTO in accordance with 37 CFR 1.302 and 1.304;

(B) In the Federal Circuit, file a copy of the notice of appeal and pay the fee, as provided for in the rules of the Federal Circuit; and

(C) Serve a copy of the notice of appeal on every other party in the reexamination proceeding in the manner provided in 37 CFR 1.248.

2. Cross Appeal

If the patent owner has filed a notice of appeal to the Federal Circuit, the third party requester may cross appeal to the Federal Circuit if also dissatisfied with the decision of the Board. 37 CFR 1.983(c).

If the third party requester has filed a notice of appeal to the Federal Circuit, the patent owner may cross appeal to the Federal Circuit if also dissatisfied with the decision of the Board. 37 CFR 1.983(d).

Such cross appeals would be taken under the rules of the Federal Circuit for cross appeals.

3. Participation in Other Party's Appeal

The patent owner and the third party requester may each be a party to, i.e., participate in, each other's appeal to the Federal Circuit from an *inter partes* reexamination decision of the Board (37 CFR 1.983(e)).

A party electing to participate in an appellant's appeal must, within fourteen days of service of the appellant's notice of appeal (37 CFR 1.983(b)(3)) or

notice of cross appeal (37 CFR 1.983(c) or (d)), take the following steps:

(A) In the Office, timely file a written notice directed to the Director of the USPTO electing to participate in the appellant's appeal to the Federal Circuit;

(B) In the Federal Circuit, file a copy of the notice electing to participate; and

(C) Serve a copy of the notice electing to participate on every other party in the reexamination proceeding in the manner provided in 37 CFR 1.248.

B. For Any *Inter Partes* Reexamination Proceeding "Commenced" Prior to November 2, 2002

In any reexamination proceeding commenced **prior** to November 2, 2002, only the patent owner can appeal to the U.S. Court of Appeals for the Federal Circuit. Pursuant to 35 U.S.C. 134(c), as it existed **prior** to its November 2, 2002 revision via Public Law 107-273, the third party requester is expressly precluded from appealing (and cross appealing) any decision of the Board in an *inter partes* reexamination proceeding commenced **prior** to November 2, 2002, to the Federal Circuit. The third party requester is also precluded from participating in any appeal taken by the patent owner to the Federal Circuit.

Pursuant to 37 CFR 1.983, a patent owner in a reexamination proceeding commenced **prior** to November 2, 2002, who is dissatisfied with the decision of the Board may, subject to 37 CFR *41.81<, appeal to the Federal Circuit. Under 37 CFR *41.81<, the patent owner may **not** appeal to the Federal Circuit until all parties' rights to request rehearing of the Board's decision have been exhausted, at which time the decision of the Board is final and appealable by the patent owner to the Federal Circuit.

The patent owner must take the following steps in such an appeal:

(A) In the Office, timely file a written notice of appeal directed to the Director of the USPTO in accordance with 37 CFR 1.302 and 1.304;

(B) In the Federal Circuit, file a copy of the notice of appeal and pay the fee, as provided for in the rules of the Federal Circuit; and

(C) Serve a copy of the notice of appeal on the third party requester(s) in the reexamination proceeding in the manner provided in 37 CFR 1.248.

II. APPEAL TO U.S. DISTRICT COURT FOR THE DISTRICT OF COLUMBIA IS NOT AVAILABLE

The remedy by civil action under 35 U.S.C. 145 is not available to the patent owner and the third party requester in an *inter partes* reexamination proceeding. Patent owners and third party requesters dissatisfied with a decision of the Board in an *inter partes* reexamination proceeding are not permitted to file a civil action against the Director of the USPTO in the U.S. District Court for the District of Columbia. Instead, they are limited to appealing decisions of the Office to the Federal Circuit.

When the optional *inter partes* reexamination alternative was added to the reexamination statute, the legislation did not provide the parties an avenue of judicial review by civil action under 35 U.S.C. 145 in *inter partes* reexamination proceedings (nor is this avenue available for *ex parte* reexamination of a patent that issued from an original application filed on or after November 29, 1999; see MPEP § 2279). Federal District Court proceedings are generally complicated and time consuming and, therefore, are contrary to the goal of expeditious resolution of reexamination proceedings. Accordingly, the first sentence of 35 U.S.C. 145 was amended to read: “An **applicant** dissatisfied with the decision of the Board of Patent Appeals and Interferences in an appeal under **134(a)** of this title may, unless appeal has been taken to the United States Court of Appeals for the Federal Circuit, have remedy by civil action against the Director in the United States District Court for the District of Columbia if commenced within such time after such decision, not less than sixty days, as the Director appoints.” (emphasis added). Note that 35 U.S.C. 134 part (a), which **is** included by 35 U.S.C. 145 is limited to applicants and applications, while 35 U.S.C. 134 parts (b) and (c) which **are not** included by 35 U.S.C. 145 are directed to reexamination and the patent owner and the third party requester, respectively.

2684 Information Material to Patentability in Reexamination Proceeding [Added R-2]

37 CFR 1.933. *Patent owner duty of disclosure in inter partes reexamination proceedings.*

(a) Each individual associated with the patent owner in an *inter partes* reexamination proceeding has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability in a reexamination proceeding as set forth in § 1.555(a) and (b). The duty to disclose all information known to be material to patentability in an *inter partes* reexamination proceeding is deemed to be satisfied by filing a paper in compliance with the requirements set forth in § 1.555(a) and (b).

(b) The responsibility for compliance with this section rests upon the individuals designated in paragraph (a) of this section, and no evaluation will be made by the Office in the reexamination proceeding as to compliance with this section. If questions of compliance with this section are raised by the patent owner or the third party requester during a reexamination proceeding, they will be noted as unresolved questions in accordance with § 1.906(c).

Duty of disclosure considerations as to *inter partes* reexamination proceedings parallel those of *ex parte* reexamination proceedings. In this regard, 37 CFR 1.933 incorporates the provisions of 37 CFR 1.555(a) and (b). See MPEP § 2280 for a discussion of the duty of disclosure in reexamination.

Any fraud practiced or attempted on the Office or any violation of the duty of disclosure through bad faith or intentional misconduct results in noncompliance with 37 CFR 1.555(a). This duty of disclosure is consistent with the duty placed on patent applicants by 37 CFR 1.56. Any such issues raised by the patent owner or the third party requester during an *inter partes* reexamination proceeding will merely be noted as unresolved questions under 37 CFR 1.906(c).

2685 No Interviews on Merits in *Inter Partes* Reexamination Proceedings [Added R-2]

37 CFR 1.955. *Interviews prohibited in inter partes reexamination proceedings.*

There will be no interviews in an *inter partes* reexamination proceeding which discuss the merits of the proceeding.

Pursuant to 37 CFR 1.955, an interview which discusses the merits of a proceeding will not be permitted in *inter partes* reexamination proceedings. Thus, in an *inter partes* reexamination proceeding, there

will be no *inter partes* interview as to the substance of the proceeding. Also, there will be no separate *ex parte* interview as to the substance of the proceeding with either the patent owner or the third party requester. Accordingly, where a party requests any information as to the merits of a reexamination proceeding, the examiner will not conduct a personal or telephone interview with that party to provide the information. Further, an informal amendment by the patent owner will not be accepted, because that would be tantamount to an *ex parte* interview. All communications between the Office and the patent owner (and the third party requester) which are directed to the merits of the proceeding must be in writing and filed with the Office for entry into the record of the proceeding.

Questions on strictly procedural matters may be discussed with the parties. The guidance to follow is that any information which a person could obtain *by reading the file* (which is open to the public) is procedural, and it *may be discussed*. Matters *not available from a reading of the file* are considered as relating to the merits of the proceeding, and *may not be discussed*. Thus, for example, a question relating to when the next Office action will be rendered is improper as it relates to the merits of the proceeding (because this information cannot be obtained from a reading of the file).

2686 Notification of Existence of Prior or Concurrent Proceedings and Decisions Thereon [R-3]

37 CFR 1.985. *Notification of prior or concurrent proceedings in inter partes reexamination.*

(a) In any *inter partes* reexamination proceeding, the patent owner shall call the attention of the Office to any prior or concurrent proceedings in which the patent is or was involved, including but not limited to interference, reissue, reexamination, or litigation and the results of such proceedings.

(b) Notwithstanding any provision of the rules, any person at any time may file a paper in an *inter partes* reexamination proceeding notifying the Office of a prior or concurrent proceedings in which the same patent is or was involved, including but not limited to interference, reissue, reexamination, or litigation and the results of such proceedings. Such paper must be limited to merely providing notice of the other proceeding without discussion of issues of the current *inter partes* reexamination proceeding. Any paper not so limited will be returned to the sender.

It is important for the Office to be aware of any prior or concurrent proceedings in which a patent undergoing *inter partes* reexamination is or was involved, such as interferences, reissues, reexaminations or litigations, and any results of such proceedings. In accordance with 37 CFR 1.985, the patent owner is required to provide the Office with information regarding the existence of any such proceedings, and the results thereof, if known. Ordinarily, while an *inter partes* reexamination proceeding is pending, third party submissions filed after the date of the order are not *entered into* the reexamination file or the patent file, unless the third party is a third party reexamination requester. However, in order to ensure a complete file, with updated status information regarding prior or concurrent proceedings regarding the patent under reexamination, the Office will, at any time, accept from any parties, for *entry into* the reexamination file, copies of notices of suits and other proceedings involving the patent and copies of decisions or papers filed in the court from litigations or other proceedings involving the patent. Persons making such submissions must limit the submissions to the notification, and must not include further arguments or information. Where a submission is not limited to bare notice of the prior or concurrent proceedings (in which a patent undergoing reexamination is or was involved), the submission will be returned by the Office. Any proper submission pursuant to *37 CFR 1.985* will be promptly *entered into* the record of the reexamination file. See MPEP § 2686.04 for Office investigation for prior or concurrent litigation.

2686.01 Multiple Copending Reexamination Proceedings [R-3]

37 CFR 1.989. *Merger of concurrent reexamination proceedings.*

(a) If any reexamination is ordered while a prior *inter partes* reexamination proceeding is pending for the same patent and prosecution in the prior *inter partes* reexamination proceeding has not been terminated, a decision may be made to merge the two proceedings or to suspend one of the two proceedings. Where merger is ordered, the merged examination will normally result in the issuance of a single reexamination certificate under § 1.997.

(b) An *inter partes* reexamination proceeding filed under § 1.913 which is merged with an *ex parte* reexamination proceeding filed under § 1.510 will result in the merged proceeding being governed by §§ 1.902 through 1.997, except that the rights of any

third party requester of the *ex parte* reexamination shall be governed by §§ 1.510 through 1.560.

This section discusses multiple copending reexamination requests which are filed on the same patent, where at least one of the multiple copending reexamination requests is an *inter partes* request. If all of the multiple copending reexamination requests are *ex parte* requests, see MPEP § 2283.

Initially, it is appropriate to point out who can file a second or subsequent request for reexamination while a first reexamination proceeding is pending.

Case (1) - The earlier (pending) reexamination is an *inter partes* reexamination:

(1)(a) The subsequent request is an *inter partes* reexamination request. Pursuant to 35 U.S.C. 317(a), once an order for *inter partes* reexamination has been issued in a first reexamination proceeding, neither the third party requester, nor its privy, may file a subsequent request for an *inter partes* reexamination of the patent until an *inter partes* reexamination certificate is issued, unless authorized by the Director of the USPTO. In addition, the patent owner is not entitled to file any *inter partes* reexamination request (see MPEP § 2612). Thus, only a third party who is not a party to the earlier pending *inter partes* reexamination proceeding (nor a privy) can file the subsequent *inter partes* reexamination request.

(1)(b) The subsequent request is an *ex parte* reexamination request. Any party (including the patent owner) can file the subsequent *ex parte* reexamination request.

Case (2) - The earlier (pending) reexamination is an *ex parte* reexamination:

(2)(a) The subsequent request is an *inter partes* reexamination request. Any party other than the patent owner can file the subsequent *inter partes* reexamination request.

(2)(b) The subsequent (later) request is an *ex parte* reexamination request. Any party (including the patent owner) can file the subsequent *ex parte* reexamination request.

In order for the second or subsequent request to be granted, a substantial new question of patentability must be raised by the art (patents and/or printed publications) cited in the second or subsequent request for reexamination. See MPEP § 2640 regarding whether a substantial new question of patentability is raised by

the art cited in a second or subsequent request filed while a first reexamination proceeding is pending.

If the second or subsequent request is granted, the decision on whether or not to merge the proceedings will be made by the Office of Patent Legal Administration. (OPLA). No decision on merging the reexaminations should be made until such time as reexamination is actually ordered in the later filed request for reexamination.

I. WHEN PROCEEDINGS ARE MERGED

If a second request for reexamination is filed where a certificate will issue for a first reexamination later than 3 months from the filing of the second request, the proceedings normally will be merged once reexamination has been ordered in both proceedings. In this situation the second request is decided based on the original patent claims and if reexamination is ordered in the second proceeding, the reexamination proceedings normally would be merged. If, however, the first reexamination is in “issue” for publication of a certificate, it might not be possible to withdraw the first reexamination from issue in some instances.

After the second reexamination proceeding is merged with the first reexamination proceeding, prosecution will be conducted at the most advanced point possible for the first proceeding. Thus, if a final rejection (a Right of Appeal Notice) has been issued in the first proceeding, prosecution will ordinarily be reopened to consider the substantial new question of patentability presented in the second request unless the examiner concludes that no new rejection or change of position is warranted. Also, the patent owner will be provided with an opportunity to respond to any new rejection in a merged reexamination proceeding prior to an Action Closing Prosecution (ACP) being issued. See MPEP § 2671.02.

Where the reexamination proceedings are merged, a single certificate will be issued based upon the merged proceedings, 37 CFR 1.989(a).

II. WHEN PROCEEDING IS SUSPENDED

It may also be desirable in certain situations to suspend one of the proceedings for a short and specified period of time. For example, a suspension of a first reexamination proceeding may be issued to allow time for the decision on the second request. Further, after the second proceeding has been ordered, it may

be desirable to suspend the second proceeding prior to merging, where the first proceeding is presently on appeal before a Federal court to await the court's decision prior to merging. A suspension will only be granted in exceptional (extraordinary) instances because of the statutory requirements that examination proceed with "special dispatch", and the express written approval by the OPLA must be obtained. Suspension will not be granted when there is an outstanding Office action.

III. MERGER OF REEXAMINATIONS

The following guidelines should be observed when two requests for reexamination directed to a single patent have been filed:

The second request (i.e., Request 2) should be processed as quickly as possible, and assigned to the same examiner to whom the first request (i.e., Request 1) is assigned. Request 2 should be decided immediately after consultation with the Reexamination Legal Advisor (RLA). If Request 2 is denied, prosecution of Request 1 should continue. If Request 2 is granted, a first Office action on the merits will not be sent with the order granting reexamination in the second proceeding. Instead, the order will indicate that an Office action will follow in due course. MPEP § 2660. The order granting the second proceeding will be prepared, reviewed by the Special Program Examiner (SPRE) and then **hand-carried** ** directly to the Central Reexamination Unit (CRU). In the CRU, the order will be mailed specially, and the **two proceedings* will be forwarded to OPLA for preparation of a decision merging the two proceedings.

The decision merging the reexamination proceedings should include a requirement that the patent owner maintain identical claims in both files. It will further require that responses/comments by the patent owner and the third party requester(s) must consist of a single response/comment paper, addressed to both files, filed in duplicate each bearing a signature, for entry in both files. The same applies to any other paper filed in the merged proceeding. The decision will point out that both files will be maintained as separate complete files. Where the claims are already the same in both reexamination files, the decision on merger will indicate at its conclusion that an Office action will be mailed in due course, and that the patent

owner need not take any action at present. Where the claims are not the same in both files, the decision will state at its conclusion that patent owner is given one month to provide an amendment to make the claims the same in each file. After the decision of merger is prepared and signed, the **decision* will be hand-carried directly to the CRU, where the decision will be mailed specially.

**>Where the merger decision indicates that an Office action will follow, the merged proceeding is immediately returned to the examiner, to issue an Office action, after the CRU mailing and processing of the decision. Where the merger decision indicates that the patent owner is given one month to provide an amendment to make the claims the same in each file (identical amendments to be placed in all files), the CRU will retain jurisdiction over the merged reexamination proceeding to await submission of the amendment or the expiration of the time to submit the amendment. After the amendment is received and processed by the CRU, or the time for submitting the amendment expires, the merged proceeding will be returned to the examiner, to issue an Office action.<

Once the **merged proceeding* is returned to the examiner for issuance of an Office action, the examiner should after consultation with the RLA, prepare the action at the most advanced point possible for the first proceeding. Thus, if the first proceeding is ready for an Action Closing Prosecution (ACP) and the second proceeding does not provide any new information which would call for a new ground of rejection, the examiner should issue an ACP for the merged proceeding using the guidance for the prosecution stage set forth below.

If the decision on the reexamination request has not yet been made in Request 1 and Request 1 is grantable, it should be processed to the point where an order granting reexamination is mailed. *An Office action should not be mailed with the order.* Then, Request 1 is normally held until Request 2 is ready for the prosecution stage following an order granting reexamination, or until Request 2 is denied. Request 2 should be determined on its own merits *without reference* in the decision to Request 1. As before, an Office action should not be mailed with the order in Request 2.

A. *The Prosecution Stage, After Merger*

When prosecution is appropriate in merged proceedings, a single combined examiner's action will be prepared. Each action will contain the control number of the two proceedings on every page. A single action cover form (having both control numbers penned in at the top) will be provided by the examiner to the clerical staff. The clerical staff will copy the action cover form, and then use the PALM printer to print the appropriate data on the original for the first request, and on the copy for the second request. ** Each requester will receive a copy of the action and both action cover forms, with the transmission form PTOL-2070 placed on top of the package. The patent owner will get a copy of both action cover forms and the action itself.

When a "Notice Of Intent To Issue *Inter Partes* Reexamination Certificate" (NIRC) is appropriate, plural notices will be printed. Both reexamination files will then be processed. The TC should prepare the file of the concurrent proceedings in the manner specified in MPEP § 2687, before release to Office of Publications (via the CRU).

The above guidance should be extended to situations where more than two requests for reexamination are filed for a single patent. The guidance should also be extended to situations where one of the requests is a request for *ex parte* reexamination. However, where an *ex parte* reexamination is to be included in the merger, allowance must be made for the statement and reply periods provided for in an *ex parte* reexamination after the order granting reexamination is issued. If all the reexamination proceedings to be merged are *ex parte* reexaminations, the present section does not apply, but rather see MPEP § 2283.

IV. PROCEEDINGS NOT MERGED

If a second request for reexamination is filed, and the first reexamination certificate will issue within 3 months from the filing of the second request, the proceedings normally will not be merged. If the certificate on the first reexamination proceeding will issue before the decision on the second request must be decided, the reexamination certificate is generally permitted to issue. The second request is then considered based upon the claims in the patent *as indicated in the issued reexamination certificate*, rather than the original claims of the patent. In such situations, the

proceedings will not be merged. In **NO** case should a decision on the second request be delayed beyond its 3 month deadline.

For processing of the second reexamination proceeding, see MPEP § 2295 and § 2695.

V. FEES IN MERGED PROCEEDINGS

Where the proceedings have been merged and a paper is filed which requires payment of a fee (e.g., >excess claims fee, extension of time fee,< petition fee, appeal fee, brief fee, oral hearing fee), only a single fee need be paid. For example, only one fee need be paid for the patent owner's appellant brief (or that of the third party requester), even though the brief relates to merged multiple proceedings and copies must be filed for each file in the merged proceeding.

VI. PETITION TO MERGE MULTIPLE COPENING REEXAMINATION PROCEEDINGS

No petition to merge multiple reexamination proceedings is necessary since the Office will generally, *sua sponte*, make a decision as to whether or not it is appropriate to merge the multiple reexamination proceedings. If any petition to merge the proceedings is filed prior to the order to reexamine the second request, it will not be considered but will be returned to the party submitting the same by the OPLA. The decision returning such a premature petition will be made of record in both reexamination files, but no copy of the petition will be retained by the Office. See MPEP § 2667.

The patent owner can file a petition to merge the proceedings at any time after the order to reexamine the second request. A requester of any of the multiple reexamination proceedings may also petition to merge the proceedings at any time after the order to reexamine the second request. A petition to merge the multiple proceedings which is filed by a party other than the patent owner or one of the third party requesters of the reexaminations will not be considered but will be returned to that party by the OPLA. Note that the acceptance of a petition to merge the multiple proceedings at any time after the order to reexamine the second request is contrary to 37 CFR 1.939 since such acceptance can be prior to the issuance of the first Office action. Accordingly, the requirement of 37 CFR 1.939 is hereby waived to the extent that a peti-

tion for merger of a reexamination proceeding with a reexamination proceeding or with a reissue (see MPEP § 2686.03) can be submitted after the order to reexamine has been issued in all the reexamination proceedings to be merged. This waiver is made to assure merger at the earliest possible stage.

All decisions on the merits of petitions to merge multiple reexamination proceedings, where at least one of the proceedings is an *inter partes* reexamination, will be made by the OPLA.

Decisions on the merits of petitions to merge multiple reexamination proceedings, where none of the proceedings is an *inter partes* reexamination, will be made by the TC Director (or by the SPRE, if the TC Director delegates such to the SPRE); see MPEP § 2283.

2686.02 Copending Reexamination and Interference Proceedings [R-3]

**>

37 CFR 1.993. Suspension of concurrent interference and inter partes reexamination proceeding.

If a patent in the process of inter partes reexamination is or becomes involved in an interference, the Director may suspend the inter partes reexamination or the interference. The Director will not consider a request to suspend an interference unless a motion under § 41.121(a)(3) of this title to suspend the interference has been presented to, and denied by, an administrative patent judge and the request is filed within ten (10) days of a decision by an administrative patent judge denying the motion for suspension or such other time as the administrative patent judge may set.

37 CFR 41.8. Mandatory notices.

(a) In an appeal brief (§§ 41.37, 41.67, or 41.68) or at the initiation of a contested case (§ 41.101), and within 20 days of any change during the proceeding, a party must identify:

- (1) Its real party-in-interest, and
- (2) Each judicial or administrative proceeding that could affect, or be affected by, the Board proceeding.

(b) For contested cases, a party seeking judicial review of a Board proceeding must file a notice with the Board of the judicial review within 20 days of the filing of the complaint or the notice of appeal. The notice to the Board must include a copy of the complaint or notice of appeal. See also §§ 1.301 to 1.304 of this title.

37 CFR 41.102. Completion of examination.

Before a contested case is initiated, except as the Board may otherwise authorize, for each involved application and patent:

- (a) Examination or reexamination must be completed, and
- (b) There must be at least one claim that:

- (1) Is patentable but for a judgment in the contested case, and
- (2) Would be involved in the contested case.

37 CFR 41.103. Jurisdiction over involved files.

The Board acquires jurisdiction over any involved file when the Board initiates a contested case. Other proceedings for the involved file within the Office are suspended except as the Board may order.<

A patent being reexamined in an *inter partes* reexamination proceeding may be involved in an interference proceeding with at least one application, where the patent and the application are claiming the same patentable invention, and at least one of the application's claims to that invention are patentable to the applicant. See MPEP *>Chapter 2300<.

The general policy of the Office is that a reexamination proceeding will not be delayed, or stayed, because of an interference or the possibility of an interference. The *>reason< for this policy **>is< the requirement of 35 U.S.C. 314(c) that all reexamination proceedings be conducted with "special dispatch" within the Office. **

In general, the Office will follow the practice of making the required and necessary decisions in the *inter partes* reexamination proceeding and, at the same time, going forward with the interference to the extent desirable. >(See *Shaked v. Taniguchi*, 21 USPQ2d 1289 (Bd. Pat. App. & Inter. 1991), where it was pointed out that neither the reexamination nor the interference will ordinarily be stayed where both proceedings are before the Office.) It is to be noted that 37 CFR 41.103 provides the Board with the flexibility to tailor a specific solution to occurrences where reexamination and interference proceedings for the same patent are copending, as such occurrences may arise.< Decisions in the interference will take into consideration the status of the reexamination proceeding and what is occurring therein. The decision as to what actions are taken in the interference will, in general, be taken in accordance with normal interference practice.

**>Although< a patent being reexamined via a reexamination proceeding may become involved in an interference proceeding, the reexamination proceeding itself can never be involved in an interference proceeding. See 35 U.S.C. 135(a) which states that "[w]henever an application is made for a patent which, in the opinion of the Director, would interfere

with any pending application, or with any unexpired patent, an interference may be declared” (emphasis added). The reexamination proceeding is neither an application nor a patent.

I. ATTEMPTING TO PROVOKE AN INTERFERENCE WITH A PATENT INVOLVED IN A REEXAMINATION PROCEEDING

See MPEP § 2284 for a discussion of the situation where an amendment seeking to provoke an interference with a patent involved in a reexamination proceeding is filed in a pending application. The practice and procedure in this area as to *inter partes* reexamination proceedings parallels that of *ex parte* reexamination proceedings.

II. MOTION TO SUSPEND INTERFERENCE UNDER 37 CFR 41.121(a)(3) PENDING THE OUTCOME OF A REEXAMINATION PROCEEDING

A miscellaneous motion under 37 CFR 41.121(a)(3) to suspend an interference pending the outcome of a reexamination proceeding may be made at any time during the interference by any party thereto. See 37 CFR 41.123(b) for the proper procedure. The motion must be presented to the Administrative Patent Judge (APJ) who will decide the motion based on the particular fact situation. However, suspension is not favored. Normally, no consideration will be given such a motion unless and until a reexamination order is issued, nor will suspension of the interference normally be permitted until after any motions have been disposed of in the interference proceeding. If the motion under 37 CFR 41.121(a)(3) is denied by the APJ, a request to stay the interference may be made to the Director of the USPTO under 37 CFR 1.993. A request to stay an interference under 37 CFR 1.993 will be decided by the Chief Administrative Patent Judge of the Board.

III. REQUEST FOR REEXAMINATION FILED DURING INTERFERENCE

In view of the provisions of 37 CFR 1.913, “[a]ny person may, at any time during the period of enforceability of a patent” file a request for *inter partes* reexamination. Under 37 CFR 41.8(a), the patent

owner must notify the Board that a request for reexamination was filed within **>twenty<** days of receiving notice of the request having been filed. Such requests for reexamination will be processed in the normal manner. No delay, or stay, of the reexamination will occur where the third party requester is not a party to the interference, or where the requester is a party to the interference but does not timely petition for a stay or delay. If the examiner orders reexamination pursuant to 37 CFR 1.931 and subsequently, in the reexamination proceeding, rejects a patent claim corresponding to a count in the interference, the attention of the **>Board<** shall be called to the rejection ******.

>

IV. PETITION TO STAY REEXAMINATION PROCEEDING BECAUSE OF INTERFERENCE

Any petition to stay an *inter partes* reexamination proceeding, because of an interference, which is filed prior to the first Office action in the reexamination proceeding will not be considered, but will be returned to the party submitting the petition. See 37 CFR 1.939 and MPEP § 2625. The decision returning such a premature petition will be made of record in the reexamination file, but no copy of the petition will be retained by the Office. A petition to stay the reexamination proceeding because of the interference may be filed by the patent owner after the first Office action in the reexamination proceeding. If a party to the interference, other than the patent owner, is also a requester of the reexamination, that party may also petition to stay the reexamination proceeding after the first Office action. If the party to the interference other than patent owner is not the reexamination requester, any petition by that party is improper under 37 CFR 1.905 and will not be considered. Any such improper petitions will be returned to the party submitting the same. Premature petitions to stay the reexamination proceedings, i.e., those filed prior to the first Office action in the reexamination proceeding, will be returned by a Legal Advisor of the Office of Patent Legal Administration (OPLA) as premature. Petitions to stay filed subsequent to the date of the first Office action in the reexamination proceeding will be referred to the OPLA for decision by a Senior Legal Advisor of that Office. All decisions on the

merits of petitions to stay a reexamination proceeding because of an interference will be made in the OPLA.
*>

V. < ACTION IN INTERFERENCE FOLLOWING REEXAMINATION

If one or more claims of a patent which is involved in an interference are canceled or amended by the issuance >and publication< of a reexamination certificate, **>the Board must be promptly notified<.

Upon issuance >and publication< of the reexamination certificate, the patent owner must notify the *>Board< of such issuance.

2686.03 Copending Reexamination and Reissue Proceedings [R-3]

37 CFR 1.991. Merger of concurrent reissue application and inter partes reexamination proceeding.

When a third party requester is involved in one or more proceedings, including an *inter partes* reexamination proceeding, the merger of such proceedings will be accomplished so as to preserve the third party requester's right to participate to the extent specifically provided for in these regulations. In merged proceedings involving different requesters, any paper filed by one party in the merged proceeding shall be served on all other parties of the merged proceeding.

37 CFR 1.937. Conduct of inter partes reexamination.

(a) All *inter partes* reexamination proceedings, including any appeals to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office, unless the Director makes a determination that there is good cause for suspending the reexamination proceeding.

37 CFR 1.995. Third party requester's participation rights preserved in merged proceeding.

When a third party requester is involved in one or more proceedings, including an *inter partes* reexamination proceeding, the merger of such proceedings will be accomplished so as to preserve the third party requester's right to participate to the extent specifically provided for in these regulations. In merged proceedings involving different requesters, any paper filed by one party in the merged proceeding shall be served on all other parties of the merged proceeding.

37 CFR 1.997. Issuance of inter partes reexamination certificate.

(a) Upon the conclusion of an *inter partes* reexamination proceeding, the Director will issue a certificate in accordance with 35 U.S.C. 316 setting forth the results of the *inter partes* reexamination proceeding and the content of the patent following the *inter partes* reexamination proceeding.

(d) If a certificate has been issued which cancels all of the claims of the patent, no further Office proceedings will be conducted with that patent or any reissue applications or any reexamination requests relating thereto.

(e) If the *inter partes* reexamination proceeding is terminated by the grant of a reissued patent as provided in § 1.991, the reissued patent will constitute the reexamination certificate required by this section and 35 U.S.C. 316.

37 CFR 1.176. Examination of reissue.

(a) A reissue application will be examined in the same manner as a non-reissue, non-provisional application, and will be subject to all the requirements of the rules related to non-reissue applications. Applications for reissue will be acted on by the examiner in advance of other applications.

The general policy of the Office is that the examination of a reissue application and an *inter partes* reexamination proceeding will not be conducted separately at the same time as to a particular patent. The reason for this policy is to permit timely resolution of both the reissue and the reexamination to the extent possible and to prevent inconsistent, and possibly conflicting, amendments from being introduced into the two files on behalf of the patent owner. Accordingly, if both a reissue application and a reexamination proceeding are pending concurrently on a patent, a decision will normally be made to merge the reissue application examination and the reexamination or to stay one of the two. See *In re Onda*, 229 USPQ 235 (Comm'r Pat. 1985). The decision as to whether the reissue application examination and the reexamination proceeding are to be merged, or which of the two (if any) is to be stayed, is made in the Office of Patent Legal Administration (OPLA).

Where a reissue application and a reexamination proceeding are pending concurrently on a patent, the patent owner, i.e., the reissue applicant, has a responsibility to notify the Office of such. 37 CFR 1.178(b), 1.565(a), and 1.985. The patent owner should file in the reissue application, as early as possible, a Notification of Concurrent Proceedings pursuant to 37 CFR 1.178(b) in order to notify the Office in the reissue application of the existence of the reexamination proceeding on the same patent. See MPEP § 1418. In addition, the patent owner should file in the reexamination proceeding, as early as possible, a Notification of Concurrent Proceedings pursuant to 37 CFR

1.565(a) or 1.985 (depending on whether the reexamination proceeding is an *ex parte* reexamination proceeding or an *inter partes* reexamination proceeding) to notify the Office in the reexamination proceeding of the existence of the two concurrent proceedings.

I. TIME FOR MAKING DECISION ON MERGING OR STAYING THE PROCEEDINGS

A decision whether or not to merge the examination of a reissue application and an *inter partes* reexamination proceeding, or to stay one of the two, will not be made prior to the mailing of the order to reexamine the patent pursuant to 37 CFR 1.931. Until such time as the reexamination is ordered, the examination of the reissue application will proceed. A determination on the request for reexamination should not be delayed despite the existence of a copending reissue application, since 35 U.S.C. 312(a) requires a determination within 3 months following the filing date of the request. See MPEP § 2641. If the decision on the request denies reexamination (MPEP § 2647), the examination of the reissue application should be continued. If reexamination is to be ordered (MPEP § 2646), ***>*the signed order should be (after review by the Technology Center (TC) Special Program Examiner (SPRE)) promptly forwarded to the Office of Patent Legal Administration (OPLA) for mailing; no first Office action will accompany the decision ordering reexamination. At the same time that the signed order is forwarded to OPLA, (A) OPLA should be notified by e-mail that the proceedings are ready for consideration of merger, and (B) if any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA.<

If a reissue application is filed during the pendency of a reexamination proceeding ***>*, the OPLA should be notified by e-mail, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the e-mail notification to OPLA.<

The decision on whether or not to merge the reissue application examination and the reexamination proceeding or which (if any) is to be stayed (suspended),

will generally be made as promptly as possible after receipt of ***>*the e-mail notification to OPLA, and delivery of all the paper files to< the OPLA.

Until a decision is mailed merging the reissue application examination and the reexamination proceeding, or staying one of them, prosecution in the reissue application and the reexamination proceeding will continue and be conducted simultaneously, but separately.

The Office may in certain situations issue a certificate at the termination of >the prosecution of< a reexamination proceeding, even if a copending reissue application or another reexamination request has already been filed.

II. CONSIDERATIONS IN DECIDING WHETHER TO MERGE THE REISSUE AND REEXAMINATION OR WHETHER TO STAY ONE OF THEM

The decision on whether to merge the reissue application examination and reexamination proceeding, or stay one of them, will be made on a case-by-case basis. Where issues are raised in the reissue application that would not be proper for consideration in reexamination and/or not be proper for comment by the reexamination third party requester, merger would ordinarily **not** be ordered, and one of the two proceedings stayed. A decision to stay the reexamination proceeding will **only** be issued in exceptional instances because of the statutory requirements that examination proceed with “special dispatch.” Where there is “good cause” to stay the reexamination proceeding, the Director may do so pursuant to 35 U.S.C. 314(c). The status of the reissue application and the reexamination proceeding will also be taken into account in the decision as to whether merger will be ordered.

A. *Reissue About To Issue, Reexamination Requested*

If the reissue patent will issue before the determination on the reexamination request must be made, the determination on the request should normally be made after the granting of the reissue patent; and then the determination should be made on the basis of the claims in the reissue patent. The reexamination, if ordered, would then be based on the reissue patent claims rather than the original patent claims. Since the

reissue application would no longer be pending, the reexamination would be processed in a normal manner.

Where a reissue patent has been issued, the determination on the request for reexamination should specifically point out that the determination has been made on the claims of the reissue patent and not on the claims of the original patent. Any amendment made in the reexamination proceeding should treat the changes made by the reissue as the text of the patent, and all bracketing and underlining made with respect to the patent **as changed by the reissue**. Note that the reissue claims used as the starting point in the reexamination proceeding must be presented in the reexamination proceeding as a “clean copy.” Thus, words bracketed in the reissue patent claim(s) would not appear at all in the reexamination clean copy of the claim(s). Also, words that were added via the reissue patent will appear in italics in the reissue patent, but must appear in plain format in the reexamination clean copy of the claim(s).

If a reissue patent issues on the patent under reexamination after reexamination is ordered, the next action from the examiner in the reexamination should point out that further proceedings in the reexamination will be based on the claims of the reissue patent and not on the patent surrendered. Form paragraph 22.05 may be used in the Office action.

¶ 22.05 *Reexamination (Ex Parte or Inter Partes) Based on Reissue Claims*

In view of the surrender of original Patent No. [1] and the granting of Reissue Patent No. [2] which issued on [3], all subsequent proceedings in this reexamination will be based on the reissue patent claims.

Where the reissue patent has issued prior to the filing of a request for reexamination of the original patent, see MPEP § 2640.

B. Reissue Pending, Reexamination Request Filed

Where a reissue patent will not be granted prior to the expiration of the 3-month period for making the determination on the reexamination request, a decision will be made *after an order to reexamine is issued* as to whether the reissue application examination and the reexamination proceeding are to be merged, or which of the two (if any) is to be stayed. In

this situation, no first Office action will have accompanied the order for reexamination.

In making a decision on whether or not to merge the reissue application examination and the reexamination proceeding, consideration will be given as to whether issues are raised in the reissue application that would not be proper for consideration in reexamination and/or not be proper for comment by the reexamination third party requester. If such issues are raised, merger would ordinarily **not** be ordered, and one of the two proceedings stayed. Consideration will also be given to the status of the reissue application examination at the time the order to reexamine the patent pursuant to 37 CFR 1.931 is mailed. For example, if the reissue application is on appeal to the Board of Patent Appeals and Interferences (Board) or to the courts, that fact would be considered in making a decision whether to merge the reissue application examination and the reexamination proceeding or stay one of them. See *In re Scragg*, 215 USPQ 715 (Comm’r Pat. 1982), *In re Stoddard*, 213 USPQ 386 (Comm’r Pat. 1982).

If merger of the reissue application examination and the reexamination proceeding is ordered, the order merging them will also require that the patent owner place the same claims in the reissue application and in the reexamination proceeding for purposes of the merger. The decision to merge may require an amendment to be filed by the patent owner to provide identical sets of claims, within a specified time set in the decision to merge.

If merger would be appropriate, but the examination of the reissue application has progressed to a point where a merger is not desirable at that time, then the reexamination proceeding will generally be stayed until the reissue application examination is complete on the issues then pending. After completion of the examination on the issues then pending in the reissue application examination, the stay of the reexamination proceeding will be removed. The proceedings would be merged if the reissue application is pending, or the reexamination proceeding will be conducted separately if the reissue application has become abandoned. The reissue application examination would be reopened, if necessary, for merger of the reexamination proceeding therewith. If a stay of a reexamination proceeding has been removed following a reissue application examination, the first Office action will

set a shortened statutory period for response of one month or thirty days (whichever is longer) unless a longer period for response clearly is warranted by the nature of the examiner's action. The second Office action will normally be final and will also set a one month or thirty days period for response. These shortened periods are considered necessary to prevent undue delay in concluding the proceedings and also to proceed with "special dispatch" in view of the earlier stay.

If the reissue application examination and reexamination proceedings are merged, the issuance of the reissue patent will also serve as the *inter partes* reexamination certificate under 37 CFR 1.997, and the reissue patent will so indicate.

C. *Reexamination Proceedings Underway, Reissue Application Filed*

When a reissue application is filed after an *inter partes* reexamination request has been filed, the OPLA should be notified by e-mail, as promptly as possible after the reissue application reaches the TC. A determination will be made as to whether reexamination should be ordered. If reexamination is ordered, no first Office action will accompany the decision ordering reexamination. The order and any of the files that are paper files should then be hand delivered to the OPLA.

Where reexamination has already been ordered prior to the filing of a reissue application, the OPLA should be notified by e-mail, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination file, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the e-mail notification to OPLA.

In making a decision on whether or not to merge the reissue application examination and the reexamination proceeding, consideration will be given as to whether issues are raised in the reissue application that would not be proper for consideration in reexamination and/or not be proper for comment by the reexamination third party requester. If such issues are raised, merger would ordinarily **not** be ordered, and one of the two proceedings stayed. In addition, consideration will also be given to the status of the reex-

amination proceeding. For example, if the reexamination proceeding is on appeal to the Board or to the Court of Appeals for the Federal Circuit, that fact would be considered in making a decision whether to merge the reissue application examination and the reexamination proceeding or stay one of them.

D. *Examiner Assignment*

With respect to the appropriate examiner assignment of the merged reexamination proceeding and the reissue application examination, see MPEP § 2636.

III. CONDUCT OF MERGED REISSUE AND REEXAMINATION PROCEEDING

The decision ordering merger will set forth the practice and procedure to be followed in the examination and prosecution of the merged reissue and *inter partes* reexamination proceeding. Any questions as to the practice and procedure set forth should be referred to the OPLA Reexamination Legal Advisor (RLA) assigned to the *inter partes* reexamination proceeding that is merged with the reissue application. In addition, the examiner will consult with the RLA assigned to the *inter partes* reexamination prior to issuing any Office action in the merged proceeding, in the same manner as he or she would consult with the RLA in an *inter partes* reexamination proceeding that has not been merged.

IV. INTER PARTES REEXAMINATION, EX PARTE REEXAMINATION, AND REISSUE APPLICATION FOR THE SAME PATENT

It will sometimes happen that an *inter partes* reexamination, an *ex parte* reexamination and a reissue application will all be copending. In these situations, the OPLA should be notified by e-mail, as promptly as possible after the reissue application reaches the TC, that the proceedings are ready for consideration of merger. If any of the reexamination files, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the e-mail notification to OPLA. The three most common examples of this are as follows:

(A) A reissue application was previously merged with an *ex parte* reexamination, and then an *inter partes* reexamination is filed. **>An order to reexamine is prepared, and the signed order and any paper files should be promptly hand delivered to the CRU for mailing of the order, and then consideration by the OPLA as to whether or not to merge the proceedings. The OPLA should be notified by e-mail of the hand delivery, and the potential merger consideration.<

(B) A reissue application was previously merged with an *inter partes* reexamination, and then a request for *ex parte* reexamination is filed. After an order to reexamine has been issued, **>the Office of the SPRE will retain jurisdiction over the merged reexamination proceeding< until the patent owner's statement and any reply by the *ex parte* third party requester have been received for the *ex parte* reexamination request, or until the time for filing the same expires. **>OPLA should then be notified by e-mail that the proceedings are ready for consideration of merger. If any of the reexamination files, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the e-mail notification to OPLA.<

(C) An *inter partes* reexamination was merged with an *ex parte* reexamination, and then a reissue application is filed. Once the reissue application is received, **>OPLA should be promptly notified by e-mail that the proceedings are ready for consideration of merger. If any of the reexamination files, the reissue application, and the patent file are paper files, they should be hand delivered to the OPLA at the time of the e-mail notification to OPLA. <

The decision to merge the three proceedings by the OPLA will provide the guidance for conducting the merged proceeding. It is to be noted that the merger will **not** be carried out pursuant to MPEP Chapter 2200. Prosecution prior to the point of merger will remain as-is, in the files.

In the event the *inter partes* reexamination >prosecution< is terminated and only the *ex parte* reexamination and the reissue application remain, the prosecution will no longer be governed by the present section. Any further prosecution will be governed by MPEP Chapter 2200; specifically see MPEP § 2285.

V. PETITION TO MERGE REISSUE APPLICATION AND *INTER PARTES* REEXAMINATION PROCEEDING OR TO STAY EITHER OF THE TWO BECAUSE OF THE EXISTENCE OF THE OTHER

No petition to merge the reexamination proceeding and the reissue application examination, or stay one of them, is necessary, since the Office will generally, *sua sponte*, make a decision to merge the reexamination proceeding and the reissue application examination or to stay one of them. If any petition to merge the reexamination proceeding and the reissue application examination, or to stay one of them because of the other, is filed prior to the determination (37 CFR 1.923) and the order to reexamine (37 CFR 1.931), it will not be considered, but will be returned to the party submitting the same by the OPLA, regardless of whether the petition is filed in the reexamination proceeding, the reissue application, or both. This is necessary in order to prevent premature papers relating to the reexamination proceeding from being filed. The decision returning such a premature petition will be made of record in both the reexamination file and the reissue application file, but no copy of the petition will be retained by the Office. See MPEP § 2667.

The patent owner or the third party requester may file a petition under 37 CFR 1.182 to merge a reexamination proceeding and a reissue application examination, or stay one of them because of the other, after the order to reexamine (37 CFR 1.931), in the event the Office has not acted prior to that date to merge or stay. Any petition to merge or stay which is filed by a party **other than** the patent owner or the third party requester of the reexamination will not be considered, but will be returned to that party by the OPLA.

All petitions to merge or stay which are filed by the patent owner or the third party requester subsequent to the date of the order for reexamination will be referred to the OPLA for decision.

VI. FEES IN MERGED PROCEEDINGS

Where the proceedings have been merged and a paper is filed which requires payment of a fee (e.g., >excess claims fee, extension of time fee,< petition fees, appeal fees, brief fees, oral hearing fees), only a single fee need be paid. For example, only one fee need be paid for an appellant brief, even though the brief relates to merged multiple examinations and

copies of the brief are filed for each file in the merger (as is required). >As to excess claim fees, reissue practice will control.<

VII. INTERVIEWS IN MERGED PROCEEDINGS

Pursuant to 37 CFR 1.955, an interview which discusses the merits of a proceeding is not permitted in an *inter partes* reexamination proceeding. Thus, in a merged proceeding of an *inter partes* reexamination and a reissue application, there will be no *inter partes* interview as to the substance of the proceeding. Also, there will be no separate *ex parte* interview as to the substance of the proceeding with either the patent owner (the reissue applicant) or the third party requester (of the reexamination). Accordingly, where a party requests any information as to the merits of the merged proceeding, the examiner will not conduct a personal or telephone interview with that party to provide the information. Further, an informal amendment by the patent owner (the reissue applicant) will not be accepted, because that would be tantamount to an *ex parte* interview. All communications between the Office and the patent owner (and the third party requester) which are directed to the merits of the merged proceeding must be in writing and filed with the Office for entry into the record of the proceeding.

VIII. EXAMINER'S AMENDMENT TO PLACE PROCEEDING IN CONDITION FOR ALLOWANCE

As pointed out immediately above, interviews, both personal and telephone are **not** permitted in a merged reissue/*inter partes* reexamination proceeding. Thus, the examiner is not permitted to telephone the patent owner/reissue applicant and obtain authorization to make an amendment. Accordingly, the only times that an examiner's amendment can be made in conjunction with a Notice of Allowability are where the patent owner authorization need not be obtained. Such amendments include:

(A) An examiner's amendment to deal with formal matters such as grammar, incorrect spelling, or incorrect number; i.e., matters that do not involve a rejection, do not go to the merits, and do not require the examiner to obtain approval.

(B) An examiner's amendment to change the title.

See also MPEP § 1302.04 *et seq.* as to examiner's amendments not needing authorization by an applicant or a patent owner. Note, however, that in a merged reissue/*inter partes* reexamination proceeding (as opposed to an application *per se*) all such examiner's amendments must be made by **formal examiner's amendment accompanying the Notice of Allowability**, in order to provide notice of the changes made in the patent being reexamined to both the patent owner/reissue applicant and the third party requester.

Note that any change going to the merits of the case (i.e., more than a formal matter) could not be made by examiner's amendment accompanying the Notice of Allowability. Rather, a change going to the merits would require (A) reopening of prosecution with the approval of the TC Director, (B) an Office action suggesting the change to the patent owner/reissue applicant, (C) a formal amendment submitted by patent owner/reissue applicant, and (D) an opportunity for the third party requester to comment on the patent owner/applicant's submission.

2686.04 Reexamination and Litigation Proceedings [R-3]

35 U.S.C. 314. *Conduct of inter partes reexamination proceedings.*

(c) SPECIAL DISPATCH.— Unless otherwise provided by the Director for good cause, all *inter partes* reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

35 U.S.C. 317. *Inter partes reexamination prohibited.*

(b) FINAL DECISION.— Once a final decision has been entered against a party in a civil action arising in whole or in part under section 1338 of title 28, that the party has not sustained its burden of proving the invalidity of any patent claim in suit or if a final decision in an *inter partes* reexamination proceeding instituted by a third-party requester is favorable to the patentability of any original or proposed amended or new claim of the patent, then neither that party nor its privies may thereafter request an *inter partes* reexamination of any such patent claim on the basis of issues which that party or its privies raised or could have raised in such civil action or *inter partes* reexamination proceeding, and an *inter partes* reexamination requested by that party or its privies on

the basis of such issues may not thereafter be maintained by the Office, notwithstanding any other provision of this chapter. This subsection does not prevent the assertion of invalidity based on newly discovered prior art unavailable to the third-party requester and the Patent and Trademark Office at the time of the inter partes reexamination proceedings.

35 U.S.C. 318. Stay of litigation.

Once an order for inter partes reexamination of a patent has been issued under section 313, the patent owner may obtain a stay of any pending litigation which involves an issue of patentability of any claims of the patent which are the subject of the inter partes reexamination order, unless the court before which such litigation is pending determines that a stay would not serve the interests of justice.

37 CFR 1.987. Suspension of inter partes reexamination proceeding due to litigation.

If a patent in the process of inter partes reexamination is or becomes involved in litigation, the Director shall determine whether or not to suspend the inter partes reexamination proceeding.

37 CFR 1.907. Inter partes reexamination prohibited.

(b) Once a final decision has been entered against a party in a civil action arising in whole or in part under 28 U.S.C. 1338 that the party has not sustained its burden of proving invalidity of any patent claim-in-suit, then neither that party nor its privies may thereafter request inter partes reexamination of any such patent claim on the basis of issues which that party, or its privies, raised or could have raised in such civil action, and an inter partes reexamination requested by that party, or its privies, on the basis of such issues may not thereafter be maintained by the Office.

35 U.S.C. 311 permits a request for inter partes reexamination to be filed "at any time." Thus, requests for inter partes reexamination can be filed where the patent (for which reexamination is requested) is involved in concurrent litigation. The guidelines set forth below will generally govern Office handling of inter partes reexamination requests where there is concurrent litigation.

I. COURT ORDERED REEXAMINATION PROCEEDING OR LITIGATION STAYED FOR REEXAMINATION

Where a request for reexamination indicates that it is filed as a result of an order by a court, or that litigation is stayed for the purpose of reexamination, all aspects of the proceeding will be expedited to the extent possible. Cases will be taken up for action at the earliest time possible, and time periods set in

actions may be extended only upon a strong showing of sufficient cause (see MPEP § 2665). Action on such a proceeding will take precedence to any other action taken by the examiner in the Office. See generally *In re Vamco Machine and Tool, Inc.*, 752 F.2d 1564, 224 USPQ 617 (Fed. Cir. 1985); *Gould v. Control Laser Corp.*, 705 F.2d 1340, 217 USPQ 985 (Fed. Cir. 1983); *Loffland Bros. Co. v. Mid-Western Energy Corp.*, 225 USPQ 886 (W.D. Okla. 1985); *The Toro Co. v. R.L. Nelson Corp.*, 223 USPQ 636 (C.D. Ill. 1984); *Digital Magnetic Systems, Inc. v. Ansley*, 213 USPQ 290 (W.D. Okla. 1982); *Raytek, Inc. v. Solfan Systems Inc.*, 211 USPQ 405 (N.D. Cal. 1981); and *Dresser Industries, Inc. v. Ford Motor Co.*, 211 USPQ 1114 (N.D. Texas 1981).

II. FEDERAL COURT DECISION KNOWN TO EXAMINER AT THE TIME THE DETERMINATION ON THE REQUEST FOR REEXAMINATION IS MADE

If a Federal Court decision *on the merits* of a patent is known to the examiner at the time the determination on the request for inter partes reexamination is made, the following guidelines will be followed by the examiner:

(A) The Third Party Requester Was Not a Party to the Litigation.

When the initial question as to whether the art raises a substantial new question of patentability as to a patent claim is under consideration, the existence of a final court decision of claim validity in view of the same or different art does not necessarily preclude the presence of a new question. This is true because of the different standards of proof and claim interpretation employed by the District Courts and the Office. See for example *In re Zletz*, 893 F.2d 319, 322, 13 USPQ2d 1320, 1322 (Fed. Cir. 1989) (manner of claim interpretation that is used by courts in litigation is not the manner of claim interpretation that is applicable during prosecution of a pending application before the PTO) and *In re Etter*, 756 F.2d 852, 225 USPQ 1 (Fed. Cir. 1985) (the 35 U.S.C. 282 presumption of patent validity has no application in reexamination proceedings). Thus, while the Office may accord deference to factual findings made by the court, the determination of whether a substantial new question of patentability exists will be made indepen-

ently of the court's decision on *validity*, since the decision is not controlling on the Office.

A *non-final* holding of claim *invalidity* or unenforceability will also not be controlling on the question of whether a substantial new question of patentability is present.

Only a final holding of claim invalidity or unenforceability (after all appeals) is controlling on the Office. In such cases, a substantial new question of patentability would not be present as to the claims held invalid or unenforceable. See *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988).

(B) The Third Party Requester Was a Party to the Litigation.

Final Holding of validity: The provisions of 37 CFR 1.907(b) apply. Where a final decision was entered against a party in a Federal Court civil action (arising in whole or in part under 28 U.S.C. 1338) that the party did not sustain its burden of proving invalidity of a patent claim in suit, that party and its privies may **not** request *inter partes* reexamination of any such patent claim on the basis of issues which that party or its privies raised or could have raised in the civil action. Further, an *inter partes* reexamination already requested by that party, or its privies, on the basis of such issues will not be maintained by the Office, i.e., the proceeding will be *>concluded.<* Note, however, that the statute does not preclude an *ex parte* reexamination by the same third party requester.

In view of the above, when the examiner is aware that the third party requester was a party to previous Federal Court litigation as to the patent for which *inter partes* reexamination has been requested, the examiner must determine:

(1) Was the Federal Court decision adverse to the third party requester as to at least one claim of the patent?

(2) Was the Federal Court decision a final decision, after all appeals?

(3) Is the issue being raised in the reexamination request the same issue as was raised in the Federal Court during the civil action, or an issue that the third party requester could have raised in the Federal Court during the civil action?

- If the answer to each of questions (1)-(3) is "yes" for all claims in the proceeding, then the *inter*

partes reexamination *>prosecution<* must be terminated. In such a case, the TC Director will prepare a decision discussing the above considerations (1)-(3) and vacating the reexamination proceeding.

- If the answer to all of questions (1)-(3) is "yes" for one or more (but not all) of the claims in the proceeding; those claims will not be treated. The examiner's action will point out the claims not treated and the reason why, i.e., a discussion of the above considerations (1)-(3). The guidelines set forth above in subsection II.(A) will be used for the claims remaining.

- If the answer to question (1) or to question (3) is "no" for all claims, then the examination of the reexamination proceeding will proceed without any discussion on the record of considerations (1)-(3), using the guidelines set forth above in subsection II.(A).

- If, for any claim, the answer to both of questions (1) and (3) is "yes", but the answer to question (2) is "no", then examination of the reexamination proceeding will proceed using the guidelines set forth above in subsection II.(A). The examiner's action will contain a discussion of considerations (1)-(3). If the examiner subsequently becomes aware that the Federal Court decision has become final, reexamination of the affected claims must be discontinued. If all claims are affected, the reexamination will be vacated by the TC Director as discussed above.

Final Holding of invalidity: A *final holding of claim invalidity or unenforceability* (after all appeals) is controlling on the Office. In such cases, a substantial new question of patentability would not be present as to the claims held invalid or unenforceable. See *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988). Where all claims are affected, the reexamination will be vacated by the TC Director. A non-final holding of claim invalidity or unenforceability, however, will not be controlling on the question of whether a substantial new question of patentability is present.

(C) Specific Situations.

For a discussion of the policy in specific situations where a Federal Court decision has been issued, see MPEP § 2642.

III. REEXAMINATION WITH CONCURRENT LITIGATION BUT ORDERED PRIOR TO FEDERAL COURT DECISION

In view of the statutory mandate to make the determination on a request for reexamination within 3 months, the determination on the request based on the record before the examiner will be made without awaiting a decision by the Federal Court. It is not realistic to attempt to determine what issues will be treated by the Federal Court prior to the Court's decision. Accordingly, the determination on the request will be made without considering the issues allegedly before the Court. If reexamination is ordered, the reexamination generally (see discussion immediately below) will continue until the Office becomes aware that a court decision has issued. At such time, the request will be reviewed in accordance with the guidelines set forth below.

In *Ethicon v. Quigg*, 849 F.2d 1422, 7 USPQ2d 1152 (Fed. Cir. 1988), the Court of Appeals for the Federal Circuit stated the following as to the Office's authority to stay a reexamination process pending the outcome of a Federal District Court case where invalidity is an issue:

"Whatever else special dispatch means, it does not admit of an indefinite suspension of reexamination proceedings pending conclusion of litigation. If it did, one would expect to find some intimation to that effect in the statute, for it would suggest the opposite of the ordinary meaning. But there is none."

"The Commissioner... has no inherent authority, only that which Congress gives. It did not give him authority to stay reexaminations; it told him to conduct them with special dispatch. Its silence about stays cannot be used to countermand that instruction."

The *Ethicon* case was decided as to *ex parte* reexamination, for which 35 U.S.C. 305 dictates in its last sentence:

"All reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office."

For *inter partes* reexamination, however, 35 U.S.C. 314 states:

"Unless otherwise provided by the Director for good cause, all *inter partes* reexamination proceedings under this section, including any appeal to the Board of

Patent Appeals and Interferences, shall be conducted with special dispatch within the Office."

35 U.S.C. 314 provides for *inter partes* reexamination the clause "Unless otherwise provided by the Director for good cause" which clause is not present in 35 U.S.C. 305 for *ex parte* reexamination. Accordingly, where there is good cause for the Director of the USPTO to suspend (stay) reexamination proceedings pending the conclusion of litigation, a suspension will be effected. A "good cause" might be present, for example, where there is an issue that cannot be decided in the reexamination proceeding but affects the resolution of the proceeding. Another example is where there is an issue common to the litigation and the reexamination that can best be decided in court due to the availability in court of discovery and subpoena power (e.g., an issue heavily dependent on presentation of conflicting/contested evidence by the two parties). If the examiner believes there is good cause to suspend (stay) reexamination proceedings, the case should be brought to the Office of Patent Legal Administration (OPLA) for consideration of such by a Reexamination Legal Advisor (RLA).

It should be noted that if, pursuant to 35 U.S.C. 318, a court stays litigation as to the patent being reexamined, action in the reexamination proceeding would not be suspended. This is so because action in the reexamination proceeding would be needed to resolve the "issue of patentability of any claims of the patent which are the subject of the *inter partes* reexamination order" set forth in 35 U.S.C. 318.

IV. FEDERAL COURT DECISION ISSUES AFTER INTER PARTES REEXAMINATION ORDERED

Pursuant to 37 CFR 1.985(a), the patent owner in an *inter partes* reexamination proceeding must promptly notify the Office of any Federal Court decision involving the patent.

Upon the issuance of a holding of claim invalidity or unenforceability by a Federal Court, reexamination of those claims will continue in the Office until the decision becomes final. A *non-final* Court decision concerning a patent under reexamination shall have no binding effect on a reexamination proceeding.

Where an *inter partes* reexamination proceeding is currently pending and a **final** Federal Court decision issues after all appeals, the reexamination proceeding

is reviewed to see if no substantial new question of patentability remains (as to one or more claims) due to holding of claims invalid, and to determine whether the provisions of 37 CFR 1.907(b) apply as a result of a decision in a civil action arising in whole or in part under 28 U.S.C. 1338.

A *final Court holding of invalidity/unenforceability* is binding on the Office. Upon the issuance of a final holding of invalidity or unenforceability, the claims held invalid or unenforceable will be withdrawn from consideration in the reexamination. The reexamination will continue as to any remaining claims. If all of the claims are finally held invalid or unenforceable, the reexamination will be vacated by the TC Director as no longer containing a substantial new question of patentability and the reexamination >prosecution< will be terminated. If not all claims were held invalid, a substantial new question of patentability may still exist as to the remaining claims. In such a situation, the remaining claims would be examined; and, as to the claims held invalid, form paragraph 26.80 should be used at the beginning of the Office action.

¶ 26.80 *Claims Held Invalid by Court, No Longer Being Reexamined*

Claims [1] of the [2] patent are not being reexamined in view of the final decision of [3]. Claims [1] were held invalid by the [4].

Examiner Note:

1. In bracket 1, insert the claims held invalid.
2. In bracket 2, insert the patentee (e.g., Rosenthal, Schor et al).
3. In bracket 3, insert the decision (e.g., *ABC Corp. v. Kery Fries*, 999 USPQ2d 99 (Fed. Cir. 1999) or *XYZ Corp. v. Jones*, 999 USPQ2d 1024 (N.D. Cal. 1999)).
4. In bracket 4, insert the name of the court (e.g., the Court of Appeals for the Federal Circuit, or the Federal District Court).

The issuance of a *final* Court decision (in a civil action arising in whole or in part under 28 U.S.C. 1338) upholding validity during an *inter partes* reexamination, where the person who filed the request **was a party to the litigation**, will have the effect that the Office will discontinue examination of all claims affected by the holding of validity. If the provisions of 37 CFR 1.907(b) apply such that all of the claims in the reexamination proceeding cannot be maintained, the order to reexamine is vacated by the TC Director, and reexamination is terminated. If the provisions of 37 CFR 1.907(b) apply to some of the claims, but not all of the claims in the proceeding;

those claims to which 37 CFR 1.907(b) applies will not be treated. The examiner's action will point out the claims not treated, and the reason why those claims cannot be maintained in the reexamination under 37 CFR 1.907(b). Action will be given on the remaining claims. Note that the provisions of 37 CFR 1.907(b) cannot be waived since they track the statute, 35 U.S.C. 317.

The issuance of a final Court decision **upholding validity** during an *inter partes* reexamination, where the person who filed the request **was not a party to the litigation**, will have no binding effect on the examination of the reexamination. This is because the Court stated in *Ethicon v. Quigg*, 849 F.2d 1422, 1428, 7 USPQ2d 1152, 1157 (Fed. Cir. 1988) that the Office is not bound by a court's holding of patent validity and should continue the reexamination. The Court noted that District Courts and the Office use different standards of proof in determining invalidity, and thus, on the same evidence, could quite correctly come to different conclusions. Specifically, invalidity in a District Court must be shown by "clear and convincing" evidence, whereas in the Office it is sufficient to show non-patentability by a "preponderance" of the evidence. Since the "clear and convincing" standard is harder to satisfy than the "preponderance standard," a court's holding of patent validity is not controlling. Deference will, however, ordinarily be accorded to the factual findings of the court, where the evidence before the Office and the court is the same. If sufficient reasons are present, claims held valid by the court may be rejected in reexamination.

V. LITIGATION REVIEW AND CRU APPROVAL

In order to ensure that the Office is aware of prior or concurrent litigation, the examiner is responsible for conducting a reasonable investigation for evidence as to whether the patent for which reexamination is requested has been, or is, involved in litigation. The investigation will include a review of the reexamination file, the patent file, and the results of the litigation computer search by the Scientific and Technical Information Center (STIC). If the examiner discovers, at any time during the reexamination proceeding, that there is litigation or that there has been a Federal Court decision on the patent, the fact will be brought to the attention of a Reexamination Legal Advisor

(RLA) of the Central Reexamination Unit (CRU) prior to *any* further action by the examiner. The RLA will provide the examiner with guidance as to compliance with Office policy where there is concurrent litigation.

2687 Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) and Conclusion of Reexamination Proceeding [R-3]

Upon conclusion of the *inter partes* reexamination proceeding, the examiner must complete a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) by filling out Form PTOL-2068. If appropriate, an examiner's amendment will also be prepared. Where the claims are found patentable, reasons must be given for each claim found patentable. See the discussion as to preparation of an examiner's amendment and reasons for allowance found at the end of this section. In addition, the examiner must prepare the reexamination file so that the Office of Publications can prepare and issue a certificate in accordance with 35 U.S.C. 316 and 37 CFR 1.997 and setting forth the results of the reexamination proceeding and the content of the patent following the proceeding. See MPEP § 2688.

I. INSTANCES WHERE A NIRC WOULD BE APPROPRIATE

The following are the only instances when issuance of a NIRC action would be proper in an *inter partes* reexamination proceeding:

(A) There is **no** timely response by the patent owner to an Office action requiring a response. If **all** claims are under rejection, the examiner will issue a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC). All claims will be canceled by formal examiner's amendment.

(B) After a Right of Appeal Notice (RAN) where no party to the reexamination timely files a notice of appeal.

(C) After filing of a notice of appeal, where all parties who filed a notice of appeal or notice of cross appeal fail to timely file an appellant brief (or fail to timely complete the brief, where the appellant brief is noted by the examiner as being incomplete).

(D) After a final decision by the Board of Patent Appeals and Interferences (Board), where there is no further timely appeal to the Court of Appeals for the Federal Circuit nor is there a timely request for rehearing by the Board.

(E) After the Federal Court appeal process has been completed and the case is returned to the examiner.

II. PREPARATION OF THE NIRC ACTION

A. No Allowed Claims

Where **all** claims are rejected or objected to in the prior Office action, the examiner will issue a NIRC indicating that all claims have been canceled and terminating the prosecution. The cover sheet to be used is Notice of Intent to Issue Reexamination Certificate Form PTOL-2068. As an attachment to the NIRC cover sheet, the examiner will draft an examiner's amendment canceling all live claims in the reexamination proceeding. Check the appropriate box on PTOL-2068. In the remarks of the examiner's amendment, the examiner should point out why the claims have been canceled. Since all claims are being canceled in the proceeding, no reasons for patentability are attached.

B. At Least One Allowed Claim

If at least one claim is free of rejection and objection, the examiner will issue a NIRC, in which all patentable claims and canceled claims will be identified. All rejected or objected claims will be canceled by formal examiner's amendment (attached as part of the NIRC). Check the appropriate box on Form PTOL-2068. In the remarks section of the examiner's amendment, the examiner should point out why the claims have been canceled. As to the patentable claims, reasons for patentability must be provided for all such claims.

III. EXAMINER'S AMENDMENT TO PLACE PROCEEDING IN CONDITION FOR NOTICE OF INTENT TO ISSUE *INTER PARTES* REEXAMINATION CERTIFICATE

Interviews, both personal and telephone are not permitted in an *inter partes* reexamination proceeding (see MPEP § 2685). Thus, the examiner is not permit-

ted to telephone the patent owner to obtain authorization to make an amendment. Accordingly, the only times that an examiner's amendment can be made in conjunction with a NIRC are where the patent owner authorization need not be obtained. Such amendments include:

(A) An examiner's amendment to deal with formal matters such as grammar, incorrect spelling, or incorrect number; i.e., matters that do not involve a rejection, do not go to the merits, and do not require the examiner to obtain approval.

(B) An examiner's amendment to change the title.

(C) An examiner's amendment to cancel all rejected and objected claims in the proceeding, when the patent owner fails (1) to timely respond (where a response is required), (2) to timely appeal, or (3) to take further action to maintain an appeal.

See also MPEP § 1302.04 *et. seq.* as to examiner's amendments not needing authorization by an applicant or a patent owner. Note, however, that in an *inter partes* reexamination proceeding (as opposed to an application) all such examiner's amendments must be made by **formal examiner's amendment accompanying the NIRC**, in order to provide notice of the changes made in the patent being reexamined to both the patent owner and the third party requester.

Note that any change going to the merits of the case (i.e., more than a formal matter) could not be made by examiner's amendment accompanying the NIRC. Rather, a change going to the merits would require (1) reopening of prosecution with the approval of the Technology Center (TC) Director, (2) an Office action suggesting the change to patent owner, (3) a formal amendment submitted by the patent owner, and (4) an opportunity for the third party requester to comment on the patent owner's submission.

Where an examiner's amendment is to be prepared, Box 9 of Form PTOL-2068 (Notice of Intent to Issue a Reexamination Certificate) is checked, and form paragraph 26.69 is used to provide the appropriate attachment:

¶ 26.69 *Examiner's Amendment Accompanying Notice of Intent to Issue Reexamination Certificate*

An examiner's amendment to the record appears below. The changes made by this examiner's amendment will be reflected in the reexamination certificate to issue in due course.

[1]

The examiner's amendment must comply with the requirements of 37 CFR 1.530(d)-(j) in amending the patent.

Thus, if a portion of the text is amended more than once, the examiner's amendment should indicate all changes (insertions and deletions) in relation to the current text in the patent under reexamination, **not** in relation to a prior amendment made during the proceeding.

In addition, the examiner's amendment requires presentation of the **full text** of any paragraph or claim to be changed, with 37 CFR 1.530(f) markings. Examiners' amendments in reexamination are not subject to the exceptions to this requirement which are provided for applications in 37 CFR 1.121(g) and which do not apply to reexamination proceedings. See MPEP § 2250. The only **exception** to the full text presentation requirement is that an entire claim or an entire paragraph of specification may be deleted from the patent by a statement deleting the claim or paragraph without the presentation of the text of the claim or paragraph.

IV. REASONS FOR PATENTABILITY AND/OR CONFIRMATION

Reasons for patentability must be provided, unless all claims are canceled in the proceeding. Check the appropriate box on Form PTOL-2068 and provide the reasons as an attachment. In the attachment to the Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC), the examiner should indicate why the claims found patentable in the reexamination proceeding are clearly patentable over the cited patents or printed publications. This is done in a manner similar to that used to indicate reasons for allowance in an application. See MPEP § 1302.14. Where the record is clear as to why a claim is patentable (which should be the usual situation, in view of the *inter partes* nature of the proceeding), the examiner may simply refer to the particular portions of the record which clearly establish the patentability of that claim. **In any event, reasons for patentability must be provided for every claim identified as patentable in the NIRC, and the patent owner must be notified in the NIRC that it has an opportunity to provide comments on the statement of the reasons for patentability.**

The reasons for patentability may be set forth on Form PTOL-476, entitled "REASONS FOR PATENTABILITY AND/OR CONFIRMATION." However, as a preferred alternative to using Form PTOL-476, the examiner may instead use form paragraph 26.70.

¶ 26.70 *Reasons for Patentability and/or Confirmation in Inter Partes Reexamination*

STATEMENT OF REASONS FOR PATENTABILITY AND/OR CONFIRMATION

The following is an examiner's statement of reasons for patentability and/or confirmation of the claims found patentable in this reexamination proceeding: [1]

Any comments considered necessary by the PATENT OWNER regarding the above statement must be submitted promptly to avoid processing delays. Such submission by the patent owner should be labeled: "Comments on Statement of Reasons for Patentability and/or Confirmation" and will be placed in the reexamination file.

Examiner Note:

This form paragraph may be used as an attachment to the Notice of Intent to Issue *Inter Partes* Reexamination Certificate, PTOL-2068 (item number 3).

Original patent claims that are found patentable in a reexamination proceeding are generally to be designated as "confirmed" claims, while new claims and amended patent claims are generally to be designated as "patentable" claims. However, for purposes of the examiner setting forth reasons for patentability or confirmation, the examiner may use "patentable" to refer to any claim that defines over the cited patents or printed publications. There is no need to separate the claims into "confirmed" and "patentable" categories when setting forth the reasons.

Where all claims are canceled in the proceeding, no reasons for patentability are provided.

V. PREPARATION OF THE CASE FOR PUBLICATION

As to preparing the *inter partes* reexamination file for publication of the certificate, see MPEP § 2287 for guidance. The preparation of an *inter partes* reexamination proceeding for publication is carried out in the same manner that an *ex parte* reexamination proceeding is prepared for publication.

The examiner must complete the examiner preparation of the case for reexamination certificate by completing an Examiner Checklist Reexamination form, PTOL-1516. The TC Legal Instrument Examiner

(LIE) (the reexamination clerk) must complete a Reexamination Clerk Checklist form, PTOL-1517. The case is reviewed by the TC Special Program Examiner (SPRE) and if all is in order, the case will be forwarded by the SPRE to the Central Reexamination Unit (CRU).

In the CRU, the reexamination file and its contents will be reviewed, the NIRC will be mailed, and appropriate PALM work and update scanning will be carried out. The reexamination **>proceeding< will then be forwarded, via the appropriate Office, to the Office of Publications for printing.

If the CRU returns the case to the TC for correction/revision, the correction/revision must be handled specially and returned to the CRU within the time set for such by the CRU.

VI. REEXAMINATION REMINDERS

The following items deserve special attention. The examiner should ensure they have been correctly completed or followed before forwarding the case to the SPRE for review.

(A) All patent claims must have been examined. See MPEP § 2643.

(B) No renumbering of patent claims is permitted. New claims may require renumbering. See MPEP § 2666.01 and § 2250.

(C) Amendments to the description and claims must conform to requirements of 37 CFR 1.530(d)-(k). This includes any changes made by examiner's amendment. If a portion of the text is amended more than once, each amendment should indicate all of the changes (insertions and deletions) in relation to the current text in the patent under reexamination. See MPEP § 2666.01 and § 2250.

(D) The prior art must be listed on a form PTO-892, PTO-1449, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having format equivalent to one of these forms). These forms must be properly completed. See MPEP § 2657.

(E) The examiner and clerk checklists PTO-1516 and PTO-1517 must be *entirely and properly* completed. A careful reading of the instructions contained in these checklists is essential. The clerk checklist is designed as a check and review of the examiner's responses on the examiner checklist. Accordingly, the clerk should personally review the file before completing an item. The clerk should check to make cer-

tain that the responses to all related items on both checklists are in agreement.

(F) Multiple copending reexamination proceedings should be merged. See MPEP § 2686.01.

(G) Where the reexamination proceeding is copending with an application for reissue of the patent being reexamined, the files must have been forwarded to the Office of Patent Legal Administration (OPLA) for a consideration of potential merger, with a decision on the question being present in the reexamination file. See MPEP § 2686.03.

(H) Reasons for patentability and/or confirmation are required for each claim found patentable.

(I) There is no issue fee in reexamination. See MPEP § 2634.

(J) The patent claims may not be amended nor new claims added after expiration of the patent. See MPEP § 2666.01 and § 2250.

(K) Original drawings cannot be physically changed. All drawing amendments must be presented on new sheets. The examiner may have the draftsman review the new sheets of drawings if the examiner would like the draftsman's assistance in identifying errors in the drawings. A draftsman's "stamp" to indicate approval is no longer required on patent drawings, and these stamps are no longer to be used by draftsmen. See MPEP § 2666.02.

(L) An amended or new claim may not enlarge the scope of the patent claims. See MPEP § 2658, § 2666.01, and § 2250.

(M) If the patent has expired, all amendments to the patent claims and all claims added during the proceeding must be withdrawn. Further, all presently rejected and objected claims are canceled by examiner's amendment. See MPEP § 2250, subsection on "Amendment After the Patent Has Expired."

A. Handling of Multiple Dependent Claims

For treatment of multiple dependent claims when preparing a reexamination proceeding for publication of the reexamination certificate, see the discussion in MPEP § 2287.

B. The Title of the Patent

Normally, the title will not need to be changed during reexamination. If a change of the title is necessary, it should have been pointed out as early as possible in

the prosecution, as a part of an Office Action. An informal examiner's amendment (i.e., changing the title and merely initialing the change) is **not** permitted in reexamination.

VII. REEXAMINATION PROCEEDINGS IN WHICH ALL THE CLAIMS ARE CANCELED

There will be instances where all claims in the reexamination proceeding are to be canceled. This would occur where the patent owner fails to timely respond to an Office action, and all live claims in the reexamination proceeding are under rejection. This would also occur where all live claims in the reexamination proceeding are to be canceled as a result of a decision of the Board affirming the examiner, and the time for appeal to the court and for requesting rehearing has expired. In these instances the examiner will issue a NIRC indicating that all claims have been canceled and terminating the prosecution. As an attachment to the NIRC, the examiner will draft an examiner's amendment canceling all live claims in the reexamination proceeding. In the examiner's amendment, the examiner should point out why the claims have been canceled. For example, the examiner might state one of the two following examples, as is appropriate:

"Claims 1-8 (all live claims in the proceeding) were subject to rejection in the last Office action mailed 9/9/99. Patent owner failed to timely respond to that Office action. Accordingly, claims 1-8 have been canceled. See 37 CFR 1.957(b) and MPEP § 2666.10."

"The rejection of claims 1-8 (all live claims in the proceeding) has been affirmed in the Board decision of 9/9/99, and no timely appeal to the court has been filed. Accordingly claims 1-8 have been canceled."

In order to physically cancel the live claims in the reexamination file >history<, brackets should be placed around all the live claims >on a copy of the claims printed from the file history, and the copy then scanned into the file history<. All other claims in the proceeding should have previously been either replaced or canceled.

The examiner will designate a canceled original patent claim, to be printed in the *Official Gazette*, on the ****>Issue Classification IFW form<** in the appropriate place for the claim chosen.

2687.01 Examiner Consideration of Submissions After NIRC [Added R-2]

The rules do not provide for an amendment to be filed in an *inter partes* reexamination proceeding after a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) has been issued. Note that 37 CFR 1.312 does not apply in reexamination. Any amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding filed after the NIRC (except as indicated immediately below) must be accompanied by a petition under 37 CFR 1.182. The petition must be granted, in order to have the amendment, information disclosure statement, or other paper related to the merits considered. Where an amendment, information disclosure statement, or other paper related to the merits of the reexamination proceeding is filed after the NIRC, and the accompanying petition under 37 CFR 1.182 is granted, the examiner will reconsider the case in view of the new information, and if appropriate, will reopen prosecution.

Interviews, both personal and telephone, are **not** permitted in an *inter partes* reexamination proceeding (see MPEP § 2685). Thus, the examiner is not permitted to telephone the patent owner and obtain authorization to make an amendment. The only time an examiner's amendment can be made in an *inter partes* reexamination after the NIRC has been issued is where an examiner's amendment is needed to address matters that do not require the patent owner's approval. However, matters that do not require the patent owner's approval are generally minor formal matters. Thus, it would be rare for an examiner to need to withdraw the issued NIRC for issuance of a new NIRC with an examiner's amendment, since withdrawal of the NIRC should not be done for minor formal matters. In view of this, any examiner's amendment in an *inter partes* reexamination proceeding to be made after a NIRC (has been issued) requires the TC SPRE to approve the examiner's amendment.

Any "Comments on Statement of Reasons for Patentability and/or Confirmation" which are received will be placed in the reexamination file, without comment. This will be done even where the reexamination certificate has already issued.

2688 Issuance of *Inter Partes* Reexamination Certificate [R-3]

35 U.S.C. 316. *Certificate of patentability, unpatentability and claim cancellation.*

(a) IN GENERAL.— In an *inter partes* reexamination proceeding under this chapter, when the time for appeal has expired or any appeal proceeding has terminated, the Director shall issue and publish a certificate canceling any claim of the patent finally determined to be unpatentable, confirming any claim of the patent determined to be patentable, and incorporating in the patent any proposed amended or new claim determined to be patentable.

37 CFR 1.997. *Issuance of inter partes reexamination certificate.*

(a) Upon the conclusion of an *inter partes* reexamination proceeding, the Director will issue a certificate in accordance with 35 U.S.C. 316 setting forth the results of the *inter partes* reexamination proceeding and the content of the patent following the *inter partes* reexamination proceeding.

(b) A certificate will be issued in each patent in which an *inter partes* reexamination proceeding has been ordered under § 1.931. Any statutory disclaimer filed by the patent owner will be made part of the certificate.

(c) The certificate will be sent to the patent owner at the address as provided for in § 1.33(c). A copy of the certificate will also be sent to the third party requester of the *inter partes* reexamination proceeding.

(d) If a certificate has been issued which cancels all of the claims of the patent, no further Office proceedings will be conducted with that patent or any reissue applications or any reexamination requests relating thereto.

(e) If the *inter partes* reexamination proceeding is terminated by the grant of a reissued patent as provided in § 1.991, the reissued patent will constitute the reexamination certificate required by this section and 35 U.S.C. 316.

(f) A notice of the issuance of each certificate under this section will be published in the *Official Gazette*.

Since abandonment is not possible in a reexamination proceeding, an *inter partes* reexamination certificate will be issued at the conclusion of the proceeding for each patent in which a reexamination proceeding has been ordered under 37 CFR 1.931, except where the reexamination has been ***>concluded<** by vacating the reexamination proceeding, or by the grant of a reissue patent on the same patent in which case the reissue patent also serves as the reexamination certificate.

The *inter partes* reexamination certificate will set forth the results of the proceeding and the content of the patent following the reexamination proceeding. The certificate will:

- (A) cancel any patent claims determined to be unpatentable;
- (B) confirm any patent claims determined to be patentable;
- (C) incorporate into the patent any amended or new claims determined to be patentable;
- (D) make any changes in the description approved during reexamination;
- (E) include any statutory disclaimer or terminal disclaimer filed by the patent owner;
- (F) identify unamended claims which were held invalid on final holding by another forum on any grounds;
- (G) identify any patent claims not reexamined;
- (H) be mailed on the day of its date to the patent owner at the address provided for in 37 CFR 1.33(c), and a copy will be mailed to the requester; and
- (I) refer to patent claims, dependent on amended claims, determined to be patentable.

If a certificate issues which cancels all of the claims of the patent, no further Office proceedings will be conducted with regard to that patent or any reissue application or reexamination request directed thereto.

If a reexamination proceeding is *>concluded<* by the grant of a reissue patent as provided for in 37 CFR 1.991, the reissue patent will constitute the reexamination certificate required by 35 U.S.C. 316.

If all of the claims are disclaimed in a patent under reexamination, a certificate under 37 CFR 1.997 will be issued indicating that fact.

A notice of the issuance of each reexamination certificate will be published in the *Official Gazette* on its date of issuance in a format similar to that used for reissue patents. See MPEP § 2691.

2689 Reexamination Review [R-3]

After a reexamination case is acted on by the examiner and all Technology Center (TC) clerical processing is completed, the case is forwarded to the office of the TC Special Program Examiners (SPRE). The TC SPRE (with the aid of the paralegals or other technical support who might be assigned as backup) will then

(A) procedurally review the examiner's action for compliance with the applicable provisions of the reexamination statute and regulations, and with reexamination policy, practice and procedure, (B) do a completeness review of the action to ensure that all issues and arguments raised by all parties are appropriately developed, considered and addressed, and that all materials of the action (e.g., references, forms and cover sheets) are present and appropriately completed and (C) arrange for the file to be PALMed out and *>any paper parts thereof<* hand-carried directly to the Central Reexamination Unit (CRU). In the CRU, the Reexamination Legal Advisor (RLA) will do a general review of the examiner's action for correct application of reexamination law, rules, procedure and policy.

In addition to the SPRE review of the reexamination cases, a patentability review is made in a sample of reexamination cases by the TC Quality Assurance Specialist (QAS) in the manner previously carried out by the former Office of Patent Quality Review.

After a Notice of Intent to Issue *Inter Partes* Reexamination Certificate (NIRC) has been issued and prosecution has been terminated, the reexamination case is screened in the CRU for obvious errors and proper preparation, in order to issue a reexamination certificate. The above identified review processes are appropriate vehicles for providing information on the uniformity of practice, identifying problem areas and providing feedback to the TC personnel that process and examine reexamination cases.

2690 Format of *Inter Partes* Reexamination Certificate [R-3]

An *inter partes* reexamination certificate is issued at the close of each *inter partes* reexamination proceeding in which reexamination has been ordered under 37 CFR 1.931, unless the *inter partes* reexamination proceeding is merged with a reissue application pursuant to 37 CFR 1.991. In that situation, the *inter partes* reexamination proceeding is *>concluded<* by the grant of a reissue patent, the reissue patent will constitute the reexamination certificate. It should be noted that where an *ex parte* reexamination is merged with an *inter partes* reexamination proceeding, an *inter partes* reexamination certificate will issue for the merged proceeding.

The *inter partes* reexamination certificate is formatted much the same as the title page of current U.S. patents.

The certificate is titled “*INTER PARTES REEXAMINATION CERTIFICATE*.” The title is followed by an “ordinal” number in parentheses, such as “(5th)”, which indicates that it is the fifth *inter partes* reexamination certificate that has issued. The *inter partes* reexamination certificates will be numbered in a separate and new ordinal sequence, beginning with “(1st)”. The *ex parte* reexamination certificates will continue the ordinal numbering sequence that has already been established for *ex parte* reexamination certificates.

The certificate number will always be the patent number of the original patent followed by a two-character “kind code” suffix. The “kind code” suffix is **C1** for a first reexamination certificate, **C2** for a second reexamination certificate for the same patent, etc.

For example, “1” is provided in the certificate for the first reexamination certificate and “2” for the second reexamination certificate. Thus, a second reexamination certificate for the same patent would be designated as “C2” preceded by the patent number. The next higher number will be given to the reexamination proceeding for which the reexamination certificate is issued, regardless of whether the proceeding is an *ex parte* reexamination or an *inter partes* reexamination proceeding.

Note that “B1” *ex parte* reexamination certificates that were issued prior to January 1, 2001, included the patent number of the original patent followed by the letter “B.” Where the first reexamination certificate was a “B1” certificate and an *inter partes* reexamination certificate then issues, the *inter partes* reexamination certificate will be designated “C2” and NOT “C1.” Thus, by looking at the number following the “C,” one will be able to ascertain the number of reexamination certificates that preceded the certificate being viewed, i.e., how many prior reexamination certificates have been issued for the patent. (If this were not the practice and C1 were used, one would not be able to ascertain from the number on the certificate how many B certificates came before.)

The certificate denotes the date the certificate was issued at INID code [45] (see MPEP § 901.04). The

title, name of inventor, international and U.S. classification, the abstract, and the list of prior art documents appear at their respective INID code designations, much the same as is presently done in utility patents.

The primary differences, other than as indicated above, are:

(A) The filing date and number of the request is preceded by “Reexamination Request;”

(B) The patent for which the certificate is now issued is identified under the heading “Reexamination Certificate for”; and

(C) The prior art documents cited at INID code [56] will be only those which are part of the reexamination file and cited on forms PTO-1449 *>, PTO/SB/08A or 08B, or PTO/SB/42 (or on a form having a format equivalent to one of these forms) (and the documents< have not been crossed out because they were not considered) and PTO-892.

Finally, the certificate will identify the patent claims which were confirmed as patentable, canceled, disclaimed, and those claims not examined. Only the status of the confirmed, canceled, disclaimed, and not examined claims will be indicated in the certificate. The text of the new and amended claims will be printed in the certificate. Any new claims will be printed in the certificate completely in italics, and any amended claims will be printed in the certificate with italics and bracketing indicating the amendments thereto. Any prior court decisions will be identified, as well as the citation of the court decisions.

2691 Notice of *Inter Partes* Reexamination Certificate Issuance in *Official Gazette* [R-3]

The *Official Gazette* notice will include bibliographic information, and an indication of the status of each claim after the *>conclusion< of the reexamination proceeding. Additionally, a representative claim will be published along with an indication of any changes to the specification or drawing.

The notice of reexamination certificate will clearly state that it is a certificate for a concluded *inter partes* reexamination proceeding (as opposed to an *ex parte* reexamination proceeding).

2692 Distribution of Certificate [R-3]

****>**An e-copy< of the *inter partes* reexamination certificate ****>**will be associated with the e-copy< of the patent in the search files. A copy of the certificate will also be made a part of any patent copies prepared by the Office subsequent to the issuance of the certificate.

A copy of the *inter partes* reexamination certificate will also be forwarded to all depository libraries and to those foreign offices which have an exchange agreement with the Office.

2693 Intervening Rights [Added R-2]

35 U.S.C. 316. Certificate of patentability, unpatentability and claim cancellation.

(b) AMENDED OR NEW CLAIM.— Any proposed amended or new claim determined to be patentable and incorporated into a patent following an *inter partes* reexamination proceeding shall have the same effect as that specified in section 252 of this title for reissued patents on the right of any person who made, purchased, or used within the United States, or imported into the United States, anything patented by such proposed amended or new claim, or who made substantial preparation therefor, prior to issuance of a certificate under the provisions of subsection (a) of this section.

The situation of intervening rights resulting from *inter partes* reexamination proceedings parallels the intervening rights situation resulting from reissue patents or from *ex parte* reexamination proceedings. The rights detailed in 35 U.S.C. 252 for reissue apply equally in reexamination and reissue situations. See *Fortel Corp. v. Phone-Mate, Inc.*, 825 F.2d 1577, 3 USPQ2d 1771 (Fed. Cir. 1987); *Kaufman Co., Inc. v. Lantech, Inc.*, 807 F.2d 970, 1 USPQ2d 1202 (Fed. Cir. 1986); *Tennant Co. v. Hako Minuteman, Inc.*, 4 USPQ2d 1167 (N.D. Ill. 1987); and *Key Mfg. Group, Inc. v. Microdot, Inc.*, 679 F.Supp. 648, 4 USPQ2d 1687 (E.D. Mich. 1987).

2694 ****>** Concluded Reexamination Proceedings< [R-3]

Inter partes reexamination proceedings may be ****>**concluded< in one of three ways:

(A) The **>**prosecution of the reexamination< proceeding may be terminated **>**and the proceeding itself concluded,< by a denial of reexamination or vacating

the reexamination proceeding. In either case, no reexamination certificate is issued.

A terminated reexamination file **>**(IFW or paper)< in which reexamination has been denied or vacated should be forwarded to the Central Reexamination Unit (CRU) if the file is not already there. The CRU will process the file to provide the partial refund set forth in 37 CFR 1.26(c). ****>**The reexamination file will then be given a 420 status (reexamination denied) or a 422 status (reexamination vacated). A copy of the PALM “Application Number Information” screen and the “Contents” screen is printed, the printed copy is annotated by adding the comment “PROCEEDING CONCLUDED,” and the annotated copy is then scanned into IFW using the miscellaneous letter document code.<

(B) The proceeding may be ****>**concluded< under 37 CFR 1.997(b) with the issuance of a reexamination certificate.

A reexamination proceeding that is ****>**to be concluded< in this manner should be processed as set forth in MPEP § 2687 and then forwarded to the CRU for review, mailing of the NIRC, and forwarding the file to the Office of Publication.

(C) The proceeding may be ****>**concluded< under 37 CFR 1.997(e) where the reexamination proceeding has been merged with a reissue proceeding and a reissue patent is granted; an individual reexamination certificate is not issued, but rather the reissue patent serves as the certificate.

A reexamination proceeding that is ****>**concluded< in this manner should be processed, together with the reissue proceeding, as set forth in MPEP § 1455 and forwarded to the Office of Patent Legal Administration in accordance with MPEP § 1456.

2695 Reexamination of a Reexamination [Added R-2]

See MPEP § 2295 for guidance for the processing and examination of a reexamination request filed on a patent for which a reexamination certificate has already issued, or a reexamination certificate issues on a prior reexamination, while the new reexamination is pending. This reexamination request is generally referred to as a “reexamination of a reexamination.” A reexamination of a reexamination is processed in accordance with the guidelines set forth in MPEP

§ 2295 regardless of whether the reexamination certificate was issued for an *ex parte* reexamination or an *inter partes* reexamination, and regardless of whether the pending reexamination proceeding is an *ex parte* reexamination or an *inter partes* reexamination.

2696 USPTO Forms To Be Used in *Inter Partes* Reexamination [R-3]

The correct forms which are to be used by the Office in *inter partes* reexamination actions and processing are as follows (these forms are not reproduced below):

| | |
|--|------------|
| (A) NOTICE OF FAILURE TO COMPLY WITH <i>INTER PARTES</i> REEXAMINATION REQUEST FEE REQUIREMENTS..... | PTOL 2057 |
| (B) NOTICE OF <i>INTER PARTES</i> REEXAMINATION REQUEST FILING DATE..... | PTOL 2058 |
| (C) NOTICE OF INCOMPLETE REQUEST FOR <i>INTER PARTES</i> REEXAMINATION..... | PTOL 2059 |
| (D) NOTICE OF ASSIGNMENT OF <i>INTER PARTES</i> REEXAMINATION REQUEST..... | PTOL 2060 |
| (E) NOTE TO SPRE/EXAMINER/TC PERSONNEL OF <i>INTER PARTES</i> REEXAMINATION DEADLINES..... | PTOL 2061 |
| (F) NOTICE OF CONCURRENT PROCEEDING(S)..... | PTOL 2062 |
| (G) ORDER GRANTING/DENYING REQUEST FOR <i>INTER PARTES</i> REEXAMINATION..... | PTOL 2063 |
| (H) OFFICE ACTION IN <i>INTER PARTES</i> REEXAMINATION..... | PTOL 2064 |
| (I) ACTION CLOSING PROSECUTION (37 CFR 1.949)..... | PTOL 2065 |
| (J) RIGHT OF APPEAL NOTICE (37 CFR 1.953)..... | PTOL 2066 |
| (K) <i>INTER PARTES</i> REEXAMINATION NOTIFICATION REAPPEAL..... | PTOL 2067 |
| (L) NOTICE OF INTENT TO ISSUE <i>INTER PARTES</i> REEXAMINATION CERTIFICATE..... | PTOL 2068 |
| (M) REEXAMINATION REASONS FOR PATENTABILITY/CONFIRMATION..... | PTOL 476 |
| (N) NOTICE OF DEFECTIVE PAPER IN <i>INTER PARTES</i> REEXAMINATION..... | PTOL 2069 |
| (O) TRANSMITTAL OF COMMUNICATION TO THIRD PARTY REQUESTER – <i>INTER PARTES</i> REEXAMINATION..... | PTOL 2070 |
| (P) <i>INTER PARTES</i> REEXAMINATION COMMUNICATION (WITH SSP)..... | PTOL 2071 |
| (Q) <i>INTER PARTES</i> REEXAMINATION COMMUNICATION (NO SSP)..... | PTOL 2072 |
| **>(R) <i>INTER PARTES</i> REEXAMINATION NOTIFICATION RE BRIEF..... | PTOL 2073< |
| *>(S)< EXAMINER CHECKLIST – REEXAMINATION..... | PTOL 1516 |
| *>(T)< REEXAMINATION CLERK CHECKLIST..... | PTOL 1517 |

A user Request for Reexamination Transmittal Form, PTO/SB/58, is provided for public use in filing

a request for *inter partes* reexamination; its use, however, is not mandatory.

Chapter 2700 Patent Terms and Extensions

- 2701 Patent Term
 - 2710 Term Extensions or Adjustments for Delays Within the USPTO Under 35 U.S.C. 154
 - 2720 Applications Filed Between June 8, 1995, and May 28, 2000
 - 2730 Applications Filed On or After May 29, 2000; Grounds for Adjustment
 - >2731 Period of Adjustment
 - 2732 Reduction of Period of Adjustment of Patent Term
 - 2733 Determination of Patent Term Adjustment
 - 2734 Application for Patent Term Adjustment; Due Care Showing
 - 2735 Request for Reconsideration of Patent Term Adjustment Determination
 - 2736 Third Party Papers<
 - 2750 Patent Term Extension for Delays at other Agencies Under 35 U.S.C. 156
 - 2751 Eligibility Requirements
 - 2752 Patent Term Extension Applicant
 - 2753 Application Contents
 - 2754 Filing Date
 - 2754.01 Deadline for Filing an Application Under 35 U.S.C. 156(d)(1)
 - 2754.02 Filing Window for an Application Under 35 U.S.C. 156(d)(5)
 - 2754.03 Filing of a Request for an Extension Under 35 U.S.C. 156(e)(2)
 - 2755 Eligibility Determination
 - 2755.01 Interim Extension of Patent Term During the Processing of the Application
 - 2755.02 Interim Extension of Patent Term Before Product Approval
 - 2756 Correspondence Between the USPTO and the Regulatory Agency
 - 2757 Regulatory Agency Determination of the Length of the Regulatory Review Period
 - 2757.01 Due Diligence Determination
 - 2758 Notice of Final Determination - Calculation of Patent Term Extension
 - 2759 Certificate of Extension of Patent Term
 - 2760 Trade Secret, Confidential, and Protective Order Material
 - 2761 Multiple Applications for Extension of Term of the Same Patent or of Different Patents for the Same Regulatory Review Period for a Product
 - 2762 Duty of Disclosure in Patent Term Extension Proceedings
 - 2763 Limitation of Third Party Participation
 - 2764 Express Withdrawal of Application for Extension of Patent Term
- 2701 Patent Term [R-2]**
- 35 U.S.C. 154. Contents and term of patent; provisional rights.*
- (a) IN GENERAL.—
- *****
- (2) TERM.—Subject to the payment of fees under this title, such grant shall be for a term beginning on the date on which the patent issues and ending 20 years from the date on which the application for the patent was filed in the United States or, if the application contains a specific reference to an earlier filed application or applications under section 120, 121, or 365(c) of this title, from the date on which the earliest such application was filed.
- (3) PRIORITY.—Priority under section 119, 365(a), or 365(b) of this title shall not be taken into account in determining the term of a patent.
- *****
- (c) CONTINUATION.—
- (1) DETERMINATION.—The term of a patent that is in force on or that results from an application filed before the date that is 6 months after the date of the enactment of the Uruguay Round Agreements Act shall be the greater of the 20-year term as provided in subsection (a), or 17 years from grant, subject to any terminal disclaimers.
- (2) REMEDIES.—The remedies of sections 283, 284, and 285 of this title shall not apply to acts which —
- (A) were commenced or for which substantial investment was made before the date that is 6 months after the date of the enactment of the Uruguay Round Agreements Act; and
- (B) became infringing by reason of paragraph (1).
- (3) REMUNERATION.—The acts referred to in paragraph (2) may be continued only upon the payment of an equitable remuneration to the patentee that is determined in an action brought under chapter 28 and chapter 29 (other than those provisions excluded by paragraph (2)) of this title.
- *****
- For applications filed on or after June 8, 1995, Section 532(a)(1) of the Uruguay Round Agreements Act (Pub. L. 103-465, 108 Stat. 4809 (1994)) amended 35 U.S.C. 154 to provide that the term of a patent (other than a design patent) begins on the date the patent issues and ends on the date that is twenty years from the date on which the application for the patent was filed in the United States or, if the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121, or 365(c), twenty years from the filing date of the

earliest of such application(s). This patent term provision is referred to as the “twenty-year term.” Design patents have a term of fourteen years from the date of patent grant. See 35 U.S.C. 173 and MPEP § 1505.

All patents (other than design patents) that were in force on June 8, 1995, or that issued on an application that was filed before June 8, 1995, have a term that is the greater of the “twenty-year term” or seventeen years from the patent grant. See 35 U.S.C. 154(c). A patent granted on an international application filed before June 8, 1995, and which entered the national stage under 35 U.S.C. 371 before, on or after June 8, 1995, will have a term that is the greater of seventeen years from the date of grant or twenty years from the international filing date or any earlier filing date relied upon under 35 U.S.C. 120, 121 or 365(c). The terms of these patents are subject to reduction by any applicable terminal disclaimers (discussed below).

CONTINUING APPLICATIONS

A patent granted on a continuation, divisional, or continuation-in-part application that was filed on or after June 8, 1995, will have a term which ends twenty years from the filing date of earliest application for which a benefit is claimed under 35 U.S.C. 120, 121, or 365(c), regardless of whether the application for which a benefit is claimed under 35 U.S.C. 120, 121, or 365(c) was filed prior to June 8, 1995.

INTERNATIONAL APPLICATIONS

A patent granted on an international application filed on or after June 8, 1995 and which enters the national stage under 35 U.S.C. 371 will have a term which ends twenty years from the filing date of the international application. A continuation or a continuation-in-part application claiming benefit under 35 U.S.C. 365(c) of an international application filed under 35 U.S.C. 363 designating the United States will have a term which ends twenty years from the filing date of the parent international application.

FOREIGN PRIORITY

Foreign priority under 35 U.S.C. 119(a)-(d), 365(a), or 365(b) is not considered in determining the term of a patent. Accordingly, an application claiming priority under 35 U.S.C. 365(a) or 365(b) has a term which ends twenty years from the filing date of the applica-

tion in the United States and not the prior international application.

DOMESTIC PRIORITY UNDER 35 U.S.C. 119(e)

Domestic priority under 35 U.S.C. 119(e) to one or more U.S. provisional applications is not considered in the calculation of the twenty-year term. See 35 U.S.C. 154(a)(3).

EXPIRATION DATE OF PATENTS WITH TERMINAL DISCLAIMERS

To determine the “original expiration date” of a patent subject to a terminal disclaimer, it is generally necessary to examine the language of the terminal disclaimer in the patent file history. If the disclaimer disclaims the terminal portion of the term of the patent which would extend beyond the expiration date of an earlier issued patent, then the expiration date of the earlier issued patent determines the expiration date of the patent subject to the terminal disclaimer. Before June 8, 1995, the terminal disclaimer date was printed on the face of the patent; the date was determined from the expected expiration date of the earlier issued patent based on a seventeen year term measured from grant. When 35 U.S.C. 154 was amended such that all patents (other than design patents) that were in force on June 8, 1995, or that issued on an application that was filed before June 8, 1995, have a term that is the greater of the “twenty year term” or seventeen years from the patent grant, the terminal disclaimer date as printed on many patents became incorrect. If the terminal disclaimer of record in the patent file disclaims the terminal portion of the patent subsequent to the full statutory term of a referenced patent (without identifying a specific date), then the date printed on the face of the patent is incorrect when the full statutory term of the referenced patent is changed as a result of 35 U.S.C. 154(c). That is, the referenced patent’s “twenty year term” is longer than the seventeen year term. In such a case, a patentee may request a Certificate of Correction under 37 CFR 1.323 to correct the information printed on the face of the patent. However, if the terminal disclaimer of record in the patent file disclaims the terminal portion of the patent subsequent to a specific date, without reference to the full statutory term of a referenced patent, then the expiration date is the date specified. Several decisions related to disclaimers are posted in the Freedom

of Information Act (FOIA) section of the USPTO Internet site (www.uspto.gov).

PATENT TERM EXTENSIONS OR ADJUSTMENTS

See MPEP § 2710, *et seq.*, for patent term extensions or adjustments for delays within the USPTO under 35 U.S.C. 154 for utility and plant patents issuing on applications filed on or after June 8, 1995. Patents that issue from applications filed before June 8, 1995, are not eligible for >patent term extension or patent< term adjustment under 35 U.S.C. 154.

See MPEP § 2750 *et. seq.* for patent term extensions available under 35 U.S.C. 156 for premarket regulatory review. The patent term extension that may be available under 35 U.S.C. 156 for premarket regulatory review is separate from and will be added to any extension that may be available under former and current 35 U.S.C. 154. While patents that issue from applications filed before June 8, 1995, are not eligible for term adjustment under 35 U.S.C. 154, such patents may be extended under 35 U.S.C. 156.

2710 Term Extensions or Adjustments for Delays Within the USPTO Under 35 U.S.C. 154 [R-2]

Utility and plant patents issuing on applications filed on or after June 8, 1995, but before May 29, 2000, are eligible for the patent term ** extension * provisions of former 35 U.S.C. 154(b) and 37 CFR 1.701. See MPEP § 2720. Utility and plant patents issuing on applications filed on or after May 29, 2000 are eligible for the patent term adjustment provisions of 35 U.S.C. 154(b)(amended, effective May 29, 2000) and 37 CFR 1.702-1.705. See MPEP § 2730.

Plant and utility patents issuing on applications filed before June 8, 1995 which have a term that is the greater of the “twenty-year term” (see MPEP § 2701) or seventeen years from patent grant are not eligible for term extension or adjustment due to delays in processing the patent application by the United States Patent and Trademark Office.

Since the term of a design patent is not affected by the length of time prosecution takes place, there are no patent term adjustment provisions for design patents.

2720 Applications Filed Between June 8, 1995, and May 28, 2000 [R-2]

Former 35 U.S.C. 154. Contents and term of patent.

(b) TERM EXTENSION.—

(1) INTERFERENCE DELAY OR SECRECY ORDERS.—If the issue of an original patent is delayed due to a proceeding under section 135(a) of this title, or because the application for patent is placed under an order pursuant to section 181 of this title, the term of the patent shall be extended for the period of delay, but in no case more than 5 years.

(2) EXTENSION FOR APPELLATE REVIEW.—If the issue of a patent is delayed due to appellate review by the Board of Patent Appeals and Interferences or by a Federal court and the patent is issued pursuant to a decision in the review reversing an adverse determination of patentability, the term of the patent shall be extended for a period of time but in no case more than 5 years. A patent shall not be eligible for extension under this paragraph if it is subject to a terminal disclaimer due to the issue of another patent claiming subject matter that is not patentably distinct from that under appellate review.

(3) LIMITATIONS.—The period of extension referred to in paragraph (2)—

(A) shall include any period beginning on the date on which an appeal is filed under section 134 or 141 of this title, or on which an action is commenced under section 145 of this title, and ending on the date of a final decision in favor of the applicant;

(B) shall be reduced by any time attributable to appellate review before the expiration of 3 years from the filing date of the application for patent; and

(C) shall be reduced for the period of time during which the applicant for patent did not act with due diligence, as determined by the Commissioner.

(4) LENGTH OF EXTENSION.—The total duration of all extensions of a patent under this subsection shall not exceed 5 years.

37 CFR 1.701. Extension of patent term due to examination delay under the Uruguay Round Agreements Act (original applications, other than designs, filed on or after June 8, 1995, and before May 29, 2000).

(a) A patent, other than for designs, issued on an application filed on or after June 8, 1995, is entitled to extension of the patent term if the issuance of the patent was delayed due to:

(1) Interference proceedings under 35 U.S.C. 135(a); and/or

(2) The application being placed under a secrecy order under 35 U.S.C. 181; and/or

(3) **>Appellate review by the Board of Patent Appeals and Interferences or by a Federal court under 35 U.S.C. 141 or 145, if the patent was issued pursuant to a decision in the review reversing an adverse determination of patentability and if the patent is not subject to a terminal disclaimer due to the issuance of

another patent claiming subject matter that is not patentably distinct from that under appellate review. If an application is remanded by a panel of the Board of Patent Appeals and Interferences and the remand is the last action by a panel of the Board of Patent Appeals and Interferences prior to the mailing of a notice of allowance under 35 U.S.C. 151 in the application, the remand shall be considered a decision in the review reversing an adverse determination of patentability as that phrase is used in 35 U.S.C. 154(b)(2) as amended by section 532(a) of the Uruguay Round Agreements Act, Public Law 103-465, 108 Stat. 4809, 4983-85 (1994), and a final decision in favor of the applicant under paragraph (c)(3) of this section. A remand by a panel of the Board of Patent Appeals and Interferences shall not be considered a decision in the review reversing an adverse determination of patentability as provided in this paragraph if there is filed a request for continued examination under 35 U.S.C. 132(b) that was not first preceded by the mailing, after such remand, of at least one of an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151.<

(b) The term of a patent entitled to extension under paragraph (a) of this section shall be extended for the sum of the periods of delay calculated under paragraphs (c)(1), (c)(2), (c)(3) and (d) of this section, to the extent that these periods are not overlapping, up to a maximum of five years. The extension will run from the expiration date of the patent.

(c)(1) The period of delay under paragraph (a)(1) of this section for an application is the sum of the following periods, to the extent that the periods are not overlapping:

(i) With respect to each interference in which the application was involved, the number of days, if any, in the period beginning on the date the interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(ii) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Patent and Trademark Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

(2) The period of delay under paragraph (a)(2) of this section for an application is the sum of the following periods, to the extent that the periods are not overlapping:

(i) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(ii) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order and any renewal thereof was removed;

(iii) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order and any renewal thereof was removed; and

(iv) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) and ending on the date of mailing of the notice of allowance under § 1.311.

(3) The period of delay under paragraph (a)(3) of this section is the sum of the number of days, if any, in the period begin-

ning on the date on which an appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

(d) The period of delay set forth in paragraph (c)(3) shall be reduced by:

(1) Any time during the period of appellate review that occurred before three years from the filing of the first national application for patent presented for examination; and

**>

(2) Any time during the period of appellate review, as determined by the Director, during which the applicant for patent did not act with due diligence. In determining the due diligence of an applicant, the Director may examine the facts and circumstances of the applicant's actions during the period of appellate review to determine whether the applicant exhibited that degree of timeliness as may reasonably be expected from, and which is ordinarily exercised by, a person during a period of appellate review.<

(e) The provisions of this section apply only to original patents, except for design patents, issued on applications filed on or after June 8, 1995, and before May 29, 2000.

The twenty-year term of a patent issuing from an application filed on or after June 8, 1995, and before May 29, 2000, may be extended for a maximum of five years for delays in the issuance of the patent due to interferences, secrecy orders and/or successful appeals to the Board of Patent Appeals and Interferences >(Board)< or the Federal courts in accordance with 37 CFR 1.701. See former 35 U.S.C. 154(b), as reproduced above. Extensions for successful appeals are limited in that the patent must not be subject to a terminal disclaimer. Further, the period of extension will be reduced by any time attributable to appellate review within three years of the filing date of the >first national< application >for patent<, and the period of extension for appellate review will be reduced by any time during which the applicant did not act with due diligence. The patent term extension that may be available under 35 U.S.C. 156 for premarket regulatory review is separate from and will be added to any extension that may be available under former and current 35 U.S.C. 154. See MPEP § 2750 *et seq.* 35 U.S.C. 154(b) was amended, effective May 29, 2000, to provide for patent term adjustment for applications filed on or after May 29, 2000, but the provisions of former 35 U.S.C. 154(b), as reproduced above, continue to apply to applications filed between and including June 8, 1995 and May 28, 2000.

Examiners make no decisions regarding patent term extensions. Extensions under former 35 U.S.C. 154 will be calculated by PALM and will be printed on the Notice of Allowance and Issue Fee Due. Any patent term extension granted as a result of administrative delay pursuant to 37 CFR 1.701 will also be printed on the face of the patent in generally the same location as the terminal disclaimer information. The term of a patent will be readily discernible from the face of the patent (i.e., from the filing date, continuing data, issue date and any patent term extensions printed on the patent).

If applicant disagrees with the patent term extension ** information printed on the Notice of Allowance and **>Fee(s)< Due, applicant may request review by way of a petition under 37 CFR 1.181. To avoid loss of patent term, however, any such petitions filed during the pendency of the application will not be decided until after issuance of the patent. If the petition is granted, a Certificate of Correction pursuant to 37 CFR 1.322 will be issued. If **>the patent issues with a different patent term extension value than that indicated on the Notice of Allowance or Office computer records (Patent Application Information Retrieval (PAIR))<, patentee may seek correction of the patent term extension information by filing a request for a Certificate of Correction pursuant to 37 CFR 1.322.

>Effective May 24, 2004, 37 CFR 1.701(a)(3) was amended to indicate that certain remands by the Board shall be considered “a decision in the review reversing an adverse determination of patentability” for patent term extension purposes. Any request for reconsideration of the patent term extension indicated on a patent resulting from an application in which the notice of allowance was mailed before May 24, 2004 on the basis of the changes to 37 CFR 1.701 must be filed no later than July 21, 2004.<

Petitions and Certificates of Correction regarding patent term extension under former 35 U.S.C. 154(b) should be addressed to **>Mail Stop Patent Ext., Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450<.

2730 Applications Filed on or After May 29, 2000; Grounds for Adjustment [R-2]

35 U.S.C. 154. *Contents and term of patent; provisional rights.*

(b) ADJUSTMENT OF PATENT TERM.—

(1) PATENT TERM GUARANTEES.—

(A) GUARANTEE OF PROMPT PATENT AND TRADEMARK OFFICE RESPONSES.— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to the failure of the Patent and Trademark Office to—

(i) provide at least one of the notifications under section 132 of this title or a notice of allowance under section 151 of this title not later than 14 months after—

(I) the date on which an application was filed under section 111(a) of this title; or

(II) the date on which an international application fulfilled the requirements of section 371 of this title;

(ii) respond to a reply under section 132, or to an appeal taken under section 134, within 4 months after the date on which the reply was filed or the appeal was taken;

(iii) act on an application within 4 months after the date of a decision by the Board of Patent Appeals and Interferences under section 134 or 135 or a decision by a Federal court under section 141, 145, or 146 in a case in which allowable claims remain in the application; or

(iv) issue a patent within 4 months after the date on which the issue fee was paid under section 151 and all outstanding requirements were satisfied, the term of the patent shall be extended 1 day for each day after the end of the period specified in clause (i), (ii), (iii), or (iv), as the case may be, until the action described in such clause is taken.

(B) GUARANTEE OF NO MORE THAN 3-YEAR APPLICATION PENDENCY.— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to the failure of the United States Patent and Trademark Office to issue a patent within 3 years after the actual filing date of the application in the United States, not including—

(i) any time consumed by continued examination of the application requested by the applicant under section 132(b);

(ii) any time consumed by a proceeding under section 135(a), any time consumed by the imposition of an order under section 181, or any time consumed by appellate review by the Board of Patent Appeals and Interferences or by a Federal court; or

(iii) any delay in the processing of the application by the United States Patent and Trademark Office requested by the applicant except as permitted by paragraph (3)(C), the term of the patent shall be extended 1 day for each day after the end of that 3-year period until the patent is issued.

(C) GUARANTEE OR ADJUSTMENTS FOR DELAYS DUE TO INTERFERENCES, SECRECY ORDERS,

AND APPEALS.— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to—

- (i) a proceeding under section 135(a);
- (ii) the imposition of an order under section 181; or
- (iii) appellate review by the Board of Patent Appeals and Interferences or by a Federal court in a case in which

the patent was issued under a decision in the review reversing an adverse determination of patentability, the term of the patent shall be extended 1 day for each day of the pendency of the proceeding, order, or review, as the case may be.

(2) LIMITATIONS.—

(A) IN GENERAL.— To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

(B) DISCLAIMED TERM.— No patent the term of which has been disclaimed beyond a specified date may be adjusted under this section beyond the expiration date specified in the disclaimer.

(C) REDUCTION OF PERIOD OF ADJUSTMENT.—

(i) The period of adjustment of the term of a patent under paragraph (1) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution of the application.

(ii) With respect to adjustments to patent term made under the authority of paragraph (1)(B), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of 3 months that are taken to respond to a notice from the Office making any rejection, objection, argument, or other request, measuring such 3-month period from the date the notice was given or mailed to the applicant.

(iii) The Director shall prescribe regulations establishing the circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application.

(3) PROCEDURES FOR PATENT TERM ADJUSTMENT DETERMINATION.—

(A) The Director shall prescribe regulations establishing procedures for the application for and determination of patent term adjustments under this subsection.

(B) Under the procedures established under subparagraph (A), the Director shall—

(i) make a determination of the period of any patent term adjustment under this subsection, and shall transmit a notice of that determination with the written notice of allowance of the application under section 151; and

(ii) provide the applicant one opportunity to request reconsideration of any patent term adjustment determination made by the Director.

(C) The Director shall reinstate all or part of the cumulative period of time of an adjustment under paragraph (2)(C) if the applicant, prior to the issuance of the patent, makes a showing that, in spite of all due care, the applicant was unable to respond

within the 3-month period, but in no case shall more than three additional months for each such response beyond the original 3-month period be reinstated.

(D) The Director shall proceed to grant the patent after completion of the Director's determination of a patent term adjustment under the procedures established under this subsection, notwithstanding any appeal taken by the applicant of such determination.

(4) APPEAL OF PATENT TERM ADJUSTMENT DETERMINATION.—

(A) An applicant dissatisfied with a determination made by the Director under paragraph (3) shall have remedy by a civil action against the Director filed in the United States District Court for the District of Columbia within 180 days after the grant of the patent. Chapter 7 of title 5, United States Code, shall apply to such action. Any final judgment resulting in a change to the period of adjustment of the patent term shall be served on the Director, and the Director shall thereafter alter the term of the patent to reflect such change.

(B) The determination of a patent term adjustment under this subsection shall not be subject to appeal or challenge by a third party prior to the grant of the patent.

37 CFR 1.702. Grounds for adjustment of patent term due to examination delay under the Patent Term Guarantee Act of 1999 (original applications, other than designs, filed on or after May 29, 2000).

(a) *Failure to take certain actions within specified time frames.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the failure of the Office to:

(1) Mail at least one of a notification under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151 not later than fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 in an international application;

(2) Respond to a reply under 35 U.S.C. 132 or to an appeal taken under 35 U.S.C. 134 not later than four months after the date on which the reply was filed or the appeal was taken;

(3) Act on an application not later than four months after the date of a decision by the Board of Patent Appeals and Interferences under 35 U.S.C. 134 or 135 or a decision by a Federal court under 35 U.S.C. 141, 145, or 146 where at least one allowable claim remains in the application; or

(4) Issue a patent not later than four months after the date on which the issue fee was paid under 35 U.S.C. 151 and all outstanding requirements were satisfied.

(b) *Failure to issue a patent within three years of the actual filing date of the application.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the failure of the Office to issue a patent within three years after the date on which the application was filed under 35 U.S.C. 111(a) or the national stage commenced under 35 U.S.C. 371(b) or (f) in an international application, but not including:

(1) Any time consumed by continued examination of the application under 35 U.S.C. 132(b);

(2) Any time consumed by an interference proceeding under 35 U.S.C. 135(a);

(3) Any time consumed by the imposition of a secrecy order under 35 U.S.C. 181;

(4) Any time consumed by review by the Board of Patent Appeals and Interferences or a Federal court; or

(5) Any delay in the processing of the application by the Office that was requested by the applicant.

(c) *Delays caused by interference proceedings.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to interference proceedings under 35 U.S.C. 135(a).

(d) *Delays caused by secrecy order.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to the application being placed under a secrecy order under 35 U.S.C. 181.

(e) *Delays caused by successful appellate review.* Subject to the provisions of 35 U.S.C. 154(b) and this subpart, the term of an original patent shall be adjusted if the issuance of the patent was delayed due to review by the Board of Patent Appeals and Interferences under 35 U.S.C. 134 or by a Federal court under 35 U.S.C. 141 or 145, if the patent was issued under a decision in the review reversing an adverse determination of patentability. If an application is remanded by a panel of the Board of Patent Appeals and Interferences and the remand is the last action by a panel of the Board of Patent Appeals and Interferences prior to the mailing of a notice of allowance under 35 U.S.C. 151 in the application, the remand shall be considered a decision by the Board of Patent Appeals and Interferences as that phrase is used in 35 U.S.C. 154(b)(1)(A)(iii), a decision in the review reversing an adverse determination of patentability as that phrase is used in 35 U.S.C. 154(b)(1)(C)(iii), and a final decision in favor of the applicant under § 1.703(e). A remand by a panel of the Board of Patent Appeals and Interferences shall not be considered a decision in the review reversing an adverse determination of patentability as provided in this paragraph if there is filed a request for continued examination under 35 U.S.C. 132(b) that was not first preceded by the mailing, after such remand, of at least one of an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151.<

(f) The provisions of this section and §§1.703 through 1.705 apply only to original applications, except applications for a design patent, filed on or after May 29, 2000, and patents issued on such applications.

35 U.S.C. 154(b), as amended effective May 29, 2000, and 37 CFR 1.702-1.705 apply to utility and plant patent applications filed on or after May 29, 2000. All references to 35 U.S.C. 154(b) hereinafter are to 35 U.S.C. 154(b), as amended effective May 29, 2000.

37 CFR 1.702 sets forth the bases for patent term adjustment under 35 U.S.C. 154(b)(1).

37 CFR 1.702(a) indicates that a patent is entitled to patent term adjustment if the Office fails to perform certain acts of examination within specified time frames (35 U.S.C. 154(b)(1)(A)).

37 CFR 1.702(b) indicates that a patent is entitled to patent term adjustment if, subject to a number of limitations, the Office fails to issue a patent within three years of the actual filing date of the application (35 U.S.C. 154(b)(1)(B)). In the case of an international application, the phrase “actual filing date of the application in the United States” means the date the national stage commenced under 35 U.S.C. 371(b) or (f). See *Changes to Implement Patent Term Adjustment Under Twenty-Year Patent Term*, 65 FR 56366, 56382-84, (Sept. 18, 2000), 1239 *Off. Gaz. Pat. Office* 14, 28-30 (Oct. 3, 2000).

37 CFR 1.702(c) indicates that a patent is entitled to patent term adjustment if the issuance of the patent was delayed by an interference proceeding (35 U.S.C. 154(b)(1)(C)(i)). 37 CFR 1.702(d) indicates that a patent is entitled to patent term adjustment if the issuance of the patent was delayed by the application being placed under a secrecy order under 35 U.S.C. 181 (35 U.S.C. 154(b)(1)(C)(ii)). 37 CFR 1.702(e) indicates that a patent is entitled to patent term adjustment if the issuance of the patent was delayed by successful appellate review under 35 U.S.C. 134, 141, or 145 (35 U.S.C. 154(b)(1)(C)(iii)).

>Effective May 24, 2004, 37 CFR 1.702(e) was amended to indicate that certain remands by the Board of Patent Appeals and Interferences shall be considered “a decision in the review reversing an adverse determination of patentability” for patent term adjustment purposes. Any request for reconsideration of the patent term adjustment indicated on a patent resulting from an application in which the notice of allowance was mailed before May 24, 2004 on the basis of the changes to 37 CFR 1.702 must be filed no later than July 21, 2004.<

37 CFR 1.702(f) provides that the provisions of 37 CFR 1.702 through 1.705 apply only to original (i.e., non-reissue) applications, except applications for a design patent, filed on or after May 29, 2000, and patents issued on such applications. Since a continued prosecution application (CPA) filed under 37 CFR 1.53(d) is a new (continuing) application, a CPA filed on or after May 29, 2000, >and before July 14, 2003,< is entitled to the benefits of the patent term adjustment

provisions of 35 U.S.C. 154(b) and 37 CFR 1.702 through 1.705. Since a request for continued examination (RCE) filed under 35 U.S.C. 132(b) and 37 CFR 1.114 is **not** a new application (it is a submission in a previously filed application), filing an RCE in an application filed before May 29, 2000, does **not** cause that application to be entitled to the benefits of the patent term adjustment provisions of 35 U.S.C. 154(b) and 37 CFR 1.702 through 1.705.

37 CFR 1.703. Period of adjustment of patent term due to examination delay.

(a) The period of adjustment under § 1.702(a) is the sum of the following periods:

(1) The number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(2) The number of days, if any, in the period beginning on the day after the date that is four months after the date a reply under § 1.111 was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(3) The number of days, if any, in the period beginning on the day after the date that is four months after the date a reply in compliance with § 1.113(c) was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(4) The number of days, if any, in the period beginning on the day after the date that is four months after the date an appeal brief in compliance with § 1.192 was filed and ending on the date of mailing of any of an examiner's answer under § 1.193, an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(5) The number of days, if any, in the period beginning on the day after the date that is four months after the date of a final decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145 or 146 where at least one allowable claim remains in the application and ending on the date of mailing of either an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151, whichever occurs first; and

(6) The number of days, if any, in the period beginning on the day after the date that is four months after the date the issue fee was paid and all outstanding requirements were satisfied and ending on the date a patent was issued.

(b) The period of adjustment under § 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a) or the national stage commenced under 35 U.S.C. 371(b) or (f) in an international application and ending on the date a patent was issued, but not including the sum of the following periods:

(1) The number of days, if any, in the period beginning on the date on which a request for continued examination of the application under 35 U.S.C. 132(b) was filed and ending on the date the patent was issued;

(2)(i) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(ii) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension;

(3)(i) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(ii) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order was removed;

(iii) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(iv) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151; and,

(4) The number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of the last decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145, or on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first, if the appeal did not result in a decision by the Board of Patent Appeals and Interferences.

(c) The period of adjustment under § 1.702(c) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(2) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

(d) The period of adjustment under § 1.702(d) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(2) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the

application under secrecy order and ending on the date the secrecy order was removed;

(3) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(4) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151.

(e) The period of adjustment under § 1.702(e) is the sum of the number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

(f) ~~**>~~The adjustment will run from the expiration date of the patent as set forth in 35 U.S.C. 154(a)(2). To the extent that periods of delay attributable to the grounds specified in §1.702 overlap, the period of adjustment granted under this section shall not exceed the actual number of days the issuance of the patent was delayed. The term of a patent entitled to adjustment under § 1.702 and this section shall be adjusted for the sum of the periods calculated under paragraphs (a) through (e) of this section, to the extent that such periods are not overlapping, less the sum of the periods calculated under § 1.704. The date indicated on any certificate of mailing or transmission under § 1.8 shall not be taken into account in this calculation.<

(g) No patent, the term of which has been disclaimed beyond a specified date, shall be adjusted under § 1.702 and this section beyond the expiration date specified in the disclaimer.

37 CFR 1.704. Reduction of period of adjustment of patent term.

(a) The period of adjustment of the term of a patent under § 1.703(a) through (e) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution (processing or examination) of the application.

(b) With respect to the grounds for adjustment set forth in §§ 1.702(a) through (e), and in particular the ground of adjustment set forth in § 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection, objection, argument, or other request and ending on the date the reply was filed. The period, or shortened statutory period, for reply that is set in the Office action or notice has no effect on the three-month period set forth in this paragraph.

(c) Circumstances that constitute a failure of the applicant to engage in reasonable efforts to conclude processing or examination of an application also include the following circumstances, which will result in the following reduction of the period of adjustment set forth in § 1.703 to the extent that the periods are not overlapping:

(1) Suspension of action under § 1.103 at the applicant's request, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for suspension of action under § 1.103 was filed and ending on the date of the termination of the suspension;

(2) Deferral of issuance of a patent under § 1.314, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for deferral of issuance of a patent under § 1.314 was filed and ending on the date the patent was issued;

(3) Abandonment of the application or late payment of the issue fee, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date of abandonment or the date after the date the issue fee was due and ending on the earlier of:

(i) The date of mailing of the decision reviving the application or accepting late payment of the issue fee; or

(ii) The date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed;

(4) Failure to file a petition to withdraw the holding of abandonment or to revive an application within two months from the mailing date of a notice of abandonment, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date two months from the mailing date of a notice of abandonment and ending on the date a petition to withdraw the holding of abandonment or to revive the application was filed;

(5) Conversion of a provisional application under 35 U.S.C. 111(b) to a nonprovisional application under 35 U.S.C. 111(a) pursuant to 35 U.S.C. 111(b)(5), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date the application was filed under 35 U.S.C. 111(b) and ending on the date a request in compliance with §1.53(c)(3) to convert the provisional application into a nonprovisional application was filed;

(6) Submission of a preliminary amendment or other preliminary paper less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the date of mailing of the supplemental Office action or notice of allowance; or

(ii) Four months;

(7) Submission of a reply having an omission (§1.135(c)), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the reply having an omission was filed and ending on the

date that the reply or other paper correcting the omission was filed;

(8) Submission of a supplemental reply or other paper, other than a supplemental reply or other paper expressly requested by the examiner, after a reply has been filed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the initial reply was filed and ending on the date that the supplemental reply or other such paper was filed;

(9) Submission of an amendment or other paper after a decision by the Board of Patent Appeals and Interferences, other than a decision designated as containing a new ground of rejection under § 1.196(b) or statement under § 1.196(c), or a decision by a Federal court, less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or supplemental notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the mailing date of the supplemental Office action or notice of allowance; or

(ii) Four months;

(10) Submission of an amendment under § 1.312 or other paper after a notice of allowance has been given or mailed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the date the amendment under § 1.312 or other paper was filed and ending on the mailing date of the Office action or notice in response to the amendment under § 1.312 or such other paper; or

(ii) Four months; and

(11) Further prosecution via a continuing application, in which case the period of adjustment set forth in § 1.703 shall not include any period that is prior to the actual filing date of the application that resulted in the patent.

(d) ****>**A paper containing only an information disclosure statement in compliance with §§ 1.97 and 1.98 will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraphs (c)(6), (c)(8), (c)(9), or (c)(10) of this section if it is accompanied by a statement that each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in § 1.56(c) more than thirty days prior to the filing of the information disclosure statement. This thirty-day period is not extendable.<

(e) Submission of an application for patent term adjustment under § 1.705(b) (with or without request under § 1.705(c) for reinstatement of reduced patent term adjustment) will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraph (c)(10) of this section.

37 CFR 1.705. Patent term adjustment determination

(a) The notice of allowance will include notification of any patent term adjustment under 35 U.S.C. 154(b).

(b) Any request for reconsideration of the patent term adjustment indicated in the notice of allowance, except as provided in paragraph (d) of this section, and any request for reinstatement of all or part of the term reduced pursuant to § 1.704(b) must be by way of an application for patent term adjustment. An application for patent term adjustment under this section must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. An application for patent term adjustment under this section must be accompanied by:

(1) The fee set forth in § 1.18(e); and

(2) A statement of the facts involved, specifying:

(i) The correct patent term adjustment and the basis or bases under § 1.702 for the adjustment;

(ii) The relevant dates as specified in §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in § 1.703(f) to which the patent is entitled;

(iii) Whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and

(iv)(A) Any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704; or

(B) That there were no circumstances constituting a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704.

(c) Any application for patent term adjustment under this section that requests reinstatement of all or part of the period of adjustment reduced pursuant to § 1.704(b) for failing to reply to a rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request must also be accompanied by:

(1) The fee set forth in § 1.18(f); and

****>**

(2) A showing to the satisfaction of the Director that, in spite of all due care, the applicant was unable to reply to the rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request. The Office shall not grant any request for reinstatement for more than three additional months for each reply beyond three months from the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request.

(d) If there is a revision to the patent term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment. If the patent indicates or should have indicated a revised patent term adjustment, any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued and must comply with the requirements of paragraphs (b)(1) and (b)(2) of this section. Any request for reconsideration

under this section that raises issues that were raised, or could have been raised, in an application for patent term adjustment under paragraph (b) of this section shall be dismissed as untimely as to those issues.

(e) The periods set forth in this section are not extendable.

(f) No submission or petition on behalf of a third party concerning patent term adjustment under 35 U.S.C. 154(b) will be considered by the Office. Any such submission or petition will be returned to the third party, or otherwise disposed of, at the convenience of the Office.

>

2731 Period of Adjustment [R-2]

37 CFR 1.703. Period of adjustment of patent term due to examination delay.

(a) The period of adjustment under § 1.702(a) is the sum of the following periods:

(1) The number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(2) The number of days, if any, in the period beginning on the day after the date that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(3) The number of days, if any, in the period beginning on the day after the date that is four months after the date a reply in compliance with § 1.113(c) was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(4) The number of days, if any, in the period beginning on the day after the date that is four months after the date an appeal brief in compliance with § 1.192 was filed and ending on the date of mailing of any of an examiner's answer under § 1.193, an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first;

(5) The number of days, if any, in the period beginning on the day after the date that is four months after the date of a final decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145 or 146 where at least one allowable claim remains in the application and ending on the date of mailing of either an action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151, whichever occurs first; and

(6) The number of days, if any, in the period beginning on the day after the date that is four months after the date the issue fee was paid and all outstanding requirements were satisfied and ending on the date a patent was issued.

(b) The period of adjustment under § 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the date on which the application was filed under 35 U.S.C. 111(a) or the national stage commenced under

35 U.S.C. 371(b) or (f) in an international application and ending on the date a patent was issued, but not including the sum of the following periods:

(1) The number of days, if any, in the period beginning on the date on which a request for continued examination of the application under 35 U.S.C. 132(b) was filed and ending on the date the patent was issued;

(2)(i) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(ii) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension;

(3)(i) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(ii) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order was removed;

(iii) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(iv) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151; and,

(4) The number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of the last decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145, or on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first, if the appeal did not result in a decision by the Board of Patent Appeals and Interferences.

(c) The period of adjustment under § 1.702(c) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and

(2) The number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

(d) The period of adjustment under § 1.702(d) is the sum of the following periods, to the extent that the periods are not overlapping:

(1) The number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181;

(2) The number of days, if any, in the period beginning on the date of mailing of an examiner's answer under § 1.193 in the application under secrecy order and ending on the date the secrecy order was removed;

(3) The number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and

(4) The number of days, if any, in the period beginning on the date of notification under § 5.3(c) of this chapter and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151.

(e) The period of adjustment under § 1.702(e) is the sum of the number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and § 1.191 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

(f) The adjustment will run from the expiration date of the patent as set forth in 35 U.S.C. 154(a)(2). To the extent that periods of delay attributable to the grounds specified in § 1.702 overlap, the period of adjustment granted under this section shall not exceed the actual number of days the issuance of the patent was delayed. The term of a patent entitled to adjustment under § 1.702 and this section shall be adjusted for the sum of the periods calculated under paragraphs (a) through (e) of this section, to the extent that such periods are not overlapping, less the sum of the periods calculated under § 1.704. The date indicated on any certificate of mailing or transmission under § 1.8 shall not be taken into account in this calculation.

(g) No patent, the term of which has been disclaimed beyond a specified date, shall be adjusted under § 1.702 and this section beyond the expiration date specified in the disclaimer.

37 CFR 1.703 specifies the period of adjustment if a patent is entitled to patent term adjustment under 35 U.S.C. 154(b)(1) and 37 CFR 1.702. When a period is indicated (in 37 CFR 1.703 or 1.704) as "beginning" on a particular day, that day is included in the period, in that such day is "day one" of the period and not "day zero." For example, a period beginning on April 1 and ending on April 10 is ten (and not nine) days in length.

35 U.S.C. 154(b)(1)(A) and (B) provide for an adjustment of one day for each day after the end of the period set forth in 35 U.S.C. 154(b)(1)(A)(i), (ii), (iii), (iv), and (B) until the prescribed action is taken, whereas 35 U.S.C. 154(b)(1)(C) provides for an adjustment of one day for each day of the pendency of the proceeding, order, or review prescribed in 35 U.S.C. 154(b)(1)(C)(i) through (iii). Therefore, the end of the period set forth in 37 CFR 1.703(a) and

1.703(b) (which correspond to 35 U.S.C. 154(b)(1)(A) and (B)) is "day zero" (not "day one") as to the period of adjustment, whereas the first day of the proceeding, order, or review set forth in 37 CFR 1.703(c), 1.703(d), and 1.703(e) (which correspond to 35 U.S.C. 154(b)(1)(C)(i) through (iii)) is "day one" of the period of adjustment.

37 CFR 1.703(a) pertains to 35 U.S.C. 154(b)(1)(A) and indicates that the period of adjustment under 37 CFR 1.702(a) is the sum of the periods specified in 37 CFR 1.703(a)(1) through 37 CFR 1.703(a)(6).

37 CFR 1.703(a)(1) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(i) and specifies that the period is the number of days, if any, beginning on the date after the day that is fourteen months after the date on which the application was filed under 35 U.S.C. 111(a) or fulfilled the requirements of 35 U.S.C. 371 in an international application and ending on the mailing date of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first. For purposes of 35 U.S.C. 154(b)(1)(A)(i)(II), an international application fulfills the requirements of 35 U.S.C. 371 on the date of commencement of the national stage under 35 U.S.C. 371(b) or (f), or the date the application fulfills the requirements of 35 U.S.C. 371(c) if that date is later than the date of commencement of the national stage under 35 U.S.C. 371(b) or (f). In other words, the requirements of 35 U.S.C. 371 are met when applicant has met all of the requirements of 35 U.S.C. 371(c) and, unless applicant requests early processing under 35 U.S.C. 371(f), the time limit set forth in the applicable one of PCT Articles 22 and 39 has expired. Accordingly, the requirements of 35 U.S.C. 371 are met when the Office can begin examination of the patent application. If, for example, an applicant files the required oath or declaration (35 U.S.C. 115) and any necessary English translation after the expiration of the time limit set forth in Article 22 of the PCT or the time limit under Article 39 of the PCT, the date the requirements of 35 U.S.C. 371 are met is the date the requirements of 35 U.S.C. 371(c) are met. If, however, an applicant files the required declaration, filing fee, and any required English translation before the expiration of the relevant PCT Article 22 or Article 39 time period, but does not request early processing under 35

U.S.C. 371, the requirements of 35 U.S.C. 371 will be met once the applicable time period has expired.

A written restriction requirement, a written election of species requirement, a requirement for information under 37 CFR 1.105, an action under *Ex parte Quayle*, 1935 Comm'r Dec. 11 (1935), and a notice of allowability (PTOL-37) are each an action issued as a result of the examination conducted pursuant to 35 U.S.C. 131. As such, each of these Office actions is a notification under 35 U.S.C. 132. Office notices and letters issued as part of the pre-examination processing of an application are not notices issued as a result of an examination conducted pursuant to 35 U.S.C. 131, and thus are not notifications under 35 U.S.C. 132. Examples of such pre-examination processing notices are: a Notice of Incomplete Nonprovisional Application, a Notice of Omitted Item(s) in a Nonprovisional Application, a Notice to File Missing Parts of Application, a Notice of Informal Application, a Notice to File Corrected Application Papers Filing Date Granted, or a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures.

37 CFR 1.703(a)(2) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(ii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date a reply under 37 CFR 1.111 was filed and ending on the mailing date of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first.

37 CFR 1.703(a)(3) also pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(ii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date a reply in compliance with 37 CFR 1.113(c) was filed and ending on the date of mailing of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first. A reply under 37 CFR 1.113 is a reply to a final Office action, and a reply in compliance with 37 CFR 1.113 is a reply that cancels all of the rejected claims and removes all outstanding objections and requirements or otherwise places the application in condition for allowance. Any amendment after final that does not cancel all of the rejected claims and remove all outstanding objections and requirements or otherwise place the application in

condition for allowance is not a reply in compliance with 37 CFR 1.113(c).

37 CFR 1.703(a)(4) also pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(ii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date an appeal brief in compliance with 37 CFR 1.192 was filed and ending on the mailing date of any of an examiner's answer under 37 CFR 1.193, an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first. As discussed below, the phrase "the date on which" an "appeal was taken" in 35 U.S.C. 154(b)(1)(A)(ii) means the date on which an appeal brief (and not a notice of appeal) was filed. The phrase "appeal brief in compliance with 37 CFR 1.192" requires that: (1) the appeal brief fee (37 CFR 1.17(c)) be paid (37 CFR 1.192(a)); and (2) the appeal brief complies with 37 CFR 1.192(c)(1) through (c)(9).

37 CFR 1.703(a)(5) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(iii) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date of a final decision by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145 or 146, where at least one allowable claim remains in the application and ending on the mailing date of either an action under 35 U.S.C. 132, or a notice of allowance under 35 U.S.C. 151, whichever occurs first.

The phrase "allowable claims remain in the application" for purposes of 35 U.S.C. 154(b)(1)(A)(iii) means that after the decision there is at least one pending claim (for purposes of statutory construction, "words importing the plural include the singular" (1 U.S.C. 1)) that is not withdrawn from consideration and is not subject to a rejection, objection, or other requirement. This applies in the following situations: (1) at least one claim is allowable (not merely objected to) at the time the examiner's answer is mailed and is not canceled before, or made subject to a rejection as a result of, the appellate review; or (2) when all of the rejections applied to at least one claim are reversed, and such claim is not made subject to a rejection, as a result of the appellate review. For example:

(A) If claims 1 and 2 (both independent) are pending, the decision affirms the rejection of claim 1,

and claim 2 was indicated as allowable prior to the appeal, “allowable claims remain in the application” for purposes of 35 U.S.C. 154(b)(1)(A)(iii).

(B) If claims 1 and 2 are pending, the decision affirms the rejection of claim 1, and claim 2 was objected to by the examiner prior to the appeal as being allowable except for its dependency from claim 1, “allowable claims” do not “remain in the application” for purposes of 35 U.S.C. 154(b)(1)(A)(iii) (claim 2 is not allowable because there is an outstanding objection to it).

(C) If claims 1 and 2 are pending, and the decision affirms the rejection of claim 1 and reverses the rejection of claim 2, “allowable claims remain in the application” for purposes of 35 U.S.C. 154(b)(1)(A)(iii) (claim 2 is “allowable” within the meaning of 37 CFR 1.703(a)(5) because there is no outstanding objection or requirement as to it (see MPEP § 1214.06, paragraph (I)(B))).

37 CFR 1.703(a)(6) pertains to the provisions of 35 U.S.C. 154(b)(1)(A)(iv) and specifies that the period is the number of days, if any, beginning on the day after the date that is four months after the date the issue fee was paid and all outstanding requirements were satisfied and ending on the date the patent was issued. The date the issue fee was paid and all outstanding requirements were satisfied is the later of the date the issue fee was paid or the date all outstanding requirements were satisfied. Note that the filing of a priority document (and processing fee) is not considered an outstanding requirement under 35 U.S.C. 154(b)(1)(A)(iv) and 37 CFR 1.703(a)(6) because if the priority document is not filed the patent simply issues without the priority claim (the application is not abandoned) and since no petition is required to add a priority claim after payment of the issue fee. If prosecution in an application is reopened after allowance (see MPEP § 1308), all outstanding requirements are not satisfied until the application is again in condition for allowance as indicated by the issuance of a new notice of allowance under 35 U.S.C. 151 (see MPEP § 1308).

37 CFR 1.703(b) pertains to the provisions of 35 U.S.C. 154(b)(1)(B) and indicates that the period of adjustment under 37 CFR 1.702(b) is the number of days, if any, in the period beginning on the day after the date that is three years after the actual filing date of the application and ending on the date a patent was

issued. 37 CFR 1.703(b) also sets forth the limitations on patent term adjustment specified in 35 U.S.C. 154(b)(1)(B)(i) and (ii). Specifically, 37 CFR 1.703(b) provides that the period of adjustment of the term of a patent shall not include the period equal to the sum of the following periods: (1) The period of pendency consumed by continued examination of the application under 35 U.S.C. 132(b) (35 U.S.C. 154(b)(1)(B)(i)); (2) the period of pendency consumed by interference proceedings (35 U.S.C. 154(b)(1)(B)(ii)); (3) the period of pendency consumed by imposition of a secrecy order (35 U.S.C. 154(b)(1)(B)(ii)); and (4) the period of pendency consumed by appellate review under 35 U.S.C. 134, 141, 145, whether successful or unsuccessful (35 U.S.C. 154(b)(1)(B)(ii)). The provisions of 35 U.S.C. 154(b)(1)(B)(iii) concerning the period of pendency consumed by delays in the processing of the application requested by the applicant are treated in 37 CFR 1.704 as such delays are also circumstances constituting a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application.

37 CFR 1.703(c) pertains to the provisions of 35 U.S.C. 154(b)(1)(C)(i) and indicates that the period of adjustment under 37 CFR 1.702(c) is the sum of the following periods (to the extent that such periods are not overlapping): (1) the number of days, if any, in the period beginning on the date an interference was declared or redeclared to involve the application in the interference and ending on the date that the interference was terminated with respect to the application; and (2) the number of days, if any, in the period beginning on the date prosecution in the application was suspended by the Office due to interference proceedings under 35 U.S.C. 135(a) not involving the application and ending on the date of the termination of the suspension.

37 CFR 1.703(d) pertains to the provisions of 35 U.S.C. 154(b)(1)(C)(ii) and indicates that the period of adjustment under 37 CFR 1.702(d) is the sum of the following periods (to the extent that such periods are not overlapping): (1) the number of days, if any, the application was maintained in a sealed condition under 35 U.S.C. 181; (2) the number of days, if any, in the period beginning on the date of mailing of an examiner’s answer under 37 CFR 1.193 in the application under secrecy order and ending on the date the

secrecy order was removed; (3) the number of days, if any, in the period beginning on the date applicant was notified that an interference would be declared but for the secrecy order and ending on the date the secrecy order was removed; and (4) the number of days, if any, in the period beginning on the date of notification under 37 CFR 5.3(c) and ending on the date of mailing of the notice of allowance under 35 U.S.C. 151 and 37 CFR 1.311.

37 CFR 1.703(e) pertains to the provisions of 35 U.S.C. 154(b)(1)(C)(iii) and indicates that the period of adjustment under 37 CFR 1.702(e) is the sum of the number of days, if any, in the period beginning on the date on which a notice of appeal to the Board of Patent Appeals and Interferences was filed under 35 U.S.C. 134 and 37 CFR 1.191 and ending on the date of a final decision in favor of the applicant by the Board of Patent Appeals and Interferences or by a Federal court in an appeal under 35 U.S.C. 141 or a civil action under 35 U.S.C. 145.

37 CFR 1.703(f) indicates that the adjustment will run from the expiration date of the patent as set forth in 35 U.S.C. 154(a)(2) and also indicates that to the extent that periods of delay attributable to the grounds specified in 37 CFR 1.702 overlap, the period of adjustment will not exceed the actual number of days the issuance of the patent was delayed (35 U.S.C. 154(b)(2)(A)). 37 CFR 1.703(f) also specifically indicates that the term of a patent entitled to adjustment under 37 CFR 1.702 and 1.703 shall be adjusted for the sum of the periods calculated under 37 CFR 1.703(a) through (e), to the extent that such periods are not overlapping, less the sum of the periods calculated under 37 CFR 1.704.

Moreover, 37 CFR 1.703(f) provides that the date indicated on any certificate of mailing or transmission under 37 CFR 1.8 shall not be taken into account in this calculation. The date indicated on a certificate of mailing is used only to determine whether the correspondence is timely (including whether any extension of the time and fee are required) so as to avoid abandonment of the application or termination or dismissal of proceedings. The actual date of receipt of the correspondence in the Office is used for all other purposes. See 37 CFR 1.8(a). Thus, while the date indicated on any certificate of mailing or transmission under 37 CFR 1.8 will continue to be taken into account in determining timeliness, the date of filing (37 CFR

1.6) will be the date used in a patent term adjustment calculation. Applicant may wish to consider the use of the “Express Mail Post Office to Addressee” service of the United States Postal Service (37 CFR 1.10) or facsimile transmission (37 CFR 1.6(d)) for replies to be accorded the earliest possible filing date for patent term adjustment calculations. Alternatively, applicant may choose to mail correspondence with sufficient time to ensure that the correspondence is received in the Office (and stamped with a date of receipt) before the expiration of the three-month period. Applicants are encouraged to check PAIR to verify the date of deposit entered in PALM for the correspondence. Applicants should contact the Office for correction of any such entries prior to the mailing of the notice of allowance. At the time of the mailing of the notice of allowance, the patent term adjustment calculation will be made with the dates in PALM. Thereafter, a patent term adjustment application (37 CFR 1.705(b) or (c)), accompanied by the requisite fee and statement or showing, will be necessary to have any reduction of patent term reinstated.

Finally, 37 CFR 1.703(g) indicates that no patent, the term of which has been disclaimed beyond a specified date, shall be adjusted under 37 CFR 1.702 and 1.703 beyond the expiration date specified in the disclaimer (35 U.S.C. 154(b)(2)(B)).<

>

2732 Reduction of Period of Adjustment of Patent Term [R-2]

37 CFR 1.704. Reduction of period of adjustment of patent term.

(a) The period of adjustment of the term of a patent under § 1.703(a) through (e) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution (processing or examination) of the application.

(b) With respect to the grounds for adjustment set forth in §§ 1.702(a) through (e), and in particular the ground of adjustment set forth in § 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection,

objection, argument, or other request and ending on the date the reply was filed. The period, or shortened statutory period, for reply that is set in the Office action or notice has no effect on the three-month period set forth in this paragraph.

(c) Circumstances that constitute a failure of the applicant to engage in reasonable efforts to conclude processing or examination of an application also include the following circumstances, which will result in the following reduction of the period of adjustment set forth in § 1.703 to the extent that the periods are not overlapping:

(1) Suspension of action under § 1.103 at the applicant's request, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for suspension of action under § 1.103 was filed and ending on the date of the termination of the suspension;

(2) Deferral of issuance of a patent under § 1.314, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date a request for deferral of issuance of a patent under § 1.314 was filed and ending on the date the patent was issued;

(3) Abandonment of the application or late payment of the issue fee, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date of abandonment or the date after the date the issue fee was due and ending on the earlier of:

(i) The date of mailing of the decision reviving the application or accepting late payment of the issue fee; or

(ii) The date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed;

(4) Failure to file a petition to withdraw the holding of abandonment or to revive an application within two months from the mailing date of a notice of abandonment, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date two months from the mailing date of a notice of abandonment and ending on the date a petition to withdraw the holding of abandonment or to revive the application was filed;

(5) Conversion of a provisional application under 35 U.S.C. 111(b) to a nonprovisional application under 35 U.S.C. 111(a) pursuant to 35 U.S.C. 111(b)(5), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the date the application was filed under 35 U.S.C. 111(b) and ending on the date a request in compliance with § 1.53(c)(3) to convert the provisional application into a nonprovisional application was filed;

(6) Submission of a preliminary amendment or other preliminary paper less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of

allowance and ending on the date of mailing of the supplemental Office action or notice of allowance; or

(ii) Four months;

(7) Submission of a reply having an omission (§ 1.135(c)), in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the reply having an omission was filed and ending on the date that the reply or other paper correcting the omission was filed;

(8) Submission of a supplemental reply or other paper, other than a supplemental reply or other paper expressly requested by the examiner, after a reply has been filed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the initial reply was filed and ending on the date that the supplemental reply or other such paper was filed;

(9) Submission of an amendment or other paper after a decision by the Board of Patent Appeals and Interferences, other than a decision designated as containing a new ground of rejection under § 1.196(b) or statement under § 1.196(c), or a decision by a Federal court, less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or supplemental notice of allowance, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the mailing date of the supplemental Office action or notice of allowance; or

(ii) Four months;

(10) Submission of an amendment under § 1.312 or other paper after a notice of allowance has been given or mailed, in which case the period of adjustment set forth in § 1.703 shall be reduced by the lesser of:

(i) The number of days, if any, beginning on the date the amendment under § 1.312 or other paper was filed and ending on the mailing date of the Office action or notice in response to the amendment under § 1.312 or such other paper; or

(ii) Four months; and

(11) Further prosecution via a continuing application, in which case the period of adjustment set forth in § 1.703 shall not include any period that is prior to the actual filing date of the application that resulted in the patent.

(d) A paper containing only an information disclosure statement in compliance with §§ 1.97 and 1.98 will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraphs (c)(6), (c)(8), (c)(9), or (c)(10) of this section if it is accompanied by a statement that each item of information contained in the information disclosure statement was first cited in any communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in § 1.56(c) more than thirty days prior to the filing of the information disclosure statement. This thirty-day period is not extendable.

(e) Submission of an application for patent term adjustment under § 1.705(b) (with or without request under § 1.705(c) for reinstatement of reduced patent term adjustment) will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under paragraph (c)(10) of this section.

37 CFR 1.704 implements the provisions of 35 U.S.C. 154(b)(2)(C) which provides that the period of patent term adjustment under 35 U.S.C. 154(b)(1) “shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution of the application,” and specifies certain circumstances as constituting a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Further, 35 U.S.C. 154(b)(2)(C)(iii) gives the Office the authority to prescribe regulations establishing circumstances that constitute “a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application.” 35 U.S.C. 154(b)(2)(C) does not require the applicant’s action or inaction (that amounts to a failure to engage in reasonable efforts to conclude prosecution of the application) to have caused or contributed to patent term adjustment for the period of adjustment to be reduced due to such action or inaction. The patent term adjustment provisions of 35 U.S.C. 154(b) create a balanced system allowing for patent term adjustment due to Office delays for a reasonably diligent applicant. Since the public has an interest in the technology disclosed and covered by a patent being available to the public at the earliest possible date, 35 U.S.C. 154(b)(2)(C)(i) provides that patent term adjustment is reduced by any period of time during which applicant failed to engage in reasonable efforts to conclude prosecution of the application, regardless of whether the applicant’s actions or inactions caused or contributed to patent term adjustment.

37 CFR 1.704(a) implements the provisions of 35 U.S.C. 154(b)(2)(C)(i) and sets forth that the period of adjustment shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution (i.e., processing or examination) of an application.

37 CFR 1.704(b) provides that with respect to the ground for adjustments set forth in 37 CFR 1.702(a) through (e), and in particular 37 CFR 1.702(b), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude prosecution for the

cumulative total of any periods of time in excess of three months that are taken to reply to any notice or action by the Office making any rejection, objection, argument, or other request, measuring such three-month period from the date the notice or action was mailed or given to the applicant. A Notice of Omitted Items in a Nonprovisional Application, however, is not a notice or action by the Office making a rejection, objection, argument, or other request within the meaning of 35 U.S.C. 154(b)(2)(C)(ii) or 37 CFR 1.704(b), since the Office does not require a reply to that notice to continue the processing and examination of an application. 37 CFR 1.704(b) indicates that the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date that is three months after the date of mailing or transmission of the Office communication notifying the applicant of the rejection, objection, argument, or other request and ending on the date the reply was filed. As discussed above, a reply is considered filed on the date of its actual receipt in the Office as defined by 37 CFR 1.6, and the date indicated on any certificate of mailing or transmission under 37 CFR 1.8 will not be taken into account for patent term adjustment purposes.

The three-month period in 37 CFR 1.704(b) applies to the Office notices and letters issued as part of the pre-examination processing of an application (except a Notice of Omitted Items in a Nonprovisional Application as discussed above). These notices include: (1) a Notice of Incomplete Nonprovisional Application (except as to any period prior to the filing date ultimately accorded to the application); (2) a Notice to File Missing Parts of Non-Provisional Application; (3) a Notice of Informal Application; (4) a Notice to File Corrected Application Papers Filing Date Granted; or (5) a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures.

In addition, the three-month period in 35 U.S.C. 154(b)(2)(C)(ii) and 37 CFR 1.704(b) applies regardless of the period for reply set in the Office action or notice. For example, if an Office action sets a one-month period for reply (restriction requirement), the applicant may obtain a two-month extension of time under 37 CFR 1.136(a) before being subject to a reduction of patent term adjustment under 35 U.S.C. 154(b)(2)(C)(ii) and 37 CFR 1.704(b). If, however, an

Office action sets a six-month period for reply, as is commonly set in applications subject to secrecy orders (see MPEP §130), the applicant is subject to a reduction of patent term adjustment under 35 U.S.C. 154(b)(2)(C)(ii) and 37 CFR 1.704(b) if the applicant does not reply to the Office action within three months, notwithstanding that a reply may be timely filed six months after the mailing date of the Office action.

37 CFR 1.704(c) establishes further circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. 37 CFR 1.704(c)(1) through (c)(11) set forth actions or inactions by an applicant that interfere with the Office's ability to process or examine an application (and thus circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application), as well as the period by which a period of adjustment set forth in 37 CFR 1.703 shall be reduced if an applicant engages in any of the enumerated actions or inactions. 37 CFR 1.704(c) requires that an applicant refrain from engaging in actions or inactions that prevent or interfere with the Office's ability to process or examine an application. An applicant who is engaging in actions or inactions that prevent or interfere with the Office's ability to process or examine an application cannot reasonably be characterized as "engag[ing] in reasonable efforts to conclude processing or examination of an application" (35 U.S.C. 154(b)(2)(C)(i)).

37 CFR 1.704(c)(1) through 1.704(c)(11) address situations that occur with sufficient frequency to warrant being specifically provided for in the rules of practice. These situations do not represent an exhaustive listing of actions or inactions that interfere with the Office's ability to process or examine an application, since there are a myriad of actions or inactions that occur infrequently but will interfere with the Office's ability to process or examine an application (e.g., applicant files and persists in requesting reconsideration of a meritless petition under 37 CFR 1.10; parties to an interference obtain an extension for purposes of settlement negotiations which do not result in settlement of the interference; and when the scope of the broadest claim in the application at the time an application is placed in condition for allowance is substantially the same as suggested or allowed by the

examiner more than six months earlier than the date the application was placed in condition for allowance). Thus, the actions or inactions set forth in 37 CFR 1.704(c) are exemplary circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The Office may also reduce a period of adjustment provided in 37 CFR 1.703 on the basis of conduct that interferes with the Office's ability to process or examine an application under the authority provided in 35 U.S.C. (b)(2)(C)(iii), even if such conduct is not specifically addressed in 37 CFR 1.704(c).

37 CFR 1.704(c)(1) establishes suspension of action under 37 CFR 1.103 at the applicant's request as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Obviously, if action is suspended at the applicant's request, the Office is precluded from processing or examining the application as a result of an action by the applicant. 37 CFR 1.704(c)(1) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date a request for suspension of action under 37 CFR 1.103 was filed and ending on the date of the termination of the suspension.

37 CFR 1.704(c)(2) establishes deferral of issuance of a patent under 37 CFR 1.314 as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Obviously, if issuance of the patent is deferred under 37 CFR 1.314, the Office is precluded from issuing the application as a result of an action by the applicant. When a petition under 37 CFR 1.314 is granted, the petition decision generally states that the application will be held for a period of a month to await the filing of a paper. At the end of the period, the application is returned to the issue process without a further communication from the Office to the applicant. 37 CFR 1.704(c)(2) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date a request for deferral of issuance of a patent under 37 CFR 1.314 was filed and ending on the issue date of the patent.

37 CFR 1.704(c)(3) establishes abandonment of the application or late payment of the issue fee as a circumstance that constitutes a failure of an applicant to

engage in reasonable efforts to conclude processing or examination of an application. Obviously, if the application is abandoned (either by failure to prosecute or late payment of the issue fee), the Office is precluded from processing or examining the application as a result of an action or inaction by the applicant. 37 CFR 1.704(c)(3) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date of abandonment or the date after the day the issue fee was due, and ending on the earlier of: (1) the date of mailing of the decision reviving the application or accepting late payment of the issue fee; or (2) the date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed. The phrase “earlier of...[t]he date that is four months after the date the grantable petition to revive the application or accept late payment of the issue fee was filed” is to place a cap (measured from the filing date of the grantable petition) on the reduction if the Office does not act on (grant) the grantable petition to revive within four months of the date it was filed.

37 CFR 1.704(c)(4) establishes failure to file a petition to withdraw a holding of abandonment or to revive an application within two months from the mailing date of a notice of abandonment as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Any applicant who considers an application to have been improperly held abandoned (the reduction in 37 CFR 1.704(c)(3) is applicable to the revival of an application properly held abandoned) is expected to file a petition to withdraw the holding of abandonment (or to revive the application) within two months from the mailing date of a notice of abandonment. See MPEP § 711.03(c), paragraph (I). 37 CFR 1.704(c)(4) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date two months from the mailing date of a notice of abandonment and ending on the date a petition to withdraw the holding of abandonment or to revive the application was filed.

If a petition to withdraw the holding of abandonment is granted, the Office’s PALM system records should be checked to ensure that the correct term adjustment determination is made. Applicants are

encouraged to check the Office’s PALM system records for their applications through PAIR (see MPEP § 2733). For example, if applicant shows that a reply was filed in the Office on March 2, but the March 2 reply was never matched with the file, when the petition to withdraw the holding of abandonment is granted, the receipt of a paper on March 2 should be recorded on the Office’s PALM system records. If the papers or dates are recorded incorrectly, applicant should contact the examiner, the examiner’s supervisor or the Technology Center customer service representative to have the entry corrected. If an applicant receives a Notice of Abandonment and does not request that the holding of abandonment be withdrawn within two months of the mailing date of the notice, the applicant has failed to engage in reasonable efforts to conclude prosecution and any patent term adjustment will be reduced pursuant to 37 CFR 1.704(c)(4).

37 CFR 1.704(c)(5) establishes conversion of a provisional application under 35 U.S.C. 111(b) to a nonprovisional application under 35 U.S.C. 111(a) (pursuant to 35 U.S.C. 111(b)(5); (see MPEP § 201.04(b)) as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Conversion of a provisional application to a nonprovisional application will require the Office to reprocess the application (as a nonprovisional application) up to one year after the filing date that will be accorded to such nonprovisional application as a result of an action by the applicant. 37 CFR 1.704(c)(5) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the date the application was filed under 35 U.S.C. 111(b) and ending on the date a request in compliance with 37 CFR 1.53(c)(3) to convert the provisional application into a nonprovisional application was filed.

37 CFR 1.704(c)(6) establishes submission of a preliminary amendment or other preliminary paper less than one month before the mailing of an Office action under 35 U.S.C. 132 or a notice of allowance under 35 U.S.C. 151 that requires the mailing of a supplemental Office action or notice of allowance as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. If the submission of

a preliminary amendment or other paper requires the Office to issue a supplemental Office action or notice of allowance, the submission of that preliminary amendment or other paper has interfered with the processing and examination of an application. 37 CFR 1.704(c)(6) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the lesser of the number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the date of mailing of the supplemental Office action or notice of allowance or four months. The phrase “lesser of... or [f]our months” is to provide a four-month cap for a reduction under 37 CFR 1.704(c)(6) if the Office takes longer than four months to issue a supplemental Office action or notice of allowance.

37 CFR 1.704(c)(7) establishes submission of a reply having an omission (37 CFR 1.135(c)) as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Submitting a reply having an omission requires the Office to issue an action under 37 CFR 1.135(c) and await and process the applicant’s reply to the action under 37 CFR 1.135(c) before the initial reply (as corrected) can be treated on its merits. In addition, 37 CFR 1.704(c)(7) provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the reply having an omission was filed and ending on the date that the reply or other paper correcting the omission was filed. The reference to 37 CFR 1.135(c) is parenthetical because 37 CFR 1.704(c)(7) is not limited to Office actions under 37 CFR 1.135(c) but applies when the Office issues any action or notice indicating that a reply has an omission which must be corrected: e.g., (1) a decision on a petition under 37 CFR 1.47 dismissing the petition as lacking an item necessary to grant the petition; or (2) a notice indicating that the computer readable format sequence listing filed in reply to a Notice to Comply with Requirements for Patent Applications Containing Nucleotide Sequence and/or Amino Acid Sequence Disclosures (PTO-1661) does not comply with 37 CFR 1.821 et seq.

37 CFR 1.704(c)(8) establishes submission of a supplemental reply or other paper after a reply has

been filed as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The submission of a supplemental reply or other paper (e.g., an information disclosure statement (IDS) or petition) after an initial reply was filed requires the Office to restart consideration of the initial reply in view of the supplemental reply or other paper, which will result in a delay in the Office’s response to the initial reply. 37 CFR 1.704(c)(8) does not apply to a supplemental reply or other paper that was expressly requested by the examiner. If an amendment is requested by an examiner, the examiner will have the paper processed so that it is included as part of an interview summary or examiner’s amendment and not a separate paper for PALM to flag in the patent term adjustment calculation. 37 CFR 1.704(c)(8) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the number of days, if any, beginning on the day after the date the initial reply was filed and ending on the date that the supplemental reply or such other paper was filed.

37 CFR 1.704(c)(9) establishes submission of an amendment or other paper in an application containing allowed claims after a decision by the Board of Patent Appeals and Interferences (other than a decision containing a rejection under 37 CFR 1.196(b)) or a Federal court less than one month before the mailing of an Office action under 35 U.S.C. 132 or notice of allowance under 35 U.S.C. 151, that requires the mailing of a supplemental Office action or supplemental notice of allowance as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The submission of an amendment or other paper (e.g., IDS or petition) in an application after a Board of Patent Appeals and Interferences or court decision requires the Office to restart consideration of the application in view of the amendment or other paper, which will result in a delay in the Office’s taking action on the application. 37 CFR 1.704(c)(9) also provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the lesser of the number of days, if any, beginning on the day after the mailing date of the original Office action or notice of allowance and ending on the mailing date of the supplemental Office action or notice of allowance or four months. The phrase “lesser of...or

[f]our months” is to provide a four-month cap for a reduction under 37 CFR 1.704(c)(9) if the Office takes longer than four months to issue a supplemental Office action or notice of allowance. If the amendment is requested by an examiner, the examiner will have the paper processed so that it is included as part of an interview summary or examiner’s amendment and not a separate paper for PALM to flag in the patent term adjustment calculation.

37 CFR 1.704(c)(10) establishes submission of an amendment under 37 CFR 1.312 or other paper after a notice of allowance has been given or mailed as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. The submission of amendments (or other papers) after an application is allowed may cause substantial interference with the patent issue process. Certain papers filed after allowance are not considered to be a failure to engage in reasonable efforts to conclude processing or examination of an application. See Clarification of 37 CFR 1.704(c)(10) – Reduction of Patent Term Adjustment for Certain Types of Papers Filed After a Notice of Allowance has been Mailed, 1247 Off. Gaz. Pat. Office 111 (June 26, 2001). The submission of the following papers after a “Notice of Allowance” is **not** considered a failure to engage in reasonable efforts to conclude processing or examination of an application: (1) Fee(s) Transmittal (PTOL-85B); (2) Power of Attorney; (3) Power to Inspect; (4) Change of Address; (5) Change of Status (small/not small entity status); (6) a response to the examiner’s reasons for allowance or a request to correct an error or omission in the “Notice of Allowance” or “Notice of Allowability;” and (7) letters related to government interests (e.g., those between NASA and the Office). Papers that **will be** considered a failure to engage in reasonable efforts to conclude processing or examination of an application include: (1) a request for a refund; (2) a status letter; (3) amendments under 37 CFR 1.312; (4) late priority claims; (5) a certified copy of a priority document; (6) drawings; (7) letters related to biologic deposits; and (8) oaths or declarations. 37 CFR 1.704(c)(10) provides that in such a case the period of adjustment set forth in 37 CFR 1.703 shall be reduced by the lesser of: (1) the number of days, if any, beginning on the date the amendment under 37 CFR 1.312 was filed and ending on the mail-

ing date of the Office action or notice in response to the amendment under 37 CFR 1.312 or such other paper; or (2) four months. The phrase “lesser of ...or [f]our months” is to provide a four-month cap for a reduction under 37 CFR 1.704(c)(10) if the Office takes longer than four months to issue an Office action or notice in response to the amendment under 37 CFR 1.312 or other paper.

37 CFR 1.704(c)(11) establishes further prosecution via a continuing application as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application. Currently, a continuing application may be used to: (1) obtain further examination of an invention disclosed and claimed in the prior application (continuation application); (2) obtain examination (for the first time) of an invention disclosed but not claimed or not elected for examination in the prior application (divisional application); or (3) obtain examination of an invention neither disclosed nor claimed in the prior application (continuation-in-part application). The provisions of 35 U.S.C. 132(b) and 37 CFR 1.114 permit an applicant to obtain further or continued examination of an invention disclosed and claimed in an application, which renders it unnecessary for an applicant whose application is eligible for patent term adjustment under 35 U.S.C. 154(b) to file a continuing application to obtain further examination of an invention disclosed and claimed in an application. If an applicant is filing a continuing application to obtain examination (for the first time) of an invention disclosed but not claimed or not elected for examination in the prior application or an invention neither disclosed nor claimed in the prior application, it is not appropriate for that applicant to obtain any benefit in the continuing application for examination delays that might have occurred in the prior application. Thus, the Office has established further prosecution via a continuing application as a circumstance that constitutes a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application, in that the period of adjustment set forth in 37 CFR 1.703 shall not include any period that is prior to the actual filing date of the application that resulted in the patent. Thus, if the application that resulted in the patent is a continuing application (including a CPA), the period of adjustment set forth in 37 CFR 1.703 (if any) will not

include any period that is prior to the actual filing date of the application (in the case of a CPA, the filing date of the request for a CPA) that resulted in the patent.

A CPA under 37 CFR 1.53(d) filed on or after May 29, 2000 and before July 14, 2003 is entitled to the patent term adjustment provisions of 35 U.S.C. 154(b) as amended by § 4402 of the American Inventors Protection Act of 1999 (CPAs can only be filed in design patent applications on or after July 14, 2003, and design applications are not entitled to PTA). The period of patent term adjustment set forth in 37 CFR 1.703 (if any), however, will not include any period that is prior to the filing date of the request for that CPA.

Delays before the filing date of an application are not relevant to whether an application is entitled to patent term adjustment. Patent term adjustment will not be reduced by applicant actions or inactions (that amount to a failure to engage in reasonable efforts to conclude processing or examination of the application) occurring in a prior (or other) application.

37 CFR 1.704(d) provides that a paper containing only an information disclosure statement in compliance with 37 CFR 1.97 and 1.98 will not be considered (result in a reduction) under 37 CFR 1.704(c)(6), 1.704(c)(8), 1.704(c)(9), or 1.704(c)(10) if it is accompanied by a statement that each item of information contained in the information disclosure statement was >first< cited in a communication from a foreign patent office in a counterpart application and that this communication was not received by any individual designated in 37 CFR 1.56(c) more than thirty days prior to the filing of the information disclosure statement. This provision will permit applicants to submit information >first< cited in a communication from a foreign patent office in a counterpart application to the Office without a reduction in patent term adjustment if an information disclosure statement is promptly (within thirty days of receipt of the >first< communication) submitted to the Office. Compliance with the statement requirement of 37 CFR 1.704(d) does not substitute for compliance with any relevant requirement of 37 CFR 1.97 or 1.98. 37 CFR 1.704(d) also provides that this thirty-day period is not extendable.

37 CFR 1.704(e) provides that submission of an application for patent term adjustment under 37 CFR 1.705(b) (with or without request under 37 CFR

1.705(c) for reinstatement of reduced patent term adjustment) will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under 37 CFR 1.704(c)(10). Due to the time constraints on the Office under 35 U.S.C. 154(b)(1)(A)(iv) and (B) to complete its patent term adjustment determination and issue the patent, the Office must require applicants to follow the specific procedure set forth in 37 CFR 1.705 for requesting reconsideration of the Office's initial patent term adjustment determination and for requesting reinstatement of patent term adjustment reduced under 37 CFR 1.704(b). Thus, while submission of an application for patent term adjustment under 37 CFR 1.705(b) (regardless of whether it contains a request under 37 CFR 1.705(c) for reinstatement of reduced patent term adjustment) will interfere with the patent printing process, submission of the application will not be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under 37 CFR 1.704(c)(10). Other papers concerning patent term adjustment (e.g., status letters, untimely applications for patent term adjustment, requests for reconsideration of the Office's decisions on applications for patent term adjustment, petitions under 37 CFR 1.181, 1.182, or 1.183 concerning patent term adjustment, or miscellaneous letters concerning patent term adjustment), however, will be considered a failure to engage in reasonable efforts to conclude prosecution (processing or examination) of the application under 37 CFR 1.704(c)(10).<

>

2733 Patent Term Adjustment Determination [R-2]

37 CFR 1.705. Patent term adjustment determination.

(a) The notice of allowance will include notification of any patent term adjustment under 35 U.S.C. 154(b).

37 CFR 1.705 implements the provisions of 35 U.S.C. 154(b)(3) and (b)(4)(B) and indicates that the notice of allowance will include notification of any patent term adjustment under 35 U.S.C. 154(b) (35 U.S.C. 154(b)(3)(B)(i)). The patent term adjustment determinations required by 35 U.S.C. 154(b)(3)(B)(i) are made by a computer program that uses the infor-

mation (dates of receipt and nature of applicant correspondence and of the dates of mailing and nature of Office actions or notices) recorded in the PALM system. The Office currently issues a notice of allowance using a form entitled, Notice of Allowance and Fee(s) Due (PTOL-85). Since November 13, 2001, the Notice of Allowance and Fee(s) Due (PTOL-85) includes the patent term adjustment information on the third page of the form.

37 CFR 1.705(b) provides that any request for review or reconsideration of the patent term adjustment indicated in the notice of allowance (except as provided in 37 CFR 1.705(d)) and any request for reinstatement of all or part of the term reduced pursuant to 37 CFR 1.704(a) must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. See MPEP § 2734 for a discussion of the requirements of any such request.

If a registered practitioner receives a notice of allowance with a patent term adjustment that is longer than expected, the practitioner should disclose the error to the Office in compliance with the practitioner's duty of candor and good faith in practice before the Office. Where the correct patent term adjustment is thought to be less than indicated by the Office, an application for term adjustment under 37 CFR 1.705(b) need not be filed. Instead, a letter could be filed with the issue fee payment, indicating that the term adjustment is thought to be longer than appropriate. The Office does not require the practitioner to determine whether the Office's patent term adjustment determination is correct. Alternatively, if a notice of allowance indicates a patent term adjustment that is longer than expected, since the Office frequently corrects the error after mailing the notice of allowance, the practitioner (or applicant) may wait until the patent issues, and if the patent issues with a value that is incorrect, request a certificate of correction.

Information as to how the patent term adjustment calculation has been made will be available through Patent Application Information Retrieval (PAIR) at <http://pair.uspto.gov>. This system is available to all patent applicants who have a customer number as the correspondence address for the application. Applicants should routinely use PAIR to check the accuracy of the data entered in the PALM system for their

applications (i.e., the type of the paper and date of receipt in the Office) throughout prosecution. If any errors are detected, they should be brought to the Office's attention (e.g., the examiner or the Technology Center's customer service representative) as soon as possible to ensure that they are corrected before allowance of the application and the initial determination of the patent term adjustment. In checking Office records, applicants should keep in mind that the date that should be recorded in the Office computer records is the date of receipt of the paper, not the date that it was mailed under 37 CFR 1.8. In addition, if an original paper is misplaced by the Office and a duplicate is filed with a post card receipt showing the date of receipt of the original paper, the date shown on the post-card receipt for the original paper is the date that should be shown in the Office computer records. If Express Mail service was used, then the date shown as the "date in" on the Express Mail label will be entered into the Office computer records. Otherwise, the date reflected in the Office computer records for a duplicate copy of correspondence will normally be the date that the duplicate was received in the USPTO.<

>

2734 Application for Patent Term Adjustment; Due Care Showing [R-2]

37 CFR 1.705. *Patent term adjustment determination.*

(b) Any request for reconsideration of the patent term adjustment indicated in the notice of allowance, except as provided in paragraph (d) of this section, and any request for reinstatement of all or part of the term reduced pursuant to § 1.704(b) must be by way of an application for patent term adjustment. An application for patent term adjustment under this section must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. An application for patent term adjustment under this section must be accompanied by:

- (1) The fee set forth in § 1.18(e); and
- (2) A statement of the facts involved, specifying:
 - (i) The correct patent term adjustment and the basis or bases under § 1.702 for the adjustment;
 - (ii) The relevant dates as specified in §§ 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in § 1.703(f) to which the patent is entitled;
 - (iii) Whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and

(iv)(A) Any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704; or

(B) That there were no circumstances constituting a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in § 1.704.

(c) Any application for patent term adjustment under this section that requests reinstatement of all or part of the period of adjustment reduced pursuant to § 1.704(b) for failing to reply to a rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request must also be accompanied by:

(1) The fee set forth in § 1.18(f); and

(2) A showing to the satisfaction of the Director that, in spite of all due care, the applicant was unable to reply to the rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request. The Office shall not grant any request for reinstatement for more than three additional months for each reply beyond three months from the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request.

37 CFR 1.705(b) provides that any request for review or reconsideration of the patent term adjustment indicated in the notice of allowance (except as provided in 37 CFR 1.705(d)) and any request for reinstatement of all or part of the term reduced pursuant to 37 CFR 1.704(a) must be filed no later than the payment of the issue fee but may not be filed earlier than the date of mailing of the notice of allowance. 37 CFR 1.705(b) provides that any such request must be by way of an application for patent term adjustment accompanied by the fee set forth in 37 CFR 1.18(e) and a statement of the facts involved. 37 CFR 1.705(b) also provides that such statement of facts must specify: (1) the basis or bases under 37 CFR 1.702 for the adjustment; (2) the relevant dates as specified in 37 CFR 1.703(a) through (e) for which an adjustment is sought and the adjustment as specified in 37 CFR 1.703(f) to which the patent is entitled; (3) whether the patent is subject to a terminal disclaimer and any expiration date specified in the terminal disclaimer; and (4) any circumstances during the prosecution of the application resulting in the patent that constitute a failure to engage in reasonable efforts to conclude processing or examination of such application as set forth in 37 CFR 1.704 (or a statement that

there were no such circumstances). Since the Office must complete its determination of patent term adjustment before proceeding to issue the patent (35 U.S.C. 154(b)(3)(D)), the Office must require that such application for patent term adjustment be filed within a non-extendable time period and set forth with particularity why the Office's patent term adjustment determination is not correct. In the absence of these requirements, the issuance of the patent will be further delayed by a protracted patent term adjustment determination proceeding.

DUE CARE SHOWING

37 CFR 1.705(c) implements the provisions of 35 U.S.C. 154(b)(3)(C) and specifically provides that a request for reinstatement of all or part of the period of adjustment reduced pursuant to 37 CFR 1.704(b) for failing to reply to a rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request must include: (1) the fee set forth in 37 CFR 1.18(f); and (2) a showing to the satisfaction of the Director that, in spite of all due care, the applicant was unable to reply to the rejection, objection, argument, or other request within three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request. 37 CFR 1.705(c) also provides that the Office shall not grant any request for reinstatement for more than three additional months for each reply beyond three months of the date of mailing of the Office communication notifying the applicant of the rejection, objection, argument, or other request (35 U.S.C. 154(b)(3)(C)).

Filing a reply outside of three months after an Office action is *per se* a failure to engage in reasonable efforts to conclude prosecution under 35 U.S.C. 154(b)(2)(C)(ii) unless applicant can establish that the delay was "in spite of all due care." The Office "shall reinstate all or part of the cumulative period of time of an adjustment reduced under [35 U.S.C. 154(b)(2)(C)] if the applicant... makes a showing that, in spite of all due care, the applicant was unable to respond within the 3-month period..." See 35 U.S.C. 154(b)(3)(C). The "due care" of a reasonably prudent person standard has been applied in deciding petitions under the "unavoidable delay" standard of

35 U.S.C. 133. See *In re Mattullath*, 38 App. D.C. 497, 514-15 (1912) (“the word ‘unavoidable’ ... is applicable to ordinary human affairs, and requires no more or greater care or diligence than is generally used and observed by prudent and careful men in relation to their most important business”) (quoting and adopting *Ex parte Pratt*, 1887 Dec. Comm’r Pat. 31, 32-33); see also *Ray v. Lehman*, 55 F.3d 606, 609, 34 USPQ2d 1786, 1787 (Fed. Cir. 1995) (“in determining whether a delay...was unavoidable, one looks to whether the party...exercised the due care of a reasonably prudent person”). While the legislative history of the American Inventors Protection Act of 1999 is silent as to the meaning of the phrase “in spite of all due care,” the phrases “all due care” and “unable to respond” invoke a higher degree of care than the ordinary due care standard of 35 U.S.C. 133, as well as the “reasonable efforts to conclude processing or examination [or prosecution] of an application” standard of 35 U.S.C. 154(b)(2)(C)(i) and (iii). Therefore, applicants should not rely upon decisions relating to the “unavoidable delay” standard of 35 U.S.C. 133 as controlling in a request to reinstate reduced patent term adjustment on the basis of a showing that the applicant was unable to respond within the three-month period in spite of all due care.

Examples

Examples of showings that may establish that the applicant was unable to respond within the three-month period in spite of all due care are as follows:

(A) a showing that the original three-month period was insufficient to obtain the test data necessary for an affidavit or declaration under 37 CFR 1.132 that was submitted with a reply filed outside the original three-month period;

(B) a showing that the applicant was unable to reply within the original three-month period due to a natural disaster;

(C) a showing that applicant was unable to reply within the original three-month period because testing was required to reply to an Office action, and the testing necessarily took longer than three months; or

(D) a showing that the applicant was unable to reply within the original three-month period due to illness or death of a sole practitioner of record who was responsible for prosecuting the application.

The patent term adjustment term reinstated would be limited to the period in which the showing establishes that applicant was acting with all due care to reply to the Office notice or action, but circumstances (outside applicant’s control) made applicant unable to reply in spite of such due care. An applicant will not be able to show that he or she was unable to respond within the three-month period “in spite of all due care” if the reply was not filed within the three-month period due to reasons within the control of applicant or agencies within the applicant’s control.

Examples of circumstances that would **NOT** establish that the applicant was unable to respond within the three-month period in spite of all due care are:

(A) an applicant’s or representative’s preoccupation with other matters (e.g., an inter partes lawsuit or interference) that is given priority over the application;

(B) illness or death of the practitioner in charge of the application if the practitioner is associated (in a law firm) with other practitioners (since the other practitioners could have taken action to reply within the three-month period);

(C) time consumed with communications between the applicant and his or her representative, regardless of whether the applicant resides in the United States or chooses to communicate with the United States representative via a foreign representative;

(D) vacation or other non-attention to an application that results in a failure to reply within the three-month period;

(E) applicant filing a reply on or near the last day of the three-month period using first class mail with a certificate of mailing under 37 CFR 1.8, rather than by Express Mail under 37 CFR 1.10 or facsimile (if permitted), and the reply is not received (filed) in the Office until after the three-month period; or

(F) failure of clerical employees of applicant or applicant’s representative to properly docket the Office action or notice for reply or perform other tasks necessary for reply within the three-month period.

Rarely is the power of attorney given to a single attorney and often many attorneys are given power of attorney in an application. An attorney in litigation, working on an interference or taking a vacation is generally aware of that fact before the event and

should make plans for another to take over his or her work so that it is completed and filed in the Office within the three-month period. Thus, failure to reply within the three-month period in 35 U.S.C. 154(b)(2)(C)(ii) due to preoccupation with other matters (e.g., an *inter partes* lawsuit or interference) given priority over the application, or vacation or other non-attention to an application, cannot be relied upon to show that applicant was unable to reply “in spite of all due care” under 35 U.S.C. 154(b)(3)(C).<

>

2735 Request for Reconsideration of Patent Term Adjustment Determination [R-2]

37 CFR 1.705. Patent term adjustment determination.

(d) If there is a revision to the patent term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment. If the patent indicates or should have indicated a revised patent term adjustment, any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued and must comply with the requirements of paragraphs (b)(1) and (b)(2) of this section. Any request for reconsideration under this section that raises issues that were raised, or could have been raised, in an application for patent term adjustment under paragraph (b) of this section shall be dismissed as untimely as to those issues.

(e) The periods set forth in this section are not extendable.

Since the Office is obligated to provide a determination of patent term adjustment under 35 U.S.C. 154(b) in the notice of allowance (i.e., before the actual patent issue date), the Office must project (or estimate) the actual patent issue date and base its patent term adjustment determination on that projection. Additionally, there are a number of papers which if submitted by an applicant after the mailing of the notice of allowance will result in a reduction of any patent term adjustment, and there may be Office delays occurring after mailing the notice of allowance resulting in an increase in the amount of patent term adjustment. Thus, 37 CFR 1.705(d) provides for a revision of the patent term adjustment when revision is necessitated by events occurring after the mailing of the notice of allowance. 37 CFR 1.705(d) specifically provides that if there is a revision to the patent

term adjustment indicated in the notice of allowance, the patent will indicate the revised patent term adjustment. 37 CFR 1.705(d) also provides that if the patent indicates or should have indicated a revised patent term adjustment, any request for reconsideration of the patent term adjustment indicated in the patent must be filed within two months of the date the patent issued and must comply with the requirements of 37 CFR 1.705(b). The two month period is not extendable. 37 CFR 1.705(e).

Any request for reconsideration under 37 CFR 1.705(d) that raises issues that were raised, or could have been raised, in an application for patent term adjustment under 37 CFR 1.705(b) shall be dismissed as untimely as to those issues.<

>

2736 Third Party Papers [R-2]

37 CFR 1.705. Patent term adjustment determination.

(f) No submission or petition on behalf of a third party concerning patent term adjustment under 35 U.S.C. 154(b) will be considered by the Office. Any such submission or petition will be returned to the third party, or otherwise disposed of, at the convenience of the Office.

37 CFR 1.705(f) implements the provisions of 35 U.S.C. 154(b)(4)(B) and provides that no submission or petition on behalf of a third party concerning patent term adjustment under 35 U.S.C. 154(b) will be considered by the Office, and that any such submission or petition will be returned to the third party, or otherwise disposed of, at the convenience of the Office.<

2750 Patent Term Extension for Delays at other Agencies under 35 U.S.C. 156 [R-2]

The right to a patent term extension based upon regulatory review is the result of the Drug Price Competition and Patent Term Restoration Act of 1984, Pub. L. No. 98-417, 98 Stat. 1585 (codified at 21 U.S.C. 355(b), (j), (l); 35 U.S.C. 156, 271, 282)(Hatch-Waxman Act). The act sought to eliminate two distortions to the normal “patent term produced by the requirement that certain products must receive premarket regulatory approval.” *Eli Lilly &*

Co. v. Medtronic Inc., 496 U.S. 661, 669, 15 USPQ2d 1121, 1126 (1990). The first distortion was that the patent owner loses patent term during the early years of the patent because the product cannot be commercially marketed without approval from a regulatory agency. The second distortion occurred after the end of the patent term because competitors could not immediately enter the market upon expiration of the patent because they were not allowed to begin testing and other activities necessary to receive FDA approval before patent expiration.

The part of the act codified as 35 U.S.C. 156 was designed to create new incentives for research and development of certain products subject to premarket government approval by a regulatory agency. The statute enables the owners of patents on certain human drugs, food or color additives, medical devices, animal drugs, and veterinary biological products to restore to the terms of those patents some of the time lost while awaiting premarket government approval from a regulatory agency. The rights derived from extension of the patent term are limited to the approved product (as defined in 35 U.S.C. 156(a)(4) and (a)(5)). See 35 U.S.C. 156(b). Accordingly, if the patent claims other products in addition to the approved product, the exclusive patent rights to the additional products expire with the original expiration date of the patent.

In exchange for extension of the term of the patent, Congress legislatively overruled *Roche Products v. Bolar Pharmaceuticals*, 733 F.2d 858, 221 USPQ 937 (Fed. Cir. 1984) as to products covered by 35 U.S.C. 271(e) and provided that it shall not be an act of infringement, for example, to make and test a patented drug solely for the purpose of developing and submitting information for an Abbreviated New Drug Application (ANDA). 35 U.S.C. 271(e)(1). See Donald O. Beers, *Generic and Innovator Drugs: A Guide to FDA Approval Requirements*, Fifth Edition, Aspen Law & Business, 1999, 4.3[2] for a discussion of the Hatch-Waxman Act and infringement litigation. Furthermore, Congress provided that an ANDA cannot be filed until five years after the approval date of the product if the active ingredient or a salt or ester of the active ingredient had not been previously approved under section 505(b) of the Federal Food, Drug and Cosmetic Act. 21 U.S.C. 355(j)(4)(D)(ii). See also Lourie, *Patent Term Restoration: History,*

Summary, and Appraisal, 40 Food, Drug and Cosmetic L. J. 351, 353-60 (1985). See also Lourie, *Patent Term Restoration*, 66 J. Pat. Off. Soc'y 526 (1984).

On November 16, 1988, 35 U.S.C. 156 was amended by Public Law 100-670, essentially to add animal drugs and veterinary biologics to the list of products that can form the basis of patent term extension. Animal drug products which are primarily manufactured through biotechnology are excluded from the provisions of patent term extension.

On December 3, 1993, 35 U.S.C. 156 was further amended to provide for interim extension of a patent where a product claimed by the patent was expected to be approved, but not until after the original expiration date of the patent. Public Law 103-179, Section 5.

An application for the extension of the term of a patent under 35 U.S.C. 156 must be submitted by the owner of record of the patent or its agent within the sixty-day period beginning on the date the product received permission for commercial marketing or use under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. See 35 U.S.C. 156(d)(1). The USPTO initially determines whether the application is formally complete and whether the patent is eligible for extension. The statute requires the *>Director of the United States Patent and Trademark Office< to notify the Secretary of Agriculture or the Secretary of Health and Human Services of the submission of an application for extension of patent term which complies with 35 U.S.C. 156 within sixty days and to submit to the Secretary a copy of the application. Not later than thirty days after receipt of the application from the *>Director<, the Secretary will determine the length of the applicable regulatory review period and notify the *>Director< of the determination. If the *>Director< determines that the patent is eligible for extension, the *>Director< calculates the length of extension for which the patent is eligible under the appropriate statutory provision and issues an appropriate Certificate of Extension.

Patent term extensions provided by private relief legislation, public laws other than as enacted by 35 U.S.C. 156, such as 35 U.S.C. 155 and 155A, are not addressed herein.

2751 Eligibility Requirements [R-2]

35 U.S.C. 156. Extension of patent term

(a) The term of a patent which claims a product, a method of using a product, or a method of manufacturing a product shall be extended in accordance with this section from the original expiration date of the patent, which shall include any patent term adjustment granted under section 154(b) if —

(1) the term of the patent has not expired before an application is submitted under subsection (d)(1) for its extension;

(2) the term of the patent has never been extended under subsection (e)(1) of this section;

(3) an application for extension is submitted by the owner of record of the patent or its agent and in accordance with the requirements of paragraphs (1) through (4) of subsection (d);

(4) the product has been subject to a regulatory review period before its commercial marketing or use;

(5)(A) except as provided in subparagraph (B) or (C), the permission for the commercial marketing or use of the product after such regulatory review period is the first permitted commercial marketing or use of the product under the provision of law under which such regulatory review period occurred;

(B) in the case of a patent which claims a method of manufacturing the product which primarily uses recombinant DNA technology in the manufacture of the product, the permission for the commercial marketing or use of the product after such regulatory period is the first permitted commercial marketing or use of a product manufactured under the process claimed in the patent; or

(C) for purposes of subparagraph (A), in the case of a patent which —

(i) claims a new animal drug or a veterinary biological product which (I) is not covered by the claims in any other patent which has been extended, and (II) has received permission for the commercial marketing or use in non-food-producing animals and in food-producing animals, and

(ii) was not extended on the basis of the regulatory review period for use in non-food-producing animals, the permission for the commercial marketing or use of the drug or product after the regulatory review period for use in food-producing animals is the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal.

The product referred to in paragraphs (4) and (5) is hereinafter in this section referred to as the “approved product.”

(f) For purposes of this section:

(1) The term “product” means:

(A) A drug product.

(B) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

(2) The term “drug product” means the active ingredient of—

(A) a new drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) or

(B) a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) which is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes involving site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient.

(3) The term “major health or environmental effects test” means a test which is reasonably related to the evaluation of the health or environmental effects of a product, which requires at least six months to conduct, and the data from which is submitted to receive permission for commercial marketing or use. Periods of analysis or evaluation of test results are not to be included in determining if the conduct of a test required at least six months.

(4)(A) Any reference to section 351 is a reference to section 351 of the Public Health Service Act.

(B) Any reference to section 503, 505, 512, or 515 is a reference to section 503, 505, 512, or 515 of the Federal Food, Drug and Cosmetic Act.

(C) Any reference to the Virus-Serum-Toxin Act is a reference to the Act of March 4, 1913 (21 U.S.C. 151 - 158).

(5) The term “informal hearing” has the meaning prescribed for such term by section 201(y) of the Federal Food, Drug and Cosmetic Act.

(6) The term “patent” means a patent issued by the United States Patent and Trademark Office.

(7) The term “date of enactment” as used in this section means September 24, 1984, for human drug product, a medical device, food additive, or color additive.

(8) The term “date of enactment” as used in this section means the date of enactment of the Generic Animal Drug and Patent Term Restoration Act for an animal drug or a veterinary biological product.

37 CFR 1.710. Patents subject to extension of the patent term

(a) A patent is eligible for extension of the patent term if the patent claims a product as defined in paragraph (b) of this section, either alone or in combination with other ingredients that read on a composition that received permission for commercial marketing or use, or a method of using such a product, or a method of manufacturing such a product, and meets all other conditions and requirements of this subpart.

(b) The term *product* referred to in paragraph (a) of this section means —

(1) The active ingredient of a new human drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(2) The active ingredient of a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) that is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes

including site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(3) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

37 CFR 1.720. Conditions for extension of patent term

The term of a patent may be extended if:

(a) The patent claims a product or a method of using or manufacturing a product as defined in § 1.710;

(b) The term of the patent has never been previously extended, except for extensions issued pursuant to §§ 1.701, 1.760, or 1.790;

(c) An application for extension is submitted in compliance with § 1.740;

(d) The product has been subject to a regulatory review period as defined in 35 U.S.C. 156(g) before its commercial marketing or use;

(e) The product has received permission for commercial marketing or use and —

(1) The permission for the commercial marketing or use of the product is the first received permission for commercial marketing or use under the provision of law under which the applicable regulatory review occurred, or

(2) In the case of a patent other than one directed to subject matter within § 1.710(b)(2) claiming a method of manufacturing the product that primarily uses recombinant DNA technology in the manufacture of the product, the permission for the commercial marketing or use is the first received permission for the commercial marketing or use of a product manufactured under the process claimed in the patent, or

(3) In the case of a patent claiming a new animal drug or a veterinary biological product that is not covered by the claims in any other patent that has been extended, and has received permission for the commercial marketing or use in non-food-producing animals and in food-producing animals, and was not extended on the basis of the regulatory review period for use in non-food-producing animals, the permission for the commercial marketing or use of the drug or product after the regulatory review period for use in food-producing animals is the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal.

(f) The application is submitted within the sixty-day period beginning on the date the product first received permission for commercial marketing or use under the provisions of law under which the applicable regulatory review period occurred; or in the case of a patent claiming a method of manufacturing the product which primarily uses recombinant DNA technology in the manufacture of the product, the application for extension is submitted within the sixty-day period beginning on the date of the first permitted commercial marketing or use of a product manufactured under the process claimed in the patent; or in the case of a patent that claims a new animal drug or a veterinary biological product that is not covered by the claims in any other patent that has been extended, and said drug or product has received permission for the commercial marketing or use in non-food-producing animals, the

application for extension is submitted within the sixty-day period beginning on the date of the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal;

(g) The term of the patent, including any interim extension issued pursuant to § 1.790, has not expired before the submission of an application in compliance with § 1.741; and

(h) No other patent term has been extended for the same regulatory review period for the product.

35 U.S.C. 156(a) sets forth what patents can be extended and the conditions under which they may be extended. 37 CFR 1.710 also addresses the patents that may be extended, and 37 CFR 1.720 describes the conditions under which a patent may be extended. As set forth in 35 U.S.C. 156 and 37 CFR 1.710, a patent which claims a human drug product, medical device, food or color additive first approved for marketing or use after September 24, 1984, or an animal drug or veterinary biological product (which was not primarily manufactured through biotechnology) first approved for marketing or use after November 16, 1988, may qualify for patent term extension. Furthermore, 35 U.S.C. 156(a)(1) - (5) require that the applicant establish that:

(1) the patent has not expired before an application under 35 U.S.C. 156(d) was filed (this may be an application for patent term extension under subsection (d)(1) or an application for interim extension under subsection (d)(5));

(2) the patent has never been extended under 35 U.S.C. 156(e)(1);

(3) the application for extension is submitted by the owner of record of the patent or its agent to the Office within 60 days of regulatory agency approval of the commercial marketing application and the application includes details relating to the patent, the approved product, and the regulatory review time spent in securing regulatory agency approval;

(4) the product has been subject to a regulatory review period within the meaning of 35 U.S.C. 156(g) before its commercial marketing or use;

(5) the approval is the first permitted commercial marketing or use of the product (35 U.S.C. 156(a)(5)(A)), except in the case of human drug products manufactured using recombinant DNA technology where the provisions of 35 U.S.C. 156(a)(5)(B) apply, or in the case of a new animal drug or a veterinary biological product where the provisions of 35 U.S.C. 156(a)(5)(C) apply.

35 U.S.C. 156(c)(4) also requires that no other patent term has been extended for the same regulatory review period for the product. See MPEP § 2761.

>TERMINALLY DISCLAIMED PATENTS ARE ELIGIBLE

A patent may be extended under 35 U.S.C. 156, even though it has been terminally disclaimed. A patent term extension under 35 U.S.C. 156 is a limited extension of the patent rights associated with the approved product that is attached onto the original term of the patent. See 35 U.S.C. 156(b). Only one patent may be extended for a regulatory review period for any product, and 35 U.S.C. 156 sets the expiration date of a patent term extension. Although 35 U.S.C. 154(b)(2)(June 8, 1995) precludes a patent from being extended under 35 U.S.C. 154(b) if the patent has been terminally disclaimed due to an obviousness-type double patenting rejection (see MPEP § 2720), there is no such exclusion in 35 U.S.C. 156. Additionally, 35 U.S.C. 154(b)(2)(B)(May 29, 2000) provides that a patent cannot be adjusted beyond the date set by the disclaimer (see MPEP § 2730), but there is no similar provision in 35 U.S.C. 156. Thus patents may receive a patent term extension under 35 U.S.C. 156 beyond an expiration date set by a terminal disclaimer.<

MEANING OF “PRODUCT” AS DEFINED IN 35 U.S.C. 156(f)

As required by 35 U.S.C. 156(a), patents eligible for extension of patent term are those which:

(A) claim a “product” as defined in 35 U.S.C. 156(f)(1), either alone or in combination with other ingredients, wherein the product reads on a composition (product) that received permission for commercial marketing or use, or a method of using such a product, or a method of manufacturing such a product, and

(B) meet all other conditions and requirements of the statute.

The term “claims a product” is not synonymous with “infringed by a product.” A patent which claims a metabolite of an approved drug does not claim the approved drug. *Hoechst-Roussel Pharmaceuticals Inc. v. Lehman*, 109 F.3d 756, 759, 42 USPQ2d 1220, 1223 (Fed. Cir. 1997).

The term “product” means:

(A) The active ingredient of a new human drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(B) The active ingredient of a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) that is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes including site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient; or

(C) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

See 21 CFR 60.3(b) for definitions of terms such as active ingredient, color additive, food additive, human drug product, and medical device.

Essentially, a “product” is a “drug product,” medical device, food additive, or color additive requiring Food and Drug Administration or Department of Agriculture (Plant and Animal Inspection Service) approval of an order or regulation prior to commercial marketing or use. “Drug product” is the active ingredient of a human drug, animal drug (excluding those primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes including site specific genetic manipulation techniques), or biological product (as defined by the Federal Food, Drug and Cosmetics Act and the Public Health Service Act) including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient. Animal biological products are approved by the Plant and Animal Inspection Service of the Department of Agriculture.

A “drug product” means the active ingredient found in the final dosage form prior to administration of the product to the patient, not the resultant form the drug may take after administration. In this regard, a drug in the ester form which is used for oral administration is a different drug product from the same active moiety

in a salt form which is administered by injection, even though both the salt and the ester are used to treat the same disease condition. The ester form is a different active ingredient from the salt form. Both the ester and the salt active ingredient may each support an extension of patent term of different patents provided the acid itself has not previously been approved. See *Glaxo Operations UK Ltd. v. Quigg*, 706 F.Supp. 1224, 1232-33, 10 USPQ2d 1100, 1107 (E.D. Va. 1989); *aff'd.*, 894 F.2d 392, 13 USPQ2d 1628 (Fed. Cir. 1990).

Furthermore, a “drug product” is the active ingredient of a particular new drug, rather than the entire composition of the drug product approved by the Food and Drug Administration. See *Fisons plc v. Quigg*, 1988 U.S. Dist. LEXIS 10935; 8 USPQ2d 1491, 1495 (D.D.C. 1988); *aff'd.*, 876 F.2d 99, 110; 10 USPQ2d 1869, 1870 (Fed. Cir. 1989). An active ingredient of a drug is the ingredient in the drug product that becomes therapeutically active when administered. *Glaxo Operations UK Ltd. v. Quigg*, 894 F.2d 392, 393, 13 USPQ2d 1628, 1629 (Fed. Cir. 1990); *but c.f.*, *Abbott Laboratories v. Young*, 920 F.2d 984, 989 n.7 (D.C. Cir. 1990), *cert denied*, 112 S. Ct. 76 (1991) (The court rejected the approach of *Glaxo* in considering whether *Abbott* was entitled to exclusivity).

A patent is considered to claim the product at least in those situations where the patent claims the active ingredient per se, or claims a composition or formulation which contains the active ingredient(s) and reads on the composition or formulation approved for commercial marketing or use.

NO PREVIOUS EXTENSIONS (WITH LIMITED EXCEPTIONS)

37 CFR 1.720(b) explains that patent term extension pursuant to 35 U.S.C. 156 is available only if the term of the patent has never been previously extended, except for extensions issued pursuant to 37 CFR 1.701, 1.760, or 1.790. An extension issued pursuant to 37 CFR 1.701 is an extension of the patent due to administrative delay within the Office. Note that the term of a patent is “adjusted,” not extended, pursuant to 37 CFR 1.702-1.705. An extension issued pursuant to 37 CFR 1.760 is an interim extension under 35 U.S.C. 156(e)(2). An extension issued pur-

suant to 37 CFR 1.790 is an interim extension under 35 U.S.C. 156(d)(5).

REGULATORY REVIEW PERIOD

37 CFR 1.720(d) restates the statutory requirement set forth in 35 U.S.C. 156(a)(4). The regulatory review period must have been a regulatory review period defined by the statute. A regulatory review period under section 510(k) of the Federal Food, Drug and Cosmetic Act is not a regulatory review period which gives rise to eligibility for patent term extension under 35 U.S.C. 156. *In re Nitinol Medical Technologies Inc.*, 17 USPQ2d 1492, 1492-1493 (Comm'r Pat. & Tm. 1990). See also *Baxter Diagnostics v. AVL Scientific Corp.* 798 F. Supp. 612, 619-620; 25 USPQ2d 1428, 1434 (CD CA 1992) (Congress intended only Class III medical devices to be eligible for patent term extension).

If the product is alleged to be a medical device, then regulatory review must have occurred under section 515, and not section 505, of the Federal Food, Drug and Cosmetic Act. Drug products are not reviewed under section 515.

If more than one application for patent term extension is filed based upon a single regulatory review period, election will be required of a single patent. See MPEP § 2761.

FIRST PERMITTED MARKETING OR USE

37 CFR 1.720(e) follows 35 U.S.C. 156(a)(5), and sets forth that the approval under the relevant provision of law must have been the first permitted marketing or use of the product under the provision of law, unless the product is for use in food producing animals as explained below. See *In re Patent Term Extension Application*, U.S. Patent No. 3,849,549, 226 USPQ 283, 284 (Pat. & Tm. Office 1985). If the product is a human drug product, then the approval of the active ingredient must be the first permitted commercial marketing or use of the active ingredient as a single entity or in combination with another active ingredient under the provision of law under which regulatory review occurred.

Where a product contains multiple active ingredients, if any one active ingredient has not been previously approved, it can form the basis of an extension of patent term provided the patent claims that ingredient. See *In re Alcon Laboratories Inc.*, 13 USPQ2d

1115, 1121 (Comm'r Pat. & Tm. 1989) for examples of products having different combinations of active ingredients. A different ratio of hormones is not a different active ingredient for purposes of 35 U.S.C. 156. Furthermore, an approved product having two active ingredients, which are not shown to have a synergistic effect or have pharmacological interaction, will not be considered to have a single active ingredient made of the two active ingredients.

As to 35 U.S.C. 156(a)(5)(C), which is addressed in 37 CFR 1.720(e)(3), the term of a patent directed to a new animal drug or veterinary biological product may be extended based on a second or subsequent approval of the active ingredient provided all the following conditions exist:

(A) the patent claims the drug or product;

(B) the drug or product is not covered by the claims in any other patent that has been extended;

(C) the patent term was not extended on the basis of the regulatory review period for use in non-food producing animals; and

(D) the second or subsequent approval was the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal. In this case, the application must be filed within sixty days of the first approval for administration to a food-producing animal.

For animal drugs or products, prior approval for use in a non-food producing animal will not make a patent ineligible for patent term extension based upon a later approval of the drug or product for use in food producing animals, if the later approval is the first approval of the drug or product for use in food producing animals.

2752 Patent Term Extension Applicant

35 U.S.C. 156. *Extension of patent term*

(d)(1) To obtain an extension of the term of a patent under this section, the owner of record of the patent or its agent shall submit an application to the Director. Except as provided in paragraph (5), such an application may only be submitted within the sixty-day period beginning on the date the product received permission under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. The application shall contain —

(A) the identity of the approved product and the Federal statute under which regulatory review occurred;

(B) the identity of the patent for which an extension is being sought and the identity of each claim of such patent;

(C) information to enable the Director to determine under subsections (a) and (b) the eligibility of a patent for extension and the rights that will be derived from the extension and information to enable the Director and the Secretary of Health and Human Services or the Secretary of Agriculture to determine the period of the extension under subsection (g);

(D) a brief description of the activities undertaken by the applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities; and

(E) such patent or other information as the Director may require.

37 CFR 1.730. *Applicant for extension of patent term; signature requirements.*

(a) Any application for extension of a patent term must be submitted by the owner of record of the patent or its agent and must comply with the requirements of § 1.740.

(b) If the application is submitted by the patent owner, the application must be signed either by:

(1) The patent owner in compliance with § 3.73(b) of this chapter; or

(2) A registered practitioner on behalf of the patent owner.

(c) If the application is submitted on behalf of the patent owner by an agent of the patent owner (e.g., a licensee of the patent owner), the application must be signed by a registered practitioner on behalf of the agent. The Office may require proof that the agent is authorized to act on behalf of the patent owner.

(d) If the application is signed by a registered practitioner, the Office may require proof that the practitioner is authorized to act on behalf of the patent owner or agent of the patent owner.

35 U.S.C. 156(d)(1) requires that the application for extension of the patent term must be submitted by the owner of record of the patent or its agent. If the application is filed by an assignee, the application papers should refer to the reel and frame number of the recorded assignment. A power of attorney from the patent owner to any patent attorney or agent submitting the patent term extension application papers should be filed, if the attorney or agent is not already of record in the patent (see 37 CFR 1.34(b)).

If the applicant for patent term extension was not the marketing applicant before the regulatory agency, then there must be an agency relationship between the patent owner and the marketing applicant during the regulatory review period. To show that such an applicant is authorized to rely upon the activities of the marketing applicant before the Food and Drug Administration or the Department of Agriculture, it is

advisable for the applicant for patent term extension to obtain a letter from the marketing applicant specifically authorizing such reliance.

2753 Application Contents [R-2]

37 CFR 1.740. *Formal requirements for application for extension of patent term; correction of informalities.*

**>

(a) An application for extension of patent term must be made in writing to the Director. A formal application for the extension of patent term must include:<

(1) A complete identification of the approved product as by appropriate chemical and generic name, physical structure or characteristics;

(2) A complete identification of the Federal statute including the applicable provision of law under which the regulatory review occurred;

(3) An identification of the date on which the product received permission for commercial marketing or use under the provision of law under which the applicable regulatory review period occurred;

(4) In the case of a drug product, an identification of each active ingredient in the product and as to each active ingredient, a statement that it has not been previously approved for commercial marketing or use under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, or the Virus-Serum-Toxin Act, or a statement of when the active ingredient was approved for commercial marketing or use (either alone or in combination with other active ingredients), the use for which it was approved, and the provision of law under which it was approved.

(5) A statement that the application is being submitted within the sixty day period permitted for submission pursuant to § 1.720(f) and an identification of the date of the last day on which the application could be submitted;

(6) A complete identification of the patent for which an extension is being sought by the name of the inventor, the patent number, the date of issue, and the date of expiration;

(7) A copy of the patent for which an extension is being sought, including the entire specification (including claims) and drawings;

(8) A copy of any disclaimer, certificate of correction, receipt of maintenance fee payment, or reexamination certificate issued in the patent;

(9) A statement that the patent claims the approved product, or a method of using or manufacturing the approved product, and a showing which lists each applicable patent claim and demonstrates the manner in which at least one such patent claim reads on:

(i) The approved product, if the listed claims include any claim to the approved product;

(ii) The method of using the approved product, if the listed claims include any claim to the method of using the approved product; and

(iii) The method of manufacturing the approved product, if the listed claims include any claim to the method of manufacturing the approved product;

(10) A statement beginning on a new page of the relevant dates and information pursuant to 35 U.S.C. 156(g) in order to enable the Secretary of Health and Human Services or the Secretary of Agriculture, as appropriate, to determine the applicable regulatory review period as follows:

(i) For a patent claiming a human drug, antibiotic, or human biological product:

(A) The effective date of the investigational new drug (IND) application and the IND number;

(B) The date on which a new drug application (NDA) or a Product License Application (PLA) was initially submitted and the NDA or PLA number; and

(C) The date on which the NDA was approved or the Product License issued;

(ii) For a patent claiming a new animal drug:

(A) The date a major health or environmental effects test on the drug was initiated, and any available substantiation of that date, or the date of an exemption under subsection (j) of Section 512 of the Federal Food, Drug, and Cosmetic Act became effective for such animal drug;

(B) The date on which a new animal drug application (NADA) was initially submitted and the NADA number; and

(C) The date on which the NADA was approved;

(iii) For a patent claiming a veterinary biological product:

(A) The date the authority to prepare an experimental biological product under the Virus-Serum-Toxin Act became effective;

(B) The date an application for a license was submitted under the Virus-Serum-Toxin Act; and

(C) The date the license issued;

(iv) For a patent claiming a food or color additive:

(A) The date a major health or environmental effects test on the additive was initiated and any available substantiation of that date;

(B) The date on which a petition for product approval under the Federal Food, Drug and Cosmetic Act was initially submitted and the petition number; and

(C) The date on which the FDA published a *Federal Register* notice listing the additive for use;

(v) For a patent claiming a medical device:

(A) The effective date of the investigational device exemption (IDE) and the IDE number, if applicable, or the date on which the applicant began the first clinical investigation involving the device, if no IDE was submitted, and any available substantiation of that date;

(B) The date on which the application for product approval or notice of completion of a product development protocol under Section 515 of the Federal Food, Drug and Cosmetic Act was initially submitted and the number of the application; and

(C) The date on which the application was approved or the protocol declared to be completed;

(11) A brief description beginning on a new page of the significant activities undertaken by the marketing applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities;

(12) A statement beginning on a new page that in the opinion of the applicant the patent is eligible for the extension and a statement as to the length of extension claimed, including how the length of extension was determined;

**>

(13) A statement that applicant acknowledges a duty to disclose to the Director of the United States Patent and Trademark Office and the Secretary of Health and Human Services or the Secretary of Agriculture any information which is material to the determination of entitlement to the extension sought (*see* § 1.765);<

(14) The prescribed fee for receiving and acting upon the application for extension (*see* § 1.20(j)); and

(15) The name, address, and telephone number of the person to whom inquiries and correspondence relating to the application for patent term extension are to be directed.

(b) The application under this section must be accompanied by two additional copies of such application (for a total of three copies).

(c) If an application for extension of patent term is informal under this section, the Office will so notify the applicant. The applicant has two months from the mail date of the notice, or such time as is set in the notice, within which to correct the informality. Unless the notice indicates otherwise, this time period may be extended under the provisions of § 1.136.

37 CFR 1.740 sets forth the requirements for a formal application for extension of patent term. See MPEP § 2752 for a discussion of who may apply for a patent term extension. See 37 CFR 1.741 and MPEP § 2754 for a description of the information that must be submitted in the patent term extension application in order to be accorded a filing date.

37 CFR 1.740(a)(1) requires a complete identification of the approved product as by appropriate chemical and generic name, physical structure or characteristics so as to enable the *>Director< to make a determination of whether the patent claims the approved product, or a method of using or manufacturing the approved product.

37 CFR 1.740(a)(2) requires a complete identification of the federal statute including the applicable provision of law under which the regulatory review occurred. When the regulatory review of the product took place under more than one Federal statute, each appropriate statute should be listed. This could apply to a situation where a human biological product is tested under an investigational new drug (IND) application pursuant to the Federal Food, Drug, and Cosmetic Act, but is approved under the Public Health Service Act; or to a situation where approval is sought for use of a particular medical device with a specific drug product which may require approval under more

than a single provision of law. The product that forms the basis of an application for patent term extension must be either a medical device or a drug product; it cannot be a combination of those separate products. See the file history of U.S. Patent No. 4,428,744 for an example of the application of this principle.

The date that a product receives permission for commercial marketing or use (which must be identified pursuant to 37 CFR 1.740(a)(3)) is generally the mailing date of the letter from the regulatory agency indicating regulatory approval. For a food additive, the approval date is generally the effective date stated in the regulation and the date the regulation is published.

37 CFR 1.740(a)(4) provides that for drug products, each active ingredient must be identified and there must be an indication of the use for which the product was approved. For each active ingredient, a statement must be made that either the active ingredient was not previously approved for commercial marketing or use under the Federal Food, Drug and Cosmetic Act, or that the active ingredient was approved for commercial marketing or use (either alone or in combination with other active ingredients) and the provision of law under which it was approved. The information is especially necessary for a determination of eligibility where, for example, the application is based on a second or subsequent approval of an active ingredient, but the first approval for administration to a food-producing animal.

In accordance with 37 CFR 1.740(a)(5), the application must be submitted within the sixty day period permitted for submission pursuant to 37 CFR 1.720(f). If the sixty day period ends on a Saturday, Sunday or Federal holiday, then the last day on which the application could be submitted will be considered to be the next business day following the Saturday, Sunday or Federal holiday. See 37 CFR 1.7. However, applicants are cautioned to avoid filing an application for patent term extension on the last day for filing to avoid the application being denied because the filing deadline was inadvertently missed.

The expiration date of the patent for which an extension is sought as identified pursuant to 37 CFR 1.740(a)(6) should be the expiration date according to the law (35 U.S.C. 154) at the time of filing of the application for patent term extension, and should

include any patent term adjustment under 35 U.S.C. 154(b).

Pursuant to 37 CFR 1.740(a)(9), the application for patent term extension need only explain how one product claim of the patent claims the approved product, if there is a claim to the product. In addition, the application need only explain how one method of use claim of the patent claims the method of use of the approved product, if there is a claim to the method of use of the product. Lastly, the application need only explain how one claim of the patent claims the method of manufacturing the approved product, if there is a claim to the method of manufacturing the approved product. At most, a showing explaining three claims is required. However, each claim that claims the approved product, the method of use of the approved product, or the method of manufacturing the approved product must be listed. See 35 U.S.C. 156(d)(1)(B).

The showing should clearly explain how each listed claim reads on the approved product. For example, where a generic chemical structure is used in the claim to define the claimed invention, a listing of variables and substituents which correspond to the approved product is appropriate. Where a claim uses the “means for” language permitted by 35 U.S.C. 112, paragraph 6, reference to the column and line number of the patent text and any drawing reference numbers, as well as a description of any relevant equivalents, is also appropriate.

Pursuant to 37 CFR 1.740(a)(10), the patent term extension applicant must provide a statement to enable the Secretary of Health and Human Services or the Secretary of Agriculture, as appropriate, to determine the applicable regulatory period. In cases where there is no regulatory event to reflect the commencement of the testing or approval phase of the regulatory review period, applicants should include in the application the dates that they claim initiate either the approval or the testing phases and an explanation of their reasonable bases for why they conclude that these dates are the relevant dates. For instance, when the clinical trials are conducted outside of the United States, the testing phase for a medical device begins on the date the clinical investigation involving the device began. An applicant should include an explanation as to why the date claimed is the date on which such clinical investigations had commenced. If the

applicant has any means of substantiating that date, that information should be included in the application.

37 CFR 1.740(a)(11) requires a brief description of the activities of the marketing applicant before the regulatory agency. This description should include an identification of significant communications of substance with the regulatory agency and the dates related to such communications. For example, these activities would include the dates of the submissions of new data to the FDA, communications between FDA and the applicant with respect to the appropriate protocols for testing the product, and communications between FDA and the applicant that are attempts to define the particular requirements for premarketing approval for this particular product. The applicant is not required to establish the existence of due diligence during the regulatory review period in order to have a complete application.

As stated above, the marketing applicant must have been an agent of the patent owner, if not the same entity as the patent owner. Accordingly, the Office will not assist the patent owner in obtaining information required in an application for patent term extension from the marketing applicant. It is sufficient that the description of the activities briefly identify those significant activities undertaken by the marketing applicant directed toward regulatory approval, and a submission of insignificant details or identification of non-substantive communications is not required.

37 CFR 1.740(a)(12) requires that the extension applicant state the length of extension claimed and show how the length of extension was calculated, including whether the 14-year limit of 35 U.S.C. 156(c)(3) or the two or three limit of 35 U.S.C. 156(g)(6)(C) applies.

37 CFR 1.740(a)(15) requires the patent term extension applicant to provide a correspondence address. A fax number should also be provided. Normally only communications regarding the application for patent term extension will be sent to the address specified in the patent term extension application. If the address is changed after filing the application for patent term extension, the change of address should be sent to *>Mail Stop< Patent Extension, since changing the address for the patent file will not cause the address for the patent term extension application to also be changed.

In order to change the address of all correspondence, including maintenance fee reminders, a change of address should also be filed. A change of address must be signed by the patent applicant, the assignee of the entire interest, or an attorney or agent of record. 37 CFR 1.33(a). Accordingly, if the patent term extension application is signed by the marketing applicant, as an agent of the patent owner, a power of attorney from the patent owner to any attorney for the marketing applicant would be necessary for the attorney for the marketing applicant to be able to sign a change of address for the patent file.

Pursuant to 37 CFR 1.740(b), two additional copies of the application for patent term extension must be filed with the application. In addition, applicants are requested to file an additional two copies of the application, for a total of five copies. The original copy is placed into the patent application file after the Notice of Final Determination is mailed. Two copies of the application are forwarded to the regulatory agency, one copy is made available for public inspection in the Office of Patent Legal Administration, and the fifth copy is used by the Legal Advisor.

2754 Filing Date [R-2]

37 CFR 1.741. Complete application given a filing date; petition procedure.

(a) The filing date of an application for extension of a patent term is the date on which a complete application is received in the Office or filed pursuant to the procedures set forth in §1.8 or § 1.10. A complete application must include:

- (1) An identification of the approved product;
- (2) An identification of each Federal statute under which regulatory review occurred;
- (3) An identification of the patent for which an extension is being sought;
- (4) An identification of each claim of the patent which claims the approved product or a method of using or manufacturing the approved product;

**>

(5) Sufficient information to enable the Director to determine under subsections (a) and (b) of 35 U.S.C. 156 the eligibility of a patent for extension, and the rights that will be derived from the extension, and information to enable the Director and the Secretary of Health and Human Services or the Secretary of Agriculture to determine the length of the regulatory review period; and<

(6) A brief description of the activities undertaken by the marketing applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities.

(b) If an application for extension of patent term is incomplete under this section, the Office will so notify the applicant. If

applicant requests review of a notice that an application is incomplete, or review of the filing date accorded an application under this section, applicant must file a petition pursuant to this paragraph accompanied by the fee set forth in § 1.17(h) within two months of the mail date of the notice that the application is incomplete, or the notice according the filing date complained of. Unless the notice indicates otherwise, this time period may be extended under the provisions of § 1.136.

FILING DATE ACCORDED

An application for patent term extension under 35 U.S.C. 156 may be filed by mail addressed to **>Mail Stop Patent Ext., Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450< or may be hand carried to the Office of Patent Legal Administration. Applicants are encouraged to use the post card receipt practice described in MPEP § 502.

As set forth in 37 CFR 1.741(a), the filing date of an application for patent term extension is the date on which a complete application is received in the USPTO or filed pursuant to the certificate of mailing provisions of 37 CFR 1.8 (see MPEP § 512 for suggested formats for a certificate of mailing) or the Express Mail provisions of 37 CFR 1.10. Patent term extension applications should not be filed by facsimile, however correspondence setting forth a change of address and other papers relating to a patent term extension may be sent by facsimile to the Office of Patent Legal Administration.

COMPLETE APPLICATION

The term “complete application” is defined in 37 CFR 1.741(a) and is an application meeting the requirements set forth in 35 U.S.C. 156(d)(1). For the establishment of a filing date, the distinction between the requirements of 37 CFR 1.740 and the requirements of 37 CFR 1.741 are important. While the requirements of 37 CFR 1.740 may be satisfied outside the 60 day filing period, the requirements of 37 CFR 1.741 are mandated by 35 U.S.C. 156 and must be satisfied within the 60 day filing period for the establishment of the filing date. The Office will consider each of these statutory requirements to be satisfied in an application which provides sufficient information, directed to each requirement, to act on the application, even though further information may be desired by the USPTO or the regulatory agency before a final determination of eligibility and length of patent term extension is made.

INFORMAL APPLICATION

37 CFR 1.740. *Formal requirements for application for extension of patent term; correction of informalities.*

(c) If an application for extension of patent term is informal under this section, the Office will so notify the applicant. The applicant has two months from the mail date of the notice, or such time as is set in the notice, within which to correct the informality. Unless the notice indicates otherwise, this time period may be extended under the provisions of § 1.136.

If the application does not meet all the formal requirements of 37 CFR 1.740(a) (see MPEP § 2753), the applicant will be notified of the informalities and may seek to have that holding reviewed under 37 CFR 1.740(c) or to correct the informality. The time periods set forth therein are subject to the provisions of 37 CFR 1.136, unless otherwise stated in the notice.

Note that if the application satisfies the requirements of 37 CFR 1.741, the application filing date will have been established even if the application is held to be informal under 37 CFR 1.740.

2754.01 Deadline for Filing an Application Under 35 U.S.C. 156(d)(1)

An application for patent term extension under 35 U.S.C. 156(d)(1) may only be filed within the sixty-day period beginning on the date the product received permission under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. The statutory time period is not extendable and cannot be waived or excused. See *U.S. Patent No. 4,486,425* (application for patent term extension filed after the end of the 60-day period and was therefore denied). The sixty-day period begins on the regulatory agency approval date which marks the end of the regulatory review period. The statute takes into account only the regulatory review carried out by the Food and Drug Administration or the Department of Agriculture and no other government obstacles to marketing or use. See *Unimed, Inc. v. Quigg*, 888 F2d 826, 828; 12 USPQ2d 1644, 1646 (Fed. Cir. 1989). For drug products the approval date is the date of a letter by the Food and Drug Administration indicating that the application has been approved, even if the letter

requires further action before the drug can be marketed. *Mead Johnson Pharmaceutical Group v. Bowen*, 838 F2d 1332, 1336; 6 USPQ2d 1565, 1568 (D.C. Cir. 1988). For food or color additives, the relevant date is the effective date of the regulation or order, which is set forth in the regulation or order, and which is generally the date that the regulation or order is published, e.g., in the Federal Register. See 21 U.S.C. 348(e). This date will generally be later than the date the approval is communicated to the marketing applicant.

2754.02 Filing Window for an Application Under 35 U.S.C. 156(d)(5)

A first application for interim extension under 35 U.S.C. 156(d)(5) (to extend the patent term before product approval) must be filed within the period beginning six months and ending fifteen days before the patent is due to expire. Each subsequent application for interim extension must be filed during the period beginning sixty days before and ending thirty days before the expiration of the preceding interim extension. 35 U.S.C. 156(d)(5)(C). An interim extension granted under 35 U.S.C. 156(d)(5) terminates sixty days after permission for commercial marketing or use of the product is granted, except, if within the sixty-day period any additional information needed for an application for patent term extension under 35 U.S.C. 156(d)(1) is submitted, the patent may be further extended. 35 U.S.C. 156(d)(5)(E). The additional information required to be submitted includes the fee for an application for patent term extension under 35 U.S.C. 156(d)(1) and identification of the date the product received permission for commercial marketing or use and a statement that the application is being submitted within sixty days of such date and identification of the last date that the application could be submitted. See 37 CFR 1.740(a)(3) and (5). However, if the product is not approved within the period of interim extension, a new request for interim extension must be filed and another interim extension granted to keep the patent in force. An applicant is generally limited to four one-year interim extensions.

See MPEP § 2755.02 for additional information pertaining to the interim extension of patent term under 35 U.S.C. 156(d)(5).

2754.03 Filing of a Request for an Extension Under 35 U.S.C. 156(e)(2)

A request for an interim extension under 35 U.S.C. 156(e)(2) (to extend the patent term during the processing of the patent term extension application) should be made at least three months before the patent is due to expire. See MPEP § 2755.01 for information pertaining to the interim extension of patent term under 35 U.S.C. 156(e)(2).

2755 Eligibility Determination [R-2]

**>

37 CFR 1.750. Determination of eligibility for extension of patent term

A determination as to whether a patent is eligible for extension may be made by the Director solely on the basis of the representations contained in the application for extension filed in compliance with § 1.740 or § 1.790. This determination may be delegated to appropriate Patent and Trademark Office officials and may be made at any time before the certificate of extension is issued. The Director or other appropriate officials may require from applicant further information or make such independent inquiries as desired before a final determination is made on whether a patent is eligible for extension. In an application for extension filed in compliance with § 1.740, a notice will be mailed to applicant containing the determination as to the eligibility of the patent for extension and the period of time of the extension, if any. This notice shall constitute the final determination as to the eligibility and any period of extension of the patent. A single request for reconsideration of a final determination may be made if filed by the applicant within such time as may be set in the notice of final determination or, if no time is set, within one month from the date of the final determination. The time periods set forth herein are subject to the provisions of § 1.136.<

The determination as to whether a patent is eligible for an extension will normally be made solely from the representations contained in the application for patent term extension. However, further information may be required or inquiry made of applicant before a final determination is made on whether a patent is eligible for extension. In circumstances where further information is required by the Office, the applicant will be given a time period within which to respond. The failure to provide a response within the time period provided may result in a final determination adverse to the granting of an extension of patent term unless the response period is extended. An extension of time to respond may be requested under the provisions of 37 CFR 1.136. Under appropriate circumstances, e.g., if time is of the essence for a particular

reason, a request for information may contain a statement that the provisions of 37 CFR 1.136(a) are not available. The intentional failure to provide the information requested may result in an adverse final determination.

A final determination may be made at any time after an application is filed. A single request for reconsideration of a final determination may be filed within one month or within such other time period set in the final determination. A notice will be mailed to applicant containing the determination as to eligibility of the patent for extension and the period of time of the extension of the term, if any. This notice shall constitute the final determination as to eligibility and any period of extension of the patent term. If no request for reconsideration is filed within the time period set in the notice of final determination, the certificate of patent term extension will be issued in due course. See MPEP § 2758.

2755.01 Interim Extension of Patent Term During the Processing of the Application [R-2]

35 U.S.C. 156. Extension of patent term.

(e)(2) If the term of a patent for which an application has been submitted under subsection (d)(1) would expire before a certificate of extension is issued or denied under paragraph (1) respecting the application, the Director shall extend, until such determination is made, the term of the patent for periods of up to one year if he determines that the patent is eligible for extension.

**>

37 CFR 1.760. Interim extension of patent term under 35 U.S.C. 156(e)(2).

An applicant who has filed a formal application for extension in compliance with § 1.740 may request one or more interim extensions for periods of up to one year each pending a final determination on the application pursuant to § 1.750. Any such request should be filed at least three months prior to the expiration date of the patent. The Director may issue interim extensions, without a request by the applicant, for periods of up to one year each until a final determination is made. The patent owner or agent will be notified when an interim extension is granted and notice of the extension will be published in the *Official Gazette of the United States Patent and Trademark Office*. The notice will be recorded in the official file of the patent and will be considered as part of the original patent. In no event will the interim extensions

granted under this section be longer than the maximum period for extension to which the applicant would be eligible.<

If the original term of the patent for which extension is sought will expire before a final decision to issue a certificate of extension can be made, and a determination is made that the patent is eligible for extension, 35 U.S.C. 156 provides that the *>Director< may issue an interim extension of the patent term for up to one year pending a final decision on the application for extension. Should additional time be necessary, additional interim extensions of up to one year may be granted by the *>Director<. The length of any interim extension is discretionary with the *>Director< so long as it is for one year or less. Its length should be set to provide time for completion of any outstanding requirements. See *In re Reckitt & Colman Products Ltd.*, 230 USPQ 369, 372 (Comm'r Pat. & Tm. 1986). The *>Director< may issue an interim extension under 35 U.S.C. 156(e)(2) with or without a request from the applicant.

Where a determination is made that the patent is not eligible for patent term extension, an interim extension of the patent term is not warranted under 35 U.S.C. 156(e)(2). See *In re Alcon Laboratories Inc.*, 13 USPQ2d 1115, 1123 (Comm'r. Pat. & Tm. 1989).

Where an interim extension has been granted and it is subsequently determined that the patent is not eligible for patent term extension, the interim extension may be vacated *ab initio* as ineligible under 35 U.S.C. 156(e)(2). See *In re Reckitt*, 230 USPQ at 370.

While 37 CFR 1.760 provides that a request for an interim extension by the applicant "should" be filed three months prior to the expiration of the patent, this time frame is not mandatory. Any request filed within a shorter period of time will be considered, upon a proper showing, where it is not possible to make an earlier request. However, for an interim extension to be granted, the application for extension, in compliance with 37 CFR 1.741, must have been filed prior to the expiration date of the patent. In no event will an interim extension be granted for a period of patent term extension longer than the period of extension to which the patent would be eligible.

A notice of each interim extension granted will be issued to the applicant for patent term extension. The

notice will be recorded in the official file of the patent and will be considered as part of the original patent. Notification of the issuance of the interim extension will be published in the Official Gazette of the Patent and Trademark Office.

2755.02 Interim Extension of Patent Term Before Product Approval

35 U.S.C. 156. *Extension of patent term.*

(d)(5)(A) If the owner of record of the patent or its agent reasonably expects that the applicable regulatory review period described in paragraphs (1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), or (5)(B)(ii) of subsection (g) that began for a product that is the subject of such patent may extend beyond the expiration of the patent term in effect, the owner or its agent may submit an application to the Director for an interim extension during the period beginning 6 months, and ending 15 days before such term is due to expire. The application shall contain—

(i) the identity of the product subject to regulating review and the Federal statute under which such review is occurring;

(ii) the identity of the patent for which interim extension is being sought and the identity of each claim of such patent which claims the product under regulatory review or a method of using or manufacturing the product;

(iii) information to enable the Director to determine under subsection (a)(1), (2), and (3) the eligibility of a patent for extension;

(iv) a brief description of the activities undertaken by the applicant during the applicable regulatory review period to date with respect to the product under review and the significant dates applicable to such activities; and

(v) such patent or other information as the Director may require.

(5)(B) If the Director determines that, except for permission to market or use the product commercially, the patent would be eligible for an extension of the patent term under this section, the Director shall publish in the Federal Register a notice of such determination, including the identity of the product under regulatory review, and shall issue to the applicant a certificate of interim extension for a period of not more than 1 year.

(C) The owner of record of a patent, or its agent, for which an interim extension has been granted under subparagraph (B), may apply for not more than 4 subsequent interim extensions under this paragraph, except that, in the case of a patent subject to subsection (g)(6)(C), the owner of record of the patent, or its agent, may apply for only 1 subsequent interim extension under this paragraph. Each such subsequent application shall be made during the period beginning 60 days before, and ending 30 days before, the expiration of the preceding interim extension.

(D) Each certificate of interim extension under this paragraph shall be recorded in the official file of the patent and shall be considered part of the original patent.

(E) Any interim extension granted under this paragraph shall terminate at the end of the 60-day period beginning on the day on which the product involved receives permission for commercial marketing or use, except that, if within that 60-day period, the applicant notifies the Director of such permission and submits any additional information under paragraph (1) of this subsection not previously contained in the application for interim extension, the patent shall be further extended, in accordance with the provisions of this section—

(i) for not to exceed 5 years from the date of expiration of the original patent term; or

(ii) if the patent is subject to subsection (g)(6)(C), from the date on which the product involved receives approval for commercial marketing or use.

(F) The rights derived from any patent the term of which is extended under this paragraph shall, during the period of interim extension—

(i) in the case of a patent which claims a product, be limited to any use then under regulatory review;

(ii) in the case of a patent which claims a method of using a product, be limited to any use claimed by the patent then under regulatory review; and

(iii) in the case of a patent which claims a method of manufacturing a product, be limited to the method of manufacturing as used to make the product then under regulatory review.

37 CFR 1.790. Interim extension of patent term under 35 U.S.C. 156(d)(5).

(a) An owner of record of a patent or its agent who reasonably expects that the applicable regulatory review period described in paragraph (1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), or (5)(B)(ii) of subsection (g) that began for a product that is the subject of such patent may extend beyond the expiration of the patent term in effect may submit one or more applications for interim extensions for periods of up to one year each. The initial application for interim extension must be filed during the period beginning 6 months and ending 15 days before the patent term is due to expire. Each subsequent application for interim extension must be filed during the period beginning 60 days before and ending 30 days before the expiration of the preceding interim extension. In no event will the interim extensions granted under this section be longer than the maximum period of extension to which the applicant would be entitled under 35 U.S.C. 156(c).

(b) A complete application for interim extension under this section shall include all of the information required for a formal application under § 1.740 and a complete application under § 1.741. Sections (a)(1), (a)(2), (a)(4), and (a)(6) - (a)(17) of § 1.740 and § 1.741 shall be read in the context of a product currently undergoing regulatory review. Sections (a)(3) and (a)(5) of § 1.740 are not applicable to an application for interim extension under this section.

(c) The content of each subsequent interim extension application may be limited to a request for a subsequent interim extension

along with a statement that the regulatory review period has not been completed along with any materials or information required under §§ 1.740 and 1.741 that are not present in the preceding interim extension application.

37 CFR 1.791. Termination of interim extension granted prior to regulatory approval of a product for commercial marketing or use.

Any interim extension granted under 35 U.S.C. 156(d)(5) terminates at the end of the 60-day period beginning on the date on which the product involved receives permission for commercial marketing or use. If within that 60-day period the patent owner or its agent files an application for extension under §§ 1.740 and 1.741 including any additional information required under 35 U.S.C. 156(d)(1) not contained in the application for interim extension, the patent shall be further extended in accordance with the provisions of 35 U.S.C. 156.

If a patent that claims a product which is undergoing the approval phase of regulatory review as defined by 35 U.S.C. 156(g)(1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), and (5)(B)(ii) is expected to expire before approval is granted, interim patent term extension is available under 35 U.S.C. 156(d)(5). The application for patent term extension that must be submitted is generally the same as would be filed had the product been approved, except that the approval date is not required to be set forth. Once the product is approved, the application must be converted to an application for patent term extension under 35 U.S.C. 156(d)(1) to obtain patent term extension under that subsection.

Processing of an application for interim patent term extension under 35 U.S.C. 156(d)(5) is performed in the Office of Patent Legal Administration and is similar to other applications for patent term extension, except that the Office is not required to seek the advice of the relevant regulatory agency. The relevant agency, however, is normally consulted before an interim extension is granted or before the application is denied. The fee for an application for patent term extension under 35 U.S.C. 156(d)(5) is set forth in 37 CFR 1.20(j)(2), and the fee for a subsequent application is set forth in 37 CFR 1.20(j)(3). Copies of an application for interim extension are maintained in the same manner as applications for patent term extension. As required by 35 U.S.C. 156(d)(5)(B), a determination that a patent is eligible for extension under 35 U.S.C. 156, but for regulatory approval, is published in the Federal Register. A sample order granting a second interim extension follows:

**UNITED STATES PATENT AND TRADEMARK OFFICE
BEFORE THE COMMISSIONER OF PATENTS AND
TRADEMARKS**

In re ____

Request for Patent Term Extension ORDER GRANTING
U.S. Patent No. ____ INTERIM EXTENSION

On ___, patent owner ___, filed an application under 35 U.S.C. 156(d)(5) for interim extension of the term of U.S. Patent No. ___. The patent claims the active ingredient __ in the human drug product “___.” The application indicates that the product is currently undergoing a regulatory review before the Food and Drug Administration for permission to market or use the product commercially. The original term of the patent expired on ____ On ___, the patent was granted an first interim extension under 35 U.S.C. 156(d)(5) for a period of one year.

Review of the application indicates that except for receipt of permission to market or use the product commercially, the subject patent would be eligible for an extension of the patent term under 35 U.S.C. 156. Since it is apparent that the regulatory review period may extend beyond the date of expiration of the patent, as extended by the first interim extension, a second interim extension of the patent term under 35 U.S.C. 156(d)(5) is appropriate.

An interim extension under 35 U.S.C. 156(d)(5) of the term of U.S. Patent No. ___ is granted for a period of one year from the extended expiration date of the patent.

As seen from the example given, a series of one-year interim extensions may be granted if requested in a timely manner (in the window of time between thirty and sixty days before the extended expiration date).

An interim extension granted under 35 U.S.C. 156(d)(5) terminates sixty days after permission for commercial marketing or use of the product is granted, except, if within the sixty day period any additional information needed for an application for patent term extension under 35 U.S.C. 156(d)(1) is submitted, the patent may be further extended. 35 U.S.C. 156(d)(5)(E).

**2756 Correspondence Between the
USPTO and the Regulatory Agency
[R-2]**

It is the *>Director’s< responsibility to decide whether an applicant has satisfied the requirements of the statute and whether the patent qualifies for patent term extension. The regulatory agency possesses

expertise and records regarding some of the statutory requirements and has certain direct responsibilities under 35 U.S.C. 156 for determining the length of the regulatory review period. Consequently, to facilitate eligibility decisions and permit the regulatory agency and the Office to carry out their responsibilities under 35 U.S.C. 156, both the Food and Drug Administration and the Department of Agriculture have entered into an “agreement” of cooperation with the Office. *Memorandum of Understanding Between the Patent and Trademark Office and the Food and Drug Administration*, 52 Fed. Reg. 17830 (May 12, 1987); *Memorandum of Understanding Between the Patent and Trademark Office and the Animal and Plant Health Inspection Service*, 54 Fed. Reg. 26399 (June 23, 1989); 1104 OG 18 (July 11, 1989). The agreements establish the procedures whereby the regulatory agency assists the Office in determining a patent’s eligibility for patent term restoration under 35 U.S.C. 156. It also establishes procedures for exchanging information between the regulatory agency and the Office regarding regulatory review period determinations, due diligence petitions and informal regulatory agency hearings under the law. The patent term extension applicant receives a copy of all correspondence between the Office and the regulatory agency.

The Animal and Health Inspection Service of the Department of Agriculture is responsible for assisting the Office in determining the eligibility of patent claiming a veterinary biological product that has been subject to the Virus-Serum-Toxin Act (21 U.S.C. 151-59) and for determining the regulatory review period of the veterinary biological product. The Secretary of Health and Human Services of the Food and Drug Administration is responsible for assisting the Office in determining the eligibility of patents claiming any other product for which regulatory review gives rise to eligibility for patent term extension. 21 CFR 60.10.

**INFORMATION REGARDING ELIGIBILITY
FOR EXTENSION**

If the Office has no clear reason to deny eligibility for patent term extension (even if there are questions concerning eligibility), or if the applicant has been notified of any informalities and it is anticipated that the informalities will be corrected or explained, a first letter is sent to the regulatory agency requesting infor-

mation regarding eligibility. The letter is accompanied by a copy of the patent term extension application. This letter does **not** request the determination of the applicable regulatory review period.

The regulatory agency reply is usually in the form of a written response:

(A) verifying whether the product has undergone a regulatory review period within the meaning of 35 U.S.C. 156(g) prior to commercial marketing or use;

(B) stating whether the marketing permission was for the first permitted commercial marketing or use of that product, or, in the case of recombinant DNA technology, whether such commercial marketing or use was the first permitted under the process claimed in the patent;

(C) informing the Office whether the patent term extension application was submitted within sixty days after the product was approved for marketing or use; and

(D) providing the Office with any other information relevant to the Office determination of whether a patent related to a product is eligible for patent term extension.

While the Office has primary responsibility for the eligibility determination, the regulatory agency often possesses information which is not readily available to the Office. The assistance on the part of the regulatory agency enables both the Office and the agency to process applications efficiently and to conserve resources.

PRELIMINARY ELIGIBILITY DECISION

Upon receipt of a reply from the regulatory agency to the first letter from the Office requesting assistance on determining eligibility, a preliminary eligibility decision (not the final decision) is made as to whether the patent is eligible for an extension of its term. As noted above, the reply from the regulatory agency will usually inform the Office as to whether the permission for commercial marketing and use of the product on which the application for patent term extension is based is the first such approval for that product. Furthermore, the regulatory agency usually provides information regarding the date of product approval to permit a determination as to whether the application was filed within the sixty-day statutory period. The

information provided by the regulatory agency is then compared with the related information from the application. If no major discrepancies are found and the patent is determined to be eligible for patent term extension, a second letter requesting a determination of the length of the regulatory review period of the product is mailed to the regulatory agency not later than sixty (60) days after the Office receipt date of the reply from the regulatory agency. In the interest of efficiency, if the patent is determined to be ineligible for patent term extension, the Office will dismiss the application rather than request a determination of the regulatory review period. *In re Allen & Hansbury, Ltd.*, 227 USPQ 955, 960 n. 9 (Comm'r Pat. & Tm. 1985). A certified copy of the application for patent term extension is sent to the regulatory agency along with the second letter. The second letter states that, subject to final review, the patent is considered eligible for patent term extension and requests a determination of the applicable regulatory review period.

2757 Regulatory Agency Determination of the Length of the Regulatory Review Period

Under 35 U.S.C. 156, the regulatory agency is responsible for the determination of the length of the regulatory review period for the approved product on which the application for patent term extension is based. The determination by the regulatory agency is made based on the application as well as the official regulatory agency records for the approved product. See, e.g., 21 CFR Ch. 1, Subpart C. The determination of the length of the regulatory review period is solely the responsibility of the regulatory agency. *Aktiebo-laget Astra v. Lehman*, 71 F.3d 1578, 1580-81, 37 USPQ2d 1212, 1214-15 (Fed. Cir. 1995); U.S. Patent No. 4,215,113.

Once the determination has been made, the regulatory agency publishes the information in the Federal Register and forwards a letter to the Office with the same information. Included in both the Federal Register Notice and the letter to the Office are the total length of the regulatory review period and the relevant dates on which the determination is based. Both the letter to the Office and the Federal Register Notice separate the total regulatory period into the initial or testing phase and the final approval phase. This provides the Office with the information necessary to

determine the actual length of extension for which the patent may be eligible. The Federal Register Notice also sets a date, 180 days after publication of the notice, as a deadline for filing written comments concerning any of the information set forth in the notice or a petition for a determination regarding whether the marketing applicant has acted with due diligence during the regulatory review period. The letter to the Office makes clear that the determination does not take into account the issue date of the patent nor does it exclude one-half of the testing phase.

The regulatory review period determination is not final until due diligence petitions and informal hearings, if any, have been resolved. A certificate for extension of the term of a patent may not issue from the Office until the regulatory review period determination is final unless an interim extension appears warranted under 35 U.S.C. 156(d)(5) and (e)(2).

2757.01 Due Diligence Determination

If a due diligence petition is filed during the 180-day period following publication of the regulatory agency determination of the regulatory review period, the regulatory agency (e.g., FDA) makes the determination under 35 U.S.C. 156(d)(2)(B) whether the applicant for patent term extension acted with due diligence during the regulatory review proceedings. The term “due diligence” is defined in 35 U.S.C. 156(d)(3) as “that degree of attention, continuous directed effort, and timeliness as may reasonably be expected from, and are ordinarily exercised by, a person during a regulatory review period.” After affirming or revising the determination of the regulatory review period, the regulatory agency notifies the Office and publishes the results in the Federal Register. If no comment or petition is filed in the time period provided, the regulatory agency notifies the Office that the period for filing a due diligence petition pursuant to the notice has expired and that the regulatory agency therefore considers its determination of the regulatory review period for the product to be final. Following notification from the regulatory agency, the Office proceeds with the final eligibility determination. See 21 CFR Ch. 1, Subparts D and E.

2758 Notice of Final Determination - Calculation of Patent Term Extension [R-2]

35 U.S.C. 156. *Extension of patent term.*

(c) The term of a patent eligible for extension under subsection (a) shall be extended by the time equal to the regulatory review period for the approved product which period occurs after the date the patent is issued, except that—

(1) each period of the regulatory review period shall be reduced by any period determined under subsection (d)(2)(B) during which the applicant for the patent extension did not act with due diligence during such period of the regulatory review period;

(2) after any reduction required by paragraph (1), the period of extension shall include only one-half of the time remaining in the periods described in paragraphs (1)(B)(i), (2)(B)(i), (3)(B)(i), (4)(B)(i), and (5)(B)(i) of subsection (g);

(3) if the period remaining in the term of a patent after the date of the approval of the approved product under the provision of law under which such regulatory review occurred when added to the regulatory review period as revised under paragraphs (1) and (2) exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years, and

(4) in no event shall more than one patent be extended under subsection (e)(i) for the same regulatory review period for any product.

(6) A period determined under any of the preceding paragraphs is subject to the following limitations:

(A) If the patent involved was issued after the date of the enactment of this section, the period of extension determined on the basis of the regulatory review period determined under any such paragraph may not exceed five years.

(B) If the patent involved was issued before the date of the enactment of this section and —

(i) no request for an exemption described in paragraph (1)(B) or (4)(B) was submitted and no request for the authority described in paragraph (5)(B) was submitted,

(ii) no major health or environment effects test described in paragraph (2)(B) or (4)(B) was initiated and no petition for a regulation or application for registration described in such paragraph was submitted, or

**>

(iii) no clinical investigation described in paragraph (3) was begun or product development protocol described in such paragraph was submitted, before such date for the approved product the period of extension determined on the basis of the regulatory review period determined under any such paragraph may not exceed five years.<

(C) If the patent involved was issued before the date of the enactment of this section and if an action described in subparagraph (B) was taken before the date of enactment of this section

with respect to the approved product and the commercial marketing or use of the product has not been approved before such date, the period of extension determined on the basis of the regulatory review period determined under such paragraph may not exceed two years or in the case of an approved product which is a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act or the Virus-Serum-Toxin Act), three years.

After reviewing the information provided by the regulatory agency, if the Office determines the patent to be eligible for extension, the calculation is made of the length of extension for which the patent is eligible under the appropriate statutory provisions (35 U.S.C. 156(c); 37 CFR 1.750). The length of extension is subject to the limitations of 35 U.S.C. 156(c)(3) and 35 U.S.C. 156(g)(6). A Notice of Final Determination is mailed to applicant which states the length of extension for which the application has been determined to be eligible and the calculations used to determine the length of extension. Recently mailed Notices of Final Determination are posted in the Freedom of Information (FOIA) section of the USPTO web site (www.uspto.gov) with other Decisions of the *>Director<. The notice provides a period, usually one month, in which the applicant can request reconsideration of any aspect of the Office determination as to eligibility or the length of extension for which the application has been found eligible.

If the application has been determined to be ineligible for patent term extension, an appropriate Notice of Final Determination is mailed to applicant which denies the application and sets forth the basis for the denial. The applicant is given a period, usually one month, in which to seek reconsideration of the determination.

If the patent is found to be eligible for extension, the Notice of Final Determination may include text similar to the following:

A determination has been made that U.S. Patent No. ____, which claims the human drug ____, is eligible for patent term extension under 35 U.S.C. 156. The period of extension has been determined to be ____.

A single request for reconsideration of this final determination as to the length of extension of the term of the patent may be made if filed within one month of the date of this notice. Extensions of time under 37 CFR 1.136(a) are not applicable to this time period. In the absence of such request

for reconsideration, the *>Director< will issue a certificate of extension, under seal, for a period of ____ days.

The period of extension has been calculated using the FDA determination of the length of the regulatory review period published in the Federal Register of _____. Under 35 U.S.C. 156(c).

Period of Extension = 1/2 (Testing Phase) + Approval Phase

$$= 1/2 (_ - _) + _$$

$$= _ \text{ days}$$

Since the regulatory review period began __, before the patent issued __, only that portion of the regulatory review period occurring after the date the patent issued has been considered in the above determination of the length of the extension period 35 U.S.C. 156(c). (From __ to __) is __ days; this period is subtracted for the number of days occurring in the testing phase according to the FDA determination of the length of the regulatory review period.) No determination of a lack of due diligence under 35 U.S.C. 156(c)(1) was made.

The 14 year exception of 35 U.S.C. 156(c)(3) operates to limit the term of the extension in the present situation because it provides that the period remaining in the term of the patent measured from the date of approval of the approved product (__) when added to the period of extension calculated above (__ days) cannot exceed fourteen years. The period of extension is thus limited to __, by operation of 35 U.S.C. 156(c)(3). Since the patent term (35 U.S.C. 154) would expire on __, the period of extension is the number of days to extend the term of the patent from its expiration date to and including __, or __ days.

The limitations of 35 U.S.C. 156(g)(6) do not operate to further reduce the period of extension determined above.

See MPEP § 2759 for further information pertaining to the issuance of a certificate of extension.

A patent term extension generally extends the patent from its "original expiration date," as defined by 35 U.S.C. 154 to include extension under 35 U.S.C. 154(b). Patents "in force on June 8, 1995 only because of a Hatch-Waxman extension are not entitled to re-apply a restoration extension to a 20-year from filing term." *Merck & Co. v. Kessler*, 80 F.3d 1543, 1553, 38 USPQ2d 1347, 1354 (Fed. Cir. 1996). However, if the patent received an interim extension under 35 U.S.C. 156(d)(5) and the patent is eligible for either a two- or a three-year extension, the extension would run from the approval date of the product, not the original expiration date of the patent. See 35 U.S.C. 156(d)(5)(E)(ii).

No certificate or extension will be issued if the term of a patent cannot be extended, even though the patent is otherwise determined to be eligible for extension. In such situations the final determination would issue indicating that no certificate will issue.

CALCULATION OF PATENT TERM EXTENSION

The procedure for calculating the length of the patent term extension is set forth for human drugs, antibiotic drugs, and human biological products in 37 FR 1.775; for food or color additives in 37 CFR 1.776; for medical devices in 37 CFR 1.777; for animal drug products in 37 CFR 1.778; and for veterinary biological products in 37 CFR 1.779. The length of patent term extension is the length of the regulatory review period as determined by the Secretary of Health and Human Services or the Secretary of Agriculture, but reduced, where appropriate, by the time periods provided in 37 CFR 1.775 - 1.779. The Office will rely on the Secretary's determination of the length of the regulatory review period when calculating the length of the extension period under 37 CFR 1.775 - 1.779.

Any part of the regulatory review period which occurs before the patent was granted will not be counted toward patent term extension. Any period in which the marketing applicant failed to exercise due diligence, thereby unnecessarily adding to the length of the regulatory review period after the patent issued, will not be considered in determining the length of the extension period. In making the calculation of the extension period, half days will be ignored and thus will not be subtracted from the regulatory review period.

For products other than animal drug or veterinary biological products, the calculated extension period cannot exceed any of the following statutory maximum periods of extension:

(A) If the period remaining in the term of the patent after the date of approval of the approved product when added to the calculated regulatory review period exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years;

(B) If the patent involved was issued after September 24, 1984, (the date of enactment of the statute), the calculated period of extension may not exceed five years;

(C) If the patent involved was issued before September 24, 1984, (the date of enactment of the statute), and the regulatory review period proceeding started after this date, the calculated period of extension may not exceed five years; and

(D) If the patent involved was issued before September 24, 1984, (the date of enactment of the statute), and the regulatory review period proceeding started before this date, and the commercial marketing or use of the product has been approved after such date, the calculated period of extension may not exceed two years.

For animal drug or veterinary biological products, the calculated extension period cannot exceed any of the following statutory maximum periods of extension:

(A) If the period remaining in the term of the patent after the date of approval of the approved product when added to the calculated regulatory review period exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years;

(B) If the patent involved was issued after November 16, 1988, the calculated period of extension may not exceed five years;

(C) If the patent involved was issued before November 16, 1988, and the regulatory review period proceeding started after this date, the calculated period of extension may not exceed five years; and

(D) If the patent involved was issued before November 16, 1988, and the regulatory review period proceeding started before this date, and the commercial marketing or use of the product has been approved after such date, the calculated period of extension may not exceed three years.

The patent term extension of a patent that issued before September 24, 1984, where the regulatory review period began and ended before September 24, 1984, would only be a function of the regulatory review period and the fourteen-year limit, and may be extended for more than five years. *Hoechst Aktiengesellschaft v. Quigg*, 916 F2d 522, 525, 16 USPQ2d 1549, 1551 (Fed. Cir. 1990).

2759 Certificate of Extension of Patent Term [R-2]

35 U.S.C. 156. *Extension of patent term.*

(e)(1) A determination that a patent is eligible for extension may be made by the Director solely on the basis of the representations contained in the application for the extension. If the Director determines that a patent is eligible for extension under subsection (a) and that the requirements of paragraphs (1) through (4) of subsection (d) have been complied with, the Director shall issue to the applicant for the extension of the term of the patent a certificate of extension, under seal, for the period prescribed by subsection (c). Such certificate shall be recorded in the official file of the patent and shall be considered as part of the original patent.

37 CFR 1.780. *Certificate or order of extension of patent term.*

If a determination is made pursuant to § 1.750 that a patent is eligible for extension and that the term of the patent is to be extended, a certificate of extension, under seal, or an order granting interim extension under 35 U.S.C. 156(d)(5), will be issued to the applicant for the extension of the patent term. Such certificate or order will be recorded in the official file of the patent and will be considered as part of the original patent. Notification of the issuance of the certificate or order of extension will be published in the *Official Gazette of the United States Patent and Trademark Office*. Notification of the issuance of the order granting an interim extension under 35 U.S.C. 156(d)(5), including the identity of the product currently under regulatory review, will be published in the *Official Gazette of the United States Patent and Trademark Office* and in the *Federal Register*. No certificate of, or order granting, an extension will be issued if the term of the patent cannot be extended, even though the patent is otherwise determined to be eligible for extension. In such situations, the final determination made pursuant to § 1.750 will indicate that no certificate or order will issue.

Once a determination is made pursuant to 37 CFR 1.750 that a patent is eligible for extension of its term, a certificate of extension, under seal, will be issued to the patent owner at the correspondence address specified in the application for patent term extension. Following the one-month period provided in the Notice of Final Determination, and where an extension is appropriate, the Certificate of Extension is signed by the *>Director<. The original certificate is mailed or delivered to the applicant and a copy is sent to the regulatory agency. A copy of the certificate is placed in the two files (official file/patent file and public file) maintained for the patent term extension application.

Upon issuance of the certificate of extension, a notice is published in the *Official Gazette*. A sample *Official Gazette* Notice Follows:

PATENT TERM EXTENDED UNDER 35 U.S.C. 156

A Certificate extending the term of the following patent was issued on ___.

U.S. Patent No.: __ Granted: __; Applicant: __; Owner of Record: __; Title: __; Classification: __ Product Trade Name: __; Original Expiration Date: __; Term Extended: ____; Extended Expiration Date: __.

All original papers from the application for patent term extension in the official file are transferred to the official patent file of the subject patent and become a part of the permanent record. A copy of the certificate of extension of patent term is added to the patent electronic database as part of the patent record in the same manner as is a certificate of correction or a terminal disclaimer. The patent is also added to the list of patents extended under 35 U.S.C. 156, a copy of which is posted on the USPTO web site (www.uspto.gov) and which is also available in the Reading Room of the Public Search Room and from the Office of Patent Legal Administration. The public file for the application for patent term extension is stored in the Office of Patent Legal Administration.

2760 Trade Secret, Confidential, and Protective Order Material

There is no provision in the statute or the rules for withholding from the public any information that is submitted to the Office or the regulatory agency relating to an application for patent term extension. While one submitting such materials to the Office in relation to a pending application for patent term extension must generally assume that such materials will be made of record in the file and be made public, the Office is not unmindful of the difficulties this sometimes imposes. Proprietary or trade secret information should be submitted generally in accordance with the procedures set forth in MPEP § 724.02. Identification of the propriety or trade secret material should be made by page, line, and word, as necessary. The Office will not in the first instance undertake the task of determining the precise material in the application which is proprietary or trade secret information. Only

the applicant is in a position to make this determination. See *In re Schering-Plough Corp.*, 1 USPQ2d 1926, 1926 (Comm'r Pat. & Tm. 1986).

The information will not be made public as part of the patent file before a certificate of patent extension is issued. Should the Office receive a Freedom of Information Act (FOIA) request for the material, the applicant will be provided notice and an opportunity to substantiate its claim that the material is proprietary before the Office determines whether disclosure of the material is required under the FOIA. If such information was material to a determination of eligibility or any other Office responsibility under 35 U.S.C. 156, it will be made public at the time the certificate of extension is issued. Otherwise, if a suitable petition to expunge is filed before the issuance of the certificate, the trade secret or confidential information will be expunged from the file and returned to the patent term extension applicant. If a petition to expunge is not filed prior to the issuance of the certificate, all of the information will be open to public inspection.

2761 Multiple Applications for Extension of Term of the Same Patent or of Different Patents for the Same Regulatory Review Period for a Product

35 U.S.C. 156. Extension of patent term.

(c)(4) in no event shall more than one patent be extended under subsection (e)(i) for the same regulatory review period for any product.

37 CFR 1.785. Multiple applications for extension of term of the same patent or of different patents for the same regulatory review period for a product.

(a) Only one patent may be extended for a regulatory review period for any product § 1.720 (h). If more than one application for extension of the same patent is filed, the certificate of extension of patent term, if appropriate, will be issued based upon the first filed application for extension.

(b) If more than one application for extension is filed by a single applicant which seeks the extension of the term of two or more patents based upon the same regulatory review period, and the patents are otherwise eligible for extension pursuant to the requirements of this subpart, in the absence of an election by the applicant, the certificate of extension of patent term, if appropriate, will be issued upon the application for extension of the patent

term having the earliest date of issuance of those patents for which extension is sought.

(c) If an application for extension is filed which seeks the extension of the term of a patent based upon the same regulatory review period as that relied upon in one or more applications for extension pursuant to the requirements of this subpart, the certificate of extension of patent term will be issued on the application only if the patent owner or its agent is the holder of the regulatory approval granted with respect to the regulatory review period.

(d) An application for extension shall be considered complete and formal regardless of whether it contains the identification of the holder of the regulatory approval granted with respect to the regulatory review period. When an application contains such information, or is amended to contain such information, it will be considered in determining whether an application is eligible for an extension under this section. A request may be made of any applicant to supply such information within a non-extendable period of not less than one month whenever multiple applications for extension of more than one patent are received and rely upon the same regulatory review period. Failure to provide such information within the period for reply set shall be regarded as conclusively establishing that the applicant is not the holder of the regulatory approval.

(e) Determinations made under this section shall be included in the notice of final determination of eligibility for extension of the patent term pursuant to § 1.750 and shall be regarded as part of that determination.

Only one patent may be extended for a regulatory review period for any product. If more than one application for extension is filed for a single patent by different applicants, the certificate of extension of the term of the patent, if appropriate, would be issued based upon the first filed application for extension of patent term. If a single applicant files more than one application for patent term extension for a single patent based upon the regulatory review period of different products, then the final determination under 37 CFR 1.750 will provide a period of time (usually one month) for the patent owner to elect the product for which extension is desired. An express withdrawal of the applications for extension of the nonelected products should accompany the election. The final determination will indicate that if the patent owner fails to elect a single product within the set time period, the Office will issue a certificate of extension for the patent for a specified one of the products.

If more than one application for extension is filed by a single applicant for the extension of the terms of different patents based upon the same regulatory review period for a product, the certificate of extension will be issued on the application for extension of the patent having the earliest date of issuance of those

for which extension is sought unless all but one application for extension is voluntarily withdrawn by the applicant. When plural patents are found to be eligible for patent term extension based on the same regulatory review of a product, the final determination under 37 CFR 1.750 will provide a period of time (usually one month) for the patent owner to elect the patent for which extension is desired. An express withdrawal of the application(s) for extension of the nonelected patent(s) should accompany the election. A failure to elect within the set time period will result in issuance of a certificate of extension for the patent having the earliest date of issue.

If applications for extension are filed by different applicants for the extension of the terms of different patents based upon the same regulatory review period of a product, the certificate of extension will be issued on the application of the holder of the regulatory approval (marketing applicant). If the marketing applicant is not an applicant for extension, the certificate of extension will issue to the applicant for extension which holds an express authorization from the marketing applicant to rely upon the regulatory review period as the basis for the application for extension. See also 37 CFR 1.785(d).

2762 Duty of Disclosure in Patent Term Extension Proceedings [R-2]

37 CFR 1.765. Duty of disclosure in patent term extension proceedings.

(a) A duty of candor and good faith toward the Patent and Trademark Office and the Secretary of Health and Human Services or the Secretary of Agriculture rests on the patent owner or its agent, on each attorney or agent who represents the patent owner and on every other individual who is substantively involved on behalf of the patent owner in a patent term extension proceeding. All such individuals who are aware, or become aware, of material information adverse to a determination of entitlement to the extension sought, which has not been previously made of record in the patent term extension proceeding must bring such information to the attention of the Office or the Secretary, as appropriate, in accordance with paragraph (b) of this section, as soon as it is practical to do so after the individual becomes aware of the information. Information is material where there is a substantial likelihood that the Office or the Secretary would consider it important in determinations to be made in the patent term extension proceeding.

(b) Disclosures pursuant to this section must be accompanied by a copy of each written document which is being disclosed. The disclosure must be made to the Office or the Secretary, as appropriate, unless the disclosure is material to determinations to

be made by both the Office and the Secretary, in which case duplicate copies, certified as such, must be filed in the Office and with the Secretary. Disclosures pursuant to this section may be made to the Office or the Secretary, as appropriate, through an attorney or agent having responsibility on behalf of the patent owner or its agent for the patent term extension proceeding or through a patent owner acting on his or her own behalf. Disclosure to such an attorney, agent or patent owner shall satisfy the duty of any other individual. Such an attorney, agent or patent owner has no duty to transmit information which is not material to the determination of entitlement to the extension sought.

(c) No patent will be determined eligible for extension and no extension will be issued if it is determined that fraud on the Office or the Secretary was practiced or attempted or the duty of disclosure was violated through bad faith or gross negligence in connection with the patent term extension proceeding. If it is established by clear and convincing evidence that any fraud was practiced or attempted on the Office or the Secretary in connection with the patent term extension proceeding or that there was any violation of the duty of disclosure through bad faith or gross negligence in connection with the patent term extension proceeding, a final determination will be made pursuant to § 1.750 that the patent is not eligible for extension.

A duty of candor and good faith toward the USPTO, the Secretary of Health and Human Services, and the Secretary of Agriculture rests on the patent owner or its agent, on each attorney or agent who represents the patent owner, and on every other individual who is substantively involved on behalf of the patent owner in a patent term extension proceeding. All such individuals who are aware, or become aware, of material information adverse to a determination of entitlement to the extension sought, which has not been previously made of record in the patent term extension proceeding, must bring such information to the attention of the Office or the Secretary, as appropriate, as soon as it is practicable to do so after the individual becomes aware of the information. Information is "material" when there is a substantial likelihood that the Office or the Secretary would consider it important in determinations to be made in the patent term extension proceeding. Any such material information should be submitted to the **>Director of the United States Patent and Trademark Office<**, the Secretary of Health and Human Services, or the Secretary of Agriculture, as appropriate, accompanied by a copy of each written document being disclosed. The information may be submitted through a patent attorney or agent.

A determination of eligibility for an extension or the issuance of a certificate will not be made if clear and convincing evidence of fraud or attempted fraud on the Office or a Secretary is determined to be present, or the duty of disclosure is determined to have been violated through bad faith or gross negligence in connection with the patent term extension proceeding. Since the determination as to whether a patent is eligible for extension may be made solely on the basis of the representations made in the application for extension, a final determination to refuse a patent term extension because of fraud or a violation of the duty of disclosure is expected to be rare. See MPEP § 2010.

2763 Limitation of Third Party Participation [R-2]

37 CFR 1.765. Duty of disclosure in patent term extension proceedings.

(d) The duty of disclosure pursuant to this section rests on the individuals identified in paragraph (a) of this section and no submission on behalf of third parties, in the form of protests or otherwise, will be considered by the Office. Any such submissions by third parties to the Office will be returned to the party making the submission, or otherwise disposed of, without consideration by the Office.

Although the statute specifically provides for public input into the determination of the regulatory review period, i.e., the filing of a due diligence petition before the regulatory agency, no such provision was made for proceedings before the Office. Since applicant already has a duty of disclosure to both the Office and the regulatory agency, and Congress

expected that it would be an administratively simple proceeding, no input from third parties is permitted. Absent an invitation from the *>Director<, any such submission would be inappropriate. Accordingly, 37 CFR 1.765(d) precludes submissions to the Office by or on behalf of third parties, thereby making patent term extension proceedings in the Office an *ex parte* matter between the patent owner or its agent and the Office. Submissions by third parties not requested by the Office will be returned, or otherwise disposed of, without consideration. See *In re Dubno*, 12 USPQ2d 1153, 1154 (Comm'r Pat. & Tm. 1989).

2764 Express Withdrawal of Application for Extension of Patent Term

37 CFR 1.770. Express withdrawal of application for extension of patent term.

An application for extension of patent term may be expressly withdrawn before a determination is made pursuant to § 1.750 by filing in the Office, in duplicate, a written declaration of withdrawal signed by the owner of record of the patent or its agent. An application may not be expressly withdrawn after the date permitted for reply to the final determination on the application. An express withdrawal pursuant to this section is effective when acknowledged in writing by the Office. The filing of an express withdrawal pursuant to this section and its acceptance by the Office does not entitle applicant to a refund of the filing fee (§ 1.20(j)) or any portion thereof.

Any request for withdrawal of an application for extension of patent term after a determination has been made pursuant to 37 CFR 1.750 must be submitted on or before the date permitted for reply to the final determination, and be accompanied by a petition under 37 CFR 1.182 with the appropriate petition filing fee.

MANUAL OF PATENT EXAMINING PROCEDURE

Appendix I Partial List of Trademarks

The following is a partial list of trademarks which may appear from time to time in patent applications. Proper usage of trademarks requires that they be capitalized at all times. See MPEP § 608.01(v).

Any questions by the examiners as to whether an apparent trademark is in fact a registered trademark or to what particular goods a registered trademark applies should be referred to the Trademark Search Branch (308-9800) for determination.

| <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> | <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> |
|------------------|--|------------------|---|
| ACE..... | Elastic bandages, adhesive bandages, adherent compounds for attaching surgical dressings or bandages to the skin, and bandage fastening clips | BUSS | Electric fuses, fuse holders, fuse wire, and protectors for electric circuits that include fuse links and thermal cutouts and that respond to heavy overloads or short circuits to open the circuits |
| ACTIONWEAR | Men's, women's, children's, and infants' garments - namely coats, sweaters, blouses, shirts, underwear, and sleepwear | BUTTERFLY..... | Medical infusion sets for administration of fluids |
| ADRENALIN | Hemostatic, astringent, blood-pressure raising and stimulating preparations for medicinal or surgical purposes | CALGON..... | Water softening and water conditioning for industrial, laundry, and semi-industrial use |
| AEROJET | Thrust motors whose general purpose is to provide thrust by means of a combustion process, and includes all the component parts of such motors | CALROD | Electrical resistance heaters; electrical resistance heating elements for cooling devices |
| AEROSOL..... | Wetting agents for use in reducing the interfacial tension between liquids and solids or between two immiscible liquids | CARBORUNDUM ... | Electrical devices comprising detectors for radio apparatus, resistance rods, lightning arrestors, resistors, and resistor units |
| AIRVEYOR | Conveyors for conveying and handling materials | CARBORUNDUM ... | Crystalline substance used as an abradant and for other purposes |
| ANCHOR | Metallic fencing and related components | CAROUSEL..... | Photographic projectors |
| ARNEL | Yarns; textile fibers, including staple fibers and continuous filaments | CAT | Machinery for earth moving, earth conditioning, and material handling, namely, loaders and engines therefor, and parts for the foregoing; vehicles and internal combustion engines for earth and material hauling and handling, namely tractors and engines therefor, and parts for the foregoing |
| BARBIE | Doll; accessories for doll | CATERPILLAR..... | Tractors, engines, treads, etc. |
| BEEF STICK..... | Summer sausage | CHAP STICK..... | Medicinal preparation for chapped skin, sunburn, and hangnails |
| BIRKENSTOCK..... | Footwear-namely, sandals, shoes, and shoe insoles | CLOROX | Household cleanser compositions, laundry detergent |
| BLUSH | Wines | | |
| BOOGIE | Surfboards | | |

MANUAL OF PATENT EXAMINING PROCEDURE

| <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> | <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> |
|-------------------------|--|-------------------------------|--|
| COCA-COLA | Beverages and syrups for the manufacture of such beverages (carbonated soft drink) | FORMICA | Laminates and solid surfacing materials in the form of slabs made predominantly of plastic for use in the manufacture of |
| COCOA-PUFFS | Ready to eat breakfast cereal | | countertops, vanity tops, tabletops, sinkbowls, bath tubs, wall paneling, flooring, and furniture |
| COKE | Nonalcoholic, maltless beverages and the syrups for making such beverages | GLAD | Plastic bag holders |
| COREX | Thermosetting plastic in the nature of a paint converted by heat into an insoluble, unfusible film | GLAD LOCK | Plastic bags for packaging, such as food storage and freezer bags |
| CRAWLER | Children's play clothes, namely, overalls, shirts, rompers, and sunsuits | HACKY SACK | Footbags used in a kicking game; conducting kicking game tournaments and kicking game instructional clinics |
| CYCLONE | Seeders and planters | HI-LITER | Marking pens |
| DACRON | Yarns of synthetic fibers; synthetic polyester fibers for generalized use in the industrial arts | INTERNET | Communication services, namely providing electronic data transmission services in the electronic banking field and retail marketing field |
| DORITOS | Corn chips, potato chips, tortilla chips, pretzels, and nut meats | INTERNET | Carpeting installation information exchange and consulting services rendered by computer |
| FEDEX | Shipping containers in the nature of document envelopes, boxes and tubes; pick-up, transportation, storage, and delivery of documents, packages and freight by land and air | INTERNET TELEVISION | Distribution and production of broadcast and nonbroadcast television programs, videotaped programs and audio tapes |
| FIBERGLAS | Inorganic material in a fibrous condition or in the form of a loose mass of filaments or fibers | IRONCLAD | Storage-battery plates |
| FLEXWOOD | Fabric-backed wood veneer | JARLSBERG | Cheese |
| FLYING SAUCER | Toys, namely model airplanes and aerodynamic flying discs | JEEP | Automobiles and structural parts thereof |
| FOAMICIDE | Chemical composition for addition to foaming liquids present in bottle and container washing processes and in industrial chemistry processes, to prevent the formation of foam therein | JELL-O | A compound used in the preparation of (jellies) desserts (pastries and ice-cream); gelatin dessert |
| FOOTLETS | Anklets, knee-hi socks, hosiery, and footsocks | JELLO-LIGHT | Pudding |
| | | JET SKI | Boats, recreational watercraft, floor mats, clothing, paint for machinery, tarpaulins, used to hold down boat covers; straps, namely boat covers and boat towing lines, motor oil, duffle bags |

PARTIAL LIST OF TRADEMARKS

| <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> | <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> |
|------------------------|--|--------------------------|---|
| KARMELKORN | Popcorn candy, seasoned popcorn, cheese-covered popcorn, and popcorn balls each of which is made from popped popcorn; and also unpopped popcorn, candy, candied apple, nuts, and ice cream | MONOTYPE | Type casting and composing machines, including keyboards and casting-machines and repair parts and supplies therefor; paper ribbons or controllers for type casting and composing machines; photo typesetting machines utilizing cameras and laser beam, and structural parts thereof, typefaces, typefonts and type designs of alphanumeric characters and/or typographical symbols recorded as visible images in printer's type |
| KEVLAR | Man-made fibers for generalized use in the industrial arts | MUSIC BY MUZAK | Planned music service for transmitting specially programmed background music to stores, restaurants, homes, hotels, banks, railroads, airlines, boats, transportation terminals, factories and other industrial and commercial establishments throughout the U.S. |
| KITTY LITTER | Ground clay used for litters for small animals, i.e., cats, rats, mice, hamsters | MYLAR | Flexible film for packaging purposes; polyester film |
| KLEENEX | Absorbent tissue suitable for cleaning, hygienic, and cosmetic purposes, and paper towels | OILGEAR | Valves for use in and in connection with the hydraulic transmission of power |
| KOOSH | Tossing balls | ORLON | Synthetic fiber-forming polymers and copolymers of acrylic acid or its derivatives produced in the form of fibers for further use in the industrial arts |
| LIFE SAVERS | Chewing-gum, candy, sweetmeats, and confections | PAMPERS | Disposable diapers |
| LINOTYPE | Typesetting machines and parts thereof; accessories and equipment for use with typeset machines and systems - namely, line printers, video terminals, keyboards, tape perforators, tape readers, graphic scanners, optical character readers and computer programs | PARA-SAIL | Parachutes |
| LIQUID PAPER | Office supply products, namely correction fluid, error correction tapes | PERF-A-TAPE | Paper tape for sealing composition board joints |
| LISTSERV | Computer software for managing electronic mailing lists | PERMALLOY | Metal hardening agent sold as a component part of machine parts; namely, sheaves, drill steels, barrel rollers, and pins for mining machinery such as drag line conveyors and drills |
| LOAFERS | Ladies', men's, and boys' shoes made of leather, rubber, fabric, and various combinations of such materials | | |
| LUCITE | Enamel and paint | | |
| LYCRA | Synthetic fibers and filaments for generalized use in the industrial arts | | |
| MINI BAR | Small-sized pry bars | | |

MANUAL OF PATENT EXAMINING PROCEDURE

| <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> | <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> |
|-------------------------|--|----------------------------|---|
| PIZZA ROLLS | Pasta snacks, namely hamburger flavor pasta snacks, cheeseburger flavor pasta snacks, pepperoni and cheese flavor pasta snacks, sausage, and cheese flavor pasta snacks, and shrimp and cheese flavor pasta snacks | SNOOZ-ALARM | Electronic repeat alarm timer sold as a component of alarm clocks; clocks |
| POPSICLE | Frozen confections on sticks and liquid flavoring concentrates for making said confections | SPEED NUT | Nuts |
| POST-IT | Stationary notes containing adhesive on one side for attachment to surfaces | SPERRY TOP-SIDER | Boating coats, boating hats, boating suits, boating jackets, boating shirts and boating trousers, footwear |
| PYREX | Beakers, flasks, test tubes, etc.; glass | STELLITE | Metal alloys |
| QUICKEN | Computer software programs and user documentation supplied therewith | STELLITE | Rivet setting tools |
| Q-TIPS | Absorbent swabs and balls for toiletry, medical, and cosmetic uses; swabs consisting of small sticks of wood or paper having wads of cotton twisted about one or both ends, intended for use primarily as a cosmetic aid | SWOOSH | Footwear |
| RICE KRISPIES | Cereal breakfast food | TABASCO | Pepper sauce |
| RIPPLE | Wines | TALON | Thread |
| ROLLERBLADE | Boots equipped with longitudinally aligned rollers used for skating and skiing | TEFLON | Synthetic resinous fluorine-containing polymers in form of molding and extruding compositions, fabricated shapes—namely, sheets, [rods] tubes, tape and filaments [-solutions,] and emulsions; polytetrafluoroethylene coatings in the nature of paints and varnishes |
| ROQUEFORT | Cheese | TELEMARKETING INC. | Telephone marketing consulting services; conducting telephone sales campaigns for business clients |
| SANKA | Coffees and teas, coffee and tea extracts, both dry and liquid, and tea and coffee substitutes | TELETYPE | Printing-telegraph apparatus |
| SCOTCH | Masking tape, cellophane tape, acetate fiber tape and other pressure-sensitive adhesive tapes; liquid adhesive, adhesive sheet material, an adhesive coated sheet material in sheet or strip form; adhesive tape | TELEX | Equipment and apparatus for electronic treatment of sound—namely, sound recorders-reproducers, phonographs, tape decks, tape recorders, tape cartridge players, tape duplicators, tapes for sound recording and reproduction, combination tape recorders and radios, and combination phonographs-tape decks, and components and parts for all of said equipment |
| SNAP-ON | Sharpening stones, nail clipper; calibrated rulers, magnetic paper clips, magnetic tape holders, drill bit gauges, tape measurers; tools and machinery | THERMOS | Temperature-retaining vessels; double-walled glass vessels with vacuum between the walls |
| | | TOLL HOUSE | Prepared edible chocolate |

PARTIAL LIST OF TRADEMARKS

| <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> | <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> |
|------------------------|---|-----------------------|---|
| TOUCH-TONE | Musical instruments, mainly timpani and other drums, mallets for playing drums, and other percussion instruments and parts thereof | WISE-GRIP. | Hand tools and instruments, namely pliers and workholding clamps with or without a cutting edge, wrenches, wrenches with a wire cutter and welding clamps, and sheet metal bending tool |
| TRAV-O-LATER | Endless conveyors | VOTATOR. | Machinery for processing and handling materials in fluid, plastic, or particulate form including food products |
| TRIGGER | Indicating tripping fuses | WEATHER-OMETER. | Apparatus for testing the effect of weather upon the surface of objects |
| TROUT CHOW | Feed for fish | WEED EATER. | Machinery for edging and trimming vegetation; weed and grass cutting machinery for edging and trimming lawns |
| TWIST-LOCK. | Electrical wiring apparatus, namely electric flush receptacles, attachment plug, caps, cord-coupling, caps, couplings, connectors, motor couplings, attachment plugs, and motor plugs | WIFFLE | Simulated or auxiliary pliable plastic baseballs and a game played therewith |
| TYVEK | Fabrics of man-made fibers and filaments suitable for making into household furnishings and apparel and for industrial uses | WINDBREAKER | Men's, young men's, boys', women's, misses' and girl's apparel for sportswear, dress wear, work wear, and uniforms; namely jackets, vests, trousers, suits, shirts, blouses |
| VASELINE | Emollient and medicinal preparation for external and internal use; petroleum jelly, oil petrol, white mineral oil; moisturizing lotion and cream | WINDOWS | Cartridges containing software for operating or enhancing the operation of laser printers, which cartridges are to be inserted into the printers, and accompanying software for installation in computers which communicate with the printers; computer programs and manuals sold as a unit; namely graphical operating environment programs for microcomputers |
| VELCRO. | Notion - namely, a synthetic material sold in ribbon, sheet, or piece goods form, said material having complementary parts which adhere to each other when pressed together and adapted for use as a closure fastener, or button for closing garments, curtains, or the like; separable fasteners-namely, hook and loop-type fasteners and components thereof | WINDSURFER | Sailboats having a free sail system |
| VICTROLA. | Prerecorded audio cassettes; records for talking-machines | WITE-OUT | Typing and drawing correction fluid (erasing liquid) |
| VIDEOFILE | Document storage systems designed to automate the storage and retrieval of document images, and components thereof | | |
| VIENNA BEEF. | Tongue, corned beef, frankfurters, wieners, knockwurst, polish sausage, pastrami, salami, and bologna | | |

MANUAL OF PATENT EXAMINING PROCEDURE

| <i>Trademark</i> | <i>Particular goods on or in connection with which the trademark is used</i> |
|------------------|--|
| XEROX | Electrophotographic copying machines (and equipment for recording x-ray images - namely, processors for electrostatically charging xeroradiographic plates and conditioners for producing positive or negative prints) |
| ZIPLOC | Plastic bags |

MANUAL OF PATENT EXAMINING PROCEDURE

Appendix L Patent Laws

United States Code Title 35 - Patents

PART I — UNITED STATES PATENT AND TRADEMARK OFFICE

CHAPTER 1 — ESTABLISHMENT, OFFICERS AND EMPLOYEES, FUNCTIONS

Sec.

- 1 Establishment.
- 2 Powers and Duties.
- 3 Officers and employees.
- 4 Restrictions on officers and employees as to interest in patents.
- 5 Patent and Trademark Office Public Advisory Committees.
- 6 Board of Patent Appeals and Interferences.
- 7 Library.
- 8 Classification of patents.
- 9 Certified copies of records.
- 10 Publications.
- 11 Exchange of copies of patents and applications with foreign countries.
- 12 Copies of patents and applications for public libraries.
- 13 Annual report to Congress.

CHAPTER 2 — PROCEEDINGS IN THE PATENT AND TRADEMARK OFFICE

- 21 Filing date and day for taking action.
- 22 Printing of papers filed.
- 23 Testimony in Patent and Trademark Office cases.
- 24 Subpoenas, witnesses.
- 25 Declaration in lieu of oath.
- 26 Effect of defective execution.

CHAPTER 3 — PRACTICE BEFORE PATENT AND TRADEMARK OFFICE

- 31 [Repealed].
- 32 Suspension or exclusion from practice.
- 33 Unauthorized representation as practitioner.

CHAPTER 4 — PATENT FEES; FUNDING; SEARCH SYSTEMS

- 41 Patent fees; patent and trademark search systems.
- 42 Patent and Trademark Office funding.

PART II — PATENTABILITY OF INVENTIONS AND GRANT OF PATENTS

CHAPTER 10 — PATENTABILITY OF INVENTIONS

- 100 Definitions.
- 101 Inventions patentable.
- 102 Conditions for patentability; novelty and loss of right to patent.
- 103 Conditions for patentability; non-obvious subject matter.
- 104 Invention made abroad.
- 105 Inventions in outer space.

CHAPTER 11 — APPLICATION FOR PATENT

- 111 Application.
- 112 Specification.
- 113 Drawings.
- 114 Models, specimens.
- 115 Oath of applicant.
- 116 Inventors.
- 117 Death or incapacity of inventor.
- 118 Filing by other than inventor.
- 119 Benefit of earlier filing date; right of priority.
- 120 Benefit of earlier filing date in the United States.
- 121 Divisional applications.
- 122 Confidential status of applications; publication of patent applications.

CHAPTER 12 — EXAMINATION OF APPLICATION

- 131 Examination of application.
- 132 Notice of rejection; reexamination.
- 133 Time for prosecuting application.
- 134 Appeal to the Board of Patent Appeals and Interferences.
- 135 Interferences.

CHAPTER 13 — REVIEW OF PATENT AND TRADEMARK OFFICE DECISION

- 141 Appeal to Court of Appeals for the Federal Circuit.
- 142 Notice of appeal.
- 143 Proceedings on appeal.
- 144 Decision on appeal.
- 145 Civil action to obtain patent.
- 146 Civil action in case of interference.

MANUAL OF PATENT EXAMINING PROCEDURE

CHAPTER 14 — ISSUE OF PATENT

- 151 Issue of patent.
- 152 Issue of patent to assignee.
- 153 How issued.
- 154 Contents and term of patent; provisional rights.
- 155 Patent term extension.
- 155A Patent term restoration.
- 156 Extension of patent term.
- 157 Statutory invention registration.

CHAPTER 15 — PLANT PATENTS

- 161 Patents for plants.
- 162 Description, claim.
- 163 Grant.
- 164 Assistance of the Department of Agriculture.

CHAPTER 16 — DESIGNS

- 171 Patents for designs.
- 172 Right of priority.
- 173 Term of design patent.

CHAPTER 17 — SECRECY OF CERTAIN INVENTIONS AND FILING APPLICATIONS IN FOREIGN COUNTRIES

- 181 Secrecy of certain inventions and withholding of patent.
- 182 Abandonment of invention for unauthorized disclosure.
- 183 Right to compensation.
- 184 Filing of application in foreign country.
- 185 Patent barred for filing without license.
- 186 Penalty.
- 187 Nonapplicability to certain persons.
- 188 Rules and regulations, delegation of power.

CHAPTER 18 — PATENT RIGHTS IN INVENTIONS MADE WITH FEDERAL ASSISTANCE

- 200 Policy and objective.

- 201 Definitions.
- 202 Disposition of rights.
- 203 March-in rights.
- 204 Preference for United States industry.
- 205 Confidentiality.
- 206 Uniform clauses and regulations.
- 207 Domestic and foreign protection of federally owned inventions.
- 208 Regulations governing Federal licensing.
- 209 Licensing federally owned inventions.
- 210 Precedence of chapter.
- 211 Relationship to antitrust laws.
- 212 Disposition of rights in educational awards.

PART III — PATENTS AND PROTECTION OF PATENT RIGHTS

CHAPTER 25 — AMENDMENT AND CORRECTION OF PATENTS

- 251 Reissue of defective patents.
- 252 Effect of reissue.
- 253 Disclaimer.
- 254 Certificate of correction of Patent and Trademark Office mistake.
- 255 Certificate of correction of applicant's mistake.
- 256 Correction of named inventor.

CHAPTER 26 — OWNERSHIP AND ASSIGNMENT

- 261 Ownership; assignment.
- 262 Joint owners.

CHAPTER 27 — GOVERNMENT INTERESTS IN PATENTS

- 266 [Repealed.]
- 267 Time for taking action in Government applications.

CHAPTER 28 — INFRINGEMENT OF PATENTS

- 271 Infringement of patent.
- 272 Temporary presence in the United States.
- 273 Defense to infringement based on earlier inventor.

PATENT LAWS

CHAPTER 29 — REMEDIES FOR
INFRINGEMENT OF PATENT, AND
OTHER ACTIONS

- 281 Remedy for infringement of patent.
- 282 Presumption of validity; defenses.
- 283 Injunction.
- 284 Damages.
- 285 Attorney fees.
- 286 Time limitation on damages.
- 287 Limitation on damages and other remedies; marking and notice.
- 288 Action for infringement of a patent containing an invalid claim.
- 289 Additional remedy for infringement of design patent.
- 290 Notice of patent suits.
- 291 Interfering patents.
- 292 False marking.
- 293 Nonresident patentee; service and notice.
- 294 Voluntary arbitration.
- 295 Presumptions: Product made by patented process.
- 296 Liability of States, instrumentalities of States, and State officials for infringement of patents.
- 297 Improper and deceptive invention promotion.

CHAPTER 30 — PRIOR ART CITATIONS TO
OFFICE AND EX PARTE REEXAMINATION
OF PATENTS

- 301 Citation of prior art.
- 302 Request for reexamination.
- 303 Determination of issue by Director.
- 304 Reexamination order by Director.
- 305 Conduct of reexamination proceedings.
- 306 Appeal.
- 307 Certificate of patentability, unpatentability, and claim cancellation.

CHAPTER 31 — OPTIONAL INTER PARTES
REEXAMINATION PROCEDURES

- 311 Request for inter partes reexamination.
- 312 Determination of issue by Director.
- 313 Inter partes reexamination order by Director.
- 314 Conduct of inter partes reexamination proceedings.
- 315 Appeal.
- 316 Certificate of patentability, unpatentability, and claim cancellation.

- 317 Inter partes reexamination prohibited.
- 318 Stay of litigation.

PART IV — PATENT
COOPERATION TREATY

CHAPTER 35 — DEFINITIONS

- 351 Definitions.

CHAPTER 36 — INTERNATIONAL STAGE

- 361 Receiving Office.
- 362 International Searching Authority and International Preliminary Examining Authority.
- 363 International application designating the United States: Effect.
- 364 International stage: Procedure.
- 365 Right of priority; benefit of the filing date of a prior application.
- 366 Withdrawn international application.
- 367 Actions of other authorities: Review.
- 368 Secrecy of certain inventions; filing international applications in foreign countries.

CHAPTER 37 — NATIONAL STAGE

- 371 National stage: Commencement.
- 372 National stage: Requirements and procedure.
- 373 Improper applicant.
- 374 Publication of international application.
- 375 Patent issued on international application: Effect.
- 376 Fees.

PART I — UNITED STATES PATENT
AND TRADEMARK OFFICE

CHAPTER 1 — ESTABLISHMENT,
OFFICERS AND EMPLOYEES, FUNCTIONS

- Sec.
- 1 Establishment.
- 2 Powers and duties.
- 3 Officers and employees.
- 4 Restrictions on officers and employees as to interest in patents.
- 5 Patent and Trademark Office Public Advisory Committees.

- 6 Board of Patent and Appeals and Interferences.
- 7 Library.
- 8 Classification of patents.
- 9 Certified copies of records.
- 10 Publications.
- 11 Exchange of copies of patents and applications with foreign countries.
- 12 Copies of patents and applications for public libraries.
- 13 Annual report to Congress.

35 U.S.C. 1 Establishment.

(a) ESTABLISHMENT.— The United States Patent and Trademark Office is established as an agency of the United States, within the Department of Commerce. In carrying out its functions, the United States Patent and Trademark Office shall be subject to the policy direction of the Secretary of Commerce, but otherwise shall retain responsibility for decisions regarding the management and administration of its operations and shall exercise independent control of its budget allocations and expenditures, personnel decisions and processes, procurements, and other administrative and management functions in accordance with this title and applicable provisions of law. Those operations designed to grant and issue patents and those operations which are designed to facilitate the registration of trademarks shall be treated as separate operating units within the Office.

(b) OFFICES.— The United States Patent and Trademark Office shall maintain its principal office in the metropolitan Washington, D.C., area, for the service of process and papers and for the purpose of carrying out its functions. The United States Patent and Trademark Office shall be deemed, for purposes of venue in civil actions, to be a resident of the district in which its principal office is located, except where jurisdiction is otherwise provided by law. The United States Patent and Trademark Office may establish satellite offices in such other places in the United States as it considers necessary and appropriate in the conduct of its business.

(c) REFERENCE.— For purposes of this title, the United States Patent and Trademark Office shall also be referred to as the “Office” and the “Patent and Trademark Office”.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-572 (S. 1948 sec. 4711).)

35 U.S.C. 2 Powers and duties.

(a) IN GENERAL.— The United States Patent and Trademark Office, subject to the policy direction of the Secretary of Commerce—

(1) shall be responsible for the granting and issuing of patents and the registration of trademarks; and

(2) shall be responsible for disseminating to the public information with respect to patents and trademarks.

(b) SPECIFIC POWERS.— The Office—

(1) shall adopt and use a seal of the Office, which shall be judicially noticed and with which letters patent, certificates of trademark registrations, and papers issued by the Office shall be authenticated;

(2) may establish regulations, not inconsistent with law, which—

(A) shall govern the conduct of proceedings in the Office;

(B) shall be made in accordance with section 553 of title 5;

(C) shall facilitate and expedite the processing of patent applications, particularly those which can be filed, stored, processed, searched, and retrieved electronically, subject to the provisions of section 122 relating to the confidential status of applications;

(D) may govern the recognition and conduct of agents, attorneys, or other persons representing applicants or other parties before the Office, and may require them, before being recognized as representatives of applicants or other persons, to show that they are of good moral character and reputation and are possessed of the necessary qualifications to render to applicants or other persons valuable service, advice, and assistance in the presentation or prosecution of their applications or other business before the Office;

(E) shall recognize the public interest in continuing to safeguard broad access to the United States patent system through the reduced fee structure for small entities under section 41(h)(1) of this title; and

(F) provide for the development of a performance-based process that includes quantitative and qualitative measures and standards for evaluating cost-effectiveness and is consistent with the principles of impartiality and competitiveness;

(3) may acquire, construct, purchase, lease, hold, manage, operate, improve, alter, and renovate any real, personal, or mixed property, or any interest therein, as it considers necessary to carry out its functions;

(4)(A) may make such purchases, contracts for the construction, or management and operation of facilities, and contracts for supplies or services, without regard to the provisions of subtitle I and chapter 33 of title 40, title III of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 251 et seq.), and the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11301 et seq.);

(B) may enter into and perform such purchases and contracts for printing services, including the process of composition, platemaking, presswork, silk screen processes, binding, microform, and the products of such processes, as it considers necessary to carry out the functions of the Office, without regard to sections 501 through 517 and 1101 through 1123 of title 44;

(5) may use, with their consent, services, equipment, personnel, and facilities of other departments, agencies, and instrumentalities of the Federal Government, on a reimbursable basis, and cooperate with such other departments, agencies, and instrumentalities in the establishment and use of services, equipment, and facilities of the Office;

(6) may, when the Director determines that it is practicable, efficient, and cost-effective to do so, use, with the consent of the United States and the agency, instrumentality, Patent and Trademark Office, or international organization concerned, the services, records, facilities, or personnel of any State or local government agency or instrumentality or foreign patent and trademark office or international organization to perform functions on its behalf;

(7) may retain and use all of its revenues and receipts, including revenues from the sale, lease, or disposal of any real, personal, or mixed property, or any interest therein, of the Office;

(8) shall advise the President, through the Secretary of Commerce, on national and certain international intellectual property policy issues;

(9) shall advise Federal departments and agencies on matters of intellectual property policy in the United States and intellectual property protection in other countries;

(10) shall provide guidance, as appropriate, with respect to proposals by agencies to assist foreign governments and international intergovernmental organizations on matters of intellectual property protection;

(11) may conduct programs, studies, or exchanges of items or services regarding domestic and international intellectual property law and the effectiveness of intellectual property protection domestically and throughout the world;

(12)(A) shall advise the Secretary of Commerce on programs and studies relating to intellectual property policy that are conducted, or authorized to be conducted, cooperatively with foreign intellectual property offices and international intergovernmental organizations; and

(B) may conduct programs and studies described in subparagraph (A); and

(13)(A) in coordination with the Department of State, may conduct programs and studies cooperatively with foreign intellectual property offices and international intergovernmental organizations; and

(B) with the concurrence of the Secretary of State, may authorize the transfer of not to exceed \$100,000 in any year to the Department of State for the purpose of making special payments to international intergovernmental organizations for studies and programs for advancing international cooperation concerning patents, trademarks, and other matters.

(c) CLARIFICATION OF SPECIFIC POWERS.—

(1) The special payments under subsection (b)(13)(B) shall be in addition to any other payments or contributions to international organizations described in subsection (b)(13)(B) and shall not be subject to any limitations imposed by law on the amounts of such other payments or contributions by the United States Government.

(2) Nothing in subsection (b) shall derogate from the duties of the Secretary of State or from the duties of the United States Trade Representative as set forth in section 141 of the Trade Act of 1974 (19 U.S.C. 2171).

(3) Nothing in subsection (b) shall derogate from the duties and functions of the Register of Copyrights or otherwise alter current authorities relating to copyright matters.

(4) In exercising the Director's powers under paragraphs (3) and (4)(A) of subsection (b), the Director shall consult with the Administrator of General Services.

(5) In exercising the Director's powers and duties under this section, the Director shall consult with the Register of Copyrights on all copyright and related matters.

(d) CONSTRUCTION.— Nothing in this section shall be construed to nullify, void, cancel, or interrupt any pending request-for-proposal let or contract issued by the General Services Administration for the specific purpose of relocating or leasing space to the United States Patent and Trademark Office.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-572 (S. 1948 sec. 4712); subsection (b)(4)(A) amended Oct. 30, 2000, Public Law 106-400, sec. 2, 114 Stat. 1675; subsections (b)(2)(B) and (b)(4)(B) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904; subsection (b)(4)(A) amended Dec. 15, 2003, Public Law 108-178, sec. 4(g), 117 Stat. 2641.)

35 U.S.C. 3 Officers and employees.

(a) UNDER SECRETARY AND DIRECTOR.—

(1) IN GENERAL.— The powers and duties of the United States Patent and Trademark Office shall be vested in an Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office (in this title referred to as the "Director"), who shall be a citizen of the United States and who shall be appointed by the President, by and with the advice and consent of the Senate. The Director shall be a person who has a professional background and experience in patent or trademark law.

(2) DUTIES.—

(A) IN GENERAL.— The Director shall be responsible for providing policy direction and

management supervision for the Office and for the issuance of patents and the registration of trademarks. The Director shall perform these duties in a fair, impartial, and equitable manner.

(B) CONSULTING WITH THE PUBLIC ADVISORY COMMITTEES.— The Director shall consult with the Patent Public Advisory Committee established in section 5 on a regular basis on matters relating to the patent operations of the Office, shall consult with the Trademark Public Advisory Committee established in section 5 on a regular basis on matters relating to the trademark operations of the Office, and shall consult with the respective Public Advisory Committee before submitting budgetary proposals to the Office of Management and Budget or changing or proposing to change patent or trademark user fees or patent or trademark regulations which are subject to the requirement to provide notice and opportunity for public comment under section 553 of title 5, as the case may be.

(3) OATH.— The Director shall, before taking office, take an oath to discharge faithfully the duties of the Office.

(4) REMOVAL.— The Director may be removed from office by the President. The President shall provide notification of any such removal to both Houses of Congress.

(b) OFFICERS AND EMPLOYEES OF THE OFFICE.—

(1) DEPUTY UNDER SECRETARY AND DEPUTY DIRECTOR.— The Secretary of Commerce, upon nomination by the Director, shall appoint a Deputy Under Secretary of Commerce for Intellectual Property and Deputy Director of the United States Patent and Trademark Office who shall be vested with the authority to act in the capacity of the Director in the event of the absence or incapacity of the Director. The Deputy Director shall be a citizen of the United States who has a professional background and experience in patent or trademark law.

(2) COMMISSIONERS.—

(A) APPOINTMENT AND DUTIES.— The Secretary of Commerce shall appoint a Commissioner for Patents and a Commissioner for Trademarks, without regard to chapter 33, 51, or 53 of title 5. The Commissioner for Patents shall be a citizen of the United States with demonstrated management ability and professional background and experience in

patent law and serve for a term of 5 years. The Commissioner for Trademarks shall be a citizen of the United States with demonstrated management ability and professional background and experience in trademark law and serve for a term of 5 years. The Commissioner for Patents and the Commissioner for Trademarks shall serve as the chief operating officers for the operations of the Office relating to patents and trademarks, respectively, and shall be responsible for the management and direction of all aspects of the activities of the Office that affect the administration of patent and trademark operations, respectively. The Secretary may reappoint a Commissioner to subsequent terms of 5 years as long as the performance of the Commissioner as set forth in the performance agreement in subparagraph (B) is satisfactory.

(B) SALARY AND PERFORMANCE AGREEMENT.— The Commissioners shall be paid an annual rate of basic pay not to exceed the maximum rate of basic pay for the Senior Executive Service established under section 5382 of title 5, including any applicable locality-based comparability payment that may be authorized under section 5304(h)(2)(C) of title 5. The compensation of the Commissioners shall be considered, for purposes of section 207(c)(2)(A) of title 18, to be the equivalent of that described under clause (ii) of section 207(c)(2)(A) of title 18. In addition, the Commissioners may receive a bonus in an amount of up to, but not in excess of, 50 percent of the Commissioners' annual rate of basic pay, based upon an evaluation by the Secretary of Commerce, acting through the Director, of the Commissioners' performance as defined in an annual performance agreement between the Commissioners and the Secretary. The annual performance agreements shall incorporate measurable organization and individual goals in key operational areas as delineated in an annual performance plan agreed to by the Commissioners and the Secretary. Payment of a bonus under this subparagraph may be made to the Commissioners only to the extent that such payment does not cause the Commissioners' total aggregate compensation in a calendar year to equal or exceed the amount of the salary of the Vice President under section 104 of title 3.

(C) REMOVAL.— The Commissioners may be removed from office by the Secretary for misconduct or nonsatisfactory performance under the per-

formance agreement described in subparagraph (B), without regard to the provisions of title 5. The Secretary shall provide notification of any such removal to both Houses of Congress.

(3) OTHER OFFICERS AND EMPLOYEES.— The Director shall—

(A) appoint such officers, employees (including attorneys), and agents of the Office as the Director considers necessary to carry out the functions of the Office; and

(B) define the title, authority, and duties of such officers and employees and delegate to them such of the powers vested in the Office as the Director may determine.

The Office shall not be subject to any administratively or statutorily imposed limitation on positions or personnel, and no positions or personnel of the Office shall be taken into account for purposes of applying any such limitation

(4) TRAINING OF EXAMINERS.— The Office shall submit to the Congress a proposal to provide an incentive program to retain as employees patent and trademark examiners of the primary examiner grade or higher who are eligible for retirement, for the sole purpose of training patent and trademark examiners.

(5) NATIONAL SECURITY POSITIONS.— The Director, in consultation with the Director of the Office of Personnel Management, shall maintain a program for identifying national security positions and providing for appropriate security clearances, in order to maintain the secrecy of certain inventions, as described in section 181, and to prevent disclosure of sensitive and strategic information in the interest of national security.

(c) CONTINUED APPLICABILITY OF TITLE 5. — Officers and employees of the Office shall be subject to the provisions of title 5, relating to Federal employees.

(d) ADOPTION OF EXISTING LABOR AGREEMENTS.— The Office shall adopt all labor agreements which are in effect, as of the day before the effective date of the Patent and Trademark Office Efficiency Act, with respect to such Office (as then in effect).

(e) CARRYOVER OF PERSONNEL.—

(1) FROM PTO.— Effective as of the effective date of the Patent and Trademark Office Effi-

ciency Act, all officers and employees of the Patent and Trademark Office on the day before such effective date shall become officers and employees of the Office, without a break in service.

(2) **OTHER PERSONNEL.**— Any individual who, on the day before the effective date of the Patent and Trademark Office Efficiency Act, is an officer or employee of the Department of Commerce (other than an officer or employee under paragraph (1)) shall be transferred to the Office, as necessary to carry out the purposes of this Act, if—

(A) such individual serves in a position for which a major function is the performance of work reimbursed by the Patent and Trademark Office, as determined by the Secretary of Commerce;

(B) such individual serves in a position that performed work in support of the Patent and Trademark Office during at least half of the incumbent's work time, as determined by the Secretary of Commerce; or

(C) such transfer would be in the interest of the Office, as determined by the Secretary of Commerce in consultation with the Director.

Any transfer under this paragraph shall be effective as of the same effective date as referred to in paragraph (1), and shall be made without a break in service.

(f) **TRANSITION PROVISIONS.**—

(1) **INTERIM APPOINTMENT OF DIRECTOR.**— On or after the effective date of the Patent and Trademark Office Efficiency Act, the President shall appoint an individual to serve as the Director until the date on which a Director qualifies under subsection (a). The President shall not make more than one such appointment under this subsection.

(2) **CONTINUATION IN OFFICE OF CERTAIN OFFICERS.**—

(A) The individual serving as the Assistant Commissioner for Patents on the day before the effective date of the Patent and Trademark Office Efficiency Act may serve as the Commissioner for Patents until the date on which a Commissioner for Patents is appointed under subsection (b).

(B) The individual serving as the Assistant Commissioner for Trademarks on the day before the effective date of the Patent and Trademark Office Efficiency Act may serve as the Commissioner for

Trademarks until the date on which a Commissioner for Trademarks is appointed under subsection (b).

(Amended Sept. 6, 1958, Public Law 85-933, sec. 1, 72 Stat. 1793; Sept. 23, 1959, Public Law 86-370, sec. 1(a), 73 Stat. 650; Aug. 14, 1964, Public Law 88-426, sec. 305(26), 78 Stat. 425; Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Jan. 2, 1975, Public Law 93-601, sec. 1, 88 Stat. 1956; Aug. 27, 1982, Public Law 97-247, sec. 4, 96 Stat. 319; Oct. 25, 1982, Public Law 97-366, sec. 4, 96 Stat. 1760; Nov. 8, 1984, Public Law 98-622, sec. 405, 98 Stat. 3392; Oct. 28, 1998, Public Law 105-304, sec. 401(a)(1), 112 Stat. 2887; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-575 (S. 1948 sec. 4713); subsections (a)(2)(B), (b)(2), and (c) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904.)

35 U.S.C. 4 Restrictions on officers and employees as to interest in patents.

Officers and employees of the Patent and Trademark Office shall be incapable, during the period of their appointments and for one year thereafter, of applying for a patent and of acquiring, directly or indirectly, except by inheritance or bequest, any patent or any right or interest in any patent, issued or to be issued by the Office. In patents applied for thereafter they shall not be entitled to any priority date earlier than one year after the termination of their appointment.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 5 Patent and Trademark Office Public Advisory Committees.

(a) **ESTABLISHMENT OF PUBLIC ADVISORY COMMITTEES.**—

(1) **APPOINTMENT.**— The United States Patent and Trademark Office shall have a Patent Public Advisory Committee and a Trademark Public Advisory Committee, each of which shall have nine voting members who shall be appointed by the Secretary of Commerce and serve at the pleasure of the Secretary of Commerce. Members of each Public Advisory Committee shall be appointed for a term of 3 years, except that of the members first appointed, three shall be appointed for a term of 1 year, and three shall be appointed for a term of 2 years. In making appointments to each Committee, the Secretary of Commerce shall consider the risk of loss of competitive advantage in international commerce or other

harm to United States companies as a result of such appointments.

(2) CHAIR.— The Secretary shall designate a chair of each Advisory Committee, whose term as chair shall be for 3 years.

(3) TIMING OF APPOINTMENTS.— Initial appointments to each Advisory Committee shall be made within 3 months after the effective date of the Patent and Trademark Office Efficiency Act. Vacancies shall be filled within 3 months after they occur.

(b) BASIS FOR APPOINTMENTS.— Members of each Advisory Committee—

(1) shall be citizens of the United States who shall be chosen so as to represent the interests of diverse users of the United States Patent and Trademark Office with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to trademarks, in the case of the Trademark Public Advisory Committee;

(2) shall include members who represent small and large entity applicants located in the United States in proportion to the number of applications filed by such applicants, but in no case shall members who represent small entity patent applicants, including small business concerns, independent inventors, and nonprofit organizations, constitute less than 25 percent of the members of the Patent Public Advisory Committee, and such members shall include at least one independent inventor; and

(3) shall include individuals with substantial background and achievement in finance, management, labor relations, science, technology, and office automation. In addition to the voting members, each Advisory Committee shall include a representative of each labor organization recognized by the United States Patent and Trademark Office. Such representatives shall be nonvoting members of the Advisory Committee to which they are appointed.

(c) MEETINGS.— Each Advisory Committee shall meet at the call of the chair to consider an agenda set by the chair.

(d) DUTIES.— Each Advisory Committee shall—

(1) review the policies, goals, performance, budget, and user fees of the United States Patent and Trademark Office with respect to patents, in the case of the Patent Public Advisory Committee, and with respect to Trademarks, in the case of the Trademark

Public Advisory Committee, and advise the Director on these matters;

(2) within 60 days after the end of each fiscal year—

(A) prepare an annual report on the matters referred to in paragraph (1);

(B) transmit the report to the Secretary of Commerce, the President, and the Committees on the Judiciary of the Senate and the House of Representatives; and

(C) publish the report in the Official Gazette of the United States Patent and Trademark Office.

(e) COMPENSATION.— Each member of each Advisory Committee shall be compensated for each day (including travel time) during which such member is attending meetings or conferences of that Advisory Committee or otherwise engaged in the business of that Advisory Committee, at the rate which is the daily equivalent of the annual rate of basic pay in effect for level III of the Executive Schedule under section 5314 of title 5. While away from such member's home or regular place of business such member shall be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5.

(f) ACCESS TO INFORMATION.— Members of each Advisory Committee shall be provided access to records and information in the United States Patent and Trademark Office, except for personnel or other privileged information and information concerning patent applications required to be kept in confidence by section 122.

(g) APPLICABILITY OF CERTAIN ETHICS LAWS.— Members of each Advisory Committee shall be special Government employees within the meaning of section 202 of title 18.

(h) INAPPLICABILITY OF FEDERAL ADVISORY COMMITTEE ACT.— The Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to each Advisory Committee.

(i) OPEN MEETINGS.— The meetings of each Advisory Committee shall be open to the public, except that each Advisory Committee may by majority vote meet in executive session when considering personnel, privileged, or other confidential information.

(j) **INAPPLICABILITY OF PATENT PROHIBITION.**— Section 4 shall not apply to voting members of the Advisory Committees.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-578 (S. 1948 sec. 4714); subsections (e) and (g) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904; subsection (i) amended and subsection (j) added Nov. 2, 2002, Public Law 107-273, sec. 13203, 116 Stat. 1902.)

35 U.S.C. 6 Board of Patent Appeals and Interferences.

(a) **ESTABLISHMENT AND COMPOSITION.**— There shall be in the United States Patent and Trademark Office a Board of Patent Appeals and Interferences. The Director, the Deputy Commissioner, the Commissioner for Patents, the Commissioner for Trademarks, and the administrative patent judges shall constitute the Board. The administrative patent judges shall be persons of competent legal knowledge and scientific ability who are appointed by the Director.

(b) **DUTIES.**— The Board of Patent Appeals and Interferences shall, on written appeal of an applicant, review adverse decisions of examiners upon applications for patents and shall determine priority and patentability of invention in interferences declared under section 135(a). Each appeal and interference shall be heard by at least three members of the Board, who shall be designated by the Director. Only the Board of Patent Appeals and Interferences may grant rehearings.

(Repealed by Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4715(a)).

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(2)).)

(Subsection (a) amended Nov. 2, 2002, Public Law 107-273, sec. 13203, 116 Stat. 1902.)

35 U.S.C. 7 Library.

The Director shall maintain a library of scientific and other works and periodicals, both foreign and domestic, in the Patent and Trademark Office to aid the officers in the discharge of their duties.

(Repealed Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 8 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S.

1948 sec. 4717(1)); amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 8 Classification of patents.

The Director may revise and maintain the classification by subject matter of United States letters patent, and such other patents and printed publications as may be necessary or practicable, for the purpose of determining with readiness and accuracy the novelty of inventions for which applications for patent are filed.

(Transferred to 35 U.S.C. 7 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 9 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 9 Certified copies of records.

The Director may furnish certified copies of specifications and drawings of patents issued by the Patent and Trademark Office, and of other records available either to the public or to the person applying therefor.

(Transferred to 35 U.S.C. 8 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 10 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)); amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 10 Publications.

(a) The Director may publish in printed, type-written, or electronic form, the following:

(1) Patents and published applications for patents, including specifications and drawings, together with copies of the same. The Patent and Trademark Office may print the headings of the drawings for patents for the purpose of photolithography.

(2) Certificates of trademark registrations, including statements and drawings, together with copies of the same.

(3) The Official Gazette of the United States Patent and Trademark Office.

(4) Annual indexes of patents and patentees, and of trademarks and registrants.

(5) Annual volumes of decisions in patent and trademark cases.

(6) Pamphlet copies of the patent laws and rules of practice, laws and rules relating to trademarks, and circulars or other publications relating to the business of the Office.

(b) The Director may exchange any of the publications specified in items 3, 4, 5, and 6 of subsection (a) of this section for publications desirable for the use of the Patent and Trademark Office.

(Transferred to 35 U.S.C. 9 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 11 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)); amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-589 (S. 1948 sec. 4804(b)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 582 (S. 1948 secs. 4507(1) and 4732(a)(10)(A)).)

35 U.S.C. 11 Exchange of copies of patents and applications with foreign countries.

The Director may exchange copies of specifications and drawings of United States patents and published applications for patents for those of foreign countries.

The Director shall not enter into an agreement to provide such copies of specifications and drawings of United States patents and applications to a foreign country, other than a NAFTA country or a WTO member country, without the express authorization of the Secretary of Commerce. For purposes of this section, the terms “NAFTA country” and “WTO member country” have the meanings given those terms in section 104(b).

(Transferred to 35 U.S.C. 10 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 12 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)); amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-591 (S. 1948 sec. 4808).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 582 (S. 1948 secs. 4507(2)(A), 4507(2)(B), and 4732(a)(10)(A)).)

35 U.S.C. 12 Copies of patents and applications for public libraries.

The Director may supply copies of specifications and drawings of patents and published applications for patents in printed or electronic form to public libraries in the United States which shall maintain such copies for the use of the public, at the rate for each year’s issue established for this purpose in section 41(d) of this title.

(Transferred to 35 U.S.C. 11 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 13 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)); amended Aug. 27, 1982, Public Law 97-247, sec. 15, 96 Stat. 321; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-589 (S. 1948 sec. 4804(c)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 566, 582 (S. 1948 secs. 4507(3)(A), 4507(3)(B), 4507(4), and 4732(a)(10)(A)).)

35 U.S.C. 13 Annual report to Congress.

The Director shall report to the Congress, not later than 180 days after the end of each fiscal year, the moneys received and expended by the Office, the purposes for which the moneys were spent, the quality and quantity of the work of the Office, the nature of training provided to examiners, the evaluation of the Commissioner of Patents and the Commissioner of Trademarks by the Secretary of Commerce, the compensation of the Commissioners, and other information relating to the Office.

(Transferred to 35 U.S.C. 12 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Transferred from 35 U.S.C. 14 Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4717(1)).)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565, 581 (S. 1948 secs. 4507(2), 4718).)

CHAPTER 2 — PROCEEDINGS IN THE PATENT AND TRADEMARK OFFICE

Sec.

- 21 Filing date and day for taking action.
- 22 Printing of papers filed.
- 23 Testimony in Patent and Trademark Office cases.
- 24 Subpoenas, witnesses.
- 25 Declaration in lieu of oath.
- 26 Effect of defective execution.

35 U.S.C. 21 Filing date and day for taking action.

(a) The Director may by rule prescribe that any paper or fee required to be filed in the Patent and Trademark Office will be considered filed in the Office on the date on which it was deposited with the United States Postal Service or would have been deposited with the United States Postal Service but for postal service interruptions or emergencies designated by the Director.

(b) When the day, or the last day, for taking any action or paying any fee in the United States Patent and Trademark Office falls on Saturday, Sunday, or a Federal holiday within the District of Columbia, the action may be taken, or fee paid, on the next succeeding secular or business day.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Aug. 27, 1982, Public Law 97-247, sec. 12, 96 Stat. 321; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 22 Printing of papers filed.

The Director may require papers filed in the Patent and Trademark Office to be printed, typewritten, or on an electronic medium.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582, 589 (S. 1948 secs. 4732(a)(10)(A), 4804(a)).)

35 U.S.C. 23 Testimony in Patent and Trademark Office cases.

The Director may establish rules for taking affidavits and depositions required in cases in the Patent

and Trademark Office. Any officer authorized by law to take depositions to be used in the courts of the United States, or of the State where he resides, may take such affidavits and depositions.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 24 Subpoenas, witnesses.

The clerk of any United States court for the district wherein testimony is to be taken for use in any contested case in the Patent and Trademark Office, shall, upon the application of any party thereto, issue a subpoena for any witness residing or being within such district, commanding him to appear and testify before an officer in such district authorized to take depositions and affidavits, at the time and place stated in the subpoena. The provisions of the Federal Rules of Civil Procedure relating to the attendance of witnesses and to the production of documents and things shall apply to contested cases in the Patent and Trademark Office.

Every witness subpoenaed and in attendance shall be allowed the fees and traveling expenses allowed to witnesses attending the United States district courts.

A judge of a court whose clerk issued a subpoena may enforce obedience to the process or punish disobedience as in other like cases, on proof that a witness, served with such subpoena, neglected or refused to appear or to testify. No witness shall be deemed guilty of contempt for disobeying such subpoena unless his fees and traveling expenses in going to, and returning from, and one day's attendance at the place of examination, are paid or tendered him at the time of the service of the subpoena; nor for refusing to disclose any secret matter except upon appropriate order of the court which issued the subpoena.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 25 Declaration in lieu of oath.

(a) The Director may by rule prescribe that any document to be filed in the Patent and Trademark Office and which is required by any law, rule, or other regulation to be under oath may be subscribed to by a written declaration in such form as the Director may prescribe, such declaration to be in lieu of the oath otherwise required.

(b) Whenever such written declaration is used, the document must warn the declarant that willful false statements and the like are punishable by fine or imprisonment, or both (18 U.S.C. 1001).

(Added Mar. 26, 1964, Public Law 88-292, sec. 1, 78 Stat. 171; amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 26 Effect of defective execution.

Any document to be filed in the Patent and Trademark Office and which is required by any law, rule, or other regulation to be executed in a specified manner may be provisionally accepted by the Director despite a defective execution, provided a properly executed document is submitted within such time as may be prescribed.

(Added Mar. 26, 1964, Public Law 88-292, sec. 1, 78 Stat. 171; amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 3 — PRACTICE BEFORE PATENT AND TRADEMARK OFFICE

Sec.

31 [Repealed]

32 Suspension or exclusion from practice.

33 Unauthorized representation as practitioner.

35 U.S.C. 31 [Repealed].

(Repealed Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580 (S. 1948 sec. 4715(b)).)

35 U.S.C. 32 Suspension or exclusion from practice.

The Director may, after notice and opportunity for a hearing, suspend or exclude, either generally or in any particular case, from further practice before the Patent and Trademark Office, any person, agent, or attorney shown to be incompetent or disreputable, or guilty of gross misconduct, or who does not comply with the regulations established under section 2(b)(2)(D) of this title, or who shall, by word, circular, letter, or advertising, with intent to defraud in any manner, deceive, mislead, or threaten any applicant or prospective applicant, or other person having immediate or prospective business before the Office. The reasons

for any such suspension or exclusion shall be duly recorded. The Director shall have the discretion to designate any attorney who is an officer or employee of the United States Patent and Trademark Office to conduct the hearing required by this section. The United States District Court for the District of Columbia, under such conditions and upon such proceedings as it by its rules determines, may review the action of the Director upon the petition of the person so refused recognition or so suspended or excluded.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-580, 581, 582 (S. 1948 secs. 4715(c), 4719, 4732(a)(10)(A)).)

35 U.S.C. 33 Unauthorized representation as practitioner.

Whoever, not being recognized to practice before the Patent and Trademark Office, holds himself out or permits himself to be held out as so recognized, or as being qualified to prepare or prosecute applications for patent, shall be fined not more than \$1,000 for each offense.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

CHAPTER 4 — PATENT FEES; FUNDING; SEARCH SYSTEMS

Sec.

41 Patent fees; patent and trademark search systems.

42 Patent and Trademark Office funding.

35 U.S.C. 41 Patent fees; patent and trademark search systems.

***Editor's Note: During fiscal years 2005 and 2006, subsections (a) and (b) of section 41 of title 35, United States Code, shall be administered as though subsections (a) and (b) read as follows:**

(a) GENERAL FEES. — The Director shall charge the following fees:

(1) FILING AND BASIC NATIONAL FEES. —

(A) On filing each application for an original patent, except for design, plant, or provisional applications, \$300.

(B) On filing each application for an original design patent, \$200.

(C) On filing each application for an original plant patent, \$200.

(D) On filing each provisional application for an original patent, \$200.

(E) On filing each application for the reissue of a patent, \$300.

(F) The basic national fee for each international application filed under the treaty defined in section 351(a) of this title entering the national stage under section 371 of this title, \$300.

(G) In addition, excluding any sequence listing or computer program listing filed in electronic medium as prescribed by the Director, for any application the specification and drawings of which exceed 100 sheets of paper (or equivalent as prescribed by the Director if filed in an electronic medium), \$250 for each additional 50 sheets of paper (or equivalent as prescribed by the Director if filed in an electronic medium) or fraction thereof.

(2) EXCESS CLAIMS FEES. — In addition to the fee specified in paragraph (1) —

(A) on filing or on presentation at any other time, \$200 for each claim in independent form in excess of 3;

(B) on filing or on presentation at any other time, \$50 for each claim (whether dependent or independent) in excess of 20; and

(C) for each application containing a multiple dependent claim, \$360.

For the purpose of computing fees under this paragraph, a multiple dependent claim referred to in section 112 of this title or any claim depending therefrom shall be considered as separate dependent claims in accordance with the number of claims to which reference is made. The Director may by regulation provide for a refund of any part of the fee specified in this paragraph for any claim that is canceled before an examination on the merits, as prescribed by the Director, has been made of the application under section 131 of this title. Errors in payment of the additional fees under this paragraph may be rectified in accordance with regulations prescribed by the Director.

(3) EXAMINATION FEES. —

(A) For examination of each application for an original patent, except for design, plant, provisional, or international applications, \$200.

(B) For examination of each application for an original design patent, \$130.

(C) For examination of each application for an original plant patent, \$160.

(D) For examination of the national stage of each international application, \$200.

(E) For examination of each application for the reissue of a patent, \$600.

The provisions of section 111(a) of this title relating to the payment of the fee for filing the application shall apply to the payment of the fee specified in this paragraph with respect to an application filed under section 111(a) of this title. The provisions of section 371(d) of this title relating to the payment of the national fee shall apply to the payment of the fee specified in this paragraph with respect to an international application.

(4) ISSUE FEES. —

(A) For issuing each original patent, except for design or plant patents, \$1,400.

(B) For issuing each original design patent, \$800.

(C) For issuing each original plant patent, \$1,100.

(D) For issuing each reissue patent, \$1,400.

(5) DISCLAIMER FEE. — On filing each disclaimer, \$130.

(6) APPEAL FEES. —

(A) On filing an appeal from the examiner to the Board of Patent Appeals and Interferences, \$500.

(B) In addition, on filing a brief in support of the appeal, \$500, and on requesting an oral hearing in the appeal before the Board of Patent Appeals and Interferences, \$1,000.

(7) REVIVAL FEES. — On filing each petition for the revival of an unintentionally abandoned application for a patent, for the unintentionally delayed payment of the fee for issuing each patent, or for an unintentionally delayed response by the patent owner in any reexamination proceeding, \$1,500, unless the petition is filed under section 133 or 151 of this title, in which case the fee shall be \$500.

(8) EXTENSION FEES. — For petitions for 1-month extensions of time to take actions required by the Director in an application —

(A) on filing a first petition, \$120;

(B) on filing a second petition, \$330; and

(C) on filing a third or subsequent petition, \$570.

(b) MAINTENANCE FEES. — The Director shall charge the following fees for maintaining in force all patents based on applications filed on or after December 12, 1980:

- (1) 3 years and 6 months after grant, \$900.
- (2) 7 years and 6 months after grant, \$2,300.
- (3) 11 years and 6 months after grant, \$3,800.

Unless payment of the applicable maintenance fee is received in the United States Patent and Trademark Office on or before the date the fee is due or within a grace period of 6 months thereafter, the patent will expire as of the end of such grace period. The Director may require the payment of a surcharge as a condition of accepting within such 6-month grace period the payment of an applicable maintenance fee. No fee may be established for maintaining a design or plant patent in force.

(Dec. 8, 2004, Public Law 108-447, sec. 801, 118 Stat. 2809.)

The bracketed text below is the unamended text of 35 U.S.C. 41(a) and (b), which may continue to have effect following fiscal year 2006:

[(a) The Director shall charge the following fees:

(1)(A) On filing each application for an original patent, except in design or plant cases, \$690.

(B) In addition, on filing or on presentation at any other time, \$78 for each claim in independent form which is in excess of 3, \$18 for each claim (whether independent or dependent) which is in excess of 20, and \$260 for each application containing a multiple dependent claim.

(C) On filing each provisional application for an original patent, \$150.

(2) For issuing each original or reissue patent, except in design or plant cases, \$1,210.

(3) In design and plant cases-

- (A) on filing each design application, \$310;
- (B) on filing each plant application, \$480;
- (C) on issuing each design patent, \$430;

and

(D) on issuing each plant patent, \$580.

(4)(A) On filing each application for the reissue of a patent, \$690.

(B) In addition, on filing or on presentation at any other time, \$78 for each claim in independent form which is in excess of the number of independent claims of the original patent, and \$18 for each claim

(whether independent or dependent) which is in excess of 20 and also in excess of the number of claims of the original patent.

(5) On filing each disclaimer, \$110.

(6)(A) On filing an appeal from the examiner to the Board of Patent Appeals and Interferences, \$300.

(B) In addition, on filing a brief in support of the appeal, \$300, and on requesting an oral hearing in the appeal before the Board of Patent Appeals and Interferences, \$260.

(7) On filing each petition for the revival of an unintentionally abandoned application for a patent, for the unintentionally delayed payment of the fee for issuing each patent, or for an unintentionally delayed response by the patent owner in any reexamination proceeding, \$1,210, unless the petition is filed under section 133 or 151 of this title, in which case the fee shall be \$110.

(8) For petitions for 1-month extensions of time to take actions required by the Director in an application-

(A) on filing a first petition, \$110;

(B) on filing a second petition, \$270; and

(C) on filing a third or subsequent petition, \$490.

(9) Basic national fee for an international application where the Patent and Trademark Office was the International Preliminary Examining Authority and the International Searching Authority, \$670.

(10) Basic national fee for an international application where the Patent and Trademark Office was the International Searching Authority but not the International Preliminary Examining Authority, \$690.

(11) Basic national fee for an international application where the Patent and Trademark Office was neither the International Searching Authority nor the International Preliminary Examining Authority, \$970.

(12) Basic national fee for an international application where the international preliminary examination has been paid to the Patent and Trademark Office, and the international preliminary examination report states that the provisions of Article 33 (2), (3), and (4) of the Patent Cooperation Treaty have been satisfied for all claims in the application entering the national stage, \$96.

(13) For filing or later presentation of each independent claim in the national stage of an international application in excess of 3, \$78.

(14) For filing or later presentation of each claim (whether independent or dependent) in a national stage of an international application in excess of 20, \$18.

(15) For each national stage of an international application containing a multiple dependent claim, \$260.

For the purpose of computing fees, a multiple dependent claim as referred to in section 112 of this title or any claim depending therefrom shall be considered as separate dependent claims in accordance with the number of claims to which reference is made. Errors in payment of the additional fees may be rectified in accordance with regulations of the Director.

(b) The Director shall charge the following fees for maintaining in force all patents based on applications filed on or after December 12, 1980:

- (1) 3 years and 6 months after grant, \$830.
- (2) 7 years and 6 months after grant, \$1,900.
- (3) 11 years and 6 months after grant, \$2,910.

Unless payment of the applicable maintenance fee is received in the Patent and Trademark Office on or before the date the fee is due or within a grace period of six months thereafter, the patent will expire as of the end of such grace period. The Director may require the payment of a surcharge as a condition of accepting within such 6-month grace period the payment of an applicable maintenance fee. No fee may be established for maintaining a design or plant patent in force.]

(c)(1) The Director may accept the payment of any maintenance fee required by subsection (b) of this section which is made within twenty-four months after the six-month grace period if the delay is shown to the satisfaction of the Director to have been unintentional, or at any time after the six-month grace period if the delay is shown to the satisfaction of the Director to have been unavoidable. The Director may require the payment of a surcharge as a condition of accepting payment of any maintenance fee after the six-month grace period. If the Director accepts payment of a maintenance fee after the six-month grace period, the patent shall be considered as not having expired at the end of the grace period.

(2) A patent, the term of which has been maintained as a result of the acceptance of a payment of a maintenance fee under this subsection, shall not abridge or affect the right of any person or that person's successors in business who made, purchased, offered to sell, or used anything protected by the patent within the United States, or imported anything protected by the patent into the United States after the 6-month grace period but prior to the acceptance of a maintenance fee under this subsection, to continue the use of, to offer for sale, or to sell to others to be used, offered for sale, or sold, the specific thing so made, purchased, offered for sale, used, or imported. The court before which such matter is in question may provide for the continued manufacture, use, offer for sale, or sale of the thing made, purchased, offered for sale, or used within the United States, or imported into the United States, as specified, or for the manufacture, use, offer for sale, or sale in the United States of which substantial preparation was made after the 6-month grace period but before the acceptance of a maintenance fee under this subsection, and the court may also provide for the continued practice of any process that is practiced, or for the practice of which substantial preparation was made, after the 6-month grace period but before the acceptance of a maintenance fee under this subsection, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced after the 6-month grace period but before the acceptance of a maintenance fee under this subsection.

***Editor's Note: During fiscal years 2005 and 2006, subsection (d) of section 41 of title 35, United States Code, shall be administered as though subsection (d) reads as follows:**

(d) PATENT SEARCH AND OTHER FEES. —

(1) PATENT SEARCH FEES. —

(A) The Director shall charge a fee for the search of each application for a patent, except for provisional applications. The Director shall establish the fees charged under this paragraph to recover an amount not to exceed the estimated average cost to the Office of searching applications for patent either by acquiring a search report from a qualified search authority, or by causing a search by Office personnel to be made, of each application for patent. For the 3-year period beginning on the date of enactment of this

Act, the fee for a search by a qualified search authority of a patent application described in clause (i), (iv), or (v) of subparagraph (B) may not exceed \$500, of a patent application described in clause (ii) of subparagraph (B) may not exceed \$100, and of a patent application described in clause (iii) of subparagraph (B) may not exceed \$300. The Director may not increase any such fee by more than 20 percent in each of the next three 1-year periods, and the Director may not increase any such fee thereafter.

(B) For purposes of determining the fees to be established under this paragraph, the cost to the Office of causing a search of an application to be made by Office personnel shall be deemed to be —

(i) \$500 for each application for an original patent, except for design, plant, provisional, or international applications;

(ii) \$100 for each application for an original design patent;

(iii) \$300 for each application for an original plant patent;

(iv) \$500 for the national stage of each international application; and

(v) \$500 for each application for the reissue of a patent.

(C) The provisions of section 111 (a)(3) of this title relating to the payment of the fee for filing the application shall apply to the payment of the fee specified in this paragraph with respect to an application filed under section 111(a) of this title. The provisions of section 371(d) of this title relating to the payment of the national fee shall apply to the payment of the fee specified in this paragraph with respect to an international application.

(D) The Director may by regulation provide for a refund of any part of the fee specified in this paragraph for any applicant who files a written declaration of express abandonment as prescribed by the Director before an examination has been made of the application under section 131 of this title, and for any applicant who provides a search report that meets the conditions prescribed by the Director.

(E) For purposes of subparagraph (A), a “qualified search authority” may not include a commercial entity unless —

(i) the Director conducts a pilot program of limited scope, conducted over a period of not more than 18 months, which demonstrates that

searches by commercial entities of the available prior art relating to the subject matter of inventions claimed in patent applications —

(I) are accurate; and

(II) meet or exceed the standards of searches conducted by and used by the Patent and Trademark Office during the patent examination process;

(ii) the Director submits a report on the results of the pilot program to Congress and the Patent Public Advisory Committee that includes —

(I) a description of the scope and duration of the pilot program;

(II) the identity of each commercial entity participating in the pilot program;

(III) an explanation of the methodology used to evaluate the accuracy and quality of the search reports; and

(IV) an assessment of the effects that the pilot program, as compared to searches conducted by the Patent and Trademark Office, had and will have on —

(aa) patentability determinations;

(bb) productivity of the Patent and Trademark Office;

(cc) costs to the Patent and Trademark Office;

(dd) costs to patent applicants; and

(ee) other relevant factors;

(iii) the Patent Public Advisory Committee reviews and analyzes the Director’s report under clause (ii) and the results of the pilot program and submits a separate report on its analysis to the Director and the Congress that includes —

(I) an independent evaluation of the effects that the pilot program, as compared to searches conducted by the Patent and Trademark Office, had and will have on the factors set forth in clause (ii)(IV); and

(II) an analysis of the reasonableness, appropriateness, and effectiveness of the methods used in the pilot program to make the evaluations required under clause (ii)(IV); and

(iv) Congress does not, during the 1-year period beginning on the date on which the Patent Public Advisory Committee submits its report to the Congress under clause (iii), enact a law prohibiting searches by commercial entities of the available prior

art relating to the subject matter of inventions claimed in patent applications.

(F) The Director shall require that any search by a qualified search authority that is a commercial entity is conducted in the United States by persons that —

(i) if individuals, are United States citizens; and

(ii) if business concerns, are organized under the laws of the United States or any State and employ United States citizens to perform the searches.

(G) A search of an application that is the subject of a secrecy order under section 181 or otherwise involves classified information may only be conducted by Office personnel.

(H) A qualified search authority that is a commercial entity may not conduct a search of a patent application if the entity has any direct or indirect financial interest in any patent or in any pending or imminent application for patent filed or to be filed in the Patent and Trademark Office.

(2) OTHER FEES. — The Director shall establish fees for all other processing, services, or materials relating to patents not specified in this section to recover the estimated average cost to the Office of such processing, services; or materials, except that the Director shall charge the following fees for the following services:

(A) For recording a document affecting title, \$40 per property.

(B) For each photocopy, \$.25 per page.

(C) For each black and white copy of a patent, \$3. The yearly fee for providing a library specified in section 12 of this title with uncertified printed copies of the specifications and drawings for all patents in that year shall be \$50.

(Dec. 8, 2004, Public Law 108-447, sec. 801, 118 Stat. 2809.)

The bracketed text below is the unamended text of 35 U.S.C. 41(d), which may continue to have effect following fiscal year 2006:

[(d) The Director shall establish fees for all other processing, services, or materials relating to patents not specified in this section to recover the estimated average cost to the Office of such processing, services, or materials, except that the Director shall charge the following fees for the following services:

(1) For recording a document affecting title, \$40 per property.

(2) For each photocopy, \$.25 per page.

(3) For each black and white copy of a patent, \$3.

The yearly fee for providing a library specified in section 13 of this title with uncertified printed copies of the specifications and drawings for all patents issued in that year shall be \$50.]

(e) The Director may waive the payment of any fee for any service or material related to patents in connection with an occasional or incidental request made by a department or agency of the Government, or any officer thereof. The Director may provide any applicant issued a notice under section 132 of this title with a copy of the specifications and drawings for all patents referred to in that notice without charge.

(f) The fees established in subsections (a) and (b) of this section may be adjusted by the Director on October 1, 1992, and every year thereafter, to reflect any fluctuations occurring during the previous 12 months in the Consumer Price Index, as determined by the Secretary of Labor. Changes of less than 1 per centum may be ignored.

***Editor's Note: During fiscal years 2005 and 2006, subsection (f) of section 41 of title 35, United States Code applies to the fees established under section 801 of Public Law 108-447. (Dec. 8, 2004, Public Law 108-447, sec. 801, 118 Stat. 2809.)**

(g) No fee established by the Director under this section shall take effect until at least 30 days after notice of the fee has been published in the Federal Register and in the *Official Gazette* of the Patent and Trademark Office.

***Editor's Note: During fiscal years 2005 and 2006, subsection (h) of section 41 of title 35, United States Code, shall be administered as though subsection (h) reads as follows:**

(h)(1) Subject to paragraph (3), fees charged under subsections (a), (b) and (d)(1) shall be reduced by 50 percent with respect to their application to any small business concern as defined under section 3 of the Small Business Act, and to any independent inventor or nonprofit organization as defined in regulations issued by the Director.

(2) With respect to its application to any entity described in paragraph (1), any surcharge or fee charged under subsection (c) or (d) shall not be higher

than the surcharge or fee required of any other entity under the same or substantially similar circumstances.

(3) The fee charged under subsection (a)(1)(A) shall be reduced by 75 percent with respect to its application to any entity to which paragraph (1) applies, if the application is filed by electronic means as prescribed by the Director.

(Dec. 8, 2004, Public Law 108-447, sec. 801, 118 Stat. 2809.)

The bracketed text below is the unamended text of 35 U.S.C. 41(h), which may continue to have effect following fiscal year 2006:

[(h)(1) Fees charged under subsection (a) or (b) shall be reduced by 50 percent with respect to their application to any small business concern as defined under section 3 of the Small Business Act, and to any independent inventor or nonprofit organization as defined in regulations issued by the Director.

(2) With respect to its application to any entity described in paragraph (1), any surcharge or fee charged under subsection (c) or (d) shall not be higher than the surcharge or fee required of any other entity under the same or substantially similar circumstances.]

(i)(1) The Director shall maintain, for use by the public, paper, microform or electronic collections of United States patents, foreign patent documents, and United States trademark registrations arranged to permit search for and retrieval of information. The Director may not impose fees directly for the use of such collections, or for the use of the public patent and trademark search rooms or libraries.

(2) The Director shall provide for the full deployment of the automated search systems of the Patent and Trademark Office so that such systems are available for use by the public, and shall assure full access by the public to, and dissemination of, patent and trademark information, using a variety of automated methods, including electronic bulletin boards and remote access by users to mass storage and retrieval systems.

(3) The Director may establish reasonable fees for access by the public to the automated search systems of the Patent and Trademark Office. If such fees are established, a limited amount of free access shall be made available to users of the systems for purposes of education and training. The Director may waive the payment by an individual of fees authorized

by this subsection upon a showing of need or hardship, and if such waiver is in the public interest.

(4) The Director shall submit to the Congress an annual report on the automated search systems of the Patent and Trademark Office and the access by the public to such systems. The Director shall also publish such report in the Federal Register. The Director shall provide an opportunity for the submission of comments by interested persons on each such report.

(Amended July 24, 1965, Public Law 89-83, sec. 1, 2, 79 Stat. 259; Jan. 2, 1975, Public Law 93-596, sec. 1, Jan. 2, 1975, 88 Stat. 1949; Nov. 14, 1975, Public Law 94-131, sec. 3, 89 Stat. 690.)

(Subsection (g) amended Dec. 12, 1980, Public Law 96-517, sec. 2, 94 Stat. 3017; Aug. 27, 1982, Public Law 97-247, sec. 3(a)-(e), 96 Stat. 317.)

(Subsections (a)-(d) amended Sept. 8, 1982, Public Law 97-256, sec. 101, 96 Stat. 816.)

(Subsection (a)(6) amended Nov. 8, 1984, Public Law 98-622, sec. 204(a), 98 Stat. 3388.)

(Subsection (h) added Nov. 6, 1986, Public Law 99-607, sec. 1(b)(2), 100 Stat. 3470.)

(Subsections (a), (b), (d), (f), and (g) amended Dec. 10, 1991, Public Law 102-204, sec. 5, 105 Stat. 1637.)

(Subsections (a)(9) - (15) and (i) added Dec. 10, 1991, Public Law 102-204, sec. 5, 105 Stat. 1637.)

(Subsection (c)(1) amended Oct. 23, 1992, Public Law 102-444, sec. 1, 106 Stat. 2245.)

(Subsection (a)(1)(C) added Dec. 8, 1994, Public Law 103-465, sec. 532(b)(2), 108 Stat. 4986.)

(Subsection (c)(2) amended, Dec. 8, 1994, Public Law 103-465, sec. 533(b)(1), 108 Stat. 4988.)

(Subsections (a)-(b) revised Nov. 10, 1998, Public Law 105-358, sec. 3, 112 Stat. 3272.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-554, 570, 582, 589 (S. 1948 secs. 4202, 4605(a), 4732(a)(5), 4732(a)(10)(A)) and 4804(d).)

35 U.S.C. 42 Patent and Trademark Office funding.

(a) All fees for services performed by or materials furnished by the Patent and Trademark Office will be payable to the Director.

(b) All fees paid to the Director and all appropriations for defraying the costs of the activities of the

Patent and Trademark Office will be credited to the Patent and Trademark Office Appropriation Account in the Treasury of the United States.

(c) To the extent and in the amounts provided in advance in appropriations Acts, fees authorized in this title or any other Act to be charged or established by the Director shall be collected by and shall be available to the Director to carry out the activities of the Patent and Trademark Office. All fees available to the Director under section 31 of the Trademark Act of 1946 shall be used only for the processing of trademark registrations and for other activities, services and materials relating to trademarks and to cover a proportionate share of the administrative costs of the Patent and Trademark Office.

(d) The Director may refund any fee paid by mistake or any amount paid in excess of that required.

(e) The Secretary of Commerce shall, on the day each year on which the President submits the annual budget to the Congress, provide to the Committees on the Judiciary of the Senate and the House of Representatives:

(1) a list of patent and trademark fee collections by the Patent and Trademark Office during the preceding fiscal year;

(2) a list of activities of the Patent and Trademark Office during the preceding fiscal year which were supported by patent fee expenditures, trademark fee expenditures, and appropriations;

(3) budget plans for significant programs, projects, and activities of the Office, including out-year funding estimates;

(4) any proposed disposition of surplus fees by the Office; and

(5) such other information as the committees consider necessary.

(Amended Nov. 14, 1975, Public Law 94-131, sec. 4, 89 Stat. 690; Dec. 12, 1980, Public Law 96-517, sec. 3, 94 Stat. 3018; Aug. 27, 1982, Public Law 97-247, sec. 3(g), 96 Stat. 319; Sept. 13, 1982, Public Law 97-258, sec. 3(i), 96 Stat. 1065.)

(Subsection (c) amended Dec. 10, 1991, Public Law 102-204, sec. 5(e), 105 Stat. 1640.)

(Subsection (e) added Dec. 10, 1991, Public Law 102-204, sec. 4, 105 Stat. 1637.)

(Subsection (c) revised Nov. 10, 1998, Public Law 105-358, sec. 4, 112 Stat. 3274.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-555, 582 (S. 1948 secs. 4205 and 4732(a)(10)(A)).)

PART II — PATENTABILITY OF INVENTIONS AND GRANT OF PATENTS

CHAPTER 10 — PATENTABILITY OF INVENTIONS

- Sec.
- 100 Definitions.
- 101 Inventions patentable.
- 102 Conditions for patentability; novelty and loss of right to patent.
- 103 Conditions for patentability; non-obvious subject matter.
- 104 Invention made abroad.
- 105 Inventions in outer space.

35 U.S.C. 100 Definitions.

When used in this title unless the context otherwise indicates -

(a) The term “invention” means invention or discovery.

(b) The term “process” means process, art, or method, and includes a new use of a known process, machine, manufacture, composition of matter, or material.

(c) The terms “United States” and “this country” mean the United States of America, its territories and possessions.

(d) The word “patentee” includes not only the patentee to whom the patent was issued but also the successors in title to the patentee.

(e) The term “third-party requester” means a person requesting ex parte reexamination under section 302 or inter partes reexamination under section 311 who is not the patent owner.

(Subsection (e) added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-567 (S. 1948 sec. 4603).)

35 U.S.C. 101 Inventions patentable.

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

35 U.S.C. 102 Conditions for patentability; novelty and loss of right to patent.

A person shall be entitled to a patent unless —

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for patent, or

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of the application for patent in the United States, or

(c) he has abandoned the invention, or

(d) the invention was first patented or caused to be patented, or was the subject of an inventor's certificate, by the applicant or his legal representatives or assigns in a foreign country prior to the date of the application for patent in this country on an application for patent or inventor's certificate filed more than twelve months before the filing of the application in the United States, or

(e) the invention was described in — (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for the purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language; or

(f) he did not himself invent the subject matter sought to be patented, or

(g)(1) during the course of an interference conducted under section 135 or section 291, another inventor involved therein establishes, to the extent permitted in section 104, that before such person's invention thereof the invention was made by such other inventor and not abandoned, suppressed, or concealed, or (2) before such person's invention thereof, the invention was made in this country by another inventor who had not abandoned, suppressed, or concealed it. In determining priority of invention under this subsection, there shall be considered not only the respective dates of conception and reduction to prac-

tice of the invention, but also the reasonable diligence of one who was first to conceive and last to reduce to practice, from a time prior to conception by the other.

(Amended July 28, 1972, Public Law 92-358, sec. 2, 86 Stat. 501; Nov. 14, 1975, Public Law 94-131, sec. 5, 89 Stat. 691.)

(Subsection (e) amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-565 (S. 1948 sec. 4505).)

(Subsection (g) amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-590 (S. 1948 sec. 4806).)

(Subsection (e) amended Nov. 2, 2002, Public Law 107-273, sec. 13205, 116 Stat. 1903.)

35 U.S.C. 103 Conditions for patentability; non-obvious subject matter.

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

(b)(1) Notwithstanding subsection (a), and upon timely election by the applicant for patent to proceed under this subsection, a biotechnological process using or resulting in a composition of matter that is novel under section 102 and nonobvious under subsection (a) of this section shall be considered nonobvious if-

(A) claims to the process and the composition of matter are contained in either the same application for patent or in separate applications having the same effective filing date; and

(B) the composition of matter, and the process at the time it was invented, were owned by the same person or subject to an obligation of assignment to the same person.

(2) A patent issued on a process under paragraph (1)-

(A) shall also contain the claims to the composition of matter used in or made by that process, or

(B) shall, if such composition of matter is claimed in another patent, be set to expire on the same date as such other patent, notwithstanding section 154.

(3) For purposes of paragraph (1), the term “biotechnological process” means-

(A) a process of genetically altering or otherwise inducing a single- or multi-celled organism to-

(i) express an exogenous nucleotide sequence,

(ii) inhibit, eliminate, augment, or alter expression of an endogenous nucleotide sequence, or

(iii) express a specific physiological characteristic not naturally associated with said organism;

(B) cell fusion procedures yielding a cell line that expresses a specific protein, such as a monoclonal antibody; and

(C) a method of using a product produced by a process defined by subparagraph (A) or (B), or a combination of subparagraphs (A) and (B).

(c)(1) Subject matter developed by another person, which qualifies as prior art only under one or more of subsections (e), (f), and (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the claimed invention was made, owned by the same person or subject to an obligation of assignment to the same person.

(2) For purposes of this subsection, subject matter developed by another person and a claimed invention shall be deemed to have been owned by the same person or subject to an obligation of assignment to the same person if —

(A) the claimed invention was made by or on behalf of parties to a joint research agreement that was in effect on or before the date the claimed invention was made;

(B) the claimed invention was made as a result of activities undertaken within the scope of the joint research agreement; and

(C) the application for patent for the claimed invention discloses or is amended to disclose the names of the parties to the joint research agreement.

(3) For purposes of paragraph (2), the term “joint research agreement” means a written contract, grant, or cooperative agreement entered into by two or

more persons or entities for the performance of experimental, developmental, or research work in the field of the claimed invention.

(Amended Nov. 8, 1984, Public Law 98-622, sec. 103, 98 Stat. 3384; Nov. 1, 1995, Public Law 104-41, sec.1, 109 Stat. 3511.)

(Subsection (c) amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-591 (S. 1948 sec. 4807).)

(Subsection (c) amended Dec. 10, 2004, Public Law 108-453, sec. 2, 118 Stat. 3596.)

35 U.S.C. 104 Invention made abroad.

(a) IN GENERAL.—

(1) PROCEEDINGS.—In proceedings in the Patent and Trademark Office, in the courts, and before any other competent authority, an applicant for a patent, or a patentee, may not establish a date of invention by reference to knowledge or use thereof, or other activity with respect thereto, in a foreign country other than a NAFTA country or a WTO member country, except as provided in sections 119 and 365 of this title.

(2) RIGHTS.—If an invention was made by a person, civil or military—

(A) while domiciled in the United States, and serving in any other country in connection with operations by or on behalf of the United States,

(B) while domiciled in a NAFTA country and serving in another country in connection with operations by or on behalf of that NAFTA country, or

(C) while domiciled in a WTO member country and serving in another country in connection with operations by or on behalf of that WTO member country, that person shall be entitled to the same rights of priority in the United States with respect to such invention as if such invention had been made in the United States, that NAFTA country, or that WTO member country, as the case may be.

(3) USE OF INFORMATION.—To the extent that any information in a NAFTA country or a WTO member country concerning knowledge, use, or other activity relevant to proving or disproving a date of invention has not been made available for use in a proceeding in the Patent and Trademark Office, a court, or any other competent authority to the same extent as such information could be made available in the United States, the Director, court, or such other

authority shall draw appropriate inferences, or take other action permitted by statute, rule, or regulation, in favor of the party that requested the information in the proceeding.

(b) DEFINITIONS.—As used in this section—

(1) The term “NAFTA country” has the meaning given that term in section 2(4) of the North American Free Trade Agreement Implementation Act; and

(2) The term “WTO member country” has the meaning given that term in section 2(10) of the Uruguay Round Agreements Act.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 14, 1975, Public Law 94-131, sec. 6, 89 Stat. 691; Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392; Dec. 8, 1993, Public Law 103-182, sec. 331, 107 Stat. 2113; Dec. 8, 1994, Public Law 103-465, sec. 531(a), 108 Stat. 4982; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 105 Inventions in outer space.

(a) Any invention made, used, or sold in outer space on a space object or component thereof under the jurisdiction or control of the United States shall be considered to be made, used or sold within the United States for the purposes of this title, except with respect to any space object or component thereof that is specifically identified and otherwise provided for by an international agreement to which the United States is a party, or with respect to any space object or component thereof that is carried on the registry of a foreign state in accordance with the Convention on Registration of Objects Launched into Outer Space.

(b) Any invention made, used, or sold in outer space on a space object or component thereof that is carried on the registry of a foreign state in accordance with the Convention on Registration of Objects Launched into Outer Space, shall be considered to be made, used, or sold within the United States for the purposes of this title if specifically so agreed in an international agreement between the United States and the state of registry.

(Added Nov. 15, 1990, Public Law 101-580, sec. 1(a), 104 Stat. 2863.)

CHAPTER 11 — APPLICATION FOR PATENT

Sec.

- 111 Application.
- 112 Specification.
- 113 Drawings.
- 114 Models, specimens.
- 115 Oath of applicant.
- 116 Inventors.
- 117 Death or incapacity of inventor.
- 118 Filing by other than inventor.
- 119 Benefit of earlier filing date; right of priority.
- 120 Benefit of earlier filing date in the United States.
- 121 Divisional applications.
- 122 Confidential status of applications; publication of patent applications.

35 U.S.C. 111 Application.

(a) IN GENERAL.—

(1) WRITTEN APPLICATION.—An application for patent shall be made, or authorized to be made, by the inventor, except as otherwise provided in this title, in writing to the Director.

(2) CONTENTS.—Such application shall include—

(A) a specification as prescribed by section 112 of this title;

(B) a drawing as prescribed by section 113 of this title; and

(C) an oath by the applicant as prescribed by section 115 of this title.

(3) FEE AND OATH.—The application must be accompanied by the fee required by law. The fee and oath may be submitted after the specification and any required drawing are submitted, within such period and under such conditions, including the payment of a surcharge, as may be prescribed by the Director.

(4) FAILURE TO SUBMIT.—Upon failure to submit the fee and oath within such prescribed period, the application shall be regarded as abandoned, unless it is shown to the satisfaction of the Director that the delay in submitting the fee and oath was unavoidable or unintentional. The filing date of an application shall be the date on which the specification and any required drawing are received in the Patent and Trademark Office.

(b) PROVISIONAL APPLICATION.—

(1) AUTHORIZATION.—A provisional application for patent shall be made or authorized to be made by the inventor, except as otherwise provided in this title, in writing to the Director. Such application shall include—

(A) a specification as prescribed by the first paragraph of section 112 of this title; and

(B) a drawing as prescribed by section 113 of this title.

(2) CLAIM.—A claim, as required by the second through fifth paragraphs of section 112, shall not be required in a provisional application.

(3) FEE.—

(A) The application must be accompanied by the fee required by law.

(B) The fee may be submitted after the specification and any required drawing are submitted, within such period and under such conditions, including the payment of a surcharge, as may be prescribed by the Director.

(C) Upon failure to submit the fee within such prescribed period, the application shall be regarded as abandoned, unless it is shown to the satisfaction of the Director that the delay in submitting the fee was unavoidable or unintentional.

(4) FILING DATE.—The filing date of a provisional application shall be the date on which the specification and any required drawing are received in the Patent and Trademark Office.

(5) ABANDONMENT.—Notwithstanding the absence of a claim, upon timely request and as prescribed by the Director, a provisional application may be treated as an application filed under subsection (a). Subject to section 119(e)(3) of this title, if no such request is made, the provisional application shall be regarded as abandoned 12 months after the filing date of such application and shall not be subject to revival after such 12-month period.

(6) OTHER BASIS FOR PROVISIONAL APPLICATION.—Subject to all the conditions in this subsection and section 119(e) of this title, and as prescribed by the Director, an application for patent filed under subsection (a) may be treated as a provisional application for patent.

(7) NO RIGHT OF PRIORITY OR BENEFIT OF EARLIEST FILING DATE.—A provisional application shall not be entitled to the right of priority

of any other application under section 119 or 365(a) of this title or to the benefit of an earlier filing date in the United States under section 120, 121, or 365(c) of this title.

(8) APPLICABLE PROVISIONS.—The provisions of this title relating to applications for patent shall apply to provisional applications for patent, except as otherwise provided, and except that provisional applications for patent shall not be subject to sections 115, 131, 135, and 157 of this title.

(Amended Aug. 27, 1982, Public Law 97-247, sec. 5, 96 Stat. 319; Dec. 8, 1994, Public Law 103-465, sec. 532(b)(3), 108 Stat. 4986; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582, 588 (S. 1948 secs. 4732(a)(10)(A), 4801(a)).)

35 U.S.C. 112 Specification.

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same, and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

A claim may be written in independent or, if the nature of the case admits, in dependent or multiple dependent form.

Subject to the following paragraph, a claim in dependent form shall contain a reference to a claim previously set forth and then specify a further limitation of the subject matter claimed. A claim in dependent form shall be construed to incorporate by reference all the limitations of the claim to which it refers.

A claim in multiple dependent form shall contain a reference, in the alternative only, to more than one claim previously set forth and then specify a further limitation of the subject matter claimed. A multiple dependent claim shall not serve as a basis for any other multiple dependent claim. A multiple dependent claim shall be construed to incorporate by reference all the limitations of the particular claim in relation to which it is being considered.

An element in a claim for a combination may be expressed as a means or step for performing a specified function without the recital of structure, material, or acts in support thereof, and such claim shall be construed to cover the corresponding structure, material, or acts described in the specification and equivalents thereof.

(Amended July 24, 1965, Public Law 89-83, sec. 9, 79 Stat. 261; Nov. 14, 1975, Public Law 94-131, sec. 7, 89 Stat. 691.)

35 U.S.C. 113 Drawings.

The applicant shall furnish a drawing where necessary for the understanding of the subject matter sought to be patented. When the nature of such subject matter admits of illustration by a drawing and the applicant has not furnished such a drawing, the Director may require its submission within a time period of not less than two months from the sending of a notice thereof. Drawings submitted after the filing date of the application may not be used (i) to overcome any insufficiency of the specification due to lack of an enabling disclosure or otherwise inadequate disclosure therein, or (ii) to supplement the original disclosure thereof for the purpose of interpretation of the scope of any claim.

(Amended Nov. 14, 1975, Public Law 94-131, sec. 8, 89 Stat. 691; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 114 Models, specimens.

The Director may require the applicant to furnish a model of convenient size to exhibit advantageously the several parts of his invention.

When the invention relates to a composition of matter, the Director may require the applicant to furnish specimens or ingredients for the purpose of inspection or experiment.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 115 Oath of applicant.

The applicant shall make oath that he believes himself to be the original and first inventor of the process, machine, manufacture, or composition of matter, or improvement thereof, for which he solicits a patent; and shall state of what country he is a citizen. Such

oath may be made before any person within the United States authorized by law to administer oaths, or, when made in a foreign country, before any diplomatic or consular officer of the United States authorized to administer oaths, or before any officer having an official seal and authorized to administer oaths in the foreign country in which the applicant may be, whose authority is proved by certificate of a diplomatic or consular officer of the United States, or apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States. Such oath is valid if it complies with the laws of the state or country where made. When the application is made as provided in this title by a person other than the inventor, the oath may be so varied in form that it can be made by him. For purposes of this section, a consular officer shall include any United States citizen serving overseas, authorized to perform notarial functions pursuant to section 1750 of the Revised Statutes, as amended (22 U.S.C. 4221).

(Amended Aug. 27, 1982, Public Law 97-247, sec. 14(a), 96 Stat. 321; Oct. 21, 1998, Pub. L. 105-277, sec. 2222(d), 112 Stat. 2681-818.)

35 U.S.C. 116 Inventors.

When an invention is made by two or more persons jointly, they shall apply for patent jointly and each make the required oath, except as otherwise provided in this title. Inventors may apply for a patent jointly even though (1) they did not physically work together or at the same time, (2) each did not make the same type or amount of contribution, or (3) each did not make a contribution to the subject matter of every claim of the patent.

If a joint inventor refuses to join in an application for patent or cannot be found or reached after diligent effort, the application may be made by the other inventor on behalf of himself and the omitted inventor. The Director, on proof of the pertinent facts and after such notice to the omitted inventor as he prescribes, may grant a patent to the inventor making the application, subject to the same rights which the omitted inventor would have had if he had been joined. The omitted inventor may subsequently join in the application.

Whenever through error a person is named in an application for patent as the inventor, or through an error an inventor is not named in an application, and

such error arose without any deceptive intention on his part, the Director may permit the application to be amended accordingly, under such terms as he prescribes.

(Amended Aug. 27, 1982, Public Law 97-247, sec. 6(a), 96 Stat. 320; Nov. 8, 1984, Public Law 98-622, sec. 104(a), 98 Stat. 3384; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 117 Death or incapacity of inventor.

Legal representatives of deceased inventors and of those under legal incapacity may make application for patent upon compliance with the requirements and on the same terms and conditions applicable to the inventor.

35 U.S.C. 118 Filing by other than inventor.

Whenever an inventor refuses to execute an application for patent, or cannot be found or reached after diligent effort, a person to whom the inventor has assigned or agreed in writing to assign the invention or who otherwise shows sufficient proprietary interest in the matter justifying such action, may make application for patent on behalf of and as agent for the inventor on proof of the pertinent facts and a showing that such action is necessary to preserve the rights of the parties or to prevent irreparable damage; and the Director may grant a patent to such inventor upon such notice to him as the Director deems sufficient, and on compliance with such regulations as he prescribes.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 119 Benefit of earlier filing date; right of priority.

(a) An application for patent for an invention filed in this country by any person who has, or whose legal representatives or assigns have, previously regularly filed an application for a patent for the same invention in a foreign country which affords similar privileges in the case of applications filed in the United States or to citizens of the United States, or in a WTO member country, shall have the same effect as the same application would have if filed in this country on the date on which the application for patent for the same invention was first filed in such foreign country, if the application in this country is filed

within twelve months from the earliest date on which such foreign application was filed; but no patent shall be granted on any application for patent for an invention which had been patented or described in a printed publication in any country more than one year before the date of the actual filing of the application in this country, or which had been in public use or on sale in this country more than one year prior to such filing.

(b)(1) No application for patent shall be entitled to this right of priority unless a claim is filed in the Patent and Trademark Office, identifying the foreign application by specifying the application number on that foreign application, the intellectual property authority or country in or for which the application was filed, and the date of filing the application, at such time during the pendency of the application as required by the Director.

(2) The Director may consider the failure of the applicant to file a timely claim for priority as a waiver of any such claim. The Director may establish procedures, including the payment of a surcharge, to accept an unintentionally delayed claim under this section.

(3) The Director may require a certified copy of the original foreign application, specification, and drawings upon which it is based, a translation if not in the English language, and such other information as the Director considers necessary. Any such certification shall be made by the foreign intellectual property authority in which the foreign application was filed and show the date of the application and of the filing of the specification and other papers.

(c) In like manner and subject to the same conditions and requirements, the right provided in this section may be based upon a subsequent regularly filed application in the same foreign country instead of the first filed foreign application, provided that any foreign application filed prior to such subsequent application has been withdrawn, abandoned, or otherwise disposed of, without having been laid open to public inspection and without leaving any rights outstanding, and has not served, nor thereafter shall serve, as a basis for claiming a right of priority.

(d) Applications for inventors' certificates filed in a foreign country in which applicants have a right to apply, at their discretion, either for a patent or for an inventor's certificate shall be treated in this country in the same manner and have the same effect for pur-

pose of the right of priority under this section as applications for patents, subject to the same conditions and requirements of this section as apply to applications for patents, provided such applicants are entitled to the benefits of the Stockholm Revision of the Paris Convention at the time of such filing.

(e)(1) An application for patent filed under section 111(a) or section 363 of this title for an invention disclosed in the manner provided by the first paragraph of section 112 of this title in a provisional application filed under section 111(b) of this title, by an inventor or inventors named in the provisional application, shall have the same effect, as to such invention, as though filed on the date of the provisional application filed under section 111(b) of this title, if the application for patent filed under section 111(a) or section 363 of this title is filed not later than 12 months after the date on which the provisional application was filed and if it contains or is amended to contain a specific reference to the provisional application. No application shall be entitled to the benefit of an earlier filed provisional application under this subsection unless an amendment containing the specific reference to the earlier filed provisional application is submitted at such time during the pendency of the application as required by the Director. The Director may consider the failure to submit such an amendment within that time period as a waiver of any benefit under this subsection. The Director may establish procedures, including the payment of a surcharge, to accept an unintentionally delayed submission of an amendment under this subsection during the pendency of the application

(2) A provisional application filed under section 111(b) of this title may not be relied upon in any proceeding in the Patent and Trademark Office unless the fee set forth in subparagraph (A) or (C) of section 41(a)(1) of this title has been paid.

(3) If the day that is 12 months after the filing date of a provisional application falls on a Saturday, Sunday, or Federal holiday within the District of Columbia, the period of pendency of the provisional application shall be extended to the next succeeding secular or business day.

(f) Applications for plant breeder's rights filed in a WTO member country (or in a foreign UPOV Contracting Party) shall have the same effect for the purpose of the right of priority under subsections (a)

through (c) of this section as applications for patents, subject to the same conditions and requirements of this section as apply to applications for patents.

(g) As used in this section—

(1) the term “WTO member country” has the same meaning as the term is defined in section 104(b)(2) of this title; and

(2) the term “UPOV Contracting Party” means a member of the International Convention for the Protection of New Varieties of Plants.

(Amended Oct. 3, 1961, Public Law 87-333, sec. 1, 75 Stat. 748; July 28, 1972, Public Law 92-358, sec. 1, 86 Stat. 501; Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Dec. 8, 1994, Public Law 103-465, sec. 532(b)(1), 108 Stat. 4985.)

(Subsection (b) amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-563 (S. 1948 sec. 4503(a)).)

(Subsection (e) amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-564, 588, 589 (S. 1948 secs. 4503(b)(2), 4801 and 4802).)

(Subsections (f) and (g) added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-589 (S. 1948 sec. 4802).)

35 U.S.C. 120 Benefit of earlier filing date in the United States.

An application for patent for an invention disclosed in the manner provided by the first paragraph of section 112 of this title in an application previously filed in the United States, or as provided by section 363 of this title, which is filed by an inventor or inventors named in the previously filed application shall have the same effect, as to such invention, as though filed on the date of the prior application, if filed before the patenting or abandonment of or termination of proceedings on the first application or on an application similarly entitled to the benefit of the filing date of the first application and if it contains or is amended to contain a specific reference to the earlier filed application. No application shall be entitled to the benefit of an earlier filed application under this section unless an amendment containing the specific reference to the earlier filed application is submitted at such time during the pendency of the application as required by the Director. The Director may consider the failure to submit such an amendment within that time period as a waiver of any benefit under this section. The Direc-

tor may establish procedures, including the payment of a surcharge, to accept an unintentionally delayed submission of an amendment under this section.

(Amended Nov. 14, 1975, Public Law 94-131, sec. 9, 89 Stat. 691; Nov. 8, 1984, Public Law 98-622, sec. 104(b), 98 Stat. 3385; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-563 (S. 1948 sec. 4503(b)(1)).)

35 U.S.C. 121 Divisional applications.

If two or more independent and distinct inventions are claimed in one application, the Director may require the application to be restricted to one of the inventions. If the other invention is made the subject of a divisional application which complies with the requirements of section 120 of this title it shall be entitled to the benefit of the filing date of the original application. A patent issuing on an application with respect to which a requirement for restriction under this section has been made, or on an application filed as a result of such a requirement, shall not be used as a reference either in the Patent and Trademark Office or in the courts against a divisional application or against the original application or any patent issued on either of them, if the divisional application is filed before the issuance of the patent on the other application. If a divisional application is directed solely to subject matter described and claimed in the original application as filed, the Director may dispense with signing and execution by the inventor. The validity of a patent shall not be questioned for failure of the Director to require the application to be restricted to one invention.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 122 Confidential status of applications; publication of patent applications.

(a) CONFIDENTIALITY.— Except as provided in subsection (b), applications for patents shall be kept in confidence by the Patent and Trademark Office and no information concerning the same given without authority of the applicant or owner unless necessary to carry out the provisions of an Act of Congress or in such special circumstances as may be determined by the Director.

(b) PUBLICATION.—

(1) IN GENERAL.—

(A) Subject to paragraph (2), each application for a patent shall be published, in accordance with procedures determined by the Director, promptly after the expiration of a period of 18 months from the earliest filing date for which a benefit is sought under this title. At the request of the applicant, an application may be published earlier than the end of such 18-month period.

(B) No information concerning published patent applications shall be made available to the public except as the Director determines.

(C) Notwithstanding any other provision of law, a determination by the Director to release or not to release information concerning a published patent application shall be final and nonreviewable.

(2) EXCEPTIONS.—

(A) An application shall not be published if that application is—

(i) no longer pending;

(ii) subject to a secrecy order under section 181 of this title;

(iii) a provisional application filed under section 111(b) of this title; or

(iv) an application for a design patent filed under chapter 16 of this title.

(B)(i) If an applicant makes a request upon filing, certifying that the invention disclosed in the application has not and will not be the subject of an application filed in another country, or under a multilateral international agreement, that requires publication of applications 18 months after filing, the application shall not be published as provided in paragraph (1).

(ii) An applicant may rescind a request made under clause (i) at any time.

(iii) An applicant who has made a request under clause (i) but who subsequently files, in a foreign country or under a multilateral international agreement specified in clause (i), an application directed to the invention disclosed in the application filed in the Patent and Trademark Office, shall notify the Director of such filing not later than 45 days after the date of the filing of such foreign or international application. A failure of the applicant to provide such notice within the prescribed period shall result in the application being regarded as abandoned, unless it is

shown to the satisfaction of the Director that the delay in submitting the notice was unintentional.

(iv) If an applicant rescinds a request made under clause (i) or notifies the Director that an application was filed in a foreign country or under a multilateral international agreement specified in clause (i), the application shall be published in accordance with the provisions of paragraph (1) on or as soon as is practical after the date that is specified in clause (i).

(v) If an applicant has filed applications in one or more foreign countries, directly or through a multilateral international agreement, and such foreign filed applications corresponding to an application filed in the Patent and Trademark Office or the description of the invention in such foreign filed applications is less extensive than the application or description of the invention in the application filed in the Patent and Trademark Office, the applicant may submit a redacted copy of the application filed in the Patent and Trademark Office eliminating any part or description of the invention in such application that is not also contained in any of the corresponding applications filed in a foreign country. The Director may only publish the redacted copy of the application unless the redacted copy of the application is not received within 16 months after the earliest effective filing date for which a benefit is sought under this title. The provisions of section 154(d) shall not apply to a claim if the description of the invention published in the redacted application filed under this clause with respect to the claim does not enable a person skilled in the art to make and use the subject matter of the claim.

(c) **PROTEST AND PRE-ISSUANCE OPPOSITION.**— The Director shall establish appropriate procedures to ensure that no protest or other form of pre-issuance opposition to the grant of a patent on an application may be initiated after publication of the application without the express written consent of the applicant.

(d) **NATIONAL SECURITY.**— No application for patent shall be published under subsection (b)(1) if the publication or disclosure of such invention would be detrimental to the national security. The Director shall establish appropriate procedures to ensure that such applications are promptly identified and the secrecy of such inventions is maintained in accordance with chapter 17 of this title.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-563 (S. 1948 sec. 4503(b)(1)).)

CHAPTER 12 — EXAMINATION OF APPLICATION

Sec.

131 Examination of application.

132 Notice of rejection; reexamination.

133 Time for prosecuting application.

134 Appeal to the Board of Patent Appeals and Interferences.

135 Interferences.

35 U.S.C. 131 Examination of application.

The Director shall cause an examination to be made of the application and the alleged new invention; and if on such examination it appears that the applicant is entitled to a patent under the law, the Director shall issue a patent therefor.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 132 Notice of rejection; reexamination.

(a) Whenever, on examination, any claim for a patent is rejected, or any objection or requirement made, the Director shall notify the applicant thereof, stating the reasons for such rejection, or objection or requirement, together with such information and references as may be useful in judging of the propriety of continuing the prosecution of his application; and if after receiving such notice, the applicant persists in his claim for a patent, with or without amendment, the application shall be reexamined. No amendment shall introduce new matter into the disclosure of the invention.

(b) The Director shall prescribe regulations to provide for the continued examination of applications for patent at the request of the applicant. The Director may establish appropriate fees for such continued examination and shall provide a 50 percent reduction in such fees for small entities that qualify for reduced fees under section 41(h)(1) of this title.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-560, 582 (S. 1948 secs. 4403 and 4732(a)(10)(A)).)

35 U.S.C. 133 Time for prosecuting application.

Upon failure of the applicant to prosecute the application within six months after any action therein, of which notice has been given or mailed to the applicant, or within such shorter time, not less than thirty days, as fixed by the Director in such action, the application shall be regarded as abandoned by the parties thereto, unless it be shown to the satisfaction of the Director that such delay was unavoidable.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 134 Appeal to the Board of Patent Appeals and Interferences.

(a) **PATENT APPLICANT.**— An applicant for a patent, any of whose claims has been twice rejected, may appeal from the decision of the primary examiner to the Board of Patent Appeals and Interferences, having once paid the fee for such appeal.

(b) **PATENT OWNER.**— A patent owner in any reexamination proceeding may appeal from the final rejection of any claim by the primary examiner to the Board of Patent Appeals and Interferences, having once paid the fee for such appeal.

(c) **THIRD-PARTY.**— A third-party requester in an inter partes proceeding may appeal to the Board of Patent Appeals and Interferences from the final decision of the primary examiner favorable to the patentability of any original or proposed amended or new claim of a patent, having once paid the fee for such appeal.

(Amended Nov. 8, 1984, Public Law 98-622, sec. 204(b)(1), 98 Stat. 3388; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4605(b)); subsections (a)-(c) amended Nov. 2, 2002, Public Law 107-273, secs. 13106 and 13202, 116 Stat. 1901.)

35 U.S.C. 135 Interferences.

(a) Whenever an application is made for a patent which, in the opinion of the Director, would interfere with any pending application, or with any unexpired patent, an interference may be declared and the Director shall give notice of such declaration to the applicants, or applicant and patentee, as the case may be. The Board of Patent Appeals and Interferences shall determine questions of priority of the inventions and may determine questions of patentability. Any final decision, if adverse to the claim of an

applicant, shall constitute the final refusal by the Patent and Trademark Office of the claims involved, and the Director may issue a patent to the applicant who is adjudged the prior inventor. A final judgment adverse to a patentee from which no appeal or other review has been or can be taken or had shall constitute cancellation of the claims involved in the patent, and notice of such cancellation shall be endorsed on copies of the patent distributed after such cancellation by the Patent and Trademark Office.

(b)(1) A claim which is the same as, or for the same or substantially the same subject matter as, a claim of an issued patent may not be made in any application unless such a claim is made prior to one year from the date on which the patent was granted.

(2) A claim which is the same as, or for the same or substantially the same subject matter as, a claim of an application published under section 122(b) of this title may be made in an application filed after the application is published only if the claim is made before 1 year after the date on which the application is published.

(c) Any agreement or understanding between parties to an interference, including any collateral agreements referred to therein, made in connection with or in contemplation of the termination of the interference, shall be in writing and a true copy thereof filed in the Patent and Trademark Office before the termination of the interference as between the said parties to the agreement or understanding. If any party filing the same so requests, the copy shall be kept separate from the file of the interference, and made available only to Government agencies on written request, or to any person on a showing of good cause. Failure to file the copy of such agreement or understanding shall render permanently unenforceable such agreement or understanding and any patent of such parties involved in the interference or any patent subsequently issued on any application of such parties so involved. The Director may, however, on a showing of good cause for failure to file within the time prescribed, permit the filing of the agreement or understanding during the six-month period subsequent to the termination of the interference as between the parties to the agreement or understanding.

The Director shall give notice to the parties or their attorneys of record, a reasonable time prior to

said termination, of the filing requirement of this section. If the Director gives such notice at a later time, irrespective of the right to file such agreement or understanding within the six-month period on a showing of good cause, the parties may file such agreement or understanding within sixty days of the receipt of such notice.

Any discretionary action of the Director under this subsection shall be reviewable under section 10 of the Administrative Procedure Act.

(d) Parties to a patent interference, within such time as may be specified by the Director by regulation, may determine such contest or any aspect thereof by arbitration. Such arbitration shall be governed by the provisions of title 9 to the extent such title is not inconsistent with this section. The parties shall give notice of any arbitration award to the Director, and such award shall, as between the parties to the arbitration, be dispositive of the issues to which it relates. The arbitration award shall be unenforceable until such notice is given. Nothing in this subsection shall preclude the Director from determining patentability of the invention involved in the interference.

(Subsection (c) added Oct. 15, 1962, Public Law 87-831, 76 Stat. 958.)

(Subsections (a) and (c) amended, Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

(Subsection (a) amended Nov. 8, 1984, Public Law 98-622, sec. 202, 98 Stat. 3386.)

(Subsection (d) added Nov. 8, 1984, Public Law 98-622, sec. 105, 98 Stat. 3385.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-566, 582 (S. 1948 secs. 4507(11) and 4732(a)(10)(A)).)

CHAPTER 13 — REVIEW OF PATENT AND TRADEMARK OFFICE DECISION

Sec.

- 141 Appeal to Court of Appeals for the Federal Circuit.
- 142 Notice of appeal.
- 143 Proceedings on appeal.
- 144 Decision on appeal.
- 145 Civil action to obtain patent.
- 146 Civil action in case of interference.

35 U.S.C. 141 Appeal to the Court of Appeals for the Federal Circuit.

An applicant dissatisfied with the decision in an appeal to the Board of Patent Appeals and Interferences under section 134 of this title may appeal the decision to the United States Court of Appeals for the Federal Circuit. By filing such an appeal the applicant waives his or her right to proceed under section 145 of this title. A patent owner, or a third-party requester in an inter partes reexamination proceeding, who is in any reexamination proceeding dissatisfied with the final decision in an appeal to the Board of Patent Appeals and Interferences under section 134 may appeal the decision only to the United States Court of Appeals for the Federal Circuit. A party to an interference dissatisfied with the decision of the Board of Patent Appeals and Interferences on the interference may appeal the decision to the United States Court of Appeals for the Federal Circuit, but such appeal shall be dismissed if any adverse party to such interference, within twenty days after the appellant has filed notice of appeal in accordance with section 142 of this title, files notice with the Director that the party elects to have all further proceedings conducted as provided in section 146 of this title. If the appellant does not, within thirty days after filing of such notice by the adverse party, file a civil action under section 146, the decision appealed from shall govern the further proceedings in the case.

(Amended Apr. 2, 1982, Public Law 97-164, sec. 163(a)(7), (b)(2), 96 Stat. 49, 50; Nov. 8, 1984, Public Law 98-622, sec. 203(a), 98 Stat. 3387; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-571, 582 (S. 1948 secs. 4605(c) and 4732(a)(10)(A)); Nov. 2, 2002, Public Law 107-273, sec. 13106, 116 Stat. 1901.)

35 U.S.C. 142 Notice of appeal.

When an appeal is taken to the United States Court of Appeals for the Federal Circuit, the appellant shall file in the Patent and Trademark Office a written notice of appeal directed to the Director, within such time after the date of the decision from which the appeal is taken as the Director prescribes, but in no case less than 60 days after that date.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Apr. 2, 1982, Public Law 97-164, sec. 163(a)(7), 96 Stat. 49; Nov. 8, 1984, Public Law 98-620, sec. 414(a), 98 Stat. 3363; Nov. 29, 1999, Public Law 106-

113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 143 Proceedings on appeal.

With respect to an appeal described in section 142 of this title, the Director shall transmit to the United States Court of Appeals for the Federal Circuit a certified list of the documents comprising the record in the Patent and Trademark Office. The court may request that the Director forward the original or certified copies of such documents during the pendency of the appeal. In an ex parte case or any reexamination case, the Director shall submit to the court in writing the grounds for the decision of the Patent and Trademark Office, addressing all the issues involved in the appeal. The court shall, before hearing an appeal, give notice of the time and place of the hearing to the Director and the parties in the appeal.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Apr. 2, 1982, Public Law 97-164, sec. 163(a)(7), 96 Stat. 49; Nov. 8, 1984, Public Law 98-620, sec. 414(a), 98 Stat. 3363; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-571, 582 (S. 1948 secs. 4605(d) and 4732(a)(10)(A)); Nov. 2, 2002, Public Law 107-273, sec. 13202, 116 Stat. 1901.)

35 U.S.C. 144 Decision on appeal.

The United States Court of Appeals for the Federal Circuit shall review the decision from which an appeal is taken on the record before the Patent and Trademark Office. Upon its determination the court shall issue to the Director its mandate and opinion, which shall be entered of record in the Patent and Trademark Office and shall govern the further proceedings in the case.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Apr. 2, 1982, Public Law 97-164, sec. 163(a)(7), 96 Stat. 49; Nov. 8, 1984, Public Law 98-620, sec. 414(a), 98 Stat. 3363; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 145 Civil action to obtain patent.

An applicant dissatisfied with the decision of the Board of Patent Appeals and Interferences in an appeal under section 134(a) of this title may, unless appeal has been taken to the United States Court of Appeals for the Federal Circuit, have remedy by civil action against the Director in the United States District Court for the District of Columbia if commenced

within such time after such decision, not less than sixty days, as the Director appoints. The court may adjudge that such applicant is entitled to receive a patent for his invention, as specified in any of his claims involved in the decision of the Board of Patent Appeals and Interferences, as the facts in the case may appear, and such adjudication shall authorize the Director to issue such patent on compliance with the requirements of law. All the expenses of the proceedings shall be paid by the applicant.

(Amended Apr. 2, 1982, Public Law 97-164, sec. 163(a)(7), 96 Stat. 49; Nov. 8, 1984, Public Law 98-622, sec. 203(b), 98 Stat. 3387; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-571, 582 (S. 1948 secs. 4605(e) and 4732(a)(10)(A)).)

35 U.S.C. 146 Civil action in case of interference.

Any party to an interference dissatisfied with the decision of the Board of Patent Appeals and Interferences may have remedy by civil action, if commenced within such time after such decision, not less than sixty days, as the Director appoints or as provided in section 141 of this title, unless he has appealed to the United States Court of Appeals for the Federal Circuit, and such appeal is pending or has been decided. In such suits the record in the Patent and Trademark Office shall be admitted on motion of either party upon the terms and conditions as to costs, expenses, and the further cross-examination of the witnesses as the court imposes, without prejudice to the right of the parties to take further testimony. The testimony and exhibits of the record in the Patent and Trademark Office when admitted shall have the same effect as if originally taken and produced in the suit.

Such suit may be instituted against the party in interest as shown by the records of the Patent and Trademark Office at the time of the decision complained of, but any party in interest may become a party to the action. If there be adverse parties residing in a plurality of districts not embraced within the same state, or an adverse party residing in a foreign country, the United States District Court for the District of Columbia shall have jurisdiction and may issue summons against the adverse parties directed to the marshal of any district in which any adverse party resides. Summons against adverse parties residing in foreign countries may be served by publication or otherwise as the court directs. The Director shall not be a necessary party but he shall be notified of the filing of

the suit by the clerk of the court in which it is filed and shall have the right to intervene. Judgment of the court in favor of the right of an applicant to a patent shall authorize the Director to issue such patent on the filing in the Patent and Trademark Office of a certified copy of the judgment and on compliance with the requirements of law.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Apr. 2, 1982, Public Law 97-164, sec. 163(a)(7), 96 Stat. 49; Nov. 8, 1984, Public Law 98-622, sec. 203(c), 98 Stat. 3387; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 14 — ISSUE OF PATENT

Sec.

- 151 Issue of patent.
- 152 Issue of patent to assignee.
- 153 How issued.
- 154 Contents and term of patent; provisional rights.
- 155 Patent term extension.
- 155A Patent term restoration.
- 156 Extension of patent term.
- 157 Statutory invention registration.

35 U.S.C. 151 Issue of patent.

If it appears that applicant is entitled to a patent under the law, a written notice of allowance of the application shall be given or mailed to the applicant. The notice shall specify a sum, constituting the issue fee or a portion thereof, which shall be paid within three months thereafter.

Upon payment of this sum the patent shall issue, but if payment is not timely made, the application shall be regarded as abandoned.

Any remaining balance of the issue fee shall be paid within three months from the sending of a notice thereof, and, if not paid, the patent shall lapse at the termination of this three-month period. In calculating the amount of a remaining balance, charges for a page or less may be disregarded.

If any payment required by this section is not timely made, but is submitted with the fee for delayed payment and the delay in payment is shown to have been unavoidable, it may be accepted by the Director as though no abandonment or lapse had ever occurred.

(Amended July 24, 1965, Public Law 89-83, sec. 4, 79 Stat. 260; Jan. 2, 1975, Public Law 93-601, sec. 3, 88

Stat. 1956; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)); Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 152 Issue of patent to assignee.

Patents may be granted to the assignee of the inventor of record in the Patent and Trademark Office, upon the application made and the specification sworn to by the inventor, except as otherwise provided in this title.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 153 How issued.

Patents shall be issued in the name of the United States of America, under the seal of the Patent and Trademark Office, and shall be signed by the Director or have his signature placed thereon and shall be recorded in the Patent and Trademark Office.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)); Nov. 2, 2002, Public Law 107-273, sec. 13203, 116 Stat. 1902.)

35 U.S.C. 154 Contents and term of patent; provisional rights.

(a) IN GENERAL.—

(1) CONTENTS.—Every patent shall contain a short title of the invention and a grant to the patentee, his heirs or assigns, of the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States or importing the invention into the United States, and, if the invention is a process, of the right to exclude others from using, offering for sale or selling throughout the United States, or importing into the United States, products made by that process, referring to the specification for the particulars thereof.

(2) TERM.—Subject to the payment of fees under this title, such grant shall be for a term beginning on the date on which the patent issues and ending 20 years from the date on which the application for the patent was filed in the United States or, if the application contains a specific reference to an earlier filed application or applications under section 120, 121, or 365(c) of this title, from the date on which the earliest such application was filed.

(3) **PRIORITY.**—Priority under section 119, 365(a), or 365(b) of this title shall not be taken into account in determining the term of a patent.

(4) **SPECIFICATION AND DRAWING.**—A copy of the specification and drawing shall be annexed to the patent and be a part of such patent.

(b) **ADJUSTMENT OF PATENT TERM.**—

(1) **PATENT TERM GUARANTEES.**—

(A) **GUARANTEE OF PROMPT PATENT AND TRADEMARK OFFICE RESPONSES.**— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to the failure of the Patent and Trademark Office to—

(i) provide at least one of the notifications under section 132 of this title or a notice of allowance under section 151 of this title not later than 14 months after—

(I) the date on which an application was filed under section 111(a) of this title; or

(II) the date on which an international application fulfilled the requirements of section 371 of this title;

(ii) respond to a reply under section 132, or to an appeal taken under section 134, within 4 months after the date on which the reply was filed or the appeal was taken;

(iii) act on an application within 4 months after the date of a decision by the Board of Patent Appeals and Interferences under section 134 or 135 or a decision by a Federal court under section 141, 145, or 146 in a case in which allowable claims remain in the application; or

(iv) issue a patent within 4 months after the date on which the issue fee was paid under section 151 and all outstanding requirements were satisfied, the term of the patent shall be extended 1 day for each day after the end of the period specified in clause (i), (ii), (iii), or (iv), as the case may be, until the action described in such clause is taken.

(B) **GUARANTEE OF NO MORE THAN 3-YEAR APPLICATION PENDENCY.**— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to the failure of the United States Patent and Trademark Office to issue a patent within 3 years after the actual filing date of the application in the United States, not including—

(i) any time consumed by continued examination of the application requested by the applicant under section 132(b);

(ii) any time consumed by a proceeding under section 135(a), any time consumed by the imposition of an order under section 181, or any time consumed by appellate review by the Board of Patent Appeals and Interferences or by a Federal court; or

(iii) any delay in the processing of the application by the United States Patent and Trademark Office requested by the applicant except as permitted by paragraph (3)(C), the term of the patent shall be extended 1 day for each day after the end of that 3-year period until the patent is issued.

(C) **GUARANTEE OR ADJUSTMENTS FOR DELAYS DUE TO INTERFERENCES, SECRECY ORDERS, AND APPEALS.**— Subject to the limitations under paragraph (2), if the issue of an original patent is delayed due to—

(i) a proceeding under section 135(a);

(ii) the imposition of an order under section 181; or

(iii) appellate review by the Board of Patent Appeals and Interferences or by a Federal court in a case in which the patent was issued under a decision in the review reversing an adverse determination of patentability, the term of the patent shall be extended 1 day for each day of the pendency of the proceeding, order, or review, as the case may be.

(2) **LIMITATIONS.**—

(A) **IN GENERAL.**— To the extent that periods of delay attributable to grounds specified in paragraph (1) overlap, the period of any adjustment granted under this subsection shall not exceed the actual number of days the issuance of the patent was delayed.

(B) **DISCLAIMED TERM.**— No patent the term of which has been disclaimed beyond a specified date may be adjusted under this section beyond the expiration date specified in the disclaimer.

(C) **REDUCTION OF PERIOD OF ADJUSTMENT.**—

(i) The period of adjustment of the term of a patent under paragraph (1) shall be reduced by a period equal to the period of time during which the applicant failed to engage in reasonable efforts to conclude prosecution of the application.

(ii) With respect to adjustments to patent term made under the authority of paragraph (1)(B), an applicant shall be deemed to have failed to engage in reasonable efforts to conclude processing or examination of an application for the cumulative total of any periods of time in excess of 3 months that are taken to respond to a notice from the Office making any rejection, objection, argument, or other request, measuring such 3-month period from the date the notice was given or mailed to the applicant.

(iii) The Director shall prescribe regulations establishing the circumstances that constitute a failure of an applicant to engage in reasonable efforts to conclude processing or examination of an application.

(3) PROCEDURES FOR PATENT TERM ADJUSTMENT DETERMINATION.—

(A) The Director shall prescribe regulations establishing procedures for the application for and determination of patent term adjustments under this subsection.

(B) Under the procedures established under subparagraph (A), the Director shall—

(i) make a determination of the period of any patent term adjustment under this subsection, and shall transmit a notice of that determination with the written notice of allowance of the application under section 151; and

(ii) provide the applicant one opportunity to request reconsideration of any patent term adjustment determination made by the Director.

(C) The Director shall reinstate all or part of the cumulative period of time of an adjustment under paragraph (2)(C) if the applicant, prior to the issuance of the patent, makes a showing that, in spite of all due care, the applicant was unable to respond within the 3-month period, but in no case shall more than three additional months for each such response beyond the original 3-month period be reinstated.

(D) The Director shall proceed to grant the patent after completion of the Director's determination of a patent term adjustment under the procedures established under this subsection, notwithstanding any appeal taken by the applicant of such determination.

(4) APPEAL OF PATENT TERM ADJUSTMENT DETERMINATION.—

(A) An applicant dissatisfied with a determination made by the Director under paragraph (3) shall have remedy by a civil action against the Director filed in the United States District Court for the District of Columbia within 180 days after the grant of the patent. Chapter 7 of title 5 shall apply to such action. Any final judgment resulting in a change to the period of adjustment of the patent term shall be served on the Director, and the Director shall thereafter alter the term of the patent to reflect such change.

(B) The determination of a patent term adjustment under this subsection shall not be subject to appeal or challenge by a third party prior to the grant of the patent.

(c) CONTINUATION.—

(1) DETERMINATION.—The term of a patent that is in force on or that results from an application filed before the date that is 6 months after the date of the enactment of the Uruguay Round Agreements Act shall be the greater of the 20-year term as provided in subsection (a), or 17 years from grant, subject to any terminal disclaimers.

(2) REMEDIES.—The remedies of sections 283, 284, and 285 of this title shall not apply to acts which —

(A) were commenced or for which substantial investment was made before the date that is 6 months after the date of the enactment of the Uruguay Round Agreements Act; and

(B) became infringing by reason of paragraph (1).

(3) REMUNERATION.—The acts referred to in paragraph (2) may be continued only upon the payment of an equitable remuneration to the patentee that is determined in an action brought under chapter 28 and chapter 29 (other than those provisions excluded by paragraph (2)) of this title.

(d) PROVISIONAL RIGHTS.—

(1) IN GENERAL.— In addition to other rights provided by this section, a patent shall include the right to obtain a reasonable royalty from any person who, during the period beginning on the date of publication of the application for such patent under section 122(b), or in the case of an international application filed under the treaty defined in section 351(a) designating the United States under Article 21(2)(a)

of such treaty, the date of publication of the application, and ending on the date the patent is issued—

(A) (i) makes, uses, offers for sale, or sells in the United States the invention as claimed in the published patent application or imports such an invention into the United States; or

(ii) if the invention as claimed in the published patent application is a process, uses, offers for sale, or sells in the United States or imports into the United States products made by that process as claimed in the published patent application; and

(B) had actual notice of the published patent application and, in a case in which the right arising under this paragraph is based upon an international application designating the United States that is published in a language other than English, had a translation of the international application into the English language.

(2) **RIGHT BASED ON SUBSTANTIALLY IDENTICAL INVENTIONS.**— The right under paragraph (1) to obtain a reasonable royalty shall not be available under this subsection unless the invention as claimed in the patent is substantially identical to the invention as claimed in the published patent application.

(3) **TIME LIMITATION ON OBTAINING A REASONABLE ROYALTY.**— The right under paragraph (1) to obtain a reasonable royalty shall be available only in an action brought not later than 6 years after the patent is issued. The right under paragraph (1) to obtain a reasonable royalty shall not be affected by the duration of the period described in paragraph (1).

(4) **REQUIREMENTS FOR INTERNATIONAL APPLICATIONS.**—

(A) **EFFECTIVE DATE.**— The right under paragraph (1) to obtain a reasonable royalty based upon the publication under the treaty defined in section 351(a) of an international application designating the United States shall commence on the date of publication under the treaty of the international application, or, if the publication under the treaty of the international application is in a language other than English, on the date on which the Patent and Trademark Office receives a translation of the publication in the English language.

(B) **COPIES.**— The Director may require the applicant to provide a copy of the international application and a translation thereof.

(Subsection (d) added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-564 (S. 1948 sec. 4504).)

(Subsection (b)(4) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904; subsection (d)(4)(A) amended Nov. 2, 2002, Public Law 107-273, sec. 13204, 116 Stat. 1902.)

35 U.S.C. 155 Patent term extension.

Notwithstanding the provisions of section 154, the term of a patent which encompasses within its scope a composition of matter or a process for using such composition shall be extended if such composition or process has been subjected to a regulatory review by the Federal Food and Drug Administration pursuant to the Federal Food, Drug and Cosmetic Act leading to the publication of regulation permitting the interstate distribution and sale of such composition or process and for which there has thereafter been a stay of regulation of approval imposed pursuant to section 409 of the Federal Food, Drug and Cosmetic Act, which stay was in effect on January 1, 1981, by a length of time to be measured from the date such stay of regulation of approval was imposed until such proceedings are finally resolved and commercial marketing permitted. The patentee, his heirs, successors, or assigns shall notify the Director within 90 days of the date of enactment of this section or the date the stay of regulation of approval has been removed, whichever is later, of the number of the patent to be extended and the date the stay was imposed and the date commercial marketing was permitted. On receipt of such notice, the Director shall promptly issue to the owner of record of the patent a certificate of extension, under seal, stating the fact and length of the extension and identifying the composition of matter or process for using such composition to which such extension is

applicable. Such certificate shall be recorded in the official file of each patent extended and such certificate shall be considered as part of the original patent, and an appropriate notice shall be published in the Official Gazette of the Patent and Trademark Office.

(Added Jan. 4, 1983, Public Law 97-414, sec. 11(a), 96 Stat. 2065; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 secs. 4732(a)(6) and 4732(a)(10)(A)).)

35 U.S.C. 155A Patent term restoration.

(a) Notwithstanding section 154 of this title, the term of each of the following patents shall be extended in accordance with this section:

(1) Any patent which encompasses within its scope a composition of matter which is a new drug product, if during the regulatory review of the product by the Federal Food and Drug Administration —

(A) the Federal Food and Drug Administration notified the patentee, by letter dated February 20, 1976, that such product's new drug application was not approvable under section 505(b)(1) of the Federal Food, Drug and Cosmetic Act;

(B) in 1977 the patentee submitted to the Federal Food and Drug Administration the results of a health effects test to evaluate the carcinogenic potential of such product;

(C) the Federal Food and Drug Administration approved, by letter dated December 18, 1979, the new drug application for such application; and

(D) the Federal Food and Drug Administration approved, by letter dated May 26, 1981, a supplementary application covering the facility for the production of such product.

(2) Any patent which encompasses within its scope a process for using the composition described in paragraph (1).

(b) The term of any patent described in subsection (a) shall be extended for a period equal to the period beginning February 20, 1976, and ending May 26, 1981, and such patent shall have the effect as if originally issued with such extended term.

(c) The patentee of any patent described in subsection (a) of this section shall, within ninety days after the date of enactment of this section, notify the Director of the number of any patent so extended. On receipt of such notice, the Director shall confirm such extension by placing a notice thereof in the official file of such patent and publishing an appropriate

notice of such extension in the *Official Gazette* of the Patent and Trademark Office.

(Added Oct. 13, 1983, Public Law 98-127, sec. 4(a), 97 Stat. 832; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 secs. 4732(a)(7) and 4732(a)(10)(A)).)

35 U.S.C. 156 Extension of patent term.

(a) The term of a patent which claims a product, a method of using a product, or a method of manufacturing a product shall be extended in accordance with this section from the original expiration date of the patent, which shall include any patent term adjustment granted under section 154(b) if —

(1) the term of the patent has not expired before an application is submitted under subsection (d)(1) for its extension;

(2) the term of the patent has never been extended under subsection (e)(1) of this section;

(3) an application for extension is submitted by the owner of record of the patent or its agent and in accordance with the requirements of paragraphs (1) through (4) of subsection (d);

(4) the product has been subject to a regulatory review period before its commercial marketing or use;

(5)(A) except as provided in subparagraph (B) or (C), the permission for the commercial marketing or use of the product after such regulatory review period is the first permitted commercial marketing or use of the product under the provision of law under which such regulatory review period occurred;

(B) in the case of a patent which claims a method of manufacturing the product which primarily uses recombinant DNA technology in the manufacture of the product, the permission for the commercial marketing or use of the product after such regulatory period is the first permitted commercial marketing or use of a product manufactured under the process claimed in the patent; or

(C) for purposes of subparagraph (A), in the case of a patent which —

(i) claims a new animal drug or a veterinary biological product which (I) is not covered by the claims in any other patent which has been extended, and (II) has received permission for the commercial marketing or use in non-food-producing animals and in food-producing animals, and

(ii) was not extended on the basis of the regulatory review period for use in non-food-producing animals, the permission for the commercial marketing or use of the drug or product after the regulatory review period for use in food-producing animals is the first permitted commercial marketing or use of the drug or product for administration to a food-producing animal.

The product referred to in paragraphs (4) and (5) is hereinafter in this section referred to as the “approved product.”

(b) Except as provided in subsection (d)(5)(F), the rights derived from any patent the term of which is extended under this section shall during the period during which the term of the patent is extended —

(1) in the case of a patent which claims a product, be limited to any use approved for the product —

(A) before the expiration of the term of the patent —

(i) under the provision of law under which the applicable regulatory review occurred, or

(ii) under the provision of law under which any regulatory review described in paragraph (1), (4), or (5) of subsection (g) occurred, and

(B) on or after the expiration of the regulatory review period upon which the extension of the patent was based;

(2) in the case of a patent which claims a method of using a product, be limited to any use claimed by the patent and approved for the product —

(A) before the expiration of the term of the patent —

(i) under any provision of law under which an applicable regulatory review occurred, and

(ii) under the provision of law under which any regulatory review described in paragraph (1), (4), or (5) of subsection (g) occurred, and

(B) on or after the expiration of the regulatory review period upon which the extension of the patent was based; and

(3) in the case of a patent which claims a method of manufacturing a product, be limited to the method of manufacturing as used to make —

(A) the approved product, or

(B) the product if it has been subject to a regulatory review period described in paragraph (1), (4), or (5) of subsection (g).

As used in this subsection, the term “product” includes an approved product.

(c) The term of a patent eligible for extension under subsection (a) shall be extended by the time equal to the regulatory review period for the approved product which period occurs after the date the patent is issued, except that—

(1) each period of the regulatory review period shall be reduced by any period determined under subsection (d)(2)(B) during which the applicant for the patent extension did not act with due diligence during such period of the regulatory review period;

(2) after any reduction required by paragraph (1), the period of extension shall include only one-half of the time remaining in the periods described in paragraphs (1)(B)(i), (2)(B)(i), (3)(B)(i), (4)(B)(i), and (5)(B)(i) of subsection (g);

(3) if the period remaining in the term of a patent after the date of the approval of the approved product under the provision of law under which such regulatory review occurred when added to the regulatory review period as revised under paragraphs (1) and (2) exceeds fourteen years, the period of extension shall be reduced so that the total of both such periods does not exceed fourteen years, and

(4) in no event shall more than one patent be extended under subsection (e)(i) for the same regulatory review period for any product.

(d)(1) To obtain an extension of the term of a patent under this section, the owner of record of the patent or its agent shall submit an application to the Director. Except as provided in paragraph (5), such an application may only be submitted within the sixty-day period beginning on the date the product received permission under the provision of law under which the applicable regulatory review period occurred for commercial marketing or use. The application shall contain —

(A) the identity of the approved product and the Federal statute under which regulatory review occurred;

(B) the identity of the patent for which an extension is being sought and the identity of each claim of such patent;

(C) information to enable the Director to determine under subsections (a) and (b) the eligibility of a patent for extension and the rights that will be derived from the extension and information to enable

the Director and the Secretary of Health and Human Services or the Secretary of Agriculture to determine the period of the extension under subsection (g);

(D) a brief description of the activities undertaken by the applicant during the applicable regulatory review period with respect to the approved product and the significant dates applicable to such activities; and

(E) such patent or other information as the Director may require.

(2)(A) Within 60 days of the submittal of an application for extension of the term of a patent under paragraph (1), the Director shall notify —

(i) the Secretary of Agriculture if the patent claims a drug product or a method of using or manufacturing a drug product and the drug product is subject to the Virus-Serum-Toxin Act, and

(ii) the Secretary of Health and Human Services if the patent claims any other drug product, a medical device, or a food additive or color additive or a method of using or manufacturing such a product, device, or additive and if the product, device, and additive are subject to the Federal Food, Drug and Cosmetic Act, of the extension application and shall submit to the Secretary who is so notified a copy of the application. Not later than 30 days after the receipt of an application from the Director, the Secretary reviewing the application shall review the dates contained in the application pursuant to paragraph (1)(C) and determine the applicable regulatory review period, shall notify the Director of the determination, and shall publish in the Federal Register a notice of such determination.

(B)(i) If a petition is submitted to the Secretary making the determination under subparagraph (A), not later than 180 days after the publication of the determination under subparagraph (A), upon which it may reasonably be determined that the applicant did not act with due diligence during the applicable regulatory review period, the Secretary making the determination shall, in accordance with regulations promulgated by the Secretary, determine if the applicant acted with due diligence during the applicable regulatory review period. The Secretary making the determination shall make such determination not later than 90 days after the receipt of such a petition. For a drug product, device, or additive subject to the Federal Food, Drug, and Cosmetic Act or the Public

Health Service Act, the Secretary may not delegate the authority to make the determination prescribed by this clause to an office below the Office of the Commissioner of Food and Drugs. For a product subject to the Virus-Serum-Toxin Act, the Secretary of Agriculture may not delegate the authority to make the determination prescribed by this clause to an office below the Office of the Assistant Secretary for Marketing and Inspection Services.

(ii) The Secretary making a determination under clause (i) shall notify the Director of the determination and shall publish in the Federal Register a notice of such determination together with the factual and legal basis for such determination. Any interested person may request, within the 60-day period beginning on the publication of a determination, the Secretary making the determination to hold an informal hearing on the determination. If such a request is made within such period, such Secretary shall hold such hearing not later than 30 days after the date of the request, or at the request of the person making the request, not later than 60 days after such date. The Secretary who is holding the hearing shall provide notice of the hearing to the owner of the patent involved and to any interested person and provide the owner and any interested person an opportunity to participate in the hearing. Within 30 days after the completion of the hearing, such Secretary shall affirm or revise the determination which was the subject of the hearing and notify the Director of any revision of the determination and shall publish any such revision in the Federal Register.

(3) For the purposes of paragraph (2)(B), the term “due diligence” means that degree of attention, continuous directed effort, and timeliness as may reasonably be expected from, and are ordinarily exercised by, a person during a regulatory review period.

(4) An application for the extension of the term of a patent is subject to the disclosure requirements prescribed by the Director.

(5)(A) If the owner of record of the patent or its agent reasonably expects that the applicable regulatory review period described in paragraphs (1)(B)(ii), (2)(B)(ii), (3)(B)(ii), (4)(B)(ii), or (5)(B)(ii) of subsection (g) that began for a product that is the subject of such patent may extend beyond the expiration of the patent term in effect, the owner or its agent may submit an application to the Director for an

interim extension during the period beginning 6 months, and ending 15 days before such term is due to expire. The application shall contain—

(i) the identity of the product subject to regulating review and the Federal statute under which such review is occurring;

(ii) the identity of the patent for which interim extension is being sought and the identity of each claim of such patent which claims the product under regulatory review or a method of using or manufacturing the product;

(iii) information to enable the Director to determine under subsection (a)(1), (2), and (3) the eligibility of a patent for extension;

(iv) a brief description of the activities undertaken by the applicant during the applicable regulatory review period to date with respect to the product under review and the significant dates applicable to such activities; and

(v) such patent or other information as the Director may require.

(B) If the Director determines that, except for permission to market or use the product commercially, the patent would be eligible for an extension of the patent term under this section, the Director shall publish in the Federal Register a notice of such determination, including the identity of the product under regulatory review, and shall issue to the applicant a certificate of interim extension for a period of not more than 1 year.

(C) The owner of record of a patent, or its agent, for which an interim extension has been granted under subparagraph (B), may apply for not more than 4 subsequent interim extensions under this paragraph, except that, in the case of a patent subject to subsection (g)(6)(C), the owner of record of the patent, or its agent, may apply for only 1 subsequent interim extension under this paragraph. Each such subsequent application shall be made during the period beginning 60 days before, and ending 30 days before, the expiration of the preceding interim extension.

(D) Each certificate of interim extension under this paragraph shall be recorded in the official file of the patent and shall be considered part of the original patent.

(E) Any interim extension granted under this paragraph shall terminate at the end of the 60-day

period beginning on the day on which the product involved receives permission for commercial marketing or use, except that, if within that 60-day period, the applicant notifies the Director of such permission and submits any additional information under paragraph (1) of this subsection not previously contained in the application for interim extension, the patent shall be further extended, in accordance with the provisions of this section—

(i) for not to exceed 5 years from the date of expiration of the original patent term; or

(ii) if the patent is subject to subsection (g)(6)(C), from the date on which the product involved receives approval for commercial marketing or use.

(F) The rights derived from any patent the term of which is extended under this paragraph shall, during the period of interim extension—

(i) in the case of a patent which claims a product, be limited to any use then under regulatory review;

(ii) in the case of a patent which claims a method of using a product, be limited to any use claimed by the patent then under regulatory review; and

(iii) in the case of a patent which claims a method of manufacturing a product, be limited to the method of manufacturing as used to make the product then under regulatory review.

(e)(1) A determination that a patent is eligible for extension may be made by the Director solely on the basis of the representations contained in the application for the extension. If the Director determines that a patent is eligible for extension under subsection (a) and that the requirements of paragraphs (1) through (4) of subsection (d) have been complied with, the Director shall issue to the applicant for the extension of the term of the patent a certificate of extension, under seal, for the period prescribed by subsection (c). Such certificate shall be recorded in the official file of the patent and shall be considered as part of the original patent.

(2) If the term of a patent for which an application has been submitted under subsection (d)(1) would expire before a certificate of extension is issued or denied under paragraph (1) respecting the application, the Director shall extend, until such determination is made, the term of the patent for peri-

ods of up to one year if he determines that the patent is eligible for extension.

(f) For purposes of this section:

(1) The term “product” means:

(A) A drug product.

(B) Any medical device, food additive, or color additive subject to regulation under the Federal Food, Drug, and Cosmetic Act.

(2) The term “drug product” means the active ingredient of—

(A) a new drug, antibiotic drug, or human biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Public Health Service Act) or

(B) a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Virus-Serum-Toxin Act) which is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes involving site specific genetic manipulation techniques, including any salt or ester of the active ingredient, as a single entity or in combination with another active ingredient.

(3) The term “major health or environmental effects test” means a test which is reasonably related to the evaluation of the health or environmental effects of a product, which requires at least six months to conduct, and the data from which is submitted to receive permission for commercial marketing or use. Periods of analysis or evaluation of test results are not to be included in determining if the conduct of a test required at least six months.

(4)(A) Any reference to section 351 is a reference to section 351 of the Public Health Service Act.

(B) Any reference to section 503, 505, 512, or 515 is a reference to section 503, 505, 512, or 515 of the Federal Food, Drug and Cosmetic Act.

(C) Any reference to the Virus-Serum-Toxin Act is a reference to the Act of March 4, 1913 (21 U.S.C. 151 - 158).

(5) The term “informal hearing” has the meaning prescribed for such term by section 201(y) of the Federal Food, Drug and Cosmetic Act.

(6) The term “patent” means a patent issued by the United States Patent and Trademark Office.

(7) The term “date of enactment” as used in this section means September 24, 1984, for human

drug product, a medical device, food additive, or color additive.

(8) The term “date of enactment” as used in this section means the date of enactment of the Generic Animal Drug and Patent Term Restoration Act for an animal drug or a veterinary biological product.

(g) For purposes of this section, the term “regulatory review period” has the following meanings:

(1)(A) In the case of a product which is a new drug, antibiotic drug, or human biological product, the term means the period described in subparagraph (B) to which the limitation described in paragraph (6) applies.

(B) The regulatory review period for a new drug, antibiotic drug, or human biological product is the sum of —

(i) the period beginning on the date an exemption under subsection (i) of section 505 or subsection (d) of section 507 became effective for the approved product and ending on the date an application was initially submitted for such drug product under section 351, 505, or 507, and

(ii) the period beginning on the date the application was initially submitted for the approved product under section 351, subsection (b) of section 505, or section 507 and ending on the date such application was approved under such section.

(2)(A) In the case of a product which is a food additive or color additive, the term means the period described in subparagraph (B) to which the limitation described in paragraph (6) applies.

(B) The regulatory review period for a food or color additive is the sum of —

(i) the period beginning on the date a major health or environmental effects test on the additive was initiated and ending on the date a petition was initially submitted with respect to the product under the Federal Food, Drug, and Cosmetic Act requesting the issuance of a regulation for use of the product, and

(ii) the period beginning on the date a petition was initially submitted with respect to the product under the Federal Food, Drug, and Cosmetic Act requesting the issuance of a regulation for use of the product, and ending on the date such regulation became effective or, if objections were filed to such regulation, ending on the date such objections were

resolved and commercial marketing was permitted or, if commercial marketing was permitted and later revoked pending further proceedings as a result of such objections, ending on the date such proceedings were finally resolved and commercial marketing was permitted.

(3)(A) In the case of a product which is a medical device, the term means the period described in subparagraph (B) to which the limitation described in paragraph (6) applies.

(B) The regulatory review period for a medical device is the sum of —

(i) the period beginning on the date a clinical investigation on humans involving the device was begun and ending on the date an application was initially submitted with respect to the device under section 515, and

(ii) the period beginning on the date an application was initially submitted with respect to the device under section 515 and ending on the date such application was approved under such Act or the period beginning on the date a notice of completion of a product development protocol was initially submitted under section 515(f)(5) and ending on the date the protocol was declared completed under section 515(f)(6).

(4)(A) In the case of a product which is a new animal drug, the term means the period described in subparagraph (B) to which the limitation described in paragraph (6) applies.

(B) The regulatory review period for a new animal drug product is the sum of —

(i) the period beginning on the earlier of the date a major health or environmental effects test on the drug was initiated or the date an exemption under subsection (j) of section 512 became effective for the approved new animal drug product and ending on the date an application was initially submitted for such animal drug product under section 512, and

(ii) the period beginning on the date the application was initially submitted for the approved animal drug product under subsection (b) of section 512 and ending on the date such application was approved under such section.

(5)(A) In the case of a product which is a veterinary biological product, the term means the period described in subparagraph (B) to which the limitation described in paragraph (6) applies.

(B) The regulatory period for a veterinary biological product is the sum of —

(i) the period beginning on the date the authority to prepare an experimental biological product under the Virus- Serum-Toxin Act became effective and ending on the date an application for a license was submitted under the Virus-Serum-Toxin Act, and

(ii) the period beginning on the date an application for a license was initially submitted for approval under the Virus-Serum-Toxin Act and ending on the date such license was issued.

(6) A period determined under any of the preceding paragraphs is subject to the following limitations:

(A) If the patent involved was issued after the date of the enactment of this section, the period of extension determined on the basis of the regulatory review period determined under any such paragraph may not exceed five years.

(B) If the patent involved was issued before the date of the enactment of this section and —

(i) no request for an exemption described in paragraph (1)(B) or (4)(B) was submitted and no request for the authority described in paragraph (5)(B) was submitted,

(ii) no major health or environment effects test described in paragraph (2)(B) or (4)(B) was initiated and no petition for a regulation or application for registration described in such paragraph was submitted, or

(iii) no clinical investigation described in paragraph (3) was begun or product development protocol described in such paragraph was submitted, before such date for the approved product the period of extension determined on the basis of the regulatory review period determined under any such paragraph may not exceed five years.

(C) If the patent involved was issued before the date of the enactment of this section and if an action described in subparagraph (B) was taken before the date of enactment of this section with respect to the approved product and the commercial marketing or use of the product has not been approved before such date, the period of extension determined on the basis of the regulatory review period determined under such paragraph may not exceed two years or in the case of an approved product which is a new animal drug or veterinary biological product (as

those terms are used in the Federal Food, Drug, and Cosmetic Act or the Virus-Serum-Toxin Act), three years.

(h) The Director may establish such fees as the Director determines appropriate to cover the costs to the Office of receiving and acting upon applications under this section.

(Added Sept. 24, 1984, Public Law 98-417, sec. 201(a), 98 Stat. 1598; amended Nov. 16, 1988, Public Law 100-670, sec. 201(a)-(h), 102 Stat. 3984; Dec. 3, 1993, Public Law 103-179, secs. 5, 6, 107 Stat. 2040, 2042; Dec. 8, 1994, Public Law 103-465, sec. 532(c)(1), 108 Stat. 4987.)

(Subsection (f) amended Nov. 21, 1997, Public Law 105-115, sec. 125(b)(2)(P), 111 Stat. 2326.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-560, 582 (S. 1948 secs. 4404 and 4732(a)(10)(A)).)

(Subsections (b)(3)(B), (d)(2)(B)(i), and (g)(6)(B)(iii) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904.)

35 U.S.C. 157 Statutory invention registration.

(a) Notwithstanding any other provision of this title, the Director is authorized to publish a statutory invention registration containing the specification and drawings of a regularly filed application for a patent without examination if the applicant —

(1) meets the requirements of section 112 of this title;

(2) has complied with the requirements for printing, as set forth in regulations of the Director;

(3) waives the right to receive a patent on the invention within such period as may be prescribed by the Director; and

(4) pays application, publication, and other processing fees established by the Director.

If an interference is declared with respect to such an application, a statutory invention registration may not be published unless the issue of priority of invention is finally determined in favor of the applicant.

(b) The waiver under subsection (a)(3) of this section by an applicant shall take effect upon publication of the statutory invention registration.

(c) A statutory invention registration published pursuant to this section shall have all of the attributes specified for patents in this title except those specified

in section 183 and sections 271 through 289 of this title. A statutory invention registration shall not have any of the attributes specified for patents in any other provision of law other than this title. A statutory invention registration published pursuant to this section shall give appropriate notice to the public, pursuant to regulations which the Director shall issue, of the preceding provisions of this subsection. The invention with respect to which a statutory invention certificate is published is not a patented invention for purposes of section 292 of this title.

(d) The Director shall report to the Congress annually on the use of statutory invention registrations. Such report shall include an assessment of the degree to which agencies of the federal government are making use of the statutory invention registration system, the degree to which it aids the management of federally developed technology, and an assessment of the cost savings to the Federal Government of the uses of such procedures.

(Added Nov. 8, 1984, Public Law 98-622, sec. 102(a), 98 Stat. 3383; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582, 583 (S. 1948 secs. 4732(a)(10)(A) and 4732(a)(11)).)

CHAPTER 15 — PLANT PATENTS

Sec.

161 Patents for plants.

162 Description, claim.

163 Grant.

164 Assistance of the Department of Agriculture.

35 U.S.C. 161 Patents for plants.

Whoever invents or discovers and asexually reproduces any distinct and new variety of plant, including cultivated sports, mutants, hybrids, and newly found seedlings, other than a tuber propagated plant or a plant found in an uncultivated state, may obtain a patent therefor, subject to the conditions and requirements of this title.

The provisions of this title relating to patents for inventions shall apply to patents for plants, except as otherwise provided.

(Amended Sept. 3, 1954, 68 Stat. 1190.)

35 U.S.C. 162 Description, claim.

No plant patent shall be declared invalid for non-compliance with section 112 of this title if the description is as complete as is reasonably possible.

The claim in the specification shall be in formal terms to the plant shown and described.

35 U.S.C. 163 Grant.

In the case of a plant patent, the grant shall include the right to exclude others from asexually reproducing the plant, and from using, offering for sale, or selling the plant so reproduced, or any of its parts, throughout the United States, or from importing the plant so reproduced, or any parts thereof, into the United States.

(Amended Oct. 27, 1998, Public Law 105-289, sec. 3, 112 Stat. 2781.)

35 U.S.C. 164 Assistance of the Department of Agriculture.

The President may by Executive order direct the Secretary of Agriculture, in accordance with the requests of the Director, for the purpose of carrying into effect the provisions of this title with respect to plants (1) to furnish available information of the Department of Agriculture, (2) to conduct through the appropriate bureau or division of the Department research upon special problems, or (3) to detail to the Director officers and employees of the Department.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 16 — DESIGNS

Sec.

- 171 Patents for designs.
- 172 Right of priority.
- 173 Term of design patent.

35 U.S.C. 171 Patents for designs.

Whoever invents any new, original, and ornamental design for an article of manufacture may obtain a patent therefor, subject to the conditions and requirements of this title.

The provisions of this title relating to patents for inventions shall apply to patents for designs, except as otherwise provided.

35 U.S.C. 172 Right of priority.

The right of priority provided for by subsections (a) through (d) of section 119 of this title and the time specified in section 102(d) shall be six months in the

case of designs. The right of priority provided for by section 119(e) of this title shall not apply to designs.

(Amended Dec. 8, 1994, Public Law 103-465, sec. 532(c)(2), 108 Stat. 4987.)

35 U.S.C. 173 Term of design patent.

Patents for designs shall be granted for the term of fourteen years from the date of grant.

(Amended Aug. 27, 1982, Public Law 97-247, sec. 16, 96 Stat. 321; Dec. 8, 1994, Public Law 103-465, sec. 532(c)(3), 108 Stat. 4987.)

CHAPTER 17 — SECRECY OF CERTAIN INVENTIONS AND FILING APPLICATIONS IN FOREIGN COUNTRIES

Sec.

- 181 Secrecy of certain inventions and withholding of patent.
- 182 Abandonment of invention for unauthorized disclosure.
- 183 Right to compensation.
- 184 Filing of application in foreign country.
- 185 Patent barred for filing without license.
- 186 Penalty.
- 187 Nonapplicability to certain persons.
- 188 Rules and regulations, delegation of power.

35 U.S.C. 181 Secrecy of certain inventions and withholding of patent.

Whenever publication or disclosure by the publication of an application or by the grant of a patent on an invention in which the Government has a property interest might, in the opinion of the head of the interested Government agency, be detrimental to the national security, the Commissioner of Patents upon being so notified shall order that the invention be kept secret and shall withhold the publication of an application or the grant of a patent therefor under the conditions set forth hereinafter.

Whenever the publication or disclosure of an invention by the publication of an application or by the granting of a patent, in which the Government does not have a property interest, might, in the opinion of the Commissioner of Patents, be detrimental to the national security, he shall make the application for patent in which such invention is disclosed available for inspection to the Atomic Energy Commission, the Secretary of Defense, and the chief officer of any other department or agency of the Government desig-

nated by the President as a defense agency of the United States.

Each individual to whom the application is disclosed shall sign a dated acknowledgment thereof, which acknowledgment shall be entered in the file of the application. If, in the opinion of the Atomic Energy Commission, the Secretary of a Defense Department, or the chief officer of another department or agency so designated, the publication or disclosure of the invention by the publication of an application or by the granting of a patent therefor would be detrimental to the national security, the Atomic Energy Commission, the Secretary of a Defense Department, or such other chief officer shall notify the Commissioner of Patents and the Commissioner of Patents shall order that the invention be kept secret and shall withhold the publication of the application or the grant of a patent for such period as the national interest requires, and notify the applicant thereof. Upon proper showing by the head of the department or agency who caused the secrecy order to be issued that the examination of the application might jeopardize the national interest, the Commissioner of Patents shall thereupon maintain the application in a sealed condition and notify the applicant thereof. The owner of an application which has been placed under a secrecy order shall have a right to appeal from the order to the Secretary of Commerce under rules prescribed by him.

An invention shall not be ordered kept secret and the publication of an application or the grant of a patent withheld for a period of more than one year. The Commissioner of Patents shall renew the order at the end thereof, or at the end of any renewal period, for additional periods of one year upon notification by the head of the department or the chief officer of the agency who caused the order to be issued that an affirmative determination has been made that the national interest continues to so require. An order in effect, or issued, during a time when the United States is at war, shall remain in effect for the duration of hostilities and one year following cessation of hostilities. An order in effect, or issued, during a national emergency declared by the President shall remain in effect for the duration of the national emergency and six months thereafter. The Commissioner of Patents may rescind any order upon notification by the heads of the departments and the chief officers of the agencies who

caused the order to be issued that the publication or disclosure of the invention is no longer deemed detrimental to the national security.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-566, 582 (S. 1948 secs. 4507(7) and 4732(a)(10)(B)).)

35 U.S.C. 182 Abandonment of invention for unauthorized disclosure.

The invention disclosed in an application for patent subject to an order made pursuant to section 181 of this title may be held abandoned upon its being established by the Commissioner of Patents that in violation of said order the invention has been published or disclosed or that an application for a patent therefor has been filed in a foreign country by the inventor, his successors, assigns, or legal representatives, or anyone in privity with him or them, without the consent of the Commissioner of Patents. The abandonment shall be held to have occurred as of the time of violation. The consent of the Commissioner of Patents shall not be given without the concurrence of the heads of the departments and the chief officers of the agencies who caused the order to be issued. A holding of abandonment shall constitute forfeiture by the applicant, his successors, assigns, or legal representatives, or anyone in privity with him or them, of all claims against the United States based upon such invention.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(B)).)

35 U.S.C. 183 Right to compensation.

An applicant, his successors, assigns, or legal representatives, whose patent is withheld as herein provided, shall have the right, beginning at the date the applicant is notified that, except for such order, his application is otherwise in condition for allowance, or February 1, 1952, whichever is later, and ending six years after a patent is issued thereon, to apply to the head of any department or agency who caused the order to be issued for compensation for the damage caused by the order of secrecy and/or for the use of the invention by the Government, resulting from his disclosure. The right to compensation for use shall begin on the date of the first use of the invention by the Government. The head of the department or agency is authorized, upon the presentation of a

claim, to enter into an agreement with the applicant, his successors, assigns, or legal representatives, in full settlement for the damage and/or use. This settlement agreement shall be conclusive for all purposes notwithstanding any other provision of law to the contrary. If full settlement of the claim cannot be effected, the head of the department or agency may award and pay to such applicant, his successors, assigns, or legal representatives, a sum not exceeding 75 per centum of the sum which the head of the department or agency considers just compensation for the damage and/or use. A claimant may bring suit against the United States in the United States Court of Federal Claims or in the District Court of the United States for the district in which such claimant is a resident for an amount which when added to the award shall constitute just compensation for the damage and/or use of the invention by the Government. The owner of any patent issued upon an application that was subject to a secrecy order issued pursuant to section 181 of this title, who did not apply for compensation as above provided, shall have the right, after the date of issuance of such patent, to bring suit in the United States Court of Federal Claims for just compensation for the damage caused by reason of the order of secrecy and/or use by the Government of the invention resulting from his disclosure. The right to compensation for use shall begin on the date of the first use of the invention by the Government. In a suit under the provisions of this section the United States may avail itself of all defenses it may plead in an action under section 1498 of title 28. This section shall not confer a right of action on anyone or his successors, assigns, or legal representatives who, while in the full-time employment or service of the United States, discovered, invented, or developed the invention on which the claim is based.

(Amended Apr. 2, 1982, Public Law 97-164, sec. 160(a)(12), 96 Stat. 48; Oct. 29, 1992, Public Law 102-572, sec. 902 (b)(1), 106 Stat. 4516.)

35 U.S.C. 184 Filing of application in foreign country.

Except when authorized by a license obtained from the Commissioner of Patents a person shall not file or cause or authorize to be filed in any foreign country prior to six months after filing in the United States an application for patent or for the registration of a utility model, industrial design, or model in respect of an

invention made in this country. A license shall not be granted with respect to an invention subject to an order issued by the Commissioner of Patents pursuant to section 181 of this title without the concurrence of the head of the departments and the chief officers of the agencies who caused the order to be issued. The license may be granted retroactively where an application has been filed abroad through error and without deceptive intent and the application does not disclose an invention within the scope of section 181 of this title.

The term “application” when used in this chapter includes applications and any modifications, amendments, or supplements thereto, or divisions thereof.

The scope of a license shall permit subsequent modifications, amendments, and supplements containing additional subject matter if the application upon which the request for the license is based is not, or was not, required to be made available for inspection under section 181 of this title and if such modifications, amendments, and supplements do not change the general nature of the invention in a manner which would require such application to be made available for inspection under such section 181. In any case in which a license is not, or was not, required in order to file an application in any foreign country, such subsequent modifications, amendments, and supplements may be made, without a license, to the application filed in the foreign country if the United States application was not required to be made available for inspection under section 181 and if such modifications, amendments, and supplements do not, or did not, change the general nature of the invention in a manner which would require the United States application to have been made available for inspection under such section 181.

(Amended Aug. 23, 1988, Public Law 100-418, sec. 9101(b)(1), 102 Stat. 1567; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(B)).)

35 U.S.C. 185 Patent barred for filing without license.

Notwithstanding any other provisions of law any person, and his successors, assigns, or legal representatives, shall not receive a United States patent for an invention if that person, or his successors, assigns, or legal representatives shall, without procuring the license prescribed in section 184 of this title, have

made, or consented to or assisted another's making, application in a foreign country for a patent or for the registration of a utility model, industrial design, or model in respect of the invention. A United States patent issued to such person, his successors, assigns, or legal representatives shall be invalid, unless the failure to procure such license was through error and without deceptive intent, and the patent does not disclose subject matter within the scope of section 181 of this title.

(Amended Aug. 23, 1988, Public Law 100-418, sec. 9101(b)(2), 102 Stat. 1568; Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904.)

35 U.S.C. 186 Penalty.

Whoever, during the period or periods of time an invention has been ordered to be kept secret and the grant of a patent thereon withheld pursuant to section 181 of this title, shall, with knowledge of such order and without due authorization, willfully publish or disclose or authorize or cause to be published or disclosed the invention, or material information with respect thereto, or whoever willfully, in violation of the provisions of section 184 of this title, shall file or cause or authorize to be filed in any foreign country an application for patent or for the registration of a utility model, industrial design, or model in respect of any invention made in the United States, shall, upon conviction, be fined not more than \$10,000 or imprisoned for not more than two years, or both.

(Amended Aug. 23, 1988, Public Law 100-418, sec. 9101(b)(3), 102 Stat. 1568.)

35 U.S.C. 187 Nonapplicability to certain persons.

The prohibitions and penalties of this chapter shall not apply to any officer or agent of the United States acting within the scope of his authority, nor to any person acting upon his written instructions or permission.

35 U.S.C. 188 Rules and regulations, delegation of power.

The Atomic Energy Commission, the Secretary of a defense department, the chief officer of any other department or agency of the Government designated by the President as a defense agency of the United States, and the Secretary of Commerce, may separately issue rules and regulations to enable the respec-

tive department or agency to carry out the provisions of this chapter, and may delegate any power conferred by this chapter.

CHAPTER 18 — PATENT RIGHTS IN INVENTIONS MADE WITH FEDERAL ASSISTANCE

Sec.

- 200 Policy and objective.
- 201 Definitions.
- 202 Disposition of rights.
- 203 March-in rights.
- 204 Preference for United States industry.
- 205 Confidentiality.
- 206 Uniform clauses and regulations.
- 207 Domestic and foreign protection of federally owned inventions.
- 208 Regulations governing Federal licensing.
- 209 Licensing federally owned inventions.
- 210 Precedence of chapter.
- 211 Relationship to antitrust laws.
- 212 Disposition of rights in educational awards.

35 U.S.C. 200 Policy and objective.

It is the policy and objective of the Congress to use the patent system to promote the utilization of inventions arising from federally supported research or development; to encourage maximum participation of small business firms in federally supported research and development efforts; to promote collaboration between commercial concerns and nonprofit organizations, including universities; to ensure that inventions made by nonprofit organizations and small business firms are used in a manner to promote free competition and enterprise without unduly encumbering future research and discovery; to promote the commercialization and public availability of inventions made in the United States by United States industry and labor; to ensure that the Government obtains sufficient rights in federally supported inventions to meet the needs of the Government and protect the public against nonuse or unreasonable use of inventions; and to minimize the costs of administering policies in this area.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3018; amended Nov. 1, 2000, Public Law 106-404, sec. 5, 114 Stat. 1745.)

35 U.S.C. 201 Definitions.

As used in this chapter —

(a) The term “Federal agency” means any executive agency as defined in section 105 of title 5, and the military departments as defined by section 102 of title 5.

(b) The term “funding agreement” means any contract, grant, or cooperative agreement entered into between any Federal agency, other than the Tennessee Valley Authority, and any contractor for the performance of experimental, developmental, or research work funded in whole or in part by the Federal Government. Such term includes any assignment, substitution of parties, or subcontract of any type entered into for the performance of experimental, developmental, or research work under a funding agreement as herein defined.

(c) The term “contractor” means any person, small business firm, or nonprofit organization that is a party to a funding agreement.

(d) The term “invention” means any invention or discovery which is or may be patentable or otherwise protectable under this title or any novel variety of plant which is or may be protectable under the Plant Variety Protection Act (7 U.S.C. 2321, et seq.).

(e) The term “subject invention” means any invention of the contractor conceived or first actually reduced to practice in the performance of work under a funding agreement: *Provided*, That in the case of a variety of plant, the date of determination (as defined in section 41(d) of the Plant Variety Protection Act (7 U.S.C. 2401(d)) must also occur during the period of contract performance.

(f) The term “practical application” means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are to the extent permitted by law or Government regulations available to the public on reasonable terms.

(g) The term “made” when used in relation to any invention means the conception or first actual reduction to practice of such invention.

(h) The term “small business firm” means a small business concern as defined at section 2 of Public Law 85-536 (15 U.S.C. 632) and implementing

regulations of the Administrator of the Small Business Administration.

(i) The term “nonprofit organization” means universities and other institutions of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3019.)

(Subsection (d) amended Nov. 8, 1984, Public Law 98-620, sec. 501(1), 98 Stat. 3364.)

(Subsection (e) amended Nov. 8, 1984, Public Law 98-620, sec. 501(2), 98 Stat. 3364.)

(Subsection (i) amended Oct. 22, 1986, Public Law 99-514, sec. 2, 100 Stat. 2095.)

(Subsection (a) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1904.)

35 U.S.C. 202 Disposition of rights.

(a) Each nonprofit organization or small business firm may, within a reasonable time after disclosure as required by paragraph (c)(1) of this section, elect to retain title to any subject invention: *Provided, however*, That a funding agreement may provide otherwise (i) when the contractor is not located in the United States or does not have a place of business located in the United States or is subject to the control of a foreign government, (ii) in exceptional circumstances when it is determined by the agency that restriction or elimination of the right to retain title to any subject invention will better promote the policy and objectives of this chapter, (iii) when it is determined by a Government authority which is authorized by statute or Executive order to conduct foreign intelligence or counterintelligence activities that the restriction or elimination of the right to retain title to any subject invention is necessary to protect the security of such activities, or (iv) when the funding agreement includes the operation of a Government-owned, contractor-operated facility of the Department of Energy primarily dedicated to that Department’s naval nuclear propulsion or weapons related programs and all funding agreement limitations under this subparagraph on the contractor’s right to elect title to a sub-

ject invention are limited to inventions occurring under the above two programs of the Department of Energy. The rights of the nonprofit organization or small business firm shall be subject to the provisions of paragraph (c) of this section and the other provisions of this chapter.

(b)(1) The rights of the Government under subsection (a) shall not be exercised by a Federal agency unless it first determines that at least one of the conditions identified in clauses (i) through (iii) of subsection (a) exists. Except in the case of subsection (a)(iii), the agency shall file with the Secretary of Commerce, within thirty days after the award of the applicable funding agreement, a copy of such determination. In the case of a determination under subsection (a)(ii), the statement shall include an analysis justifying the determination. In the case of determinations applicable to funding agreements with small business firms, copies shall also be sent to the Chief Counsel for Advocacy of the Small Business Administration. If the Secretary of Commerce believes that any individual determination or pattern of determinations is contrary to the policies and objectives of this chapter or otherwise not in conformance with this chapter, the Secretary shall so advise the head of the agency concerned and the Administrator of the Office of Federal Procurement Policy, and recommend corrective actions.

(2) Whenever the Administrator of the Office of Federal Procurement Policy has determined that one or more Federal agencies are utilizing the authority of clause (i) or (ii) of subsection (a) of this section in a manner that is contrary to the policies and objectives of this chapter the Administrator is authorized to issue regulations describing classes of situations in which agencies may not exercise the authorities of those clauses.

(3) At least once every 5 years, the Comptroller General shall transmit a report to the Committees on the Judiciary of the Senate and House of Representatives on the manner in which this chapter is being implemented by the agencies and on such other aspects of Government patent policies and practices with respect to federally funded inventions as the Comptroller General believes appropriate.

(4) If the contractor believes that a determination is contrary to the policies and objectives of this chapter or constitutes an abuse of discretion by the

agency, the determination shall be subject to the section 203(b).

(c) Each funding agreement with a small business firm or nonprofit organization shall contain appropriate provisions to effectuate the following:

(1) That the contractor disclose each subject invention to the Federal agency within a reasonable time after it becomes known to contractor personnel responsible for the administration of patent matters, and that the Federal Government may receive title to any subject invention not disclosed to it within such time.

(2) That the contractor make a written election within two years after disclosure to the Federal agency (or such additional time as may be approved by the Federal agency) whether the contractor will retain title to a subject invention: *Provided*, That in any case where publication, on sale, or public use, has initiated the one year statutory period in which valid patent protection can still be obtained in the United States, the period for election may be shortened by the Federal agency to a date that is not more than sixty days prior to the end of the statutory period: And *provided further*, That the Federal Government may receive title to any subject invention in which the contractor does not elect to retain rights or fails to elect rights within such times.

(3) That a contractor electing rights in a subject invention agrees to file a patent application prior to any statutory bar date that may occur under this title due to publication, on sale, or public use, and shall thereafter file corresponding patent applications in other countries in which it wishes to retain title within reasonable times, and that the Federal Government may receive title to any subject inventions in the United States or other countries in which the contractor has not filed patent applications on the subject invention within such times.

(4) With respect to any invention in which the contractor elects rights, the Federal agency shall have a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States any subject invention throughout the world: *Provided*, That the funding agreement may provide for such additional rights, including the right to assign or have assigned foreign patent rights in the subject invention, as are determined by the agency as necessary for meeting the

obligations of the United States under any treaty, international agreement, arrangement of cooperation, memorandum of understanding, or similar arrangement, including military agreements relating to weapons development and production.

(5) The right of the Federal agency to require periodic reporting on the utilization or efforts at obtaining utilization that are being made by the contractor or his licensees or assignees: *Provided*, That any such information, as well as any information on utilization or efforts at obtaining utilization obtained as part of a proceeding under section 203 of this chapter shall be treated by the Federal agency as commercial and financial information obtained from a person and privileged and confidential and not subject to disclosure under section 552 of title 5.

(6) An obligation on the part of the contractor, in the event a United States patent application is filed by or on its behalf or by any assignee of the contractor, to include within the specification of such application and any patent issuing thereon, a statement specifying that the invention was made with Government support and that the Government has certain rights in the invention.

(7) In the case of a nonprofit organization, (A) a prohibition upon the assignment of rights to a subject invention in the United States without the approval of the Federal agency, except where such assignment is made to an organization which has as one of its primary functions the management of inventions (provided that such assignee shall be subject to the same provisions as the contractor); (B) a requirement that the contractor share royalties with the inventor; (C) except with respect to a funding agreement for the operation of a Government-owned-contractor-operated facility, a requirement that the balance of any royalties or income earned by the contractor with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, be utilized for the support of scientific research, or education; (D) a requirement that, except where it proves infeasible after a reasonable inquiry, in the licensing of subject inventions shall be given to small business firms; and (E) with respect to a funding agreement for the operation of a Government-owned-contractor-operator facility, requirements (i) that after payment of patenting costs, licensing costs, payments

to inventors, and other expenses incidental to the administration of subject inventions, 100 percent of the balance of any royalties or income earned and retained by the contractor during any fiscal year, up to an amount equal to 5 percent of the annual budget of the facility, shall be used by the contractor for scientific research, development, and education consistent with the research and development mission and objectives of the facility, including activities that increase the licensing potential of other inventions of the facility provided that if said balance exceeds 5 percent of the annual budget of the facility, that 75 percent of such excess shall be paid to the Treasury of the United States and the remaining 25 percent shall be used for the same purposes as described above in this clause (D); and (ii) that, to the extent it provides the most effective technology transfer, the licensing of subject inventions shall be administered by contractor employees on location at the facility.

(8) The requirements of sections 203 and 204 of this chapter.

(d) If a contractor does not elect to retain title to a subject invention in cases subject to this section, the Federal agency may consider and after consultation with the contractor grant requests for retention of rights by the inventor subject to the provisions of this Act and regulations promulgated hereunder.

(e) In any case when a Federal employee is a coinventor of any invention made with a nonprofit organization, a small business firm, or a non-Federal inventor, the Federal agency employing such coinventor may, for the purpose of consolidating rights in the invention and if it finds that it would expedite the development of the invention—

(1) license or assign whatever rights it may acquire in the subject invention to the nonprofit organization, small business firm, or non-Federal inventor in accordance with the provisions of this chapter; or

(2) acquire any rights in the subject invention from the nonprofit organization, small business firm, or non-Federal inventor, but only to the extent the party from whom the rights are acquired voluntarily enters into the transaction and no other transaction under this chapter is conditioned on such acquisition.

(f)(1) No funding agreement with a small business firm or nonprofit organization shall contain a provision allowing a Federal agency to require the licensing to third parties of inventions owned by the

contractor that are not subject inventions unless such provision has been approved by the head of the agency and a written justification has been signed by the head of the agency. Any such provision shall clearly state whether the licensing may be required in connection with the practice of a subject invention, a specifically identified work object, or both. The head of the agency may not delegate the authority to approve provisions or sign justifications required by this paragraph.

(2) A Federal agency shall not require the licensing of third parties under any such provision unless the head of the agency determines that the use of the invention by others is necessary for the practice of a subject invention or for the use of a work object of the funding agreement and that such action is necessary to achieve the practical application of the subject invention or work object. Any such determination shall be on the record after an opportunity for an agency hearing. Any action commenced for judicial review of such determination shall be brought within sixty days after notification of such determination.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3020; subsection (b)(4) added and subsections (a), (b)(1), (b)(2), (c)(4), (c)(5), and (c)(7) amended Nov. 8, 1984, Public Law 98-620, sec. 501, 98 Stat. 3364; subsection (b)(3) amended Dec. 10, 1991, Public Law 102-204, sec. 10, 105 Stat. 1641; subsection (a) amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-583 (S. 1948 sec. 4732(a)(12)); subsection (e) amended Nov. 1, 2000, Public Law 106-404, sec. 6(1), 114 Stat. 1745; subsections (b)(4), (c)(4), and (c)(5) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

35 U.S.C. 203 March-in rights.

(a) With respect to any subject invention in which a small business firm or nonprofit organization has acquired title under this chapter, the Federal agency under whose funding agreement the subject invention was made shall have the right, in accordance with such procedures as are provided in regulations promulgated hereunder, to require the contractor, an assignee, or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the contractor, assignee, or exclusive licensee refuses

such request, to grant such a license itself, if the Federal agency determines that such —

(1) action is necessary because the contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) action is necessary to alleviate health or safety needs which are not reasonably satisfied by the contractor, assignee, or their licensees;

(3) action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the contractor, assignee, or licensees; or

(4) action is necessary because the agreement required by section 204 has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of its agreement obtained pursuant to section 204.

(b) A determination pursuant to this section or section 202(b)(4) shall not be subject to the Contract Disputes Act (41 U.S.C. § 601 et seq.). An administrative appeals procedure shall be established by regulations promulgated in accordance with section 206. Additionally, any contractor, inventor, assignee, or exclusive licensee adversely affected by a determination under this section may, at any time within sixty days after the determination is issued, file a petition in the United States Court of Federal Claims, which shall have jurisdiction to determine the appeal on the record and to affirm, reverse, remand or modify, as appropriate, the determination of the Federal agency. In cases described in paragraphs (1) and (3) of subsection (a), the agency's determination shall be held in abeyance pending the exhaustion of appeals or petitions filed under the preceding sentence.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3022; amended Nov. 8, 1984, Public Law 98-620, sec. 501(9), 98 Stat. 3367; Oct. 29, 1992, Public Law 102-572, sec. 902(b)(1), 106 Stat. 4516; amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

35 U.S.C. 204 Preference for United States industry.

Notwithstanding any other provision of this chapter, no small business firm or nonprofit organization which receives title to any subject invention and no assignee of any such small business firm or nonprofit

organization shall grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by the Federal agency under whose funding agreement the invention was made upon a showing by the small business firm, nonprofit organization, or assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3023.)

35 U.S.C. 205 Confidentiality.

Federal agencies are authorized to withhold from disclosure to the public information disclosing any invention in which the Federal Government owns or may own a right, title, or interest (including a nonexclusive license) for a reasonable time in order for a patent application to be filed. Furthermore, Federal agencies shall not be required to release copies of any document which is part of an application for patent filed with the United States Patent and Trademark Office or with any foreign patent office.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3023.)

35 U.S.C. 206 Uniform clauses and regulations.

The Secretary of Commerce may issue regulations which may be made applicable to Federal agencies implementing the provisions of sections 202 through 204 of this chapter and shall establish standard funding agreement provisions required under this chapter. The regulations and the standard funding agreement shall be subject to public comment before their issuance.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3023; amended Nov. 8, 1984, Public Law 98-620, sec. 501(10), 98 Stat. 3367.)

35 U.S.C. 207 Domestic and foreign protection of federally owned inventions.

(a) Each Federal agency is authorized to —

(1) apply for, obtain, and maintain patents or other forms of protection in the United States and in foreign countries on inventions in which the Federal Government owns a right, title, or interest;

(2) grant nonexclusive, exclusive, or partially exclusive licenses under federally owned inventions, royalty-free or for royalties or other consideration, and on such terms and conditions, including the grant to the licensee of the right of enforcement pursuant to the provisions of chapter 29 of this title as determined appropriate in the public interest;

(3) undertake all other suitable and necessary steps to protect and administer rights to federally owned inventions on behalf of the Federal Government either directly or through contract, including acquiring rights for and administering royalties to the Federal Government in any invention, but only to the extent the party from whom the rights are acquired voluntarily enters into the transaction, to facilitate the licensing of a federally owned invention; and

(4) transfer custody and administration, in whole or in part, to another Federal agency, of the right, title, or interest in any federally owned invention.

(b) For the purpose of assuring the effective management of Government-owned inventions, the Secretary of Commerce authorized to -

(1) assist Federal agency efforts to promote the licensing and utilization of Government-owned inventions;

(2) assist Federal agencies in seeking protection and maintaining inventions in foreign countries, including the payment of fees and costs connected therewith; and

(3) consult with and advise Federal agencies as to areas of science and technology research and development with potential for commercial utilization.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3023; amended Nov. 8, 1984, Public Law 98-620, sec. 501(11), 98 Stat. 3367; subsections (a)(2) and (a)(3) amended Nov. 1, 2000, Public Law 106-404, sec. 6(2), 114 Stat. 1745.)

35 U.S.C. 208 Regulations governing Federal licensing.

The Secretary of Commerce is authorized to promulgate regulations specifying the terms and conditions upon which any federally owned invention, other than inventions owned by the Tennessee Valley Authority, may be licensed on a nonexclusive, partially exclusive, or exclusive basis.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3024; amended Nov. 8, 1984, Public Law 98-620, sec. 501(12), 98 Stat. 3367.)

35 U.S.C. 209 Licensing federally owned inventions.

(a) **AUTHORITY.**—A Federal agency may grant an exclusive or partially exclusive license on a federally owned invention under section 207(a)(2) only if—

(1) granting the license is a reasonable and necessary incentive to—

(A) call forth the investment capital and expenditures needed to bring the invention to practical application; or

(B) otherwise promote the invention's utilization by the public;

(2) the Federal agency finds that the public will be served by the granting of the license, as indicated by the applicant's intentions, plans, and ability to bring the invention to practical application or otherwise promote the invention's utilization by the public, and that the proposed scope of exclusivity is not greater than reasonably necessary to provide the incentive for bringing the invention to practical application, as proposed by the applicant, or otherwise to promote the invention's utilization by the public;

(3) the applicant makes a commitment to achieve practical application of the invention within a reasonable time, which time may be extended by the agency upon the applicant's request and the applicant's demonstration that the refusal of such extension would be unreasonable;

(4) granting the license will not tend to substantially lessen competition or create or maintain a violation of the Federal antitrust laws; and

(5) in the case of an invention covered by a foreign patent application or patent, the interests of the Federal Government or United States industry in foreign commerce will be enhanced.

(b) **MANUFACTURE IN UNITED STATES.**—A Federal agency shall normally grant a license under section 207(a)(2) to use or sell any federally owned invention in the United States only to a licensee who agrees that any products embodying the invention or produced through the use of the invention will be manufactured substantially in the United States.

(c) **SMALL BUSINESS.**—First preference for the granting of any exclusive or partially exclusive licenses under section 207(a)(2) shall be given to small business firms having equal or greater likelihood as other applicants to bring the invention to practical application within a reasonable time.

(d) **TERMS AND CONDITIONS.**—Any licenses granted under section 207(a)(2) shall contain such terms and conditions as the granting agency considers appropriate, and shall include provisions—

(1) retaining a nontransferrable, irrevocable, paid-up license for any Federal agency to practice the invention or have the invention practiced throughout the world by or on behalf of the Government of the United States;

(2) requiring periodic reporting on utilization of the invention, and utilization efforts, by the licensee, but only to the extent necessary to enable the Federal agency to determine whether the terms of the license are being complied with, except that any such report shall be treated by the Federal agency as commercial and financial information obtained from a person and privileged and confidential and not subject to disclosure under section 552 of title 5; and

(3) empowering the Federal agency to terminate the license in whole or in part if the agency determines that—

(A) the licensee is not executing its commitment to achieve practical application of the invention, including commitments contained in any plan submitted in support of its request for a license, and the licensee cannot otherwise demonstrate to the satisfaction of the Federal agency that it has taken, or can be expected to take within a reasonable time, effective steps to achieve practical application of the invention;

(B) the licensee is in breach of an agreement described in subsection (b);

(C) termination is necessary to meet requirements for public use specified by Federal regulations issued after the date of the license, and such

requirements are not reasonably satisfied by the licensee; or

(D) the licensee has been found by a court of competent jurisdiction to have violated the Federal antitrust laws in connection with its performance under the license agreement.

(e) PUBLIC NOTICE.—No exclusive or partially exclusive license may be granted under section 207(a)(2) unless public notice of the intention to grant an exclusive or partially exclusive license on a federally owned invention has been provided in an appropriate manner at least 15 days before the license is granted, and the Federal agency has considered all comments received before the end of the comment period in response to that public notice. This subsection shall not apply to the licensing of inventions made under a cooperative research and development agreement entered into under section 12 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3710a).

(f) PLAN.—No Federal agency shall grant any license under a patent or patent application on a federally owned invention unless the person requesting the license has supplied the agency with a plan for development or marketing of the invention, except that any such plan shall be treated by the Federal agency as commercial and financial information obtained from a person and privileged and confidential and not subject to disclosure under section 552 of title 5.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3024; amended Nov. 1, 2000, Public Law 106-404, sec. 4, 114 Stat. 1743; subsections (d)(2) and (f) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

35 U.S.C. 210 Precedence of chapter.

(a) This chapter shall take precedence over any other Act which would require a disposition of rights in subject inventions of small business firms or non-profit organizations contractors in a manner that is inconsistent with this chapter, including but not necessarily limited to the following:

(1) section 10(a) of the Act of June 29, 1935, as added by title I of the Act of August 14, 1946 (7 U.S.C. 427i(a); 60 Stat. 1085);

(2) section 205(a) of the Act of August 14, 1946 (7 U.S.C. 1624(a); 60 Stat. 1090);

(3) section 501(c) of the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 951(c); 83 Stat. 742);

(4) section 30168(e) of title 49;

(5) section 12 of the National Science Foundation Act of 1950 (42 U.S.C. 1871(a); 82 Stat. 360);

(6) section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182; 68 Stat. 943);

(7) section 305 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457);

(8) section 6 of the Coal Research Development Act of 1960 (30 U.S.C. 666; 74 Stat. 337);

(9) section 4 of the Helium Act Amendments of 1960 (50 U.S.C. 167b; 74 Stat. 920);

(10) section 32 of the Arms Control and Disarmament Act of 1961 (22 U.S.C. 2572; 75 Stat. 634);

(11) section 9 of the Federal Nonnuclear Energy Research and Development Act of 1974 (42 U.S.C. 5908; 88 Stat. 1878);

(12) section 5(d) of the Consumer Product Safety Act (15 U.S.C. 2054(d); 86 Stat. 1211);

(13) section 3 of the Act of April 5, 1944 (30 U.S.C. 323; 58 Stat. 191);

(14) section 8001(c)(3) of the Solid Waste Disposal Act (42 U.S.C. 6981(c); 90 Stat. 2829);

(15) section 219 of the Foreign Assistance Act of 1961 (22 U.S.C. 2179; 83 Stat. 806);

(16) section 427(b) of the Federal Mine Health and Safety Act of 1977 (30 U.S.C. 937(b); 86 Stat. 155);

(17) section 306(d) of the Surface Mining and Reclamation Act of 1977 (30 U.S.C. 1226(d); 91 Stat. 455);

(18) section 21(d) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2218(d); 88 Stat. 1548);

(19) section 6(b) of the Solar Photovoltaic Energy Research Development and Demonstration Act of 1978 (42 U.S.C. 5585(b); 92 Stat. 2516);

(20) section 12 of the Native Latex Commercialization and Economic Development Act of 1978 (7 U.S.C. 178j; 92 Stat. 2533); and

(21) section 408 of the Water Resources and Development Act of 1978 (42 U.S.C. 7879; 92 Stat. 1360).

The Act creating this chapter shall be construed to take precedence over any future Act unless

that Act specifically cites this Act and provides that it shall take precedence over this Act.

(b) Nothing in this chapter is intended to alter the effect of the laws cited in paragraph (a) of this section or any other laws with respect to the disposition of rights in inventions made in the performance of funding agreements with persons other than nonprofit organizations or small business firms.

(c) Nothing in this chapter is intended to limit the authority of agencies to agree to the disposition of rights in inventions made in the performance of work under funding agreements with persons other than nonprofit organizations or small business firms in accordance with the Statement of Government Patent Policy issued on February 18, 1983, agency regulations, or other applicable regulations or to otherwise limit the authority of agencies to allow such persons to retain ownership of inventions, except that all funding agreements, including those with other than small business firms and nonprofit organizations, shall include the requirements established in section 202(c)(4) and section 203 of this title. Any disposition of rights in inventions made in accordance with the Statement or implementing regulations, including any disposition occurring before enactment of this section, are hereby authorized.

(d) Nothing in this chapter shall be construed to require the disclosure of intelligence sources or methods or to otherwise affect the authority granted to the Director of Central Intelligence by statute or Executive order for the protection of intelligence sources or methods.

(e) The provisions of the Stevenson-Wydler Technology Innovation Act of 1980 shall take precedence over the provisions of this chapter to the extent that they permit or require a disposition of rights in subject inventions which is inconsistent with this chapter.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3026.)

(Subsection (c) amended Nov. 8, 1984, Public Law 98-620, sec. 501(13), 98 Stat. 3367.)

(Subsection (e) added Oct. 20, 1986, Public Law 99-502, sec. 9(c), 100 Stat. 1796.)

(Subsection (a)(4) amended July 5, 1994, Public Law 103-272, sec. 5(j), 108 Stat. 1375.)

(Subsection (e) amended Mar. 7, 1996, Public Law 104-113, sec. 7, 110 Stat. 779.)

(Subsection (a) amended Nov. 13, 1998, Public Law 105-393, sec. 220(c)(2), 112 Stat. 3625.)

(Subsections (a)(11), (a)(20), and (c) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

35 U.S.C. 211 Relationship to antitrust laws.

Nothing in this chapter shall be deemed to convey to any person immunity from civil or criminal liability, or to create any defenses to actions, under any antitrust law.

(Added Dec. 12, 1980, Public Law 96-517, sec. 6(a), 94 Stat. 3027.)

35 U.S.C. 212 Disposition of rights in educational awards.

No scholarship, fellowship, training grant, or other funding agreement made by a Federal agency primarily to an awardee for educational purposes will contain any provision giving the Federal agency any rights to inventions made by the awardee.

(Added Nov. 8, 1984, Public Law 98-620, sec. 501(14), 98 Stat. 3368.)

PART III — PATENTS AND PROTECTION OF PATENT RIGHTS

CHAPTER 25 — AMENDMENT AND CORRECTION OF PATENTS

- | | |
|------|---|
| Sec. | |
| 251 | Reissue of defective patents. |
| 252 | Effect of reissue. |
| 253 | Disclaimer. |
| 254 | Certificate of correction of Patent and Trademark Office mistake. |
| 255 | Certificate of correction of applicant's mistake. |
| 256 | Correction of named inventor. |

35 U.S.C. 251 Reissue of defective patents.

Whenever any patent is, through error without any deceptive intention, deemed wholly or partly inoperative or invalid, by reason of a defective specification or drawing, or by reason of the patentee claiming more or less than he had a right to claim in the patent, the Director shall, on the surrender of such patent and the payment of the fee required by law, reissue the patent for the invention disclosed in the original

patent, and in accordance with a new and amended application, for the unexpired part of the term of the original patent. No new matter shall be introduced into the application for reissue.

The Director may issue several reissued patents for distinct and separate parts of the thing patented, upon demand of the applicant, and upon payment of the required fee for a reissue for each of such reissued patents.

The provisions of this title relating to applications for patent shall be applicable to applications for reissue of a patent, except that application for reissue may be made and sworn to by the assignee of the entire interest if the application does not seek to enlarge the scope of the claims of the original patent.

No reissued patent shall be granted enlarging the scope of the claims of the original patent unless applied for within two years from the grant of the original patent.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 252 Effect of reissue.

The surrender of the original patent shall take effect upon the issue of the reissued patent, and every reissued patent shall have the same effect and operation in law, on the trial of actions for causes thereafter arising, as if the same had been originally granted in such amended form, but in so far as the claims of the original and reissued patents are substantially identical, such surrender shall not affect any action then pending nor abate any cause of action then existing, and the reissued patent, to the extent that its claims are substantially identical with the original patent, shall constitute a continuation thereof and have effect continuously from the date of the original patent.

A reissued patent shall not abridge or affect the right of any person or that person's successors in business who, prior to the grant of a reissue, made, purchased, offered to sell, or used within the United States, or imported into the United States, anything patented by the reissued patent, to continue the use of, to offer to sell, or to sell to others to be used, offered for sale, or sold, the specific thing so made, purchased, offered for sale, used, or imported unless the making, using, offering for sale, or selling of such thing infringes a valid claim of the reissued patent which was in the original patent. The court before

which such matter is in question may provide for the continued manufacture, use, offer for sale, or sale of the thing made, purchased, offered for sale, used, or imported as specified, or for the manufacture, use, offer for sale, or sale in the United States of which substantial preparation was made before the grant of the reissue, and the court may also provide for the continued practice of any process patented by the reissue that is practiced, or for the practice of which substantial preparation was made, before the grant of the reissue, to the extent and under such terms as the court deems equitable for the protection of investments made or business commenced before the grant of the reissue.

(Amended Dec. 8, 1994, Public Law 103-465, sec. 533(b)(2), 108 Stat. 4989; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-566 (S. 1948 sec. 4507(8)).)

35 U.S.C. 253 Disclaimer.

Whenever, without any deceptive intention, a claim of a patent is invalid the remaining claims shall not thereby be rendered invalid. A patentee, whether of the whole or any sectional interest therein, may, on payment of the fee required by law, make disclaimer of any complete claim, stating therein the extent of his interest in such patent. Such disclaimer shall be in writing and recorded in the Patent and Trademark Office, and it shall thereafter be considered as part of the original patent to the extent of the interest possessed by the disclaimant and by those claiming under him.

In like manner any patentee or applicant may disclaim or dedicate to the public the entire term, or any terminal part of the term, of the patent granted or to be granted.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 254 Certificate of correction of Patent and Trademark Office mistake.

Whenever a mistake in a patent, incurred through the fault of the Patent and Trademark Office, is clearly disclosed by the records of the Office, the Director may issue a certificate of correction stating the fact and nature of such mistake, under seal, without charge, to be recorded in the records of patents. A printed copy thereof shall be attached to each printed copy of the patent, and such certificate shall be con-

sidered as part of the original patent. Every such patent, together with such certificate, shall have the same effect and operation in law on the trial of actions for causes thereafter arising as if the same had been originally issued in such corrected form. The Director may issue a corrected patent without charge in lieu of and with like effect as a certificate of correction.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 255 Certificate of correction of applicant's mistake.

Whenever a mistake of a clerical or typographical nature, or of minor character, which was not the fault of the Patent and Trademark Office, appears in a patent and a showing has been made that such mistake occurred in good faith, the Director may, upon payment of the required fee, issue a certificate of correction, if the correction does not involve such changes in the patent as would constitute new matter or would require reexamination. Such patent, together with the certificate, shall have the same effect and operation in law on the trial of actions for causes thereafter arising as if the same had been originally issued in such corrected form.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 256 Correction of named inventor.

Whenever through error a person is named in an issued patent as the inventor, or through error an inventor is not named in an issued patent and such error arose without any deceptive intention on his part, the Director may, on application of all the parties and assignees, with proof of the facts and such other requirements as may be imposed, issue a certificate correcting such error.

The error of omitting inventors or naming persons who are not inventors shall not invalidate the patent in which such error occurred if it can be corrected as provided in this section. The court before which such matter is called in question may order correction of the patent on notice and hearing of all parties concerned and the Director shall issue a certificate accordingly.

(Amended Aug. 27, 1982, Public Law 97-247, sec. 6(b), 96 Stat. 320; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 26 — OWNERSHIP AND ASSIGNMENT

Sec.

261 Ownership; assignment.

262 Joint owners.

35 U.S.C. 261 Ownership; assignment.

Subject to the provisions of this title, patents shall have the attributes of personal property.

Applications for patent, patents, or any interest therein, shall be assignable in law by an instrument in writing. The applicant, patentee, or his assigns or legal representatives may in like manner grant and convey an exclusive right under his application for patent, or patents, to the whole or any specified part of the United States.

A certificate of acknowledgment under the hand and official seal of a person authorized to administer oaths within the United States, or, in a foreign country, of a diplomatic or consular officer of the United States or an officer authorized to administer oaths whose authority is proved by a certificate of a diplomatic or consular officer of the United States, or apostille of an official designated by a foreign country which, by treaty or convention, accords like effect to apostilles of designated officials in the United States, shall be *prima facie* evidence of the execution of an assignment, grant, or conveyance of a patent or application for patent.

An assignment, grant, or conveyance shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice, unless it is recorded in the Patent and Trademark Office within three months from its date or prior to the date of such subsequent purchase or mortgage.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949; Aug. 27, 1982, Public Law 97-247, sec. 14(b), 96 Stat. 321.)

35 U.S.C. 262 Joint owners.

In the absence of any agreement to the contrary, each of the joint owners of a patent may make, use, offer to sell, or sell the patented invention within the United States, or import the patented invention into

the United States, without the consent of and without accounting to the other owners.

(Amended Dec. 8, 1994, Public Law 103-465, sec. 533(b)(3), 108 Stat. 4989.)

CHAPTER 27 — GOVERNMENT INTERESTS IN PATENTS

Sec.

266 [Repealed.]

267 Time for taking action in Government applications.

35 U.S.C. 266 [Repealed.]

(Repealed July 24, 1965, Public Law 89-83, sec. 8, 79 Stat. 261.)

35 U.S.C. 267 Time for taking action in Government applications.

Notwithstanding the provisions of sections 133 and 151 of this title, the Director may extend the time for taking any action to three years, when an application has become the property of the United States and the head of the appropriate department or agency of the Government has certified to the Director that the invention disclosed therein is important to the armament or defense of the United States.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 28 — INFRINGEMENT OF PATENTS

Sec.

271 Infringement of patent.

272 Temporary presence in the United States.

273 Defense to infringement based on earlier inventor.

35 U.S.C. 271 Infringement of patent.

(a) Except as otherwise provided in this title, whoever without authority makes, uses, offers to sell, or sells any patented invention, within the United States, or imports into the United States any patented invention during the term of the patent therefor, infringes the patent.

(b) Whoever actively induces infringement of a patent shall be liable as an infringer.

(c) Whoever offers to sell or sells within the United States or imports into the United States a component of a patented machine, manufacture, combination, or composition, or a material or apparatus for use in practicing a patented process, constituting a material part of the invention, knowing the same to be especially made or especially adapted for use in an infringement of such patent, and not a staple article or commodity of commerce suitable for substantial non-infringing use, shall be liable as a contributory infringer.

(d) No patent owner otherwise entitled to relief for infringement or contributory infringement of a patent shall be denied relief or deemed guilty of misuse or illegal extension of the patent right by reason of his having done one or more of the following: (1) derived revenue from acts which if performed by another without his consent would constitute contributory infringement of the patent; (2) licensed or authorized another to perform acts which if performed without his consent would constitute contributory infringement of the patent; (3) sought to enforce his patent rights against infringement or contributory infringement; (4) refused to license or use any rights to the patent; or (5) conditioned the license of any rights to the patent or the sale of the patented product on the acquisition of a license to rights in another patent or purchase of a separate product, unless, in view of the circumstances, the patent owner has market power in the relevant market for the patent or patented product on which the license or sale is conditioned.

(e)(1) It shall not be an act of infringement to make, use, offer to sell, or sell within the United States or import into the United States a patented invention (other than a new animal drug or veterinary biological product (as those terms are used in the Federal Food, Drug, and Cosmetic Act and the Act of March 4, 1913) which is primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes involving site specific genetic manipulation techniques) solely for uses reasonably related to the development and submission of information under a Federal law which regulates the manufacture, use, or sale of drugs or veterinary biological products.

(2) It shall be an act of infringement to submit —

(A) an application under section 505(j) of the Federal Food, Drug, and Cosmetic Act or described in section 505(b)(2) of such Act for a drug claimed in a patent or the use of which is claimed in a patent, or

(B) an application under section 512 of such Act or under the Act of March 4, 1913 (21 U.S.C. 151 - 158) for a drug or veterinary biological product which is not primarily manufactured using recombinant DNA, recombinant RNA, hybridoma technology, or other processes involving site specific genetic manipulation techniques and which is claimed in a patent or the use of which is claimed in a patent, if the purpose of such submission is to obtain approval under such Act to engage in the commercial manufacture, use, or sale of a drug or veterinary biological product claimed in a patent or the use of which is claimed in a patent before the expiration of such patent.

(3) In any action for patent infringement brought under this section, no injunctive or other relief may be granted which would prohibit the making, using, offering to sell, or selling within the United States or importing into the United States of a patented invention under paragraph (1).

(4) For an act of infringement described in paragraph (2)—

(A) the court shall order the effective date of any approval of the drug or veterinary biological product involved in the infringement to be a date which is not earlier than the date of the expiration of the patent which has been infringed,

(B) injunctive relief may be granted against an infringer to prevent the commercial manufacture, use, offer to sell, or sale within the United States or importation into the United States of an approved drug or veterinary biological product, and

(C) damages or other monetary relief may be awarded against an infringer only if there has been commercial manufacture, use, offer to sell, or sale within the United States or importation into the United States of an approved drug or veterinary biological product.

The remedies prescribed by subparagraphs (A), (B), and (C) are the only remedies which may be granted by a court for an act of infringement described in paragraph (2), except that a court may award attorney fees under section 285.

(5) Where a person has filed an application described in paragraph (2) that includes a certification under subsection (b)(2)(A)(iv) or (j)(2)(A)(vii)(IV) of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355), and neither the owner of the patent that is the subject of the certification nor the holder of the approved application under subsection (b) of such section for the drug that is claimed by the patent or a use of which is claimed by the patent brought an action for infringement of such patent before the expiration of 45 days after the date on which the notice given under subsection (b)(3) or (j)(2)(B) of such section was received, the courts of the United States shall, to the extent consistent with the Constitution, have subject matter jurisdiction in any action brought by such person under section 2201 of title 28 for a declaratory judgment that such patent is invalid or not infringed.

(f)(1) Whoever without authority supplies or causes to be supplied in or from the United States all or a substantial portion of the components of a patented invention, where such components are uncombined in whole or in part, in such manner as to actively induce the combination of such components outside of the United States in a manner that would infringe the patent if such combination occurred within the United States, shall be liable as an infringer.

(2) Whoever without authority supplies or causes to be supplied in or from the United States any component of a patented invention that is especially made or especially adapted for use in the invention and not a staple article or commodity of commerce suitable for substantial noninfringing use, where such component is uncombined in whole or in part, knowing that such component is so made or adapted and intending that such component will be combined outside of the United States in a manner that would infringe the patent if such combination occurred within the United States, shall be liable as an infringer.

(g) Whoever without authority imports into the United States or offers to sell, sells, or uses within the United States a product which is made by a process patented in the United States shall be liable as an infringer, if the importation, offer to sell, sale, or use of the product occurs during the term of such process patent. In an action for infringement of a process

patent, no remedy may be granted for infringement on account of the noncommercial use or retail sale of a product unless there is no adequate remedy under this title for infringement on account of the importation or other use, offer to sell, or sale of that product. A product which is made by a patented process will, for purposes of this title, not be considered to be so made after —

(1) it is materially changed by subsequent processes; or

(2) it becomes a trivial and nonessential component of another product.

(h) As used in this section, the term “whoever” includes any State, any instrumentality of a State, any officer or employee of a State or instrumentality of a State acting in his official capacity. Any State, and any such instrumentality, officer, or employee, shall be subject to the provisions of this title in the same manner and to the same extent as any nongovernmental entity.

(i) As used in this section, an “offer for sale” or an “offer to sell” by a person other than the patentee or any assignee of the patentee, is that in which the sale will occur before the expiration of the term of the patent.

(Subsection (e) added Sept. 24, 1984, Public Law 98-417, sec. 202, 98 Stat. 1603.)

(Subsection (f) added Nov. 8, 1984, Public Law 98-622, sec. 101(a), 98 Stat. 3383.)

(Subsection (g) added Aug. 23, 1988, Public Law 100-418, sec. 9003, 102 Stat. 1564.)

(Subsection (e) amended Nov. 16, 1988, Public Law 100-670, sec. 201(i), 102 Stat. 3988.)

(Subsection (d) amended Nov. 19, 1988, Public Law 100-703, sec. 201, 102 Stat. 4676.)

(Subsection (h) added Oct. 28, 1992, Public Law 102-560, sec. 2(a)(1), 106 Stat. 4230.)

(Subsections (a), (c), (e), and (g) amended Dec. 8, 1994, Public Law 103-465, sec. 533(a), 108 Stat. 4988.)

(Subsection (i) added Dec. 8, 1994, Public Law 103-465, sec. 533(a), 108 Stat. 4988.)

(Subsection (e)(5) added Dec. 8, 2003, Public Law 108-173, sec. 1101(d), 117 Stat. 2457.)

35 U.S.C. 272 Temporary presence in the United States.

The use of any invention in any vessel, aircraft or vehicle of any country which affords similar privileges to vessels, aircraft, or vehicles of the United States, entering the United States temporarily or accidentally, shall not constitute infringement of any patent, if the invention is used exclusively for the needs of the vessel, aircraft, or vehicle and is not offered for sale or sold in or used for the manufacture of anything to be sold in or exported from the United States.

(Amended Dec. 8, 1994, Public Law 103-465, sec. 533(b)(4), 108 Stat. 4989.)

35 U.S.C. 273 Defense to infringement based on earlier inventor.

(a) DEFINITIONS.— For purposes of this section—

(1) the terms “commercially used” and “commercial use” mean use of a method in the United States, so long as such use is in connection with an internal commercial use or an actual arm’s-length sale or other arm’s-length commercial transfer of a useful end result, whether or not the subject matter at issue is accessible to or otherwise known to the public, except that the subject matter for which commercial marketing or use is subject to a premarketing regulatory review period during which the safety or efficacy of the subject matter is established, including any period specified in section 156(g), shall be deemed “commercially used” and in “commercial use” during such regulatory review period;

(2) in the case of activities performed by a nonprofit research laboratory, or nonprofit entity such as a university, research center, or hospital, a use for which the public is the intended beneficiary shall be considered to be a use described in paragraph (1), except that the use—

(A) may be asserted as a defense under this section only for continued use by and in the laboratory or nonprofit entity; and

(B) may not be asserted as a defense with respect to any subsequent commercialization or use outside such laboratory or nonprofit entity;

(3) the term “method” means a method of doing or conducting business; and

(4) the “effective filing date” of a patent is the earlier of the actual filing date of the application

for the patent or the filing date of any earlier United States, foreign, or international application to which the subject matter at issue is entitled under section 119, 120, or 365 of this title.

(b) DEFENSE TO INFRINGEMENT.—

(1) IN GENERAL.— It shall be a defense to an action for infringement under section 271 of this title with respect to any subject matter that would otherwise infringe one or more claims for a method in the patent being asserted against a person, if such person had, acting in good faith, actually reduced the subject matter to practice at least 1 year before the effective filing date of such patent, and commercially used the subject matter before the effective filing date of such patent.

(2) EXHAUSTION OF RIGHT.— The sale or other disposition of a useful end product produced by a patented method, by a person entitled to assert a defense under this section with respect to that useful end result shall exhaust the patent owner's rights under the patent to the extent such rights would have been exhausted had such sale or other disposition been made by the patent owner.

(3) LIMITATIONS AND QUALIFICATIONS OF DEFENSE.— The defense to infringement under this section is subject to the following:

(A) PATENT.— A person may not assert the defense under this section unless the invention for which the defense is asserted is for a method.

(B) DERIVATION.— A person may not assert the defense under this section if the subject matter on which the defense is based was derived from the patentee or persons in privity with the patentee.

(C) NOT A GENERAL LICENSE.— The defense asserted by a person under this section is not a general license under all claims of the patent at issue, but extends only to the specific subject matter claimed in the patent with respect to which the person can assert a defense under this chapter, except that the defense shall also extend to variations in the quantity or volume of use of the claimed subject matter, and to improvements in the claimed subject matter that do not infringe additional specifically claimed subject matter of the patent.

(4) BURDEN OF PROOF.— A person asserting the defense under this section shall have the

burden of establishing the defense by clear and convincing evidence.

(5) ABANDONMENT OF USE.— A person who has abandoned commercial use of subject matter may not rely on activities performed before the date of such abandonment in establishing a defense under this section with respect to actions taken after the date of such abandonment.

(6) PERSONAL DEFENSE.— The defense under this section may be asserted only by the person who performed the acts necessary to establish the defense and, except for any transfer to the patent owner, the right to assert the defense shall not be licensed or assigned or transferred to another person except as an ancillary and subordinate part of a good faith assignment or transfer for other reasons of the entire enterprise or line of business to which the defense relates.

(7) LIMITATION ON SITES.— A defense under this section, when acquired as part of a good faith assignment or transfer of an entire enterprise or line of business to which the defense relates, may only be asserted for uses at sites where the subject matter that would otherwise infringe one or more of the claims is in use before the later of the effective filing date of the patent or the date of the assignment or transfer of such enterprise or line of business.

(8) UNSUCCESSFUL ASSERTION OF DEFENSE.— If the defense under this section is pleaded by a person who is found to infringe the patent and who subsequently fails to demonstrate a reasonable basis for asserting the defense, the court shall find the case exceptional for the purpose of awarding attorney fees under section 285 of this title.

(9) INVALIDITY.— A patent shall not be deemed to be invalid under section 102 or 103 of this title solely because a defense is raised or established under this section.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-555 (S. 1948 sec. 4302).)

CHAPTER 29 — REMEDIES FOR INFRINGEMENT OF PATENT, AND OTHER ACTIONS

| | |
|------|------------------------------------|
| Sec. | |
| 281 | Remedy for infringement of patent. |
| 282 | Presumption of validity; defenses. |
| 283 | Injunction. |

- 284 Damages.
- 285 Attorney fees.
- 286 Time limitation on damages.
- 287 Limitation on damages and other remedies; marking and notice.
- 288 Action for infringement of a patent containing an invalid claim.
- 289 Additional remedy for infringement of design patent.
- 290 Notice of patent suits.
- 291 Interfering patents.
- 292 False marking.
- 293 Nonresident patentee; service and notice.
- 294 Voluntary arbitration.
- 295 Presumptions: Product made by patented process.
- 296 Liability of States, instrumentalities of States, and State officials for infringement of patents.
- 297 Improper and deceptive invention promotion

35 U.S.C. 281 Remedy for infringement of patent.

A patentee shall have remedy by civil action for infringement of his patent.

35 U.S.C. 282 Presumption of validity; defenses.

A patent shall be presumed valid. Each claim of a patent (whether in independent, dependent, or multiple dependent form) shall be presumed valid independently of the validity of other claims; dependent or multiple dependent claims shall be presumed valid even though dependent upon an invalid claim. Notwithstanding the preceding sentence, if a claim to a composition of matter is held invalid and that claim was the basis of a determination of nonobviousness under section 103(b)(1), the process shall no longer be considered nonobvious solely on the basis of section 103(b)(1). The burden of establishing invalidity of a patent or any claim thereof shall rest on the party asserting such invalidity.

The following shall be defenses in any action involving the validity or infringement of a patent and shall be pleaded:

- (1) Noninfringement, absence of liability for infringement, or unenforceability,
- (2) Invalidity of the patent or any claim in suit on any ground specified in part II of this title as a condition for patentability,

(3) Invalidity of the patent or any claim in suit for failure to comply with any requirement of sections 112 or 251 of this title,

(4) Any other fact or act made a defense by this title.

In actions involving the validity or infringement of a patent the party asserting invalidity or noninfringement shall give notice in the pleadings or otherwise in writing to the adverse party at least thirty days before the trial, of the country, number, date, and name of the patentee of any patent, the title, date, and page numbers of any publication to be relied upon as anticipation of the patent in suit or, except in actions in the United States Court of Federal Claims, as showing the state of the art, and the name and address of any person who may be relied upon as the prior inventor or as having prior knowledge of or as having previously used or offered for sale the invention of the patent in suit. In the absence of such notice proof of the said matters may not be made at the trial except on such terms as the court requires.

Invalidity of the extension of a patent term or any portion thereof under section 154(b) or 156 of this title because of the material failure—

- (1) by the applicant for the extension, or
- (2) by the Director, to comply with the requirements of such section shall be a defense in any action involving the infringement of a patent during the period of the extension of its term and shall be pleaded. A due diligence determination under section 156(d)(2) is not subject to review in such an action.

(Amended July 24, 1965, Public Law 89-83, sec. 10, 79 Stat. 261; Nov. 14, 1975, Public Law 94-131, sec. 10, 89 Stat. 692; Apr. 2, 1982, Public Law 97-164, sec. 161(7), 96 Stat. 49; Sept. 24, 1984, Public Law 98-417, sec. 203, 98 Stat. 1603; Oct. 29, 1992, Public Law 102-572, sec. 902(b)(1), 106 Stat. 4516; Nov. 1, 1995, Public Law 104-41, sec. 2, 109 Stat. 352; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-560, 582 (S. 1948 secs. 4402(b)(1) and 4732(a)(10)(A)).)

35 U.S.C. 283 Injunction.

The several courts having jurisdiction of cases under this title may grant injunctions in accordance with the principles of equity to prevent the violation of any right secured by patent, on such terms as the court deems reasonable.

35 U.S.C. 284 Damages.

Upon finding for the claimant the court shall award the claimant damages adequate to compensate for the infringement but in no event less than a reasonable royalty for the use made of the invention by the infringer, together with interest and costs as fixed by the court.

When the damages are not found by a jury, the court shall assess them. In either event the court may increase the damages up to three times the amount found or assessed. Increased damages under this paragraph shall not apply to provisional rights under section 154(d) of this title.

The court may receive expert testimony as an aid to the determination of damages or of what royalty would be reasonable under the circumstances.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-566 (S. 1948 sec. 4507(9)).)

35 U.S.C. 285 Attorney fees.

The court in exceptional cases may award reasonable attorney fees to the prevailing party.

35 U.S.C. 286 Time limitation on damages.

Except as otherwise provided by law, no recovery shall be had for any infringement committed more than six years prior to the filing of the complaint or counterclaim for infringement in the action.

In the case of claims against the United States Government for use of a patented invention, the period before bringing suit, up to six years, between the date of receipt of a written claim for compensation by the department or agency of the Government having authority to settle such claim, and the date of mailing by the Government of a notice to the claimant that his claim has been denied shall not be counted as a part of the period referred to in the preceding paragraph.

35 U.S.C. 287 Limitation on damages and other remedies; marking and notice.

(a) Patentees, and persons making, offering for sale, or selling within the United States any patented article for or under them, or importing any patented article into the United States, may give notice to the public that the same is patented, either by fixing thereon the word "patent" or the abbreviation "pat.", together with the number of the patent, or when, from the character of the article, this cannot be done, by fixing to it, or to the package wherein one or more of them is contained, a label containing a like notice. In

the event of failure so to mark, no damages shall be recovered by the patentee in any action for infringement, except on proof that the infringer was notified of the infringement and continued to infringe thereafter, in which event damages may be recovered only for infringement occurring after such notice. Filing of an action for infringement shall constitute such notice.

(b)(1) An infringer under section 271(g) shall be subject to all the provisions of this title relating to damages and injunctions except to the extent those remedies are modified by this subsection or section 9006 of the Process Patent Amendments Act of 1988. The modifications of remedies provided in this subsection shall not be available to any person who —

(A) practiced the patented process;

(B) owns or controls, or is owned or controlled by, the person who practiced the patented process; or

(C) had knowledge before the infringement that a patented process was used to make the product the importation, use, offer for sale, or sale of which constitutes the infringement.

(2) No remedies for infringement under section 271(g) of this title shall be available with respect to any product in the possession of, or in transit to, the person subject to liability under such section before that person had notice of infringement with respect to that product. The person subject to liability shall bear the burden of proving any such possession or transit.

(3)(A) In making a determination with respect to the remedy in an action brought for infringement under section 271(g), the court shall consider—

(i) the good faith demonstrated by the defendant with respect to a request for disclosure;

(ii) the good faith demonstrated by the plaintiff with respect to a request for disclosure, and

(iii) the need to restore the exclusive rights secured by the patent.

(B) For purposes of subparagraph (A), the following are evidence of good faith:

(i) a request for disclosure made by the defendant;

(ii) a response within a reasonable time by the person receiving the request for disclosure; and

(iii) the submission of the response by the defendant to the manufacturer, or if the manufacturer is not known, to the supplier, of the product to be purchased by the defendant, together with a request

for a written statement that the process claimed in any patent disclosed in the response is not used to produce such product.

The failure to perform any acts described in the preceding sentence is evidence of absence of good faith unless there are mitigating circumstances. Mitigating circumstances include the case in which, due to the nature of the product, the number of sources for the product, or like commercial circumstances, a request for disclosure is not necessary or practicable to avoid infringement.

(4)(A) For purposes of this subsection, a “request for disclosure” means a written request made to a person then engaged in the manufacture of a product to identify all process patents owned by or licensed to that person, as of the time of the request, that the person then reasonably believes could be asserted to be infringed under section 271(g) if that product were imported into, or sold, offered for sale, or used in, the United States by an unauthorized person. A request for disclosure is further limited to a request —

(i) which is made by a person regularly engaged in the United States in the sale of the type of products as those manufactured by the person to whom the request is directed, or which includes facts showing that the person making the request plans to engage in the sale of such products in the United States;

(ii) which is made by such person before the person’s first importation, use, offer for sale, or sale of units of the product produced by an infringing process and before the person had notice of infringement with respect to the product; and

(iii) which includes a representation by the person making the request that such person will promptly submit the patents identified pursuant to the request to the manufacturer, or if the manufacturer is not known, to the supplier, of the product to be purchased by the person making the request, and will request from that manufacturer or supplier a written statement that none of the processes claimed in those patents is used in the manufacture of the product.

(B) In the case of a request for disclosure received by a person to whom a patent is licensed, that person shall either identify the patent or promptly notify the licensor of the request for disclosure.

(C) A person who has marked, in the manner prescribed by subsection (a), the number of the process patent on all products made by the patented process which have been offered for sale or sold by that person in the United States, or imported by the person into the United States, before a request for disclosure is received is not required to respond to the request for disclosure. For purposes of the preceding sentence, the term “all products” does not include products made before the effective date of the Process Patent Amendments Act of 1988.

(5)(A) For purposes of this subsection, notice of infringement means actual knowledge, or receipt by a person of a written notification, or a combination thereof, of information sufficient to persuade a reasonable person that it is likely that a product was made by a process patented in the United States.

(B) A written notification from the patent holder charging a person with infringement shall specify the patented process alleged to have been used and the reasons for a good faith belief that such process was used. The patent holder shall include in the notification such information as is reasonably necessary to explain fairly the patent holder’s belief, except that the patent holder is not required to disclose any trade secret information.

(C) A person who receives a written notification described in subparagraph (B) or a written response to a request for disclosure described in paragraph (4) shall be deemed to have notice of infringement with respect to any patent referred to in such written notification or response unless that person, absent mitigating circumstances—

(i) promptly transmits the written notification or response to the manufacturer or, if the manufacturer is not known, to the supplier, of the product purchased or to be purchased by that person; and

(ii) receives a written statement from the manufacturer or supplier which on its face sets forth a well grounded factual basis for a belief that the identified patents are not infringed.

(D) For purposes of this subsection, a person who obtains a product made by a process patented in the United States in a quantity which is abnormally large in relation to the volume of business of such person or an efficient inventory level shall be rebuttably

presumed to have actual knowledge that the product was made by such patented process.

(6) A person who receives a response to a request for disclosure under this subsection shall pay to the person to whom the request was made a reasonable fee to cover actual costs incurred in complying with the request, which may not exceed the cost of a commercially available automated patent search of the matter involved, but in no case more than \$500.

(c)(1) With respect to a medical practitioner's performance of a medical activity that constitutes an infringement under section 271(a) or (b) of this title, the provisions of sections 281, 283, 284, and 285 of this title shall not apply against the medical practitioner or against a related health care entity with respect to such medical activity.

(2) For the purposes of this subsection:

(A) the term "medical activity" means the performance of a medical or surgical procedure on a body, but shall not include (i) the use of a patented machine, manufacture, or composition of matter in violation of such patent, (ii) the practice of a patented use of a composition of matter in violation of such patent, or (iii) the practice of a process in violation of a biotechnology patent.

(B) the term "medical practitioner" means any natural person who is licensed by a State to provide the medical activity described in subsection (c)(1) or who is acting under the direction of such person in the performance of the medical activity.

(C) the term "related health care entity" shall mean an entity with which a medical practitioner has a professional affiliation under which the medical practitioner performs the medical activity, including but not limited to a nursing home, hospital, university, medical school, health maintenance organization, group medical practice, or a medical clinic.

(D) the term "professional affiliation" shall mean staff privileges, medical staff membership, employment or contractual relationship, partnership or ownership interest, academic appointment, or other affiliation under which a medical practitioner provides the medical activity on behalf of, or in association with, the health care entity.

(E) the term "body" shall mean a human body, organ or cadaver, or a nonhuman animal used in medical research or instruction directly relating to the treatment of humans.

(F) the term "patented use of a composition of matter" does not include a claim for a method of performing a medical or surgical procedure on a body that recites the use of a composition of matter where the use of that composition of matter does not directly contribute to achievement of the objective of the claimed method.

(G) the term "State" shall mean any state or territory of the United States, the District of Columbia, and the Commonwealth of Puerto Rico.

(3) This subsection does not apply to the activities of any person, or employee or agent of such person (regardless of whether such person is a tax exempt organization under section 501(c) of the Internal Revenue Code), who is engaged in the commercial development, manufacture, sale, importation, or distribution of a machine, manufacture, or composition of matter or the provision of pharmacy or clinical laboratory services (other than clinical laboratory services provided in a physician's office), where such activities are:

(A) directly related to the commercial development, manufacture, sale, importation, or distribution of a machine, manufacture, or composition of matter or the provision of pharmacy or clinical laboratory services (other than clinical laboratory services provided in a physician's office), and

(B) regulated under the Federal Food, Drug, and Cosmetic Act, the Public Health Service Act, or the Clinical Laboratories Improvement Act.

(4) This subsection shall not apply to any patent issued based on an application the earliest effective filing date of which is prior to September 30, 1996.

(Amended Aug. 23, 1988, Public Law 100-418, sec. 9004(a), 102 Stat. 1564; Dec. 8, 1994, Public Law 103-465, sec. 533(b)(5), 108 Stat. 4989.)

(Subsection (c) added Sept. 30, 1996, Public Law 104-208, sec. 616, 110 Stat. 3009-67.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-589 (S. 1948 sec. 4803).)

35 U.S.C. 288 Action for infringement of a patent containing an invalid claim.

Whenever, without deceptive intention, a claim of a patent is invalid, an action may be maintained for the infringement of a claim of the patent which may be valid. The patentee shall recover no costs unless a dis-

claimer of the invalid claim has been entered at the Patent and Trademark Office before the commencement of the suit.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 289 Additional remedy for infringement of design patent.

Whoever during the term of a patent for a design, without license of the owner, (1) applies the patented design, or any colorable imitation thereof, to any article of manufacture for the purpose of sale, or (2) sells or exposes for sale any article of manufacture to which such design or colorable imitation has been applied shall be liable to the owner to the extent of his total profit, but not less than \$250, recoverable in any United States district court having jurisdiction of the parties.

Nothing in this section shall prevent, lessen, or impeach any other remedy which an owner of an infringed patent has under the provisions of this title, but he shall not twice recover the profit made from the infringement.

35 U.S.C. 290 Notice of patent suits.

The clerks of the courts of the United States, within one month after the filing of an action under this title, shall give notice thereof in writing to the Director, setting forth so far as known the names and addresses of the parties, name of the inventor, and the designating number of the patent upon which the action has been brought. If any other patent is subsequently included in the action he shall give like notice thereof. Within one month after the decision is rendered or a judgment issued the clerk of the court shall give notice thereof to the Director. The Director shall, on receipt of such notices, enter the same in the file of such patent.

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 291 Interfering patents.

The owner of an interfering patent may have relief against the owner of another by civil action, and the court may adjudge the question of validity of any of the interfering patents, in whole or in part. The provisions of the second paragraph of section 146 of this title shall apply to actions brought under this section.

35 U.S.C. 292 False marking.

(a) Whoever, without the consent of the patentee, marks upon, or affixes to, or uses in advertising in connection with anything made, used, offered for sale, or sold by same person within the United States, or imported by the person into the United States, the name or any imitation of the name of the patentee, the patent number, or the words “patent,” “patentee,” or the like, with the intent of counterfeiting or imitating the mark of the patentee, or of deceiving the public and inducing them to believe that the thing was made, offered for sale, sold, or imported into the United States by or with the consent of the patentee; or

Whoever marks upon, or affixes to, or uses in advertising in connection with any unpatented article the word “patent” or any word or number importing the same is patented, for the purpose of deceiving the public; or

Whoever marks upon, or affixes to, or uses in advertising in connection with any article the words “patent applied for,” “patent pending,” or any word importing that an application for patent has been made, when no application for patent has been made, or if made, is not pending, for the purpose of deceiving the public —

Shall be fined not more than \$500 for every such offense.

(b) Any person may sue for the penalty, in which event one-half shall go to the person suing and the other to the use of the United States.

(Subsection (a) amended Dec. 8, 1994, Public Law 103-465, sec. 533(b)(6), 108 Stat. 4990.)

35 U.S.C. 293 Nonresident patentee; service and notice.

Every patentee not residing in the United States may file in the Patent and Trademark Office a written designation stating the name and address of a person residing within the United States on whom may be served process or notice of proceedings affecting the patent or rights thereunder. If the person designated cannot be found at the address given in the last designation, or if no person has been designated, the United States District Court for the District of Columbia shall have jurisdiction and summons shall be served by publication or otherwise as the court directs. The court shall have the same jurisdiction to take any action respecting the patent or rights thereunder that it

would have if the patentee were personally within the jurisdiction of the court.

(Amended Jan. 2, 1975, Public Law 93-596, sec. 1, 88 Stat. 1949.)

35 U.S.C. 294 Voluntary arbitration.

(a) A contract involving a patent or any right under a patent may contain a provision requiring arbitration of any dispute relating to patent validity or infringement arising under the contract. In the absence of such a provision, the parties to an existing patent validity or infringement dispute may agree in writing to settle such dispute by arbitration. Any such provision or agreement shall be valid, irrevocable, and enforceable, except for any grounds that exist at law or in equity for revocation of a contract.

(b) Arbitration of such disputes, awards by arbitrators, and confirmation of awards shall be governed by title 9, to the extent such title is not inconsistent with this section. In any such arbitration proceeding, the defenses provided for under section 282 of this title shall be considered by the arbitrator if raised by any party to the proceeding.

(c) An award by an arbitrator shall be final and binding between the parties to the arbitration but shall have no force or effect on any other person. The parties to an arbitration may agree that in the event a patent which is the subject matter of an award is subsequently determined to be invalid or unenforceable in a judgment rendered by a court of competent jurisdiction from which no appeal can or has been taken, such award may be modified by any court of competent jurisdiction upon application by any party to the arbitration. Any such modification shall govern the rights and obligations between such parties from the date of such modification.

(d) When an award is made by an arbitrator, the patentee, his assignee or licensee shall give notice thereof in writing to the Director. There shall be a separate notice prepared for each patent involved in such proceeding. Such notice shall set forth the names and addresses of the parties, the name of the inventor, and the name of the patent owner, shall designate the number of the patent, and shall contain a copy of the award. If an award is modified by a court, the party requesting such modification shall give notice of such modification to the Director. The Director shall, upon receipt of either notice, enter the same in the record of the prosecution of such patent. If the required notice is

not filed with the Director, any party to the proceeding may provide such notice to the Director.

(e) The award shall be unenforceable until the notice required by subsection (d) is received by the Director.

(Added Aug. 27, 1982, Public Law 97-247, sec. 17(b)(1), 96 Stat. 322; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)); subsections (b) and (c) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

35 U.S.C. 295 Presumption: Product made by patented process.

In actions alleging infringement of a process patent based on the importation, sale, offered for sale, or use of a product which is made from a process patented in the United States, if the court finds—

(1) that a substantial likelihood exists that the product was made by the patented process, and

(2) that the plaintiff has made a reasonable effort to determine the process actually used in the production of the product and was unable so to determine, the product shall be presumed to have been so made, and the burden of establishing that the product was not made by the process shall be on the party asserting that it was not so made.

(Added Aug. 23, 1988, Public Law 100-418, sec. 9005(a), 102 Stat. 1566; amended Dec. 8, 1994, Public Law 103-465, sec. 533(b)(7), 108 Stat. 4990.)

35 U.S.C. 296 Liability of States, instrumentalities of States, and State officials for infringement of patents.

(a) **IN GENERAL.** - Any State, any instrumentality of a State, and any officer or employee of a State or instrumentality of a State, acting in his official capacity, shall not be immune, under the eleventh amendment of the Constitution of the United States or under any other doctrine of sovereign immunity, from suit in Federal court by any person, including any governmental or nongovernmental entity, for infringement of a patent under section 271, or for any other violation under this title.

(b) **REMEDIES.** - In a suit described in subsection (a) for a violation described in that subsection, remedies (including remedies both at law and in equity) are available for the violation to the same extent as such remedies are available for such a violation in a suit against any private entity. Such remedies

include damages, interest, costs, and treble damages under section 284, attorney fees under section 285, and the additional remedy for infringement of design patents under section 289.

(Added Oct. 28, 1992, Public Law 102-560, sec. 2(a)(2), 106 Stat. 4230.)

35 U.S.C. 297 Improper and deceptive invention promotion.

(a) **IN GENERAL.**— An invention promoter shall have a duty to disclose the following information to a customer in writing, prior to entering into a contract for invention promotion services:

(1) the total number of inventions evaluated by the invention promoter for commercial potential in the past 5 years, as well as the number of those inventions that received positive evaluations, and the number of those inventions that received negative evaluations;

(2) the total number of customers who have contracted with the invention promoter in the past 5 years, not including customers who have purchased trade show services, research, advertising, or other nonmarketing services from the invention promoter, or who have defaulted in their payment to the invention promoter;

(3) the total number of customers known by the invention promoter to have received a net financial profit as a direct result of the invention promotion services provided by such invention promoter;

(4) the total number of customers known by the invention promoter to have received license agreements for their inventions as a direct result of the invention promotion services provided by such invention promoter; and

(5) the names and addresses of all previous invention promotion companies with which the invention promoter or its officers have collectively or individually been affiliated in the previous 10 years.

(b) **CIVIL ACTION.**—

(1) Any customer who enters into a contract with an invention promoter and who is found by a court to have been injured by any material false or fraudulent statement or representation, or any omission of material fact, by that invention promoter (or any agent, employee, director, officer, partner, or independent contractor of such invention promoter), or by the failure of that invention promoter to disclose such information as required under subsection (a),

may recover in a civil action against the invention promoter (or the officers, directors, or partners of such invention promoter), in addition to reasonable costs and attorneys' fees--

(A) the amount of actual damages incurred by the customer; or

(B) at the election of the customer at any time before final judgment is rendered, statutory damages in a sum of not more than \$5,000, as the court considers just.

(2) Notwithstanding paragraph (1), in a case where the customer sustains the burden of proof, and the court finds, that the invention promoter intentionally misrepresented or omitted a material fact to such customer, or willfully failed to disclose such information as required under subsection (a), with the purpose of deceiving that customer, the court may increase damages to not more than three times the amount awarded, taking into account past complaints made against the invention promoter that resulted in regulatory sanctions or other corrective actions based on those records compiled by the Commissioner of Patents under subsection (d).

(c) **DEFINITIONS.**— For purposes of this section—

(1) a “contract for invention promotion services” means a contract by which an invention promoter undertakes invention promotion services for a customer;

(2) a “customer” is any individual who enters into a contract with an invention promoter for invention promotion services;

(3) the term “invention promoter” means any person, firm, partnership, corporation, or other entity who offers to perform or performs invention promotion services for, or on behalf of, a customer, and who holds itself out through advertising in any mass media as providing such services, but does not include—

(A) any department or agency of the Federal Government or of a State or local government;

(B) any nonprofit, charitable, scientific, or educational organization, qualified under applicable State law or described under section 170(b)(1)(A) of the Internal Revenue Code of 1986;

(C) any person or entity involved in the evaluation to determine commercial potential of, or offering to license or sell, a utility patent or a previously filed nonprovisional utility patent application;

(D) any party participating in a transaction involving the sale of the stock or assets of a business; or

(E) any party who directly engages in the business of retail sales of products or the distribution of products; and

(4) the term “invention promotion services” means the procurement or attempted procurement for a customer of a firm, corporation, or other entity to develop and market products or services that include the invention of the customer.

(d) RECORDS OF COMPLAINTS.—

(1) RELEASE OF COMPLAINTS.— The Commissioner of Patents shall make all complaints received by the Patent and Trademark Office involving invention promoters publicly available, together with any response of the invention promoters. The Commissioner of Patents shall notify the invention promoter of a complaint and provide a reasonable opportunity to reply prior to making such complaint publicly available.

(2) REQUEST FOR COMPLAINTS.— The Commissioner of Patents may request complaints relating to invention promotion services from any Federal or State agency and include such complaints in the records maintained under paragraph (1), together with any response of the invention promoters.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-552 (S. 1948 sec. 4102(a)).)

CHAPTER 30 — PRIOR ART CITATIONS TO OFFICE AND EX PARTE REEXAMINATION OF PATENTS

Sec.

301 Citation of prior art.

302 Request for reexamination.

303 Determination of issue by Director.

304 Reexamination order by Director.

305 Conduct of reexamination proceedings.

306 Appeal.

307 Certificate of patentability, unpatentability, and claim cancellation.

35 U.S.C. 301 Citation of prior art.

Any person at any time may cite to the Office in writing prior art consisting of patents or printed publications which that person believes to have a bearing

on the patentability of any claim of a particular patent. If the person explains in writing the pertinency and manner of applying such prior art to at least one claim of the patent, the citation of such prior art and the explanation thereof will become a part of the official file of the patent. At the written request of the person citing the prior art, his or her identity will be excluded from the patent file and kept confidential.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3015.)

35 U.S.C. 302 Request for reexamination.

Any person at any time may file a request for reexamination by the Office of any claim of a patent on the basis of any prior art cited under the provisions of section 301 of this title. The request must be in writing and must be accompanied by payment of a reexamination fee established by the Director pursuant to the provisions of section 41 of this title. The request must set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested. Unless the requesting person is the owner of the patent, the Director promptly will send a copy of the request to the owner of record of the patent.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3015; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(8) and 4732(a)(10)(A)).)

35 U.S.C. 303 Determination of issue by Director.

(a) Within three months following the filing of a request for reexamination under the provisions of section 302 of this title, the Director will determine whether a substantial new question of patentability affecting any claim of the patent concerned is raised by the request, with or without consideration of other patents or printed publications. On his own initiative, and any time, the Director may determine whether a substantial new question of patentability is raised by patents and publications discovered by him or cited under the provisions of section 301 of this title. The existence of a substantial new question of patentability is not precluded by the fact that a patent or printed publication was previously cited by or to the Office or considered by the Office.

(b) A record of the Director’s determination under subsection (a) of this section will be placed in the official file of the patent, and a copy promptly will

be given or mailed to the owner of record of the patent and to the person requesting reexamination, if any.

(c) A determination by the Director pursuant to subsection (a) of this section that no substantial new question of patentability has been raised will be final and nonappealable. Upon such a determination, the Director may refund a portion of the reexamination fee required under section 302 of this title.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3015; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-581, 582 (S. 1948 secs. 4732(a)(9) and (4732(a)(10)(A))); subsection (a) amended Nov. 2, 2002, Public Law 107-273, sec. 13105, 116 Stat. 1900.)

35 U.S.C. 304 Reexamination order by Director.

If, in a determination made under the provisions of subsection 303(a) of this title, the Director finds that a substantial new question of patentability affecting any claim of a patent is raised, the determination will include an order for reexamination of the patent for resolution of the question. The patent owner will be given a reasonable period, not less than two months from the date a copy of the determination is given or mailed to him, within which he may file a statement on such question, including any amendment to his patent and new claim or claims he may wish to propose, for consideration in the reexamination. If the patent owner files such a statement, he promptly will serve a copy of it on the person who has requested reexamination under the provisions of section 302 of this title. Within a period of two months from the date of service, that person may file and have considered in the reexamination a reply to any statement filed by the patent owner. That person promptly will serve on the patent owner a copy of any reply filed.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3016; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 305 Conduct of reexamination proceedings.

After the times for filing the statement and reply provided for by section 304 of this title have expired, reexamination will be conducted according to the procedures established for initial examination under the provisions of sections 132 and 133 of this title. In any reexamination proceeding under this chapter, the

patent owner will be permitted to propose any amendment to his patent and a new claim or claims thereto, in order to distinguish the invention as claimed from the prior art cited under the provisions of section 301 of this title, or in response to a decision adverse to the patentability of a claim of a patent. No proposed amended or new claim enlarging the scope of a claim of the patent will be permitted in a reexamination proceeding under this chapter. All reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, will be conducted with special dispatch within the Office.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3016; amended Nov. 8, 1984, Public Law 98-622, sec. 204(c), 98 Stat. 3388.)

35 U.S.C. 306 Appeal.

The patent owner involved in a reexamination proceeding under this chapter may appeal under the provisions of section 134 of this title, and may seek court review under the provisions of sections 141 to 145 of this title, with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3016.)

35 U.S.C. 307 Certificate of patentability, unpatentability, and claim cancellation.

(a) In a reexamination proceeding under this chapter, when the time for appeal has expired or any appeal proceeding has terminated, the Director will issue and publish a certificate canceling any claim of the patent finally determined to be unpatentable, confirming any claim of the patent determined to be patentable, and incorporating in the patent any proposed amended or new claim determined to be patentable.

(b) Any proposed amended or new claim determined to be patentable and incorporated into a patent following a reexamination proceeding will have the same effect as that specified in section 252 of this title for reissued patents on the right of any person who made, purchased, or used within the United States, or imported into the United States, anything patented by such proposed amended or new claim, or who made substantial preparation for the same, prior to issuance of a certificate under the provisions of subsection (a) of this section.

(Added Dec. 12, 1980, Public Law 96-517, sec. 1, 94 Stat. 3016; amended Dec. 8, 1994, Public Law 103-465, sec. 533(b)(8), 108 Stat. 4990; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 31 — OPTIONAL INTER PARTES REEXAMINATION PROCEDURES

Sec.

- 311 Request for inter partes reexamination.
- 312 Determination of issue by Director.
- 313 Inter partes reexamination order by Director.
- 314 Conduct of inter partes reexamination proceedings.
- 315 Appeal.
- 316 Certificate of patentability, unpatentability, and claim cancellation.
- 317 Inter partes reexamination prohibited.
- 318 Stay of litigation.

35 U.S.C. 311 Request for inter partes reexamination

(a) **IN GENERAL.**— Any third-party requester at any time may file a request for inter partes reexamination by the Office of a patent on the basis of any prior art cited under the provisions of section 301.

(b) **REQUIREMENTS.**— The request shall—

(1) be in writing, include the identity of the real party in interest, and be accompanied by payment of an inter partes reexamination fee established by the Director under section 41; and

(2) set forth the pertinency and manner of applying cited prior art to every claim for which reexamination is requested.

(c) **COPY.**— The Director promptly shall send a copy of the request to the owner of record of the patent.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)); subsections (a) and (c) amended Nov. 2, 2002, Public Law 107-273, sec. 13202, 116 Stat. 1901.)

35 U.S.C. 312 Determination of issue by Director

(a) **REEXAMINATION.**— Not later than 3 months after the filing of a request for inter partes reexamination under section 311, the Director shall determine whether a substantial new question of patentability affecting any claim of the patent concerned is raised by the request, with or without consideration

of other patents or printed publications. The existence of a substantial new question of patentability is not precluded by the fact that a patent or printed publication was previously cited by or to the Office or considered by the Office.

(b) **RECORD.**— A record of the Director's determination under subsection (a) shall be placed in the official file of the patent, and a copy shall be promptly given or mailed to the owner of record of the patent and to the third-party requester.

(c) **FINAL DECISION.**— A determination by the Director under subsection (a) shall be final and non-appealable. Upon a determination that no substantial new question of patentability has been raised, the Director may refund a portion of the inter partes reexamination fee required under section 311.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)); subsections (a) and (b) amended Nov. 2, 2002, Public Law 107-273, secs. 13105 and 13202, 116 Stat. 1900-1901.)

35 U.S.C. 313 Inter partes reexamination order by Director

If, in a determination made under section 312(a), the Director finds that a substantial new question of patentability affecting a claim of a patent is raised, the determination shall include an order for inter partes reexamination of the patent for resolution of the question. The order may be accompanied by the initial action of the Patent and Trademark Office on the merits of the inter partes reexamination conducted in accordance with section 314.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)).)

35 U.S.C. 314 Conduct of inter partes reexamination proceedings

(a) **IN GENERAL.**— Except as otherwise provided in this section, reexamination shall be conducted according to the procedures established for initial examination under the provisions of sections 132 and 133. In any inter partes reexamination proceeding under this chapter, the patent owner shall be permitted to propose any amendment to the patent and a new claim or claims, except that no proposed amended or new claim enlarging the scope of the claims of the patent shall be permitted.

(b) RESPONSE.—

(1) With the exception of the inter partes reexamination request, any document filed by either the patent owner or the third-party requester shall be served on the other party. In addition, the Office shall send to the third-party requester a copy of any communication sent by the Office to the patent owner concerning the patent subject to the inter partes reexamination proceeding.

(2) Each time that the patent owner files a response to an action on the merits from the Patent and Trademark Office, the third-party requester shall have one opportunity to file written comments addressing issues raised by the action of the Office or the patent owner's response thereto, if those written comments are received by the Office within 30 days after the date of service of the patent owner's response.

(c) **SPECIAL DISPATCH.—** Unless otherwise provided by the Director for good cause, all inter partes reexamination proceedings under this section, including any appeal to the Board of Patent Appeals and Interferences, shall be conducted with special dispatch within the Office.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)); subsection (b)(1) amended Nov. 2, 2002, Public Law 107-273, sec. 13202, 116 Stat. 1901.)

35 U.S.C. 315 Appeal

(a) **PATENT OWNER.—** The patent owner involved in an inter partes reexamination proceeding under this chapter—

(1) may appeal under the provisions of section 134 and may appeal under the provisions of sections 141 through 144, with respect to any decision adverse to the patentability of any original or proposed amended or new claim of the patent; and

(2) may be a party to any appeal taken by a third-party requester under subsection (b).

(b) **THIRD-PARTY REQUESTER.—** A third-party requester—

(1) may appeal under the provisions of section 134, and may appeal under the provisions of sections 141 through 144, with respect to any final decision favorable to the patentability of any original or proposed amended or new claim of the patent; and

(2) may, subject to subsection (c), be a party to any appeal taken by the patent owner under the provisions of section 134 or sections 141 through 144.

(c) **CIVIL ACTION.—** A third-party requester whose request for an inter partes reexamination results in an order under section 313 is estopped from asserting at a later time, in any civil action arising in whole or in part under section 1338 of title 28, the invalidity of any claim finally determined to be valid and patentable on any ground which the third-party requester raised or could have raised during the inter partes reexamination proceedings. This subsection does not prevent the assertion of invalidity based on newly discovered prior art unavailable to the third-party requester and the Patent and Trademark Office at the time of the inter partes reexamination proceedings.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)); subsection (b) amended Nov. 2, 2002, Public Law 107-273, sec. 13106, 116 Stat. 1900; subsection (c) amended Nov. 2, 2002, Public Law 107-273, sec. 13202, 116 Stat. 1901.)

35 U.S.C. 316 Certificate of patentability, unpatentability and claim cancellation

(a) **IN GENERAL.—** In an inter partes reexamination proceeding under this chapter, when the time for appeal has expired or any appeal proceeding has terminated, the Director shall issue and publish a certificate canceling any claim of the patent finally determined to be unpatentable, confirming any claim of the patent determined to be patentable, and incorporating in the patent any proposed amended or new claim determined to be patentable.

(b) **AMENDED OR NEW CLAIM.—** Any proposed amended or new claim determined to be patentable and incorporated into a patent following an inter partes reexamination proceeding shall have the same effect as that specified in section 252 of this title for reissued patents on the right of any person who made, purchased, or used within the United States, or imported into the United States, anything patented by such proposed amended or new claim, or who made substantial preparation therefor, prior to issuance of a certificate under the provisions of subsection (a) of this section.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)).)

35 U.S.C. 317 Inter partes reexamination prohibited

(a) **ORDER FOR REEXAMINATION.**— Notwithstanding any provision of this chapter, once an order for inter partes reexamination of a patent has been issued under section 313, neither the third-party requester nor its privies may file a subsequent request for inter partes reexamination of the patent until an inter partes reexamination certificate is issued and published under section 316, unless authorized by the Director.

(b) **FINAL DECISION.**— Once a final decision has been entered against a party in a civil action arising in whole or in part under section 1338 of title 28, that the party has not sustained its burden of proving the invalidity of any patent claim in suit or if a final decision in an inter partes reexamination proceeding instituted by a third-party requester is favorable to the patentability of any original or proposed amended or new claim of the patent, then neither that party nor its privies may thereafter request an inter partes reexamination of any such patent claim on the basis of issues which that party or its privies raised or could have raised in such civil action or inter partes reexamination proceeding, and an inter partes reexamination requested by that party or its privies on the basis of such issues may not thereafter be maintained by the Office, notwithstanding any other provision of this chapter. This subsection does not prevent the assertion of invalidity based on newly discovered prior art unavailable to the third-party requester and the Patent and Trademark Office at the time of the inter partes reexamination proceedings.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)); subsections (a) and (b) amended Nov. 2, 2002, Public Law 107-273, sec. 13202, 116 Stat. 1901.)

35 U.S.C. 318 Stay of litigation

Once an order for inter partes reexamination of a patent has been issued under section 313, the patent owner may obtain a stay of any pending litigation which involves an issue of patentability of any claims of the patent which are the subject of the inter partes reexamination order, unless the court before which such litigation is pending determines that a stay would not serve the interests of justice.

(Added Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-570 (S. 1948 sec. 4604(a)).)

PART IV — PATENT COOPERATION TREATY

CHAPTER 35 — DEFINITIONS

Sec.

351 Definitions.

35 U.S.C. 351 Definitions.

When used in this part unless the context otherwise indicates—

(a) The term “treaty” means the Patent Cooperation Treaty done at Washington, on June 19, 1970.

(b) The term “Regulations,” when capitalized, means the Regulations under the treaty, done at Washington on the same date as the treaty. The term “regulations,” when not capitalized, means the regulations established by the Director under this title.

(c) The term “international application” means an application filed under the treaty.

(d) The term “international application originating in the United States” means an international application filed in the Patent and Trademark Office when it is acting as a Receiving Office under the treaty, irrespective of whether or not the United States has been designated in that international application.

(e) The term “international application designating the United States” means an international application specifying the United States as a country in which a patent is sought, regardless where such international application is filed.

(f) The term “Receiving Office” means a national patent office or intergovernmental organization which receives and processes international applications as prescribed by the treaty and the Regulations.

(g) The terms “International Searching Authority” and “International Preliminary Examining Authority” mean a national patent office or intergovernmental organization as appointed under the treaty which processes international applications as prescribed by the treaty and the Regulations.

(h) The term “International Bureau” means the international intergovernmental organization which is recognized as the coordinating body under the treaty and the Regulations.

(i) Terms and expressions not defined in this part are to be taken in the sense indicated by the treaty and the Regulations.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 685; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392; Nov. 6, 1986, Public Law 99-616, sec. 2 (a)-(c), 100 Stat. 3485; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

CHAPTER 36 — INTERNATIONAL STAGE

Sec.

- 361 Receiving Office.
- 362 International Searching Authority and International Preliminary Examining Authority.
- 363 International application designating the United States: Effect.
- 364 International stage: Procedure.
- 365 Right of priority; benefit of the filing date of a prior application.
- 366 Withdrawn international application.
- 367 Actions of other authorities: Review.
- 368 Secrecy of certain inventions; filing international applications in foreign countries.

35 U.S.C. 361 Receiving Office.

(a) The Patent and Trademark Office shall act as a Receiving Office for international applications filed by nationals or residents of the United States. In accordance with any agreement made between the United States and another country, the Patent and Trademark Office may also act as a Receiving Office for international applications filed by residents or nationals of such country who are entitled to file international applications.

(b) The Patent and Trademark Office shall perform all acts connected with the discharge of duties required of a Receiving Office, including the collection of international fees and their transmittal to the International Bureau.

(c) International applications filed in the Patent and Trademark Office shall be in the English language.

(d) The international fee, and the transmittal and search fees prescribed under section 376(a) of this part, shall either be paid on filing of an international application or within such later time as may be fixed by the Director.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 686; amended Nov. 8, 1984, Public Law 98-622, sec. 401(a), 403(a), 98 Stat. 3391-3392; Nov. 6, 1986, Public Law 99-616, sec. 2(d), 100 Stat. 3485; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 362 International Searching Authority and International Preliminary Examining Authority.

(a) The Patent and Trademark Office may act as an International Searching Authority and International Preliminary Examining Authority with respect to international applications in accordance with the terms and conditions of an agreement which may be concluded with the International Bureau, and may discharge all duties required of such Authorities, including the collection of handling fees and their transmittal to the International Bureau.

(b) The handling fee, preliminary examination fee, and any additional fees due for international preliminary examination shall be paid within such time as may be fixed by the Director.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 686; amended Nov. 8, 1984, Public Law 98-622, sec. 403 (a), 98 Stat. 3392; Nov. 6, 1986, Public Law 99-616, sec. 4, 100 Stat. 3485; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 363 International application designating the United States: Effect.

An international application designating the United States shall have the effect, from its international filing date under article 11 of the treaty, of a national application for patent regularly filed in the Patent and Trademark Office except as otherwise provided in section 102(e) of this title.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 686; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392.)

35 U.S.C. 364 International stage: Procedure.

(a) International applications shall be processed by the Patent and Trademark Office when acting as a Receiving Office, International Searching Authority, or International Preliminary Examining Authority, in accordance with the applicable provisions of the treaty, the Regulations, and this title.

(b) An applicant's failure to act within prescribed time limits in connection with requirements pertaining to a pending international application may be excused upon a showing satisfactory to the Director of unavoidable delay, to the extent not precluded by the treaty and the Regulations, and provided the conditions imposed by the treaty and the Regulations regarding the excuse of such failure to act are complied with.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 686; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392.)

(Subsection (a) amended Nov. 6, 1986, Public Law 99-616, sec. 5, 100 Stat. 3485.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 365 Right of priority; benefit of the filing date of a prior application.

(a) In accordance with the conditions and requirements of subsections (a) through (d) of section 119 of this title, a national application shall be entitled to the right of priority based on a prior filed international application which designated at least one country other than the United States.

(b) In accordance with the conditions and requirements of section 119(a) of this title and the treaty and the Regulations, an international application designating the United States shall be entitled to the right of priority based on a prior foreign application, or a prior international application designating at least one country other than the United States.

(c) In accordance with the conditions and requirements of section 120 of this title, an international application designating the United States shall be entitled to the benefit of the filing date of a prior national application or a prior international application designating the United States, and a national application shall be entitled to the benefit of the filing date of a prior international application designating the United States. If any claim for the benefit of an earlier filing date is based on a prior international application which designated but did not originate in the United States, the Director may require the filing in the Patent and Trademark Office of a certified copy of such application together with a translation thereof

into the English language, if it was filed in another language.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 686; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392; Dec. 8, 1994, Public Law 103-465, sec. 532(c)(4), 108 Stat. 4987; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 366 Withdrawn international application.

Subject to section 367 of this part, if an international application designating the United States is withdrawn or considered withdrawn, either generally or as to the United States, under the conditions of the treaty and the Regulations, before the applicant has complied with the applicable requirements prescribed by section 371(c) of this part, the designation of the United States shall have no effect after the date of withdrawal and shall be considered as not having been made, unless a claim for benefit of a prior filing date under section 365(c) of this section was made in a national application, or an international application designating the United States, filed before the date of such withdrawal. However, such withdrawn international application may serve as the basis for a claim of priority under section 365 (a) and (b) of this part, if it designated a country other than the United States.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 687; amended Nov. 8, 1984, Public Law 98-622, sec. 401(b), 98 Stat. 3391.)

35 U.S.C. 367 Actions of other authorities: Review.

(a) Where a Receiving Office other than the Patent and Trademark Office has refused to accord an international filing date to an international application designating the United States or where it has held such application to be withdrawn either generally or as to the United States, the applicant may request review of the matter by the Director, on compliance with the requirements of and within the time limits specified by the treaty and the Regulations. Such review may result in a determination that such application be considered as pending in the national stage.

(b) The review under subsection (a) of this section, subject to the same requirements and conditions, may also be requested in those instances where an international application designating the United States

is considered withdrawn due to a finding by the International Bureau under article 12 (3) of the treaty.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 687; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 368 Secrecy of certain inventions; filing international applications in foreign countries.

(a) International applications filed in the Patent and Trademark Office shall be subject to the provisions of chapter 17 of this title.

(b) In accordance with article 27 (8) of the treaty, the filing of an international application in a country other than the United States on the invention made in this country shall be considered to constitute the filing of an application in a foreign country within the meaning of chapter 17 of this title, whether or not the United States is designated in that international application.

(c) If a license to file in a foreign country is refused or if an international application is ordered to be kept secret and a permit refused, the Patent and Trademark Office when acting as a Receiving Office, International Searching Authority, or International Preliminary Examining Authority, may not disclose the contents of such application to anyone not authorized to receive such disclosure.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 687; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392; Nov. 6, 1986, Public Law 99-616, sec. 6, 100 Stat. 3486.)

CHAPTER 37 — NATIONAL STAGE

Sec.

- 371 National stage: Commencement.
- 372 National stage: Requirements and procedure.
- 373 Improper applicant.
- 374 Publication of international application: Effect.
- 375 Patent issued on international application: Effect.
- 376 Fees.

35 U.S.C. 371 National stage: Commencement.

(a) Receipt from the International Bureau of copies of international applications with any amendments to the claims, international search reports, and

international preliminary examination reports including any annexes thereto may be required in the case of international applications designating or electing the United States.

(b) Subject to subsection (f) of this section, the national stage shall commence with the expiration of the applicable time limit under article 22 (1) or (2), or under article 39 (1)(a) of the treaty.

(c) The applicant shall file in the Patent and Trademark Office —

(1) the national fee provided in section 41(a) of this title;

(2) a copy of the international application, unless not required under subsection (a) of this section or already communicated by the International Bureau, and a translation into the English language of the international application, if it was filed in another language;

(3) amendments, if any, to the claims in the international application, made under article 19 of the treaty, unless such amendments have been communicated to the Patent and Trademark Office by the International Bureau, and a translation into the English language if such amendments were made in another language;

(4) an oath or declaration of the inventor (or other person authorized under chapter 11 of this title) complying with the requirements of section 115 of this title and with regulations prescribed for oaths or declarations of applicants;

(5) a translation into the English language of any annexes to the international preliminary examination report, if such annexes were made in another language.

(d) The requirement with respect to the national fee referred to in subsection (c)(1), the translation referred to in subsection (c)(2), and the oath or declaration referred to in subsection (c)(4) of this section shall be complied with by the date of the commencement of the national stage or by such later time as may be fixed by the Director. The copy of the international application referred to in subsection (c)(2) shall be submitted by the date of the commencement of the national stage. Failure to comply with these requirements shall be regarded as abandonment of the application by the parties thereof, unless it be shown to the satisfaction of the Director that such failure to comply was unavoidable. The payment of a surcharge may be

required as a condition of accepting the national fee referred to in subsection (c)(1) or the oath or declaration referred to in subsection (c)(4) of this section if these requirements are not met by the date of the commencement of the national stage. The requirements of subsection (c)(3) of this section shall be complied with by the date of the commencement of the national stage, and failure to do so shall be regarded as a cancellation of the amendments to the claims in the international application made under article 19 of the treaty. The requirement of subsection (c)(5) shall be complied with at such time as may be fixed by the Director and failure to do so shall be regarded as cancellation of the amendments made under article 34 (2)(b) of the treaty.

(e) After an international application has entered the national stage, no patent may be granted or refused thereon before the expiration of the applicable time limit under article 28 or article 41 of the treaty, except with the express consent of the applicant. The applicant may present amendments to the specification, claims, and drawings of the application after the national stage has commenced.

(f) At the express request of the applicant, the national stage of processing may be commenced at any time at which the application is in order for such purpose and the applicable requirements of subsection (c) of this section have been complied with.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 688; amended Nov. 8, 1984, Public Law 98-622, sec. 402(a)-(d), 403(a), 98 Stat. 3391, 3392.)

(Subsections (a), (b), (c), (d), and (e) amended Nov. 6, 1986, Public Law, 99-616, sec. 7, 100 Stat. 3486.)

(Subsection (c)(1) amended Dec. 10, 1991, Public Law 102-204, sec. 5(g)(2), 105 Stat. 1641.)

(Amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

(Subsection (d) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

35 U.S.C. 372 National stage: Requirements and procedure.

(a) All questions of substance and, within the scope of the requirements of the treaty and Regulations, procedure in an international application designating the United States shall be determined as in the

case of national applications regularly filed in the Patent and Trademark Office.

(b) In case of international applications designating but not originating in, the United States -

(1) the Director may cause to be reexamined questions relating to form and contents of the application in accordance with the requirements of the treaty and the Regulations;

(2) the Director may cause the question of unity of invention to be reexamined under section 121 of this title, within the scope of the requirements of the treaty and the Regulations; and

(3) the Director may require a verification of the translation of the international application or any other document pertaining to the application if the application or other document was filed in a language other than English.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 689; amended Nov. 8, 1984, Public Law 98-622, sec. 402(e), (f), 403(a), 98 Stat. 3392; Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 373 Improper applicant.

An international application designating the United States, shall not be accepted by the Patent and Trademark Office for the national stage if it was filed by anyone not qualified under chapter 11 of this title to be an applicant for the purpose of filing a national application in the United States. Such international applications shall not serve as the basis for the benefit of an earlier filing date under section 120 of this title in a subsequently filed application, but may serve as the basis for a claim of the right of priority under subsections (a) through (d) of section 119 of this title, if the United States was not the sole country designated in such international application.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 689; amended Nov. 8, 1984, Public Law 98-622, sec. 403(a), 98 Stat. 3392; Dec. 8, 1994, Public Law 103-465, sec. 532(c)(5), 108 Stat. 4987.)

35 U.S.C. 374 Publication of international application.

The publication under the treaty defined in section 351(a) of this title, of an international application designating the United States shall be deemed a publication under section 122(b), except as provided in sections 102(e) and 154(d) of this title.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 689; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-566 (S. 1948 sec. 4507(10)); amended Nov. 2, 2002, Public Law 107-273, sec. 13205, 116 Stat. 1903.)

35 U.S.C. 375 Patent issued on international application: Effect.

(a) A patent may be issued by the Director based on an international application designating the United States, in accordance with the provisions of this title. Subject to section 102(e) of this title, such patent shall have the force and effect of a patent issued on a national application filed under the provisions of chapter 11 of this title.

(b) Where due to an incorrect translation the scope of a patent granted on an international application designating the United States, which was not originally filed in the English language, exceeds the scope of the international application in its original language, a court of competent jurisdiction may retroactively limit the scope of the patent, by declaring it unenforceable to the extent that it exceeds the scope of the international application in its original language.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 689; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501A-582 (S. 1948 sec. 4732(a)(10)(A)).)

35 U.S.C. 376 Fees.

(a) The required payment of the international fee and the handling fee, which amounts are specified in the Regulations, shall be paid in United States currency. The Patent and Trademark Office shall charge a national fee as provided in section 41(a), and may also charge the following fees:

- (1) A transmittal fee (see section 361(d)).
- (2) A search fee (see section 361(d)).
- (3) A supplemental search fee (to be paid when required).

(4) A preliminary examination fee and any additional fees (see section 362(b)).

(5) Such other fees as established by the Director.

(b) The amounts of fees specified in subsection (a) of this section, except the international fee and the handling fee, shall be prescribed by the Director. He may refund any sum paid by mistake or in excess of the fees so specified, or if required under the treaty

and the Regulations. The Director may also refund any part of the search fee, the national fee, the preliminary examination fee and any additional fees, where he determines such refund to be warranted.

(Added Nov. 14, 1975, Public Law 94-131, sec. 1, 89 Stat. 690, amended Nov. 8, 1984, Public Law 98-622, sec. 402(g), 403(a), 98 Stat. 3392; Nov. 6, 1986, Public Law 99-616, sec. 8(a) & (b), 100 Stat. 3486; Dec. 10, 1991, Public Law 102-204, sec. 5(g)(1), 105 Stat. 1640; amended Nov. 29, 1999, Public Law 106-113, sec. 1000(a)(9), 113 Stat. 1501-582 (S. 1948 sec. 4732(a)(10)(A)); subsections (a)(1)-(a)(3) amended Nov. 2, 2002, Public Law 107-273, sec. 13206, 116 Stat. 1905.)

LAWS NOT IN TITLE 35, UNITED STATES CODE

18 U.S.C. 1001 Statements or entries generally.

(a) Except as otherwise provided in this section, whoever, in any matter within the jurisdiction of the executive, legislative, or judicial branch of the Government of the United States, knowingly and willfully —

(1) falsifies, conceals, or covers up by any trick, scheme, or device a material fact;

(2) makes any materially false, fictitious, or fraudulent statement or representation; or

(3) makes or uses any false writing or document knowing the same to contain any materially false, fictitious, or fraudulent statement or entry; shall be fined under this title or imprisoned not more than 5 years, or both.

(b) Subsection (a) does not apply to a party to a judicial proceeding, or that party's counsel, for statements, representations, writings or documents submitted by such party or counsel to a judge or magistrate in that proceeding.

(c) With respect to any matter within the jurisdiction of the legislative branch, subsection (a) shall apply only to —

(1) administrative matters, including a claim for payment, a matter related to the procurement of property or services, personnel or employment practices, or support services, or a document required by law, rule, or regulation to be submitted to the Congress or any office or officer within the legislative branch; or

(2) any investigation or review, conducted pursuant to the authority of any committee, subcommittee, commission or office of the Congress, consistent with applicable rules of the House or Senate.

(Amended Sept. 13, 1994, Public Law 103-322, sec. 330016(1)(L), 108 Stat. 2147; Oct. 11, 1996, Public Law 104-292, Sec. 2, 110 Stat. 3459.)

18 U.S.C. 2071 Concealment, removal, or mutilation generally.

(a) Whoever willfully and unlawfully conceals, removes, mutilates, obliterates, or destroys, or attempts to do so, or, with intent to do so takes and carries away any record, proceeding, map, book, paper, document, or other thing, filed or deposited with any clerk or officer of any court of the United States, or in any public office, or with any judicial or

public officer of the United States, shall be fined under this title or imprisoned not more than three years, or both.

(b) Whoever, having the custody of any such record, proceeding, map, book, document, paper, or other thing, willfully and unlawfully conceals, removes, mutilates, obliterates, falsifies, or destroys the same, shall be fined under this title or imprisoned not more than three years, or both; and shall forfeit his office and be disqualified from holding any office under the United States. As used in this subsection, the term “office” does not include the office held by any person as a retired officer of the Armed Forces of the United States.

(Amended Nov. 5, 1990, Public Law 101-510, sec. 552(a), 104 Stat. 1566; Sept. 13, 1994, Public Law 103-322, sec. 330016(1)(I), 108 Stat. 2147.)

 Extension 155, 156

 Period 154

 Restoration 155A

Testimony, rules for taking 23

Time:

 Expiring on Saturday, Sunday, or holiday 21

 For payment of issue fee 151

 For taking action in Government cases 267

 Limitation on damages 286

 Within which action must be taken 133

Title of invention 154

Trademark fees 42(c)

Trademarks, reference to 1, 2, 3, 10

Translation error in international application 375

U

Unauthorized disclosure 182

Unauthorized person may not lawfully assist persons in transaction of business before the Office 33

Under Secretary of Commerce for Intellectual Property 6

United States as designated office 363

United States, defined 100

PATENT LAWS

United States Patent and Trademark Office:
 In Department of Commerce 1
 Library 7
 Printing 10
 Rules, authority for 2
 Seal of 2
Unpatented article, penalty for deceptive marking . . . 292
Use in foreign countries, no bar to grant of patent . . . 102

V

Verified translation requirement 372

Voluntary arbitration 294

W

Withdrawal of international application 366
Withholding of patent 181

Witness:

 Failing to attend or refusing to testify 24
 Fees of, interference cases 24
 In interference summoned by clerk of United
 States court 24
 When in contempt, punishment 24

Appendix R PATENT RULES

Title 37 - Code of Federal Regulations Patents, Trademarks, and Copyrights

CHAPTER I — UNITED STATES PATENT AND TRADEMARK OFFICE, DEPARTMENT OF COMMERCE

SUBCHAPTER A - GENERAL

PATENTS

Part

- 1 Rules of practice in patent cases
- 3 Assignment, recording and rights of assignee
- 4 Complaints regarding invention promoters
- 5 Secrecy of certain inventions and licenses to export and file applications in foreign countries

Index I - Rules pertaining to patents

PRACTICE BEFORE THE PATENT AND TRADEMARK OFFICE

- 10 Representation of others before the Patent and Trademark Office
- 11 Representation of others before the United States Patent and Trademark Office

Index II - Rules relating to practice before the United States Patent and Trademark Office

15 [Reserved]

15a [Reserved]

- 41 Practice before the Board of Patent Appeals and Interferences

SUBCHAPTER B — ADMINISTRATION

100 [Reserved]

101 [Reserved]

102 Disclosure of government information

104 Legal processes

SUBCHAPTER C—PROTECTION OF FOREIGN MASK WORKS

150 Requests for Presidential proclamations pursuant to 17 U.S.C. 902(a)(2)

SUBCHAPTER A - GENERAL

PART 1 - RULES OF PRACTICE IN PATENT CASES

Subpart A - General Provisions

GENERAL INFORMATION AND CORRESPONDENCE

Sec.

- 1.1 Addresses for non-trademark correspondence with the United States Patent and Trademark Office.
- 1.2 Business to be transacted in writing.
- 1.3 Business to be conducted with decorum and courtesy.
- 1.4 Nature of correspondence and signature requirements.
- 1.5 Identification of patent, patent application, or patent-related proceeding.
- 1.6 Receipt of correspondence.
- 1.7 Times for taking action; Expiration on Saturday, Sunday, or Federal holiday.
- 1.8 Certificate of mailing or transmission.
- 1.9 Definitions.
- 1.10 Filing of papers and fees by “Express Mail.”

RECORDS AND FILES OF THE PATENT AND TRADEMARK OFFICE

- 1.11 Files open to the public.
- 1.12 Assignment records open to public inspection.
- 1.13 Copies and certified copies.
- 1.14 Patent applications preserved in confidence.
- 1.15 [Reserved]

MANUAL OF PATENT EXAMINING PROCEDURE

FEES AND PAYMENT OF MONEY

- 1.16 National application filing, search, and examination fees.
- 1.17 Patent application and reexamination processing fees.
- 1.18 Patent post allowance (including issue) fees.
- 1.19 Document supply fees.
- 1.20 Post issuance fees.
- 1.21 Miscellaneous fees and charges.
- 1.22 Fees payable in advance.
- 1.23 Method of payment.
- 1.24 [Reserved]
- 1.25 Deposit accounts.
- 1.26 Refunds.
- 1.27 Definition of small entities and establishing status as a small entity to permit payment of small entity fees; when a determination of entitlement to small entity status and notification of loss of entitlement to small entity status are required; fraud on the Office.
- 1.28 Refunds when small entity status is later established; how errors in small entity status are excused.

Subpart B - National Processing Provision

PROSECUTION OF APPLICATION AND APPOINTMENT OF ATTORNEY OR AGENT

- 1.31 Applicants may be represented by a registered attorney or agent.
- 1.32 Power of attorney.
- 1.33 Correspondence respecting patent applications, reexamination proceedings, and other proceedings.
- 1.34 Acting in a representative capacity.
- 1.36 Revocation of power of attorney; withdrawal of patent attorney or agent.

WHO MAY APPLY FOR A PATENT

- 1.41 Applicant for patent.
- 1.42 When the inventor is dead.
- 1.43 When the inventor is insane or legally incapacitated.
- 1.44 [Reserved]
- 1.45 Joint inventors.

- 1.46 Assigned inventions and patents.
- 1.47 Filing when an inventor refuses to sign or cannot be reached.
- 1.48 Correction of inventorship in a patent application, other than a reissue application, pursuant to 35 U.S.C. 116.

THE APPLICATION

- 1.51 General requisites of an application.
- 1.52 Language, paper, writing, margins, compact disc specifications.
- 1.53 Application number, filing date, and completion of application.
- 1.54 Parts of application to be filed together; filing receipt.
- 1.55 Claim for foreign priority.
- 1.56 Duty to disclose information material to patentability.
- 1.57 Incorporation by reference.
- 1.58 Chemical and mathematical formulae and tables.
- 1.59 Expungement of information or copy of papers in application file.
- 1.60 [Reserved]
- 1.61 [Reserved]
- 1.62 [Reserved]

OATH OR DECLARATION

- 1.63 Oath or declaration.
- 1.64 Person making oath or declaration.
- 1.66 Officers authorized to administer oaths.
- 1.67 Supplemental oath or declaration.
- 1.68 Declaration in lieu of oath.
- 1.69 Foreign language oaths and declarations.
- 1.70 [Reserved]

SPECIFICATION

- 1.71 Detailed description and specification of the invention.
- 1.72 Title and abstract.
- 1.73 Summary of the invention.
- 1.74 Reference to drawings.
- 1.75 Claim(s).
- 1.76 Application data sheet.
- 1.77 Arrangement of application elements.

PATENT RULES

- 1.78 Claiming benefit of earlier filing date and cross-references to other applications.
- 1.79 Reservation clauses not permitted.

THE DRAWINGS

- 1.81 Drawings required in patent application.
- 1.83 Content of drawing.
- 1.84 Standards for drawings.
- 1.85 Corrections to drawings.
- 1.88 [Reserved]

MODELS, EXHIBITS, SPECIMENS

- 1.91 Models or exhibits not generally admitted as part of application or patent.
- 1.92 [Reserved]
- 1.93 Specimens.
- 1.94 Return of models, exhibits or specimens.
- 1.95 Copies of exhibits.
- 1.96 Submission of computer program listings.

INFORMATION DISCLOSURE STATEMENT

- 1.97 Filing of information disclosure statement.
- 1.98 Content of information disclosure statement.
- 1.99 Third-party submission in published application.

EXAMINATION OF APPLICATIONS

- 1.101 [Reserved]
- 1.102 Advancement of examination.
- 1.103 Suspension of action by the Office.
- 1.104 Nature of examination.
- 1.105 Requirements for information.
- 1.106 [Reserved]
- 1.107 [Reserved]
- 1.108 [Reserved]
- 1.109 [Reserved]
- 1.110 Inventorship and date of invention of the subject matter of individual claims.

ACTION BY APPLICANT AND FURTHER CONSIDERATION

- 1.111 Reply by applicant or patent owner to a non-final Office action.
- 1.112 Reconsideration before final action.
- 1.113 Final rejection or action.
- 1.114 Request for continued examination.

AMENDMENTS

- 1.115 Preliminary amendments.
- 1.116 Amendments and affidavits or other evidence after final action and prior to appeal.
- 1.117 [Reserved]
- 1.118 [Reserved]
- 1.119 [Reserved]
- 1.121 Manner of making amendments in applications.
- 1.122 [Reserved]
- 1.123 [Reserved]
- 1.124 [Reserved]
- 1.125 Substitute specification.
- 1.126 Numbering of claims.
- 1.127 Petition from refusal to admit amendment.

TRANSITIONAL PROVISIONS

- 1.129 Transitional procedures for limited examination after final rejection and restriction practice.

AFFIDAVITS OVERCOMING REJECTIONS

- 1.130 Affidavit or declaration to disqualify commonly owned patent or published application as prior art.
- 1.131 Affidavit or declaration of prior invention.
- 1.132 Affidavits or declarations traversing rejections or objections.

INTERVIEWS

- 1.133 Interviews.

TIME FOR REPLY BY APPLICANT; ABANDONMENT OF APPLICATION

- 1.134 Time period for reply to an Office action.
- 1.135 Abandonment for failure to reply within time period.
- 1.136 Extensions of time.
- 1.137 Revival of abandoned application, terminated reexamination proceeding, or lapsed patent.
- 1.138 Express abandonment.
- 1.139 [Reserved]

JOINDER OF INVENTIONS IN ONE APPLICATION; RESTRICTION

- 1.141 Different inventions in one national application.
- 1.142 Requirement for restriction.
- 1.143 Reconsideration of requirement.
- 1.144 Petition from requirement for restriction.
- 1.145 Subsequent presentation of claims for different invention.
- 1.146 Election of species.

DESIGN PATENTS

- 1.151 Rules applicable.
- 1.152 Design drawings.
- 1.153 Title, description and claim, oath or declaration.
- 1.154 Arrangement of application elements in a design application.
- 1.155 Expedited examination of design applications.

PLANT PATENTS

- 1.161 Rules applicable.
- 1.162 Applicant, oath or declaration.
- 1.163 Specification and arrangement of application elements in a plant application.
- 1.164 Claim.
- 1.165 Plant Drawings.
- 1.166 Specimens.
- 1.167 Examination.

REISSUES

- 1.171 Application for reissue.
- 1.172 Applicants, assignees.
- 1.173 Reissue specification, drawings, and amendments.
- 1.174 [Reserved]
- 1.175 Reissue oath or declaration.
- 1.176 Examination of reissue.
- 1.177 Issuance of multiple reissue patents.
- 1.178 Original patent; continuing duty of applicant.
- 1.179 [Reserved]

PETITIONS AND ACTION BY THE DIRECTOR

- 1.181 Petition to the Director.
- 1.182 Questions not specifically provided for.
- 1.183 Suspension of rules.
- 1.184 [Reserved]

APPEAL TO THE BOARD OF PATENT APPEALS AND INTERFERENCES

- 1.191 Appeal to Board of Patent Appeals and Interferences.
- 1.192 [Reserved]
- 1.193 [Reserved]
- 1.194 [Reserved]
- 1.195 [Reserved]
- 1.196 [Reserved]
- 1.197 Return of jurisdiction from the Board of Patent Appeals and Interferences; termination of proceedings.
- 1.198 Reopening after a final decision of the Board of Patent Appeals and Interferences.

PUBLICATION OF APPLICATIONS

- 1.211 Publication of applications.
- 1.213 Nonpublication request.
- 1.215 Patent application publication.
- 1.217 Publication of a redacted copy of an application.
- 1.219 Early publication.
- 1.221 Voluntary publication or republication of patent application publication.

PATENT RULES

MISCELLANEOUS PROVISIONS

- 1.248 Service of papers; manner of service; proof of service in cases other than interferences.
- 1.251 Unlocatable file.

PROTESTS AND PUBLIC USE PROCEEDINGS

- 1.291 Protests by the public against pending applications.
- 1.292 Public use proceedings.
- 1.293 Statutory invention registration.
- 1.294 Examination of request for publication of a statutory invention registration and patent application to which the request is directed.
- 1.295 Review of decision finally refusing to publish a statutory invention registration.
- 1.296 Withdrawal of request for publication of statutory invention registration.
- 1.297 Publication of statutory invention registration.

REVIEW OF PATENT AND TRADEMARK OFFICE DECISIONS BY COURT

- 1.301 Appeal to U.S. Court of Appeals for the Federal Circuit.
- 1.302 Notice of appeal.
- 1.303 Civil action under 35 U.S.C. 145, 146, 306.
- 1.304 Time for appeal or civil action.

ALLOWANCE AND ISSUE OF PATENT

- 1.311 Notice of Allowance.
- 1.312 Amendments after allowance.
- 1.313 Withdrawal from issue.
- 1.314 Issuance of patent.
- 1.315 Delivery of patent.
- 1.316 Application abandoned for failure to pay issue fee.
- 1.317 Lapsed patents; delayed payment of balance of issue fee.
- 1.318 [Reserved]

DISCLAIMER

- 1.321 Statutory disclaimers, including terminal disclaimers.

CORRECTION OF ERRORS IN PATENT

- 1.322 Certificate of correction of Office mistake.
- 1.323 Certificate of correction of applicant's mistake.
- 1.324 Correction of inventorship in patent, pursuant to 35 U.S.C. 256.
- 1.325 Other mistakes not corrected.

ARBITRATION AWARDS

- 1.331 [Reserved]
- 1.332 [Reserved]
- 1.333 [Reserved]
- 1.334 [Reserved]
- 1.335 Filing of notice of arbitration awards.

AMENDMENT OF RULES

- 1.351 Amendments to rules will be published.
- 1.352 [Reserved]

MAINTENANCE FEES

- 1.362 Time for payment of maintenance fees.
- 1.363 Fee address for maintenance fee purposes.
- 1.366 Submission of maintenance fees.
- 1.377 Review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of patent.
- 1.378 Acceptance of delayed payment of maintenance fee in expired patent to reinstate patent.

Subpart C - International Processing Provisions

GENERAL INFORMATION

- 1.401 Definitions of terms under the Patent Cooperation Treaty.
- 1.412 The United States Receiving Office.
- 1.413 The United States International Searching Authority.

MANUAL OF PATENT EXAMINING PROCEDURE

- 1.414 The United States Patent and Trademark Office as a Designated Office or Elected Office.
- 1.415 The International Bureau.
- 1.416 The United States International Preliminary Examining Authority.
- 1.417 Submission of translation of international publication.
- 1.419 Display of currently valid control number under the Paperwork Reduction Act.

WHO MAY FILE AN INTERNATIONAL APPLICATION

- 1.421 Applicant for international application.
- 1.422 When the inventor is dead.
- 1.423 When the inventor is insane or legally incapacitated.
- 1.424 [Reserved]
- 1.425 [Reserved]

THE INTERNATIONAL APPLICATION

- 1.431 International application requirements.
- 1.432 Designation of States by filing an international application.
- 1.433 Physical requirements of international application.
- 1.434 The request.
- 1.435 The description.
- 1.436 The claims.
- 1.437 The drawings.
- 1.438 The abstract.

FEES

- 1.445 International application filing, processing and search fees.
- 1.446 Refund of international application filing and processing fees.

PRIORITY

- 1.451 The priority claim and priority document in an international application.

REPRESENTATION

- 1.455 Representation in international applications.

TRANSMITTAL OF RECORD COPY

- 1.461 Procedures for transmittal of record copy to the International Bureau.

TIMING

- 1.465 Timing of application processing based on the priority date.
- 1.468 Delays in meeting time limits.

AMENDMENTS

- 1.471 Corrections and amendments during international processing.
- 1.472 Changes in person, name, or address of applicants and inventors.

UNITY OF INVENTION

- 1.475 Unity of invention before the International Searching Authority, the International Preliminary Examining Authority and during the national stage.
- 1.476 Determination of unity of invention before the International Searching Authority.
- 1.477 Protest to lack of unity of invention before the International Searching Authority.

INTERNATIONAL PRELIMINARY EXAMINATION

- 1.480 Demand for international preliminary examination.
- 1.481 Payment of international preliminary examination fees.
- 1.482 International preliminary examination fees.
- 1.484 Conduct of international preliminary examination.
- 1.485 Amendments by applicant during international preliminary examination.
- 1.488 Determination of unity of invention before the International Preliminary Examining Authority.

PATENT RULES

- 1.489 Protest to lack of unity of invention before the International Preliminary Examining Authority.

NATIONAL STAGE

- 1.491 National stage commencement and entry.
1.492 National stage fees.
1.494 [Reserved]
1.495 Entering the national stage in the United States of America.
1.496 Examination of international applications in the national stage.
1.497 Oath or declaration under 35 U.S.C. 371(c)(4).
1.499 Unity of invention during the national stage.

Subpart D - *Ex Parte* Reexamination of Patents

CITATION OF PRIOR ART

- 1.501 Citation of prior art in patent files.
1.502 Processing of prior art citations during an *ex parte* reexamination proceeding.

REQUEST FOR REEXAMINATION

- 1.510 Request for *ex parte* reexamination.
1.515 Determination of the request for *ex parte* reexamination.
1.520 *Ex parte* reexamination at the initiative of the Director.
1.525 Order for *ex parte* reexamination.
1.530 Statement by patent owner in *ex parte* reexamination; amendment by patent owner in *ex parte* or *inter partes* reexamination; inventorship change in *ex parte* or *inter partes* reexamination.
1.535 Reply by third party requester in *ex parte* reexamination.
1.540 Consideration of responses in *ex parte* reexamination.
1.550 Conduct of *ex parte* reexamination proceedings.
1.552 Scope of reexamination in *ex parte* reexamination proceedings.

- 1.555 Information material to patentability in *ex parte* reexamination and *inter partes* reexamination proceedings.
1.560 Interviews in *ex parte* reexamination proceedings.
1.565 Concurrent office proceedings which include an *ex parte* reexamination proceeding.
1.570 Issuance of *ex parte* reexamination certificate after *ex parte* reexamination proceedings.

Subpart E - [Reserved]

Subpart F - Adjustment and Extension of Patent Term

ADJUSTMENT OF PATENT TERM DUE TO EXAMINATION DELAY

- 1.701 Extension of patent term due to examination delay under the Uruguay Round Agreements Act (original applications, other than designs, filed on or after June 8, 1995, and before May 29, 2000).
1.702 Grounds for adjustment of patent term due to examination delay under the Patent Term Guarantee Act of 1999 (original applications, other than designs, filed on or after May 29, 2000).
1.703 Period of adjustment of patent term due to examination delay.
1.704 Reduction of period of adjustment of patent term.
1.705 Patent term adjustment determination.

EXTENSION OF PATENT TERM DUE TO REGULATORY REVIEW

- 1.710 Patents subject to extension of the patent term.
1.720 Conditions for extension of patent term.
1.730 Applicant for extension of patent term; signature requirements.
1.740 Formal requirements for application for extension of patent term; correction of informalities.
1.741 Complete application given a filing date; petition procedure.
1.750 Determination of eligibility for extension of patent term.
1.760 Interim extension of patent term under 35 U.S.C. 156(e)(2).
1.765 Duty of disclosure in patent term extension proceedings.

MANUAL OF PATENT EXAMINING PROCEDURE

- 1.770 Express withdrawal of application for extension of patent term.
- 1.775 Calculation of patent term extension for a human drug, antibiotic drug, or human biological product.
- 1.776 Calculation of patent term extension for a food additive or color additive.
- 1.777 Calculation of patent term extension for a medical device.
- 1.778 Calculation of patent term extension for an animal drug product.
- 1.779 Calculation of patent term extension for a veterinary biological product.
- 1.780 Certificate or order of extension of patent term.
- 1.785 Multiple applications for extension of term of the same patent or of different patents for the same regulatory review period for a product.
- 1.790 Interim extension of patent term under 35 U.S.C. 156(d)(5)
- 1.791 Termination of interim extension granted prior to regulatory approval of a product for commercial marketing or use.

Subpart G - Biotechnology Invention Disclosures

DEPOSIT OF BIOLOGICAL MATERIAL

- 1.801 Biological material.
- 1.802 Need or opportunity to make a deposit.
- 1.803 Acceptable depository.
- 1.804 Time of making an original deposit.
- 1.805 Replacement or supplement of deposit.
- 1.806 Term of deposit.
- 1.807 Viability of deposit.
- 1.808 Furnishing of samples.
- 1.809 Examination procedures.

APPLICATION DISCLOSURES CONTAINING NUCLEOTIDE AND/OR AMINO ACID SEQUENCES

- 1.821 Nucleotide and/or amino acid sequence disclosures in patent applications.

- 1.822 Symbols and format to be used for nucleotide and/or amino acid sequence data.
- 1.823 Requirements for nucleotide and/or amino acid sequences as part of the application.
- 1.824 Form and format for nucleotide and/or amino acid sequence submissions in computer readable form.
- 1.825 Amendments to or replacement of sequence listing and computer readable copy thereof.

Appendix A - Sample Sequence Listing

Subpart H - *Inter Partes* Reexamination of Patents that Issued From an Original Application Filed in the United States on or After November 29, 1999

PRIOR ART CITATIONS

- 1.902 Processing of prior art citations during an *inter partes* reexamination proceeding.

REQUIREMENTS FOR *INTER PARTES* REEXAMINATION PROCEEDINGS

- 1.903 Service of papers on parties in *inter partes* reexamination.
- 1.904 Notice of *inter partes* reexamination in *Official Gazette*.
- 1.905 Submission of papers by the public in *inter partes* reexamination.
- 1.906 Scope of reexamination in *inter partes* reexamination proceeding.
- 1.907 *Inter partes* reexamination prohibited.
- 1.913 Persons eligible to file request for *inter partes* reexamination.
- 1.915 Content of request for *inter partes* reexamination.
- 1.919 Filing date of request for *inter partes* reexamination.
- 1.923 Examiner's determination on the request for *inter partes* reexamination.
- 1.925 Partial refund if request for *inter partes* reexamination is not ordered.
- 1.927 Petition to review refusal to order *inter partes* reexamination.

PATENT RULES

INTER PARTES REEXAMINATION OF PATENTS

- 1.931 Order for *inter partes* reexamination.

INFORMATION DISCLOSURE IN *INTER PARTES* REEXAMINATION

- 1.933 Patent owner duty of disclosure in *inter partes* reexamination proceedings.

OFFICE ACTIONS AND RESPONSES (BEFORE THE EXAMINER) IN *INTER PARTES* REEXAMINATION

- 1.935 Initial Office action usually accompanies order for *inter partes* reexamination.
- 1.937 Conduct of *inter partes* reexamination.
- 1.939 Unauthorized papers in *inter partes* reexamination.
- 1.941 Amendments by patent owner in *inter partes* reexamination.
- 1.943 Requirements of responses, written comments, and briefs in *inter partes* reexamination.
- 1.945 Response to Office action by patent owner in *inter partes* reexamination.
- 1.947 Comments by third party requester to patent owner's response in *inter partes* reexamination.
- 1.948 Limitations on submission of prior art by third party requester following the order for *inter partes* reexamination.
- 1.949 Examiner's Office action closing prosecution in *inter partes* reexamination.
- 1.951 Options after Office action closing prosecution in *inter partes* reexamination.
- 1.953 Examiner's Right of Appeal Notice in *inter partes* reexamination.

INTERVIEWS PROHIBITED IN *INTER PARTES* REEXAMINATION

- 1.955 Interviews prohibited in *inter partes* reexamination proceedings.

EXTENSIONS OF TIME, TERMINATION OF PROCEEDINGS, AND PETITIONS TO REVIVE IN *INTER PARTES* REEXAMINATION

- 1.956 Patent owner extensions of time in *inter partes* reexamination.
- 1.957 Failure to file a timely, appropriate or complete response or comment in *inter partes* reexamination.
- 1.958 Petition to revive terminated *inter partes* reexamination or claims terminated for lack of patent owner response.

APPEAL TO THE BOARD OF PATENT APPEALS AND INTERFERENCES IN *INTER PARTES* REEXAMINATION

- 1.959 Appeal in *inter partes* reexamination.
- 1.961 [Reserved]
- 1.962 [Reserved]
- 1.963 [Reserved]
- 1.965 [Reserved]
- 1.967 [Reserved]
- 1.969 [Reserved]
- 1.971 [Reserved]
- 1.973 [Reserved]
- 1.975 [Reserved]
- 1.977 [Reserved]
- 1.979 Return of Jurisdiction from the Board of Patent Appeals and Interferences; termination of proceedings.
- 1.981 Reopening after a final decision of the Board of Patent Appeals and Interferences.

APPEAL TO THE UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT IN *INTER PARTES* REEXAMINATION

- 1.983 Appeal to the United States Court of Appeals for the Federal Circuit in *inter partes* reexamination.

CONCURRENT PROCEEDINGS INVOLVING SAME PATENT IN *INTER PARTES* REEXAMINATION

- 1.985 Notification of prior or concurrent proceedings in *inter partes* reexamination.
- 1.987 Suspension of *inter partes* reexamination proceeding due to litigation.
- 1.989 Merger of concurrent reexamination proceedings.
- 1.991 Merger of concurrent reissue application and *inter partes* reexamination proceeding.
- 1.993 Suspension of concurrent interference and *inter partes* reexamination proceeding.
- 1.995 Third party requester's participation rights preserved in merged proceeding.

REEXAMINATION CERTIFICATE IN *INTER PARTES* REEXAMINATION

- 1.997 Issuance of *inter partes* reexamination certificate.

SUBCHAPTER A – GENERAL

PART 1 — RULES OF PRACTICE IN PATENT CASES

Subpart A — General Provisions

GENERAL INFORMATION AND CORRESPONDENCE

§ 1.1 Addresses for non-trademark correspondence with the United States Patent and Trademark Office.

(a) *In general.* Except as provided in paragraphs (a)(3)(i), (a)(3)(ii) and (d)(1) of this section, all correspondence intended for the United States Patent and Trademark Office must be addressed to either “Director of the United States Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313-1450” or to specific areas within the Office as set out in paragraphs (a)(1), and (a)(3)(iii) of this section. When appropriate, correspondence should also be marked for the attention of a particular office or individual.

(1) *Patent correspondence.*

(i) *In general.* All correspondence concerning patent matters processed by organizations reporting to the Commissioner for Patents should be addressed to: Commissioner for Patents, PO Box 1450, Alexandria, Virginia 22313-1450.

(ii) *Board of Patent Appeals and Interferences.* See § 41.10 of this title. Notices of appeal, appeal briefs, reply briefs, requests for oral hearing, as well as all other correspondence in an application or a patent involved in an appeal to the Board for which an address is not otherwise specified, should be addressed as set out in paragraph (a)(1)(i) of this section.

(2) [Reserved]

(3) *Office of General Counsel correspondence.*—

(i) *Litigation and service.* Correspondence relating to pending litigation or otherwise within the scope of part 104 of this title shall be addressed as provided in § 104.2.

(ii) *Disciplinary proceedings.* Correspondence to counsel for the Director of the Office of Enrollment and Discipline relating to disciplinary proceedings pending before an Administrative Law Judge or the Director shall be mailed to: Office of the Solicitor, PO Box 16116, Arlington, Virginia 22215.

(iii) *Solicitor, in general.* Correspondence to the Office of the Solicitor not otherwise provided for shall be addressed to: Mail Stop 8, Director of the United States Patent and Trademark Office, PO Box 1450, Alexandria, Virginia 22313-1450.

(iv) *General Counsel.* Correspondence to the Office of the General Counsel not otherwise provided for, including correspondence to the General Counsel relating to disciplinary proceedings, shall be addressed to: General Counsel, United States Patent and Trademark Office, PO Box 1450, Alexandria, Virginia 22313-1450.

(v) *Improper correspondence.* Correspondence improperly addressed to a Post Office Box specified in paragraphs (a)(3)(i) and (a)(3)(ii) of this section will not be filed elsewhere in the United States Patent and Trademark Office, and may be returned.

(4) *Office of Public Records correspondence.*

(i) *Assignments.* All patent-related documents submitted by mail to be recorded by Assignment Services Division, except for documents filed

together with a new application, should be addressed to: Mail Stop Assignment Recordation Services, Director of the United States Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313-1450. *See* § 3.27.

(ii) *Documents*. All requests for certified or uncertified copies of patent documents should be addressed to: Mail Stop Document Services, Director of the United States Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313-1450.

(5) *Office of Enrollment and Discipline correspondence*. All correspondence directed to the Office of Enrollment and Discipline concerning enrollment, registration, and investigation matters should be addressed to Mail Stop OED, Director of the United States Patent and Trademark Office, P.O. Box 1450, Alexandria, Virginia 22313-1450.

(b) *Patent Cooperation Treaty*. Letters and other communications relating to international applications during the international stage and prior to the assignment of a national serial number should be additionally marked “Mail Stop PCT.”

(c) *For reexamination proceedings*.

(1) Requests for *ex parte* reexamination (original request papers only) should be additionally marked “Mail Stop *Ex parte* Reexam.”

(2) Requests for *inter partes* reexamination (original request papers) and all subsequent *inter partes* reexamination correspondence filed in the Office, other than correspondence to the Office of the General Counsel pursuant to § 1.1(a)(3) and § 1.302(c), should be additionally marked “Mail Stop *Inter partes* Reexam.”

(d) *Maintenance fee correspondence*.—

(1) *Payments*. Payments of maintenance fees in patents not submitted electronically should be mailed to: United States Patent and Trademark Office, P.O. Box 371611, Pittsburgh, Pennsylvania 15250-1611.

(2) *Other correspondence*. Correspondence related to maintenance fees other than payments of maintenance fees in patents is not to be mailed to P.O. Box 371611, Pittsburgh, Pennsylvania 15250-1611, but must be mailed to: Mail Stop M Correspondence, Director of the United States Patent and Trademark

Office, P.O. Box 1450, Alexandria, Virginia 22313-1450.

(e) *Patent term extension*. All applications for extension of patent term under 35 U.S.C. 156 and any communications relating thereto intended for the United States Patent and Trademark Office should be additionally marked “Mail Stop Patent Ext.” When appropriate, the communication should also be marked to the attention of a particular individual, as where a decision has been rendered.

§ 1.2 Business to be transacted in writing.

All business with the Patent and Trademark Office should be transacted in writing. The personal attendance of applicants or their attorneys or agents at the Patent and Trademark Office is unnecessary. The action of the Patent and Trademark Office will be based exclusively on the written record in the Office. No attention will be paid to any alleged oral promise, stipulation, or understanding in relation to which there is disagreement or doubt.

§ 1.3 Business to be conducted with decorum and courtesy.

Applicants and their attorneys or agents are required to conduct their business with the United States Patent and Trademark Office with decorum and courtesy. Papers presented in violation of this requirement will be submitted to the Director and will not be entered. A notice of the non-entry of the paper will be provided. Complaints against examiners and other employees must be made in correspondence separate from other papers.

[Amended, 61 FR 56439, Nov. 1, 1996, effective Dec. 2, 1996; revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; revised, 68 FR 38611, June 30, 2003, effective July 30, 2003]

§ 1.4 Nature of correspondence and signature requirements.

(a) Correspondence with the Patent and Trademark Office comprises:

(1) Correspondence relating to services and facilities of the Office, such as general inquiries, requests for publications supplied by the Office, orders for printed copies of patents, orders for copies of records, transmission of assignments for recording, and the like, and

(2) Correspondence in and relating to a particular application or other proceeding in the Office. See particularly the rules relating to the filing, processing, or other proceedings of national applications in subpart B, §§ 1.31 to 1.378; of international applications in subpart C, §§ 1.401 to 1.499; of ex parte reexaminations of patents in subpart D, §§ 1.501 to 1.570; of extension of patent term in subpart F, §§ 1.710 to 1.785; of inter partes reexaminations of patents in subpart H, §§ 1.902 to 1.997; and of the Board of Patent Appeals and Interferences in part 41 of this title.

(b) Since each file must be complete in itself, a separate copy of every paper to be filed in a patent, patent file, or other proceeding must be furnished for each file to which the paper pertains, even though the contents of the papers filed in two or more files may be identical. The filing of duplicate copies of correspondence in the file of an application, patent, or other proceeding should be avoided, except in situations in which the Office requires the filing of duplicate copies. The Office may dispose of duplicate

copies of correspondence in the file of an application, patent, or other proceeding.

(c) Since different matters may be considered by different branches or sections of the United States Patent and Trademark Office, each distinct subject, inquiry or order must be contained in a separate paper to avoid confusion and delay in answering papers dealing with different subjects.

(d)(1) *Handwritten signature.* Each piece of correspondence, except as provided in paragraphs (d)(2), (d)(3), (e) and (f) of this section, filed in an application, patent file, or other proceeding in the Office which requires a person's signature, must:

(i) Be an original, that is, have an original handwritten signature personally signed, in permanent dark ink or its equivalent, by that person; or

(ii) Be a direct or indirect copy, such as a photocopy or facsimile transmission (§ 1.6(d)), of an original. In the event that a copy of the original is filed, the original should be retained as evidence of authenticity. If a question of authenticity arises, the Office may require submission of the original.

(2) *S-signature.* An S-signature is a signature inserted between forward slash marks, but not a handwritten signature as defined by § 1.4(d)(1). An S-signature includes any signature made by electronic or mechanical means, and any other mode of making or applying a signature not covered by either a handwritten signature of § 1.4(d)(1) or an Office Electronic Filing System (EFS) character coded signature of § 1.4(d)(3). Correspondence being filed in the Office in paper, by facsimile transmission as provided in § 1.6(d), with a signature in permanent dark ink or its equivalent, or via the Office Electronic Filing System as an EFS Tag(ged) Image File Format (TIFF) attachment, for a patent application, patent, or a reexamination proceeding may be S-signature signed instead of being personally signed (i.e., with a handwritten signature) as provided for in paragraph (d)(1) of this section. The requirements for an S-signature under this paragraph (d)(2) are as follows.

(i) The S-signature must consist only of letters, or Arabic numerals, or both, with appropriate spaces and commas, periods, apostrophes, or hyphens for punctuation, and the person signing the correspondence must insert his or her own S-signature with a first single forward slash mark before,

and a second single forward slash mark after, the S-signature (e.g., /Dr. James T. Jones, Jr.); and

(ii) A registered practitioner, signing pursuant to §§ 1.33(b)(1) or 1.33(b)(2), must supply his/her registration number, either as part of the S-signature, or immediately below or adjacent the S-signature. The number (#) character may only be used as part of the S-signature when appearing before a practitioner's registration number; otherwise the number character may not be used in an S-signature.

(iii) The signer's name must be:

(A) Presented in printed or typed form preferably immediately below or adjacent the S-signature, and

(B) Reasonably specific enough so that the identity of the signer can be readily recognized.

(3) *EFS character coded signature.* Correspondence in character coded form being filed via the Office Electronic Filing System for a patent application or patent may be signed electronically. The electronic signature must consist only of letters of the English alphabet, or Arabic numerals, or both, with appropriate spaces and commas, periods, apostrophes, or hyphens for punctuation. The person signing the correspondence must personally insert the electronic signature with a first single forward slash mark before, and a second single forward slash mark after, the electronic signature (e.g., /Dr. James T. Jones, Jr.).

(4) *Certifications.* (i) *Section 10.18 certifications:* The presentation to the Office (whether by signing, filing, submitting, or later advocating) of any paper by a party, whether a practitioner or non-practitioner, constitutes a certification under § 10.18(b) of this chapter. Violations of § 10.18(b)(2) of this chapter by a party, whether a practitioner or non-practitioner, may result in the imposition of sanctions under § 10.18(c) of this chapter. Any practitioner violating § 10.18(b) of this chapter may also be subject to disciplinary action. See §§ 10.18(d) and 10.23(c)(15) of this chapter.

(ii) *Certifications as to the signature:* (A) *Of another:* A person submitting a document signed by another under paragraphs (d)(2) or (d)(3) of this section is obligated to have a reasonable basis to believe that the person whose signature is present on the document was actually inserted by that person,

and should retain evidence of authenticity of the signature.

(B) *Self certification:* The person inserting a signature under paragraphs (d)(2) or (d)(3) of this section in a document submitted to the Office certifies that the inserted signature appearing in the document is his or her own signature.

(C) *Sanctions:* Violations of the certifications as to the signature of another or a person's own signature, set forth in paragraphs (d)(4)(ii)(A) and (B) of this section, may result in the imposition of sanctions under § 10.18(c) and (d) of this chapter.

(e) Correspondence requiring a person's signature and relating to registration practice before the Patent and Trademark Office in patent cases, enrollment and disciplinary investigations, or disciplinary proceedings must be submitted with an original hand written signature personally signed in permanent dark ink or its equivalent by that person.

(f) When a document that is required by statute to be certified must be filed, a copy, including a photocopy or facsimile transmission, of the certification is not acceptable.

(g) An applicant who has not made of record a registered attorney or agent may be required to state whether assistance was received in the preparation or prosecution of the patent application, for which any compensation or consideration was given or charged, and if so, to disclose the name or names of the person or persons providing such assistance. Assistance includes the preparation for the applicant of the specification and amendments or other papers to be filed in the Patent and Trademark Office, as well as other assistance in such matters, but does not include merely making drawings by draftsmen or stenographic services in typing papers.

(h) *Ratification/confirmation/evidence of authenticity:* The Office may require ratification, confirmation (which includes submission of a duplicate document but with a proper signature), or evidence of authenticity of a signature, such as when the Office has reasonable doubt as to the authenticity (veracity) of the signature, e.g., where there are variations of a signature, or where the signature and the typed or printed name, do not clearly identify the person signing.

§ 1.5 Identification of patent, patent application, or patent-related proceeding.

(a) No correspondence relating to an application should be filed prior to receipt of the application number from the Patent and Trademark Office. When a letter directed to the Patent and Trademark Office concerns a previously filed application for a patent, it must identify on the top page in a conspicuous location, the application number (consisting of the series code and the serial number; e.g., 07/123,456), or the serial number and filing date assigned to that application by the Patent and Trademark Office, or the international application number of the international application. Any correspondence not containing such identification will be returned to the sender where a return address is available. The returned correspondence will be accompanied with a cover letter which will indicate to the sender that if the returned correspondence is resubmitted to the Patent and Trademark Office within two weeks of the mail date on the cover letter, the original date of receipt of the correspondence will be considered by the Patent and Trademark Office as the date of receipt of the correspondence. Applicants may use either the Certificate of Mailing or Transmission procedure under § 1.8 or the Express Mail procedure under § 1.10 for resubmissions of returned correspondence if they desire to have the benefit of the date of deposit in the United States Postal Service. If the returned correspondence is not

resubmitted within the two-week period, the date of receipt of the resubmission will be considered to be the date of receipt of the correspondence. The two-week period to resubmit the returned correspondence will not be extended. In addition to the application number, all letters directed to the Patent and Trademark Office concerning applications for patent should also state the name of the applicant, the title of the invention, the date of filing the same, and, if known, the group art unit or other unit within the Patent and Trademark Office responsible for considering the letter and the name of the examiner or other person to which it has been assigned.

(b) When the letter concerns a patent other than for purposes of paying a maintenance fee, it should state the number and date of issue of the patent, the name of the patentee, and the title of the invention. For letters concerning payment of a maintenance fee in a patent, see the provisions of § 1.366(c).

(c) [Reserved]

(d) A letter relating to a reexamination proceeding should identify it as such by the number of the patent undergoing reexamination, the reexamination request control number assigned to such proceeding, and, if known, the group art unit and name of the examiner to which it been assigned.

(e) [Reserved]

(f) When a paper concerns a provisional application, it should identify the application as such and include the application number.

[24 FR 10332, Dec. 22, 1959; 46 FR 29181, May 29, 1981; para. (a), 49 FR 552, Jan. 4, 1984, effective Apr. 1, 1984; para. (a), 49 FR 48416, Dec. 12, 1984, effective Feb. 11, 1985; paras. (a) & (b), 53 FR 47807, Nov. 28, 1988, effective Jan. 1, 1989; para. (a) revised, 58 FR 54494, Oct. 22, 1993, effective Nov. 22, 1993; para. (f) added, 61 FR 42790, Aug. 19, 1996, effective Sept. 23, 1996; para. (a) amended, 61 FR 56439, Nov. 1, 1996, effective Dec. 2, 1996; para. (c) revised, 64 FR 48900, Sept. 8, 1999, effective Oct. 30, 1999; section heading revised, para. (c) removed and reserved, 68 FR 48286, Aug. 13, 2003, effective Sept. 12, 2003; para. (e) removed and reserved, 69 FR 49959, Aug. 12, 2004, effective Sept. 13, 2004]

§ 1.6 Receipt of correspondence.

(a) *Date of receipt and Express Mail date of deposit.* Correspondence received in the Patent and

Trademark Office is stamped with the date of receipt except as follows:

(1) The Patent and Trademark Office is not open for the filing of correspondence on any day that is a Saturday, Sunday, or Federal holiday within the District of Columbia. Except for correspondence transmitted by facsimile under paragraph (a)(3) of this section, or filed electronically under paragraph (a)(4) of this section, no correspondence is received in the Office on Saturdays, Sundays, or Federal holidays within the District of Columbia.

(2) Correspondence filed in accordance with § 1.10 will be stamped with the date of deposit as “Express Mail” with the United States Postal Service.

(3) Correspondence transmitted by facsimile to the Patent and Trademark Office will be stamped with the date on which the complete transmission is received in the Patent and Trademark Office unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia, in which case the date stamped will be the next succeeding day which is not a Saturday, Sunday, or Federal holiday within the District of Columbia.

(4) [Reserved]

(b) [Reserved]

(c) *Correspondence delivered by hand.* In addition to being mailed, correspondence may be delivered by hand during hours the Office is open to receive correspondence.

(d) *Facsimile transmission.* Except in the cases enumerated below, correspondence, including authorizations to charge a deposit account, may be transmitted by facsimile. The receipt date accorded to the correspondence will be the date on which the complete transmission is received in the United States Patent and Trademark Office, unless that date is a Saturday, Sunday, or Federal holiday within the District of Columbia. See § 1.6(a)(3). To facilitate proper processing, each transmission session should be limited to correspondence to be filed in a single application or other proceeding before the United States Patent and Trademark Office. The application number of a patent application, the control number of a reexamination proceeding, the interference number of an interference proceeding, or the patent number of a patent should be entered as a part of the sender’s identification on a facsimile cover sheet. Facsimile transmis-

sions are not permitted and, if submitted, will not be accorded a date of receipt in the following situations:

(1) Correspondence as specified in § 1.4(e), requiring an original signature;

(2) Certified documents as specified in § 1.4(f);

(3) Correspondence which cannot receive the benefit of the certificate of mailing or transmission as specified in § 1.8(a)(2)(i)(A) through (D) and (F), and § 1.8(a)(2)(iii)(A), except that a continued prosecution application under § 1.53(d) may be transmitted to the Office by facsimile;

(4) Color drawings submitted under §§ 1.81, 1.83 through 1.85, 1.152, 1.165, 1.173, or 1.437;

(5) A request for reexamination under § 1.510 or § 1.913;

(6) Correspondence to be filed in a patent application subject to a secrecy order under §§ 5.1 through 5.5 of this chapter and directly related to the secrecy order content of the application;

(7) [Reserved]

(8) [Reserved]

(9) In contested cases before the Board of Patent Appeals and Interferences except as the Board may expressly authorize.

(e) [Reserved]

(f) *Facsimile transmission of a patent application under § 1.53(d).* In the event that the Office has no evidence of receipt of an application under § 1.53(d) (a continued prosecution application) transmitted to the Office by facsimile transmission, the party who transmitted the application under § 1.53(d) may petition the Director to accord the application under § 1.53(d) a filing date as of the date the application under § 1.53(d) is shown to have been transmitted to and received in the Office,

(1) Provided that the party who transmitted such application under § 1.53(d):

(i) Informs the Office of the previous transmission of the application under § 1.53(d) promptly after becoming aware that the Office has no evidence of receipt of the application under § 1.53(d);

(ii) Supplies an additional copy of the previously transmitted application under § 1.53(d); and

(iii) Includes a statement which attests on a personal knowledge basis or to the satisfaction of the Director to the previous transmission of the application under § 1.53(d) and is accompanied by a copy of

the sending unit's report confirming transmission of the application under § 1.53(d) or evidence that came into being after the complete transmission and within one business day of the complete transmission of the application under § 1.53(d).

(2) The Office may require additional evidence to determine if the application under § 1.53(d) was transmitted to and received in the Office on the date in question.

[48 FR 2707, Jan. 20, 1983, effective Feb. 27, 1983; 48 FR 4285, Jan. 31, 1983; para. (a), 49 FR 552, Jan. 4, 1984, effective Apr. 1, 1984; revised, 58 FR 54494, Oct. 22, 1993, effective Nov. 22, 1993; para. (a) amended, 61 FR 56439, Nov. 1, 1996, effective Dec. 2, 1996; paras. (d)(3), (d)(6) & (e) amended, para. (f) added, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; para (a)(1) revised and para. (a)(4) added, 64 FR 48900, Sept. 8, 1999, effective Oct. 30, 1999; para.(d)(9) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (d)(5) revised, 65 FR 76756, Dec. 7, 2000, effective Feb. 5, 2001; para. (b) removed and reserved and paras. (e), (f) & (f)(1)(iii) revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; paras. (a)(4), (d)(7) and (d)(8) removed and reserved, and paras. (d), introductory text, (d)(3), and (d)(4) revised, 68 FR 48286, Aug. 13, 2003, effective Sept. 12, 2003; para. (d)(9) revised, 69 FR 49959, Aug. 12, 2004, effective Sept. 13, 2004; para. (d)(4) revised and para. (e) removed and reserved, 69 FR 56481, Sept. 21, 2004, effective Sept. 21, 2004]

§ 1.7 Times for taking action; Expiration on Saturday, Sunday or Federal holiday.

(a) Whenever periods of time are specified in this part in days, calendar days are intended. When the day, or the last day fixed by statute or by or under this part for taking any action or paying any fee in the United States Patent and Trademark Office falls on Saturday, Sunday, or on a Federal holiday within the District of Columbia, the action may be taken, or the fee paid, on the next succeeding business day which is not a Saturday, Sunday, or a Federal holiday. See § 1.304 for time for appeal or for commencing civil action.

(b) If the day that is twelve months after the filing date of a provisional application under 35 U.S.C. 111(b) and § 1.53(c) falls on Saturday, Sunday, or on a Federal holiday within the District of Columbia, the period of pendency shall be extended to the next suc-

ceeding secular or business day which is not a Saturday, Sunday, or a Federal holiday.

[48 FR 2707, Jan. 20, 1983, effective Feb. 27, 1983; corrected 48 FR 4285, Jan. 31, 1983; revised, 65 FR 14865, Mar. 20, 2000, effective May 29, 2000 (adopted as final, 65 FR 50092, Aug. 16, 2000)]

§ 1.8 Certificate of mailing or transmission.

(a) Except in the situations enumerated in paragraph (a)(2) of this section or as otherwise expressly excluded in this chapter, correspondence required to be filed in the U.S. Patent and Trademark Office within a set period of time will be considered as being timely filed if the procedure described in this section is followed. The actual date of receipt will be used for all other purposes.

(1) Correspondence will be considered as being timely filed if:

(i) The correspondence is mailed or transmitted prior to expiration of the set period of time by being:

(A) Addressed as set out in § 1.1(a) and deposited with the U.S. Postal Service with sufficient postage as first class mail; or

(B) Transmitted by facsimile to the Patent and Trademark Office in accordance with § 1.6(d); and

(ii) The correspondence includes a certificate for each piece of correspondence stating the date of deposit or transmission. The person signing the certificate should have reasonable basis to expect that the correspondence would be mailed or transmitted on or before the date indicated.

(2) The procedure described in paragraph (a)(1) of this section does not apply to, and no benefit will be given to a Certificate of Mailing or Transmission on, the following:

(i) *Relative to Patents and Patent Applications*—

(A) The filing of a national patent application specification and drawing or other correspondence for the purpose of obtaining an application filing date, including a request for a continued prosecution application under § 1.53(d);

(B) [Reserved]

(C) Papers filed in contested cases before the Board of Patent Appeals and Interferences, which are governed by § 41.106 (f) of this title;

(D) The filing of an international application for patent;

(E) The filing of correspondence in an international application before the U.S. Receiving Office, the U.S. International Searching Authority, or the U.S. International Preliminary Examining Authority;

(F) The filing of a copy of the international application and the basic national fee necessary to enter the national stage, as specified in § 1.495(b).

(ii) [Reserved]

(iii) *Relative to Disciplinary Proceedings*—

(A) Correspondence filed in connection with a disciplinary proceeding under part 10 of this chapter.

(B) [Reserved]

(b) In the event that correspondence is considered timely filed by being mailed or transmitted in accordance with paragraph (a) of this section, but not received in the U.S. Patent and Trademark Office after a reasonable amount of time has elapsed from the time of mailing or transmitting of the correspondence, or after the application is held to be abandoned, or after the proceeding is dismissed, terminated, or decided with prejudice, the correspondence will be considered timely if the party who forwarded such correspondence:

(1) Informs the Office of the previous mailing or transmission of the correspondence promptly after becoming aware that the Office has no evidence of receipt of the correspondence;

(2) Supplies an additional copy of the previously mailed or transmitted correspondence and certificate; and

(3) Includes a statement which attests on a personal knowledge basis or to the satisfaction of the Director to the previous timely mailing or transmission. If the correspondence was sent by facsimile transmission, a copy of the sending unit's report confirming transmission may be used to support this statement.

(c) The Office may require additional evidence to determine if the correspondence was timely filed.

§ 1.9 Definitions.

(a)(1) A national application as used in this chapter means a U.S. application for patent which was either filed in the Office under 35 U.S.C. 111, or which entered the national stage from an international application after compliance with 35 U.S.C. 371.

(2) A provisional application as used in this chapter means a U.S. national application for patent filed in the Office under 35 U.S.C. 111(b).

(3) A nonprovisional application as used in this chapter means a U.S. national application for patent which was either filed in the Office under 35 U.S.C. 111(a), or which entered the national stage from an international application after compliance with 35 U.S.C. 371.

(b) An international application as used in this chapter means an international application for patent filed under the Patent Cooperation Treaty prior to entering national processing at the Designated Office stage.

(c) A published application as used in this chapter means an application for patent which has been published under 35 U.S.C. 122(b).

(d) [Reserved]

(e) [Reserved]

(f) [Reserved]

(g) For definitions in Board of Patent Appeals and Interferences proceedings, see part 41 of this title.

(h) A Federal holiday within the District of Columbia as used in this chapter means any day, except Saturdays and Sundays, when the Patent and Trademark Office is officially closed for business for the entire day.

(i) National security classified as used in this chapter means specifically authorized under criteria established by an Act of Congress or Executive Order to be kept secret in the interest of national defense or foreign policy and, in fact, properly classified pursuant to such Act of Congress or Executive Order.

(j) Director as used in this chapter, except for part 10 of this section, means the Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

(k) Paper as used in this chapter means a document that may exist in electronic form, or in physical form, and therefore does not necessarily imply physical sheets of paper.

§ 1.10 Filing of correspondence by “Express Mail.”

(a)(1) Any correspondence received by the U.S. Patent and Trademark Office (USPTO) that was delivered by the “Express Mail Post Office to Addressee” service of the United States Postal Service (USPS) will be considered filed with the USPTO on the date of deposit with the USPS.

(2) The date of deposit with USPS is shown by the “date in” on the “Express Mail” label or other official USPS notation. If the USPS deposit date cannot be determined, the correspondence will be accorded the USPTO receipt date as the filing date. See § 1.6(a).

(b) Correspondence should be deposited directly with an employee of the USPS to ensure that the person depositing the correspondence receives a

legible copy of the “Express Mail” mailing label with the “date-in” clearly marked. Persons dealing indirectly with the employees of the USPS (such as by deposit in an “Express Mail” drop box) do so at the risk of not receiving a copy of the “Express Mail” mailing label with the desired “date-in” clearly marked. The paper(s) or fee(s) that constitute the correspondence should also include the “Express Mail” mailing label number thereon. See paragraphs (c), (d) and (e) of this section.

(c) Any person filing correspondence under this section that was received by the Office and delivered by the “Express Mail Post Office to Addressee” service of the USPS, who can show that there is a discrepancy between the filing date accorded by the Office to the correspondence and the date of deposit as shown by the “date-in” on the “Express Mail” mailing label or other official USPS notation, may petition the Director to accord the correspondence a filing date as of the “date-in” on the “Express Mail” mailing label or other official USPS notation, provided that:

(1) The petition is filed promptly after the person becomes aware that the Office has accorded, or will accord, a filing date other than the USPS deposit date;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) that constitute the correspondence prior to the original mailing by “Express Mail;” and

(3) The petition includes a true copy of the “Express Mail” mailing label showing the “date-in,” and of any other official notation by the USPS relied upon to show the date of deposit.

(d) Any person filing correspondence under this section that was received by the Office and delivered by the “Express Mail Post Office to Addressee” service of the USPS, who can show that the “date-in” on the “Express Mail” mailing label or other official notation entered by the USPS was incorrectly entered or omitted by the USPS, may petition the Director to accord the correspondence a filing date as of the date the correspondence is shown to have been deposited with the USPS, provided that:

(1) The petition is filed promptly after the person becomes aware that the Office has accorded, or will accord, a filing date based upon an incorrect entry by the USPS;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) that constitute the correspondence prior to the original mailing by “Express Mail”; and

(3) The petition includes a showing which establishes, to the satisfaction of the Director, that the requested filing date was the date the correspondence was deposited in the “Express Mail Post Office to Addressee” service prior to the last scheduled pickup for that day. Any showing pursuant to this paragraph must be corroborated by evidence from the USPS or that came into being after deposit and within one business day of the deposit of the correspondence in the “Express Mail Post Office to Addressee” service of the USPS.

(e) Any person mailing correspondence addressed as set out in § 1.1(a) to the Office with sufficient postage utilizing the “Express Mail Post Office to Addressee” service of the USPS but not received by the Office, may petition the Director to consider such correspondence filed in the Office on the USPS deposit date, provided that:

(1) The petition is filed promptly after the person becomes aware that the Office has no evidence of receipt of the correspondence;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) that constitute the correspondence prior to the original mailing by “Express Mail”;

(3) The petition includes a copy of the originally deposited paper(s) or fee(s) that constitute the correspondence showing the number of the “Express Mail” mailing label thereon, a copy of any returned postcard receipt, a copy of the “Express Mail” mailing label showing the “date-in,” a copy of any other official notation by the USPS relied upon to show the date of deposit, and, if the requested filing date is a date other than the “date-in” on the “Express Mail” mailing label or other official notation entered by the USPS, a showing pursuant to paragraph (d)(3) of this section that the requested filing date was the date the correspondence was deposited in the “Express Mail Post Office to Addressee” service prior to the last scheduled pickup for that day; and

(4) The petition includes a statement which establishes, to the satisfaction of the Director, the original deposit of the correspondence and that the copies of the correspondence, the copy of the

“Express Mail” mailing label, the copy of any returned postcard receipt, and any official notation entered by the USPS are true copies of the originally mailed correspondence, original “Express Mail” mailing label, returned postcard receipt, and official notation entered by the USPS.

(f) The Office may require additional evidence to determine if the correspondence was deposited as “Express Mail” with the USPS on the date in question.

(g) Any person who mails correspondence addressed as set out in § 1.1 (a) to the Office with sufficient postage utilizing the “Express Mail Post Office to Addressee” service of the USPS, but has the correspondence returned by the USPS due to an interruption or emergency in “Express Mail” service, may petition the Director to consider such correspondence as filed on a particular date in the Office, provided that:

(1) The petition is filed promptly after the person becomes aware of the return of the correspondence;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) that constitute the correspondence prior to the original mailing by “Express Mail”;

(3) The petition includes the original correspondence or a copy of the original correspondence showing the number of the “Express Mail” mailing label thereon and a copy of the “Express Mail” mailing label showing the “date-in”; and

(4) The petition includes a statement which establishes, to the satisfaction of the Director, the original deposit of the correspondence and that the correspondence or copy of the correspondence is the original correspondence or a true copy of the correspondence originally deposited with the USPS on the requested filing date. The Office may require additional evidence to determine if the correspondence was returned by the USPS due to an interruption or emergency in “Express Mail” service.

(h) Any person who attempts to mail correspondence addressed as set out in § 1.1 (a) to the Office with sufficient postage utilizing the “Express Mail Post Office to Addressee” service of the USPS, but has the correspondence refused by an employee of the USPS due to an interruption or emergency in “Express Mail” service, may petition the Director to

consider such correspondence as filed on a particular date in the Office, provided that:

(1) The petition is filed promptly after the person becomes aware of the refusal of the correspondence;

(2) The number of the “Express Mail” mailing label was placed on the paper(s) or fee(s) that constitute the correspondence prior to the attempted mailing by “Express Mail”;

(3) The petition includes the original correspondence or a copy of the original correspondence showing the number of the “Express Mail” mailing label thereon; and

(4) The petition includes a statement by the person who originally attempted to deposit the correspondence with the USPS which establishes, to the satisfaction of the Director, the original attempt to deposit the correspondence and that the correspondence or copy of the correspondence is the original correspondence or a true copy of the correspondence originally attempted to be deposited with the USPS on the requested filing date. The Office may require additional evidence to determine if the correspondence was refused by an employee of the USPS due to an interruption or emergency in “Express Mail” service.

(i) Any person attempting to file correspondence under this section that was unable to be deposited with the USPS due to an interruption or emergency in “Express Mail” service which has been so designated by the Director, may petition the Director to consider such correspondence as filed on a particular date in the Office, provided that:

(1) The petition is filed in a manner designated by the Director promptly after the person becomes aware of the designated interruption or emergency in “Express Mail” service;

(2) The petition includes the original correspondence or a copy of the original correspondence; and

(3) The petition includes a statement which establishes, to the satisfaction of the Director, that the correspondence would have been deposited with the USPS but for the designated interruption or emergency in “Express Mail” service, and that the correspondence or copy of the correspondence is the original correspondence or a true copy of the corre-

spondence originally attempted to be deposited with the USPS on the requested filing date.

RECORDS AND FILES OF THE PATENT AND TRADEMARK OFFICE

§ 1.11 Files open to the public.

(a) The specification, drawings, and all papers relating to the file of an abandoned published application, except if a redacted copy of the application was used for the patent application publication, a patent, or a statutory invention registration are open to inspection by the public, and copies may be obtained upon the payment of the fee set forth in § 1.19(b)(2). See § 2.27 for trademark files.

(b) All reissue applications, all applications in which the Office has accepted a request to open the complete application to inspection by the public, and related papers in the application file, are open to inspection by the public, and copies may be furnished upon paying the fee therefor. The filing of reissue applications, other than continued prosecution applications under § 1.53(d) of reissue applications, will be announced in the *Official Gazette*. The announcement shall include at least the filing date, reissue application and original patent numbers, title, class and subclass, name of the inventor, name of the owner of record, name of the attorney or agent of record, and examining group to which the reissue application is assigned.

(c) All requests for reexamination for which the fee under § 1.20(c) has been paid, will be announced in the *Official Gazette*. Any reexaminations at the initiative of the Director pursuant to § 1.520 will also be announced in the *Official Gazette*. The announcement shall include at least the date of the request, if any, the

reexamination request control number or the Director initiated order control number, patent number, title, class and subclass, name of the inventor, name of the patent owner of record, and the examining group to which the reexamination is assigned.

(d) All papers or copies thereof relating to a reexamination proceeding which have been entered of record in the patent or reexamination file are open to inspection by the general public, and copies may be furnished upon paying the fee therefor.

(e) Except as prohibited in § 41.6 (b), the file of any interference is open to public inspection and copies of the file may be obtained upon payment of the fee therefor.

[42 FR 5593, Jan. 28, 1977; 43 FR 28477, June 30, 1978; 46 FR 29181, May 29, 1981, para. (c), 47 FR 41272, Sept. 17, 1982, effective Oct. 1, 1982; para. (a), 49 FR 48416, Dec. 12, 1984, effective Feb. 11, 1985; paras. (a), (b) and (e), 50 FR 9278, Mar. 7, 1985, effective May 8, 1985; para. (e) revised, 60 FR 14488, Mar. 17, 1995, effective Mar. 17, 1995; para. (b) revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; para. (a) revised, 65 FR 57024, Sept. 20, 2000, effective Nov. 29, 2000; para. (c) revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; para. (e) revised, 69 FR 49959, Aug. 12, 2004, effective Sept. 13, 2004]

§ 1.12 Assignment records open to public inspection.

(a)(1) Separate assignment records are maintained in the United States Patent and Trademark Office for patents and trademarks. The assignment records, relating to original or reissue patents, including digests and indexes (for assignments recorded on or after May 1, 1957), and published patent applications are open to public inspection at the United States Patent and Trademark Office, and copies of patent assignment records may be obtained upon request and payment of the fee set forth in § 1.19 of this chapter. See § 2.200 of this chapter regarding trademark assignment records.

(2) All records of assignments of patents recorded before May 1, 1957, are maintained by the National Archives and Records Administration (NARA). The records are open to public inspection. Certified and uncertified copies of those assignment records are provided by NARA upon request and payment of the fees required by NARA.

(b) Assignment records, digests, and indexes relating to any pending or abandoned patent application, which is open to the public pursuant to § 1.11 or for which copies or access may be supplied pursuant to § 1.14, are available to the public. Copies of any assignment records, digests, and indexes that are not available to the public shall be obtainable only upon written authority of the applicant or applicant's assignee or patent attorney or patent agent or upon a showing that the person seeking such information is a bona fide prospective or actual purchaser, mortgagee, or licensee of such application, unless it shall be necessary to the proper conduct of business before the Office or as provided in this part.

(c) Any request by a member of the public seeking copies of any assignment records of any pending or abandoned patent application preserved in confidence under § 1.14, or any information with respect thereto, must:

(1) Be in the form of a petition including the fee set forth in § 1.17(g); or

(2) Include written authority granting access to the member of the public to the particular assignment records from the applicant or applicant's assignee or attorney or agent of record.

(d) An order for a copy of an assignment or other document should identify the reel and frame number where the assignment or document is recorded. If a document is identified without specifying its correct reel and frame, an extra charge as set forth in § 1.21(j) will be made for the time consumed in making a search for such assignment.

[47 FR 41272, Sept. 17, 1982, effective Oct. 1, 1982; paras. (a) and (c), 54 FR 6893, Feb. 15, 1989, effective April 17, 1989; paras. (a) and (d), 56 FR 65142, Dec. 13, 1991, effective Dec. 16, 1991; paras. (a)(1) and (d), 57 FR 29641, July 6, 1992, effective Sept. 4, 1992; para. (a)(2) added, 57 FR 29641, July 6, 1992, effective Sept. 4, 1992; para. (c) amended, 60 FR 20195, Apr. 25, 1995, effective June 8, 1995; para. (c) amended, 61 FR 42790, Aug. 19, 1996, effective Sept. 23, 1996; para. (c)(1) amended, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; paras. (a)(1) and (b) revised, 65 FR 57024, Sept. 20, 2000, effective Nov. 29, 2000; paras. (a)(1) and (a)(2) revised, 68 FR 48286, Aug. 13, 2003, effective Sept. 12, 2003; para. (b) revised, 69 FR 29865, May 26, 2004, effective June 25, 2004; para. (c)(1) revised, 69 FR 56481, Sept. 21, 2004, effective Nov. 22, 2004]

§ 1.13 Copies and certified copies.

(a) Non-certified copies of patents, patent application publications, and of any records, books, papers, or drawings within the jurisdiction of the United States Patent and Trademark Office and open to the public, will be furnished by the United States Patent and Trademark Office to any person, and copies of other records or papers will be furnished to persons entitled thereto, upon payment of the appropriate fee. See § 2.201 of this chapter regarding copies of trademark records.

(b) Certified copies of patents, patent application publications, and trademark registrations and of any records, books, papers, or drawings within the jurisdiction of the United States Patent and Trademark Office and open to the public or persons entitled thereto will be authenticated by the seal of the United States Patent and Trademark Office and certified by the Director, or in his or her name, upon payment of the fee for the certified copy.

[Revised, 58 FR 54504, Oct. 22, 1993, effective Jan. 3, 1994; revised, 65 FR 57024, Sept. 20, 2000, effective Nov. 29, 2000; para. (b) revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; revised, 68 FR 48286, Aug. 13, 2003, effective Sept. 12, 2003; para. (b) revised, 68 FR 70996, Dec. 22, 2003, effective Jan. 21, 2004]

§ 1.14 Patent applications preserved in confidence.

(a) *Confidentiality of patent application information.* Patent applications that have not been published under 35 U.S.C. 122(b) are generally preserved in confidence pursuant to 35 U.S.C. 122(a). Information concerning the filing, pendency, or subject matter of an application for patent, including status information, and access to the application, will only be given to the public as set forth in § 1.11 or in this section.

(1) Records associated with patent applications (see paragraph (g) for international applications) may be available in the following situations:

(i) *Patented applications and statutory invention registrations.* The file of an application that has issued as a patent or published as a statutory invention registration is available to the public as set forth in § 1.11(a). A copy of the patent application-as-filed, the file contents of the application, or a specific document in the file of such an application may be

provided upon request and payment of the appropriate fee set forth in § 1.19(b).

(ii) *Published abandoned applications.* The file of an abandoned application that has been published as a patent application publication is available to the public as set forth in § 1.11(a). A copy of the application-as-filed, the file contents of the published application, or a specific document in the file of the published application may be provided to any person upon request, and payment of the appropriate fee set forth in § 1.19(b).

(iii) *Published pending applications.* A copy of the application-as-filed, the file contents of the application, or a specific document in the file of a pending application that has been published as a patent application publication may be provided to any person upon request, and payment of the appropriate fee set forth in § 1.19(b). If a redacted copy of the application was used for the patent application publication, the copy of the specification, drawings, and papers may be limited to a redacted copy. The Office will not provide access to the paper file of a pending application that has been published, except as provided in paragraph (c) or (h) of this section.

(iv) *Unpublished abandoned applications (including provisional applications) that are identified or relied upon.* The file contents of an unpublished, abandoned application may be made available to the public if the application is identified in a U.S. patent, a statutory invention registration, a U.S. patent application publication, or an international patent application publication of an international application that was published in accordance with PCT Article 21(2). An application is considered to have been identified in a document, such as a patent, when the application number or serial number and filing date, first named inventor, title and filing date or other application specific information are provided in the text of the patent, but not when the same identification is made in a paper in the file contents of the patent and is not included in the printed patent. Also, the file contents may be made available to the public, upon a written request, if benefit of the abandoned application is claimed under 35 U.S.C. 119(e), 120, 121, or 365 in an application that has issued as a U.S. patent, or has published as a statutory invention registration, a U.S. patent application publication, or an international patent application that was published in

accordance with PCT Article 21(2). A copy of the application-as-filed, the file contents of the application, or a specific document in the file of the application may be provided to any person upon written request, and payment of the appropriate fee (§ 1.19(b)).

(v) *Unpublished pending applications (including provisional applications) whose benefit is claimed.* A copy of the file contents of an unpublished pending application may be provided to any person, upon written request and payment of the appropriate fee (§ 1.19(b)), if the benefit of the application is claimed under 35 U.S.C. 119(e), 120, 121, or 365 in an application that has issued as a U.S. patent, an application that has published as a statutory invention registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2). A copy of the application-as-filed, or a specific document in the file of the pending application may also be provided to any person upon written request, and payment of the appropriate fee (§ 1.19(b)). The Office will not provide access to the paper file of a pending application, except as provided in paragraph (c) or (h) of this section.

(vi) *Unpublished pending applications (including provisional applications) that are incorporated by reference or otherwise identified.* A copy of the application as originally filed of an unpublished pending application may be provided to any person, upon written request and payment of the appropriate fee (§ 1.19(b)), if the application is incorporated by reference or otherwise identified in a U.S. patent, a statutory invention registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2). The Office will not provide access to the paper file of a pending application, except as provided in paragraph (c) or (h) of this section.

(vii) *When a petition for access or a power to inspect is required.* Applications that were not published or patented, that are not the subject of a benefit claim under 35 U.S.C. 119(e), 120, 121, or 365 in an application that has issued as a U.S. patent, an application that has published as a statutory invention registration, a U.S. patent application publication, or an international patent application publication that was published in accordance with PCT Article 21(2), or

are not identified in a U.S. patent, a statutory invention registration, a U.S. patent application publication, or an international patent application that was published in accordance with PCT Article 21(2), are not available to the public. If an application is identified in the file contents of another application, but not the published patent application or patent itself, a granted petition for access (see paragraph (h)) or a power to inspect (see paragraph (c)) is necessary to obtain the application, or a copy of the application.

(2) Information concerning a patent application may be communicated to the public if the patent application is identified in paragraphs (a)(1)(i) through (a)(1)(vi) of this section. The information that may be communicated to the public (*i.e.*, status information) includes:

(i) Whether the application is pending, abandoned, or patented;

(ii) Whether the application has been published under 35 U.S.C. 122(b);

(iii) The application “numerical identifier” which may be:

(A) The eight-digit application number (the two-digit series code plus the six-digit serial number); or

(B) The six-digit serial number plus any one of the filing date of the national application, the international filing date, or date of entry into the national stage; and

(iv) Whether another application claims the benefit of the application (*i.e.*, whether there are any applications that claim the benefit of the filing date under 35 U.S.C. 119(e), 120, 121 or 365 of the application), and if there are any such applications, the numerical identifier of the application, the specified relationship between the applications (*e.g.*, continuation), whether the application is pending, abandoned or patented, and whether the application has been published under 35 U.S.C. 122(b).

(b) *Electronic access to an application.* Where a copy of the application papers or access to the application may be made available pursuant to paragraphs (a)(1)(i) through (a)(1)(vi) of this section, the Office may at its discretion provide access to only an electronic copy of the specification, drawings, and file contents of the application.

(c) *Power to inspect a pending or abandoned application.* Access to an application may be provided

to any person if the application file is available, and the application contains written authority (e.g., a power to inspect) granting access to such person. The written authority must be signed by:

- (1) An applicant;
- (2) An attorney or agent of record;
- (3) An authorized official of an assignee of record (made of record pursuant to § 3.71 of this chapter); or

- (4) A registered attorney or agent named in the papers accompanying the application papers filed under § 1.53 or the national stage documents filed under § 1.495, if an executed oath or declaration pursuant to § 1.63 or § 1.497 has not been filed.

(d) *Applications reported to Department of Energy.* Applications for patents which appear to disclose, purport to disclose or do disclose inventions or discoveries relating to atomic energy are reported to the Department of Energy, which Department will be given access to the applications. Such reporting does not constitute a determination that the subject matter of each application so reported is in fact useful or is an invention or discovery, or that such application in fact discloses subject matter in categories specified by 42 U.S.C. 2181(c) and (d).

(e) *Decisions by the Director.* Any decision by the Director that would not otherwise be open to public inspection may be published or made available for public inspection if:

- (1) The Director believes the decision involves an interpretation of patent laws or regulations that would be of precedential value; and

- (2) The applicant is given notice and an opportunity to object in writing within two months on the ground that the decision discloses a trade secret or other confidential information. Any objection must identify the deletions in the text of the decision considered necessary to protect the information, or explain why the entire decision must be withheld from the public to protect such information. An applicant or party will be given time, not less than twenty days, to request reconsideration and seek court review before any portions of a decision are made public under this paragraph over his or her objection.

(f) *Publication pursuant to § 1.47.* Information as to the filing of an application will be published in the *Official Gazette* in accordance with § 1.47(c).

(g) *International applications.* (1) Copies of international application files for international applications which designate the U.S. and which have been published in accordance with PCT Article 21(2), or copies of a document in such application files, will be furnished in accordance with PCT Articles 30 and 38 and PCT Rules 94.2 and 94.3, upon written request including a showing that the publication of the application has occurred and that the U.S. was designated, and upon payment of the appropriate fee (see § 1.19(b)), if:

- (i) With respect to the Home Copy (the copy of the international application kept by the Office in its capacity as the Receiving Office, see PCT Article 12(1)), the international application was filed with the U.S. Receiving Office;

- (ii) With respect to the Search Copy (the copy of an international application kept by the Office in its capacity as the International Searching Authority, see PCT Article 12(1)), the U.S. acted as the International Searching Authority, except for the written opinion of the International Searching Authority which shall not be available until the expiration of thirty months from the priority date; or

- (iii) With respect to the Examination Copy (the copy of an international application kept by the Office in its capacity as the International Preliminary Examining Authority), the United States acted as the International Preliminary Examining Authority, an International Preliminary Examination Report has issued, and the United States was elected.

- (2) A copy of an English language translation of a publication of an international application which has been filed in the United States Patent and Trademark Office pursuant to 35 U.S.C. 154(d)(4) will be furnished upon written request including a showing that the publication of the application in accordance with PCT Article 21(2) has occurred and that the U.S. was designated, and upon payment of the appropriate fee (§ 1.19(b)(4)).

- (3) Access to international application files for international applications which designate the U.S. and which have been published in accordance with PCT Article 21(2), or copies of a document in such application files, will be permitted in accordance with PCT Articles 30 and 38 and PCT Rules 44^{ter}.1, 94.2 and 94.3, upon written request including a showing

that the publication of the application has occurred and that the U.S. was designated.

(4) In accordance with PCT Article 30, copies of an international application-as-filed under paragraph (a) of this section will not be provided prior to the international publication of the application pursuant to PCT Article 21(2).

(5) Access to international application files under paragraphs (a)(1)(i) through (a)(1)(vi) and (g)(3) of this section will not be permitted with respect to the Examination Copy in accordance with PCT Article 38.

(h) *Access or copies in other circumstances.* The Office, either *sua sponte* or on petition, may also provide access or copies of all or part of an application if necessary to carry out an Act of Congress or if warranted by other special circumstances. Any petition by a member of the public seeking access to, or copies of, all or part of any pending or abandoned application preserved in confidence pursuant to paragraph (a) of this section, or any related papers, must include:

(1) The fee set forth in § 1.17(g); and

(2) A showing that access to the application is necessary to carry out an Act of Congress or that special circumstances exist which warrant petitioner being granted access to all or part of the application.

FEES AND PAYMENT OF MONEY

§ 1.16 National application filing, search, and examination fees.

(a) Basic fee for filing each application under 35 U.S.C. 111 for an original patent, except design, plant, or provisional applications:

(1) For an application filed on or after December 8, 2004:

By a small entity (§ 1.27(a)) if the application is submitted in compliance with the Office electronic filing system (§ 1.27(b)(2)). \$75.00

By a small entity (§ 1.27(a)) . . . \$150.00

By other than a small entity . . . \$300.00

(2) For an application filed before December 8, 2004:

By a small entity (§ 1.27(a)) . . . \$395.00

By other than a small entity . . . \$790.00

(b) Basic fee for filing each application for an original design patent:

(1) For an application filed on or after December 8, 2004:

By a small entity (§ 1.27(a)) . . . \$100.00

By other than a small entity . . . \$200.00

(2) For an application filed before December 8, 2004:

By a small entity (§ 1.27(a)) . . . \$175.00

By other than a small entity . . . \$350.00

(c) Basic fee for filing each application for an original plant patent:

(1) For an application filed on or after December 8, 2004:

- By a small entity (§ 1.27(a)) . . . \$100.00
- By other than a small entity . . . \$200.00
- (2) For an application filed before December 8, 2004:
 - By a small entity (§ 1.27(a)) . . . \$275.00
 - By other than a small entity . . . \$550.00
- (d) Basic fee for filing each provisional application:
 - By a small entity (§ 1.27(a)) . . . \$100.00
 - By other than a small entity . . . \$200.00
- (e) Basic fee for filing each application for the reissue of a patent:
 - (1) For an application filed on or after December 8, 2004:
 - By a small entity (§ 1.27(a)) . . . \$150.00
 - By other than a small entity . . . \$300.00
 - (2) For an application filed before December 8, 2004:
 - By a small entity (§ 1.27(a)) . . . \$395.00
 - By other than a small entity . . . \$790.00
- (f) Surcharge for filing any of the basic filing fee, the search fee, the examination fee, or the oath or declaration on a date later than the filing date of the application, except provisional applications:
 - By a small entity (§ 1.27(a)) . . . \$65.00
 - By other than a small entity . . . \$130.00
- (g) Surcharge for filing the basic filing fee or cover sheet (§ 1.51(c)(1)) on a date later than the filing date of the provisional application:
 - By a small entity (§ 1.27(a)) . . . \$25.00
 - By other than a small entity . . . \$50.00
- (h) In addition to the basic filing fee in an application, other than a provisional application, for filing or later presentation at any other time of each claim in independent form in excess of 3:
 - By a small entity (§ 1.27(a)) . . . \$100.00
 - By other than a small entity . . . \$200.00
- (i) In addition to the basic filing fee in an application, other than a provisional application, for filing or later presentation at any other time of each claim (whether dependent or independent) in excess of 20 (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):
 - By a small entity (§ 1.27(a)) . . . \$25.00
 - By other than a small entity . . . \$50.00
- (j) In addition to the basic filing fee in an application, other than a provisional application, that con-

- tains, or is amended to contain, a multiple dependent claim, per application:
 - By a small entity (§ 1.27(a)) . . . \$180.00
 - By other than a small entity . . . \$360.00
- (k) Search fee for each application under 35 U.S.C. 111 on or after December 8, 2004, for an original patent, except design, plant, or provisional applications:
 - By a small entity (§ 1.27(a)) . . . \$250.00
 - By other than a small entity . . . \$500.00
- (l) Search fee for each application filed on or after December 8, 2004, for an original design patent:
 - By a small entity (§ 1.27(a)) . . . \$50.00
 - By other than a small entity . . . \$100.00
- (m) Search fee for each application filed on or after December 8, 2004, for an original plant patent:
 - By a small entity (§ 1.27(a)) . . . \$150.00
 - By other than a small entity . . . \$300.00
- (n) Search fee for each application filed on or after December 8, 2004, for the reissue of a patent:
 - By a small entity (§ 1.27(a)) . . . \$250.00
 - By other than a small entity . . . \$500.00
- (o) Examination fee for each application filed under 35 U.S.C. 111 on or after December 8, 2004, for an original patent, except design, plant, or provisional applications:
 - By a small entity (§ 1.27(a)) . . . \$100.00
 - By other than a small entity . . . \$200.00
- (p) Examination fee for each application filed on or after December 8, 2004, for an original design patent:
 - By a small entity (§ 1.27(a)) . . . \$65.00
 - By other than a small entity . . . \$130.00
- (q) Examination fee for each application filed on or after December 8, 2004, for an original plant patent:
 - By a small entity (§ 1.27(a)) . . . \$80.00
 - By other than a small entity . . . \$160.00
- (r) Examination fee for each application filed on or after December 8, 2004, for the reissue of a patent:
 - By a small entity (§ 1.27(a)) . . . \$300.00
 - By other than a small entity . . . \$600.00
- (s) Application size fee for any application under 35 U.S.C. 111 filed on or after December 8, 2004, the specification and drawings of which exceed 100 sheets of paper, for each additional 50 sheets or

fraction thereof (see § 1.52(f) for applications submitted in whole or in part on an electronic medium):

- By a small entity (§ 1.27(a)) . . . \$125.00
- By other than a small entity \$250.00

[Added, 47 FR 41273, Sept. 17, 1982, effective date Oct. 1, 1982; 50 FR 31824, Aug. 6, 1985, effective date Oct. 5, 1985; paras. (f) and (s) revised, 70 FR 30360, May 26, 2005, effective July 1, 2005]

§ 1.17 Patent application and reexamination processing fees.

- (a) Extension fees pursuant to § 1.136(a):
 - (1) For reply within first month:
 - By a small entity (§ 1.27(a)) \$60.00
 - By other than a small entity \$120.00
 - (2) For reply within second month:
 - By a small entity (§ 1.27(a)) . . . \$225.00
 - By other than a small entity \$450.00
 - (3) For reply within third month:
 - By a small entity (§ 1.27(a)) . . . \$510.00
 - By other than a small entity . . . \$1,020.00
 - (4) For reply within fourth month:
 - By a small entity (§ 1.27(a)) . . . \$795.00
 - By other than a small entity . . . \$1,590.00

- (5) For reply within fifth month:
 - By a small entity (§ 1.27(a)) . . \$1,080.00
 - By other than a small entity . . . \$2,160.00
- (b) For fees in proceedings before the Board of Patent Appeals and Interferences, see § 41.20 of this title.
- (c) [Reserved]
- (d) [Reserved]
- (e) To request continued examination pursuant to § 1.114:
 - By a small entity (§1.27(a)) \$395.00
 - By other than a small entity \$790.00
- (f) For filing a petition under one of the following sections which refers to this paragraph: \$400.00
 - § 1.53(e)—to accord a filing date.
 - § 1.57(a)—to accord a filing date.
 - § 1.182—for decision on a question not specifically provided for.
 - § 1.183—to suspend the rules.
 - § 1.378(e)—for reconsideration of decision on petition refusing to accept delayed payment of maintenance fee in an expired patent.
 - § 1.741(b)—to accord a filing date to an application under § 1.740 for extension of a patent term.
- (g) For filing a petition under one of the following sections which refers to this paragraph: \$200.00
 - § 1.12—for access to an assignment record.
 - § 1.14—for access to an application.
 - § 1.47—for filing by other than all the inventors or a person not the inventor.
 - § 1.59—for expungement of information.
 - § 1.103(a)—to suspend action in an application.
 - § 1.136(b)—for review of a request for extension for extension of time when the provisions of § 1.136 (a) are not available.
 - § 1.295—for review of refusal to publish a statutory invention registration.
 - § 1.296—to withdraw a request for publication of a statutory invention registration filed on or after the date the notice of intent to publish issued.
 - § 1.377—for review of decision refusing to accept and record payment of a maintenance fee filed prior to expiration of a patent.
 - § 1.550(c)—for patent owner requests for extension of time in *ex parte* reexamination proceedings.

§ 1.956—for patent owner requests for extension of time in *inter partes* reexamination proceedings.

§ 5.12—for expedited handling of a foreign filing license.

§ 5.15—for changing the scope of a license.

§ 5.25—for retroactive license.

(h) For filing a petition under one of the following sections which refers to this paragraph . . . \$130.00

§ 1.19(g)—to request documents in a form other than provided in this part.

§ 1.84—for accepting color drawings or photographs.

§ 1.91—for entry of a model or exhibit.

§ 1.102(d)—to make an application special.

§ 1.138(c)—to expressly abandon an application to avoid publication.

§ 1.313—to withdraw an application from issue.

§ 1.314—to defer issuance of a patent.

(i) Processing fee for taking action under one of the following sections which refers to this paragraph: \$130.00

§ 1.28(c)(3)—for processing a non-itemized fee deficiency based on an error in small entity status.

§ 1.41—for supplying the name or names of the inventor or inventors after the filing date without an oath or declaration as prescribed by § 1.63, except in provisional applications.

§ 1.48—for correcting inventorship, except in provisional applications.

§ 1.52(d)—for processing a nonprovisional application filed with a specification in a language other than English.

§ 1.53(b)(3)—to convert a provisional application filed under § 1.53(c) into a nonprovisional application under § 1.53(b).

§ 1.55—for entry of late priority papers.

§ 1.71(g)(2)—for processing a belated amendment under § 1.71(g).

§ 1.99(e)—for processing a belated submission under § 1.99.

§ 1.103(b)—for requesting limited suspension of action, continued prosecution application for a design patent (§ 1.53(d)).

§ 1.103(c)—for requesting limited suspension of action, request for continued examination (§ 1.114).

§ 1.103(d)—for requesting deferred examination of an application.

§ 1.217—for processing a redacted copy of a paper submitted in the file of an application in which a redacted copy was submitted for the patent application publication.

§ 1.221—for requesting voluntary publication or republication of an application.

§ 1.291(c)(5)—for processing a second or subsequent protest by the same real party in interest.

§ 1.497(d)—for filing an oath or declaration pursuant to 35 U.S.C. 371(c)(4) naming an inventive entity different from the inventive entity set forth in the international stage.

§ 3.81—for a patent to issue to assignee, assignment submitted after payment of the issue fee.

(j) For filing a petition to institute a public use proceeding under § 1.292. \$1,510.00

(k) For filing a request for expedited examination under § 1.155(a) \$900.00

(l) For filing a petition for the revival of an unavoidably abandoned application under 35 U.S.C. 111, 133, 364, or 371, for the unavoidably delayed payment of the issue fee under 35 U.S.C. 151, or for the revival of an unavoidably terminated reexamination proceeding under 35 U.S.C. 133 (§ 1.137(a)):

By a small entity (§ 1.27(a)). . . . \$250.00

By other than a small entity \$500.00

(m) For filing a petition for the revival of an unintentionally abandoned application, for the unintentionally delayed payment of the fee for issuing a patent, or for the revival of an unintentionally terminated reexamination proceeding under 35 U.S.C. 41(a)(7) (§ 1.137(b)):

By a small entity (§ 1.27(a)). . . . \$750.00

By other than a small entity . . . \$1,500.00

(n) For requesting publication of a statutory invention registration prior to the mailing of the first examiner's action pursuant to § 1.104 \$920.00 reduced by the amount of the application basic filing fee paid.

(o) For requesting publication of a statutory invention registration after the mailing of the first examiner's action pursuant to § 1.104 \$1,840.00 reduced by the amount of the application basic filing fee paid.

(p) For an information disclosure statement under § 1.97(c) or (d) or a submission under § 1.99 \$180.00

(q) Processing fee for taking action under one of the following sections which refers to this paragraph \$50.00

§ 1.41—to supply the name or names of the inventor or inventors after the filing date without a cover sheet as prescribed by § 1.51(c)(1) in a provisional application

§ 1.48—for correction of inventorship in a provisional application.

§ 1.53(c)(2) —to convert a nonprovisional application filed under § 1.53(b) to a provisional application under § 1.53(c).

(r) For entry of a submission after final rejection under § 1.129(a):

By a small entity (§ 1.27(a)) . . . \$395.00

By other than a small entity \$790.00

(s) For each additional invention requested to be examined under § 1.129(b):

By a small entity (§ 1.27(a)) . . . \$395.00

By other than a small entity \$790.00

(t) For the acceptance of an unintentionally delayed claim for priority under 35 U.S.C. 119, 120, 121, or 365(a) or (c) (§§ 1.55 and 1.78) . . . \$1,370.00

§ 1.18 Patent post allowance (including issue) fees.

(a) Issue fee for issuing each original patent, except a design or plant patent, or for issuing each reissue patent:

By a small entity (§ 1.27(a)) . . . \$700.00

By other than a small entity . . . \$1,400.00

(b) Issue fee for issuing an original design patent:

By a small entity (§ 1.27(a)) . . . \$400.00

By other than a small entity \$800.00

(c) Issue fee for issuing an original plant patent:

- By a small entity (§ 1.27(a)) . . . \$550.00
- By other than a small entity . . . \$1,100.00
- (d) Publication fee \$300.00
- (e) For filing an application for patent term adjustment under § 1.705. \$200.00
- (f) For filing a request for reinstatement of all or part of the term reduced pursuant to § 1.704(b) in an application for patent term adjustment under § 1.705 \$400.00

[Added, 47 FR 41273, Sept. 17, 1982, effective Oct. 1, 1982; 50 FR 31824, Aug. 6, 1985, effective Oct. 5, 1985; revised, 54 FR 6893, Feb. 15, 1989, effective Apr. 17, 1989; revised, 56 FR 65142, Dec. 13, 1991, effective Dec. 16, 1991; paras. § 1.19 Document supply fees.

The United States Patent and Trademark Office will supply copies of the following patent-related documents upon payment of the fees indicated. Paper copies will be in black and white unless the original document is in color, a color copy is requested and the fee for a color copy is paid.

- (a) Uncertified copies of patent application publications and patents:
 - (1) Printed copy of the paper portion of a patent application publication or patent, including a design patent, statutory invention registration, or defensive publication document. Service includes preparation of copies by the Office within two to three business days and delivery by United States Postal Service; and preparation of copies by the Office

- within one business day of receipt and delivery to an Office Box or by electronic means (*e.g.*, facsimile, electronic mail) \$3.00
- (2) Printed copy of a plant patent in color \$15.00
- (3) Color copy of a patent (other than a plant patent) or statutory invention registration containing a color drawing \$25.00
- (b) Copies of Office documents to be provided in paper, or in electronic form, as determined by the Director (for other patent-related materials see § 1.21(k)):
 - (1) Copy of a patent application as filed, or a patent-related file wrapper and contents, stored in paper in a paper file wrapper, in an image format in an image file wrapper, or if color documents, stored in paper in an Artifact Folder:
 - (i) If provided on paper:
 - (A) Application as filed \$20.00.
 - (B) File wrapper and contents of 400 or fewer pages \$200.00.
 - (C) Additional fee for each additional 100 pages or portion thereof of file wrapper and contents \$40.00.
 - (D) Individual application documents, other than application as filed, per document . \$25.00.
 - (ii) If provided on compact disc or other physical electronic medium in single order:
 - (A) Application as filed \$20.00.
 - (B) File wrapper and contents, first physical electronic medium: \$55.00.
 - (C) Additional fee for each continuing physical electronic medium in the single order of paragraph (b)(1)(ii)(B) of this section: \$15.00.
 - (iii) If provided electronically (*e.g.*, by electronic transmission) other than on a physical electronic medium as specified in paragraph (b)(1)(ii) of this section:
 - (A) Application as filed: \$20.00.
 - (B) File wrapper and contents: . . \$55.00.
 - (2) Copy of patent-related file wrapper contents that were submitted and are stored on compact disc or other electronic form (*e.g.*, compact discs stored in an Artifact Folder), other than as available in paragraph (b)(1) of this section:
 - (i) If provided on compact disc or other physical electronic medium in a single order:

(A) First physical electronic medium in a single order: \$55.00.

(B) Additional fee for each continuing physical electronic medium in the single order of paragraph (b)(2)(i) of this section: \$15.00.

(ii) If provided electronically other than on a physical electronic medium per order: \$55.00.

(3) Copy of Office records, except copies available under paragraph (b)(1) or (2) of this section: \$25.00.

(4) For assignment records, abstract of title and certification, per patent: \$25.00.

(c) Library service (35 U.S.C. 13): For providing to libraries copies of all patents issued annually, per annum \$50.00

(d) For list of all United States patents and statutory invention registrations in a subclass. \$3.00

(e) Uncertified statement as to status of the payment of maintenance fees due on a patent or expiration of a patent. \$10.00

(f) Uncertified copy of a non-United States patent document, per document. \$25.00

(g) Petitions for documents in a form other than that provided by this part, or in a form other than that generally provided by the Director, will be decided in accordance with the merits of each situation. Any petition seeking a decision under this section must be accompanied by the petition fee set forth in § 1.17 (h) and, if the petition is granted, the documents will be provided at cost.

(h) [Reserved]

[Added 47 FR 41273, Sept. 17, 1982, effective date Oct. 1, 1982; para. (b), 49 FR 552, Jan. 4, 1984, effective date Apr. 1, 1984; paras. (f) and (g) added, 49 FR 34724, Aug. 31, 1984, effective date Nov. 1, 1984; paras. (a) and (c), 50 FR 9379, Mar. 7, 1985, effective date May 8, 1985; 50 FR 31825, Aug. 6, 1985, effective date Oct. 5, 1985; revised, 54 FR 6893, Feb. 15, 1989; 54 FR 9432, March 7, 1989, effective Apr. 17, 1989, revised 56 FR 65142, Dec. 13, 1991, effective Dec. 16, 1991; paras. (b)(4), (f) and (h), 57 FR 38190, Aug. 21, 1992, effective Oct. 1, 1992; para. (a)(3), 58 FR 38719, July 20, 1993, effective Oct. 1, 1993; paras. (a)(1)(ii), (a)(1)(iii), (b)(1)(i), & (b)(1)(ii) amended, 60 FR 41018, Aug. 11, 1995, effective Oct. 1, 1995; paras. (a)(2) and (a)(3) amended, 62 FR 40450, July 29, 1997, effective Oct. 1, 1997; paras. (a)(1)(i) through (a)(1)(iii) revised, 64 FR 67486, Dec. 2, 1999, effective Dec. 2, 1999; introductory text and paras. (a) and (b) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7,

2000; paras. (g) and (h) removed and reserved, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (a) revised, 65 FR 57024, Sept. 20, 2000, effective Nov. 29, 2000; paras. (a)(1) and (b)(1) revised, 67 FR 70847, Nov. 27, 2002, effective Jan. 1, 2003; introductory text and para. (b) revised and para. (g) added, 69 FR 56481, Sept. 21, 2004, effective Nov. 22, 2004]

§ 1.20 Post issuance fees.

(a) For providing a certificate of correction for applicant's mistake (§ 1.323). \$100.00

(b) Processing fee for correcting inventorship in a patent (§ 1.324). \$130.00

(c) In reexamination proceedings

(1) For filing a request for *ex parte* reexamination (§ 1.510(a)) \$2,520.00

(2) For filing a request for *inter partes* reexamination (§ 1.915(a)) \$8,800.00

(3) For filing with a request for reexamination or later presentation at any other time of each claim in independent form in excess of 3 and also in excess of the number of claims in independent form in the patent under reexamination:

By a small entity (§ 1.27(a)) . . \$100.00

By other than a small entity . . \$200.00

(4) For filing with a request for reexamination or later presentation at any other time of each claim (whether dependent or independent) in excess of 20 and also in excess of the number of claims in the patent under reexamination (note that § 1.75(c) indicates how multiple dependent claims are considered for fee calculation purposes):

By a small entity (§ 1.27 (a)) . . \$25.00

By other than a small entity . . . \$50.00

(5) If the excess claims fees required by paragraphs (c)(3) and (c)(4) are not paid with the request for reexamination or on later presentation of the claims for which the excess claims fees are due, the fees required by paragraphs (c)(3) and (c)(4) must be paid or the claims canceled by amendment prior to the expiration of the time period set for reply by the Office in any notice of fee deficiency in order to avoid abandonment.

(d) For filing each statutory disclaimer (§ 1.321):

By a small entity (§ 1.27(a)) \$65.00

By other than a small entity \$130.00

(e) For maintaining an original or reissue patent, except a design or plant patent, based on an

application filed on or after December 12, 1980, in force beyond four years, the fee being due by three years and six months after the original grant:

- By small entity (§ 1.27(a)) \$450.00
- By other than a small entity \$900.00

(f) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond eight years, the fee being due by seven years and six months after the original grant:

- By a small entity (§ 1.27(a)) . . \$1,150.00
- By other than a small entity . . . \$2,300.00

(g) For maintaining an original or reissue patent, except a design or plant patent, based on an application filed on or after December 12, 1980, in force beyond twelve years, the fee being due by eleven years and six months after the original grant:

- By a small entity (§ 1.27(a)) . . \$1,900.00
- By other than a small entity . . . \$3,800.00

(h) Surcharge for paying a maintenance fee during the six-month grace period following the expiration of three years and six months, seven years and six months, and eleven years and six months after the date of the original grant of a patent based on an application filed on or after December 12, 1980:

- By a small entity (§ 1.27(a)) \$65.00
- By other than a small entity \$130.00

(i) Surcharge for accepting a maintenance fee after expiration of a patent for non-timely payment of a maintenance fee where the delay in payment is shown to the satisfaction of the Director to have been

-
- (1) Unavoidable \$700.00
- (2) Unintentional \$1,640.00
- (j) For filing an application for extension of the term of a patent
 - (1) Application for extension under § 1.740 \$1,120.00
 - (2) Initial application for interim extension under § 1.790 \$420.00
 - (3) Subsequent application for interim extension under § 1.790 \$220.00

(e) through (g) revised, 69 FR 52604, Aug. 27, 2004, effective Oct. 1, 2004; paras. (c)-(g) revised, 70 FR 3880, Jan. 27, 2005, effective Dec. 8, 2004]

§ 1.21 Miscellaneous fees and charges.

The Patent and Trademark Office has established the following fees for the services indicated:

- (a) Registration of attorneys and agents:
 - (1) For admission to examination for registration to practice:
 - (i) Application Fee (non-refundable) \$40.00
 - (ii) Registration examination fee
 - (A) For test administration by commercial entity \$200.00
 - (B) For test administration by the USPTO \$450.00
 - (2) On registration to practice or grant of limited recognition under § 11.9(b) or (c) \$100.00
 - (3) For reinstatement to practice \$40.00
 - (4) For certificate of good standing as an attorney or agent \$10.00
 - (i) Suitable for framing \$20.00
 - (ii) [Reserved]

- (5) For review of decision:
 - (i) By the Director of Enrollment and Discipline under § 11.2(c) \$130.00
 - (ii) Of the Director of Enrollment and Discipline under § 11.2(d). \$130.00
- (6)-(9)[Reserved]
- (10) On application by a person for recognition or registration after disbarment or suspension on ethical grounds, or resignation pending disciplinary proceedings in any other jurisdiction; on application by a person for recognition or registration who is asserting rehabilitation from prior conduct that resulted in an adverse decision in the Office regarding the person’s moral character; and on application by a person for recognition or registration after being convicted of a felony or crime involving moral turpitude or breach of fiduciary duty; on petition for reinstatement by a person excluded or suspended on ethical grounds, or excluded on consent from practice before the Office \$1,600.00
 - (b) Deposit accounts:
 - (1) For establishing a deposit account \$10.00
 - (2) Service charge for each month when the balance at the end of the month is below \$1,000 \$25.00
 - (3) Service charge for each month when the balance at the end of the month is below \$300 for restricted subscription deposit accounts used exclusively for subscription order of patent copies as issued \$25.00
 - (c) Disclosure document: For filing a disclosure document \$10.00
 - (d) Delivery box: Local delivery box rental, per annum \$50.00
 - (e) International type search reports: For preparing an international type search report of an international type search made at the time of the first action on the merits in a national patent application \$40.00
 - (f) [Reserved]
 - (g) Self-service copy charge, per page . . \$0.25
 - (h) For recording each assignment, agreement, or other paper relating to the property in a patent or application, per property \$40.00
 - (i) Publication in *Official Gazette*: For publication in the *Official Gazette* of a notice of the availability of an application or a patent for licensing or sale:

- Each application or patent \$25.00
- (j) Labor charges for services, per hour or fraction thereof \$40.00
- (k) For items and services that the Director finds may be supplied, for which fees are not specified by statute or by this part, such charges as may be determined by the Director with respect to each such item or service Actual cost
 - (l) [Reserved]
 - (m) For processing each payment refused (including a check returned “unpaid”) or charged back by a financial institution \$50.00
 - (n) For handling an application in which proceedings are terminated pursuant to § 1.53(e) \$130.00
 - (o) [Reserved]

§ 1.22 Fees payable in advance.

(a) Patent fees and charges payable to the United States Patent and Trademark Office are required to be paid in advance; that is, at the time of requesting any action by the Office for which a fee or charge is payable with the exception that under § 1.53 applications for patent may be assigned a filing date without payment of the basic filing fee.

(b) All fees paid to the United States Patent and Trademark Office must be itemized in each individual application, patent, or other proceeding in such a manner that it is clear for which purpose the fees are paid. The Office may return fees that are not itemized as required by this paragraph. The provisions of § 1.5(a) do not apply to the resubmission of fees returned pursuant to this paragraph.

[48 FR 2708, Jan. 20, 1983, effective Feb. 27, 1983; para. (b) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; revised, 68 FR 48286, Aug. 13, 2003, effective Sept. 12, 2003]

§ 1.23 Methods of payment.

(a) All payments of money required for United States Patent and Trademark Office fees, including fees for the processing of international applications (§ 1.445), shall be made in U.S. dollars and in the form of a cashier's or certified check, Treasury note, national bank notes, or United States Postal Service money order. If sent in any other form, the Office may delay or cancel the credit until collection is made. Checks and money orders must be made payable to the Director of the United States Patent and Trademark Office. (Checks made payable to the Commissioner of Patents and Trademarks will continue to be accepted.) Payments from foreign countries must be payable and immediately negotiable in the United States for the full amount of the fee required. Money sent to the Office by mail will be at the risk of the sender, and letters containing money should be registered with the United States Postal Service.

(b) Payments of money required for United States Patent and Trademark Office fees may also be made by credit card, except for replenishing a deposit account. Payment of a fee by credit card must specify the amount to be charged to the credit card and such other information as is necessary to process the charge, and is subject to collection of the fee. The Office will not accept a general authorization to

charge fees to a credit card. If credit card information is provided on a form or document other than a form provided by the Office for the payment of fees by credit card, the Office will not be liable if the credit card number becomes public knowledge.

[43 FR 20462, May 11, 1978; revised, 64 FR 48900, Sept. 8, 1999, effective Oct. 30, 1999; revised, 65 FR 33452, May 24, 2000, effective June 5, 2000; para. (b) revised, 69 FR 43751, July 22, 2004, effective Aug. 23, 2004]

§ 1.24 [Reserved]

[47 FR 41274, Sept. 17, 1982, effective Oct. 1, 1982; 48 FR 2708, Jan. 20, 1983, effective date Feb. 27, 1983; 50 FR 31825, Aug. 6, 1985, effective Oct. 5, 1985; 51 FR 28057, Aug. 4, 1986; 56 FR 65142, Dec. 13, 1991, effective Dec. 16, 1991; para. (b) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; removed and reserved, 65 FR 57024, Sept. 20, 2000, effective Nov. 29, 2000]

§ 1.25 Deposit accounts.

(a) For the convenience of attorneys, and the general public in paying any fees due, in ordering services offered by the Office, copies of records, etc., deposit accounts may be established in the Patent and Trademark Office upon payment of the fee for establishing a deposit account § 1.21(b)(1)). A minimum deposit of \$1,000 is required for paying any fee due or in ordering any services offered by the Office. However, a minimum deposit of \$300 may be paid to establish a restricted subscription deposit account used exclusively for subscription order of patent copies as issued. At the end of each month, a deposit account statement will be rendered. A remittance must be made promptly upon receipt of the statement to cover the value of items or services charged to the account and thus restore the account to its established normal deposit value. An amount sufficient to cover all fees, services, copies, etc., requested must always be on deposit. Charges to accounts with insufficient funds will not be accepted. A service charge (§ 1.21(b)(2)) will be assessed for each month that the balance at the end of the month is below \$1,000. For restricted subscription deposit accounts, a service charge (§ 1.21(b)(3)) will be assessed for each month that the balance at the end of the month is below \$300.

(b) Filing, issue, appeal, international-type search report, international application processing, petition, and post-issuance fees may be charged against these accounts if sufficient funds are on deposit to cover such fees. A general authorization to charge all fees, or only certain fees, set forth in §§ 1.16 to 1.18 to a deposit account containing sufficient funds may be filed in an individual application, either for the entire pendency of the application or with a particular paper filed. An authorization to charge fees under § 1.16 in an international application entering the national stage under 35 U.S.C. 371 will be treated as an authorization to charge fees under § 1.492. An authorization to charge fees set forth in § 1.18 to a deposit account is subject to the provisions of § 1.311(b). An authorization to charge to a deposit account the fee for a request for reexamination pursuant to § 1.510 or § 1.913 and any other fees required in a reexamination proceeding in a patent may also be filed with the request for reexamination. An authorization to charge a fee to a deposit account will not be considered payment of the fee on the date the authorization to charge the fee is effective as to the particular fee to be charged unless sufficient funds are present in the account to cover the fee.

(c) A deposit account holder may replenish the deposit account by submitting a payment to the United States Patent and Trademark Office. A payment to replenish a deposit account must be submitted by one of the methods set forth in paragraphs (c)(1), (c)(2), (c)(3), or (c)(4) of this section.

(1) A payment to replenish a deposit account may be submitted by electronic funds transfer through the Federal Reserve Fedwire System, which requires that the following information be provided to the deposit account holder's bank or financial institution:

(i) Name of the Bank, which is Treas NYC (Treasury New York City);

(ii) Bank Routing Code, which is 021030004;

(iii) United States Patent and Trademark Office account number with the Department of the Treasury, which is 13100001; and

(iv) The deposit account holder's company name and deposit account number.

(2) A payment to replenish a deposit account may be submitted by electronic funds transfer over the Office's Internet Web site (*www.uspto.gov*).

(3) A payment to replenish a deposit account may be submitted by mail with the USPS to: Director of the United States Patent and Trademark Office, P.O. Box 70541, Chicago, Illinois 60673.

(4) A payment to replenish a deposit account may be submitted by mail with a private delivery service or hand-carrying the payment to: Director of the United States Patent and Trademark Office, Deposit Accounts, One Crystal Park, 2011 Crystal Drive, Suite 307, Arlington, Virginia 22202.

[49 FR 553, Jan. 4, 1984, effective Apr. 1, 1984; 47 FR 41274, Sept. 17, 1982, effective Oct. 1, 1982; 50 FR 31826, Aug. 6, 1985, effective Oct. 5, 1985; para. (b) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (b) revised, 65 FR 76756, Dec. 7, 2000, effective Feb. 5, 2001; para. (b) revised, 67 FR 520, Jan. 4, 2002, effective Apr. 1, 2002; para. (c) added, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; para. (c)(2) revised, 69 FR 43751, July 22, 2004, effective Aug. 23, 2004]

§ 1.26 Refunds.

(a) The Director may refund any fee paid by mistake or in excess of that required. A change of purpose after the payment of a fee, such as when a party desires to withdraw a patent filing for which the fee was paid, including an application, an appeal, or a request for an oral hearing, will not entitle a party to a refund of such fee. The Office will not refund amounts of twenty-five dollars or less unless a refund is specifically requested, and will not notify the payor of such amounts. If a party paying a fee or requesting a refund does not provide the banking information necessary for making refunds by electronic funds transfer (31 U.S.C. 3332 and 31 CFR part 208), or instruct the Office that refunds are to be credited to a deposit account, the Director may require such information, or use the banking information on the payment instrument to make a refund. Any refund of a fee paid by credit card will be by a credit to the credit card account to which the fee was charged.

(b) Any request for refund must be filed within two years from the date the fee was paid, except as otherwise provided in this paragraph or in § 1.28(a). If the Office charges a deposit account by an amount other than an amount specifically indicated in an authorization (§ 1.25(b)), any request for refund based upon such charge must be filed within two years from the date of the deposit account statement indicating

such charge, and include a copy of that deposit account statement. The time periods set forth in this paragraph are not extendable.

(c) If the Director decides not to institute a reexamination proceeding, for *ex parte* reexaminations filed under § 1.510, a refund of \$1,690 will be made to the reexamination requester. For *inter partes* reexaminations filed under § 1.913, a refund of \$7,970 will be made to the reexamination requester. The reexamination requester should indicate the form in which any refund should be made (*e.g.*, by check, electronic funds transfer, credit to a deposit account, etc.). Generally, reexamination refunds will be issued in the form that the original payment was provided.

[47 FR 41274, Sept. 17, 1982, effective Oct. 1, 1982; 50 FR 31826 Aug. 6, 1985, effective Oct. 5, 1985; para. (c), 54 FR 6893, Feb. 15, 1989, effective Apr. 17, 1989; para. (c), 56 FR 65142, Dec. 13, 1991, effective Dec. 16, 1991; paras. (a) and (c), 57 FR 38190, Aug. 21, 1992, effective Oct. 1, 1992; para. (a) revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; para. (a) revised and para. (b) added, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (c) revised, 65 FR 76756, Dec. 7, 2000, effective Feb. 5, 2001; paras. (a) & (c) revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; para. (a) revised, 68 FR 48286, Aug. 13, 2003, effective Sept. 12, 2003]

§ 1.27 Definition of small entities and establishing status as a small entity to permit payment of small entity fees; when a determination of entitlement to small entity status and notification of loss of entitlement to small entity status are required; fraud on the Office.

(a) *Definition of small entities.* A small entity as used in this chapter means any party (person, small business concern, or nonprofit organization) under paragraphs (a)(1) through (a)(3) of this section.

(1) *Person.* A person, as used in paragraph (c) of this section, means any inventor or other individual (*e.g.*, an individual to whom an inventor has transferred some rights in the invention) who has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention. An inventor or other individual who has transferred some rights in the invention to one or more parties, or is under an obligation to transfer some rights in the

invention to one or more parties, can also qualify for small entity status if all the parties who have had rights in the invention transferred to them also qualify for small entity status either as a person, small business concern, or nonprofit organization under this section.

(2) *Small business concern.* A small business concern, as used in paragraph (c) of this section, means any business concern that:

(i) Has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person, concern, or organization which would not qualify for small entity status as a person, small business concern, or nonprofit organization; and

(ii) Meets the size standards set forth in 13 CFR 121.801 through 121.805 to be eligible for reduced patent fees. Questions related to standards for a small business concern may be directed to: Small Business Administration, Size Standards Staff, 409 Third Street, SW., Washington, DC 20416.

(3) *Nonprofit Organization.* A nonprofit organization, as used in paragraph (c) of this section, means any nonprofit organization that:

(i) Has not assigned, granted, conveyed, or licensed, and is under no obligation under contract or law to assign, grant, convey, or license, any rights in the invention to any person, concern, or organization which would not qualify as a person, small business concern, or a nonprofit organization; and

(ii) Is either:

(A) A university or other institution of higher education located in any country;

(B) An organization of the type described in section 501(c)(3) of the Internal Revenue Code of 19 86 (26 U.S.C. 501(c)(3)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a));

(C) Any nonprofit scientific or educational organization qualified under a nonprofit organization statute of a state of this country (35 U.S.C. 201 (i)); or

(D) Any nonprofit organization located in a foreign country which would qualify as a nonprofit organization under paragraphs (a)(3)(ii)(B) of this section or (a)(3)(ii)(C) of this section if it were located in this country.

(4) *License to a Federal agency.* (i) For persons under paragraph (a)(1) of this section, a license to the Government resulting from a rights determination under Executive Order 10096 does not constitute a license so as to prohibit claiming small entity status.

(ii) For small business concerns and non-profit organizations under paragraphs (a)(2) and (a)(3) of this section, a license to a Federal agency resulting from a funding agreement with that agency pursuant to 35 U.S.C. 202 (c)(4) does not constitute a license for the purposes of paragraphs (a)(2)(i) and (a)(3)(i) of this section.

(5) *Security Interest.* A security interest does not involve an obligation to transfer rights in the invention for the purposes of paragraphs (a)(1) through (a)(3) of this section unless the security interest is defaulted upon.

(b) *Establishment of small entity status permits payment of reduced fees.*

(1) A small entity, as defined in paragraph (a) of this section, who has properly asserted entitlement to small entity status pursuant to paragraph (c) of this section will be accorded small entity status by the Office in the particular application or patent in which entitlement to small entity status was asserted. Establishment of small entity status allows the payment of certain reduced patent fees pursuant to 35 U.S.C. 41(h)(1).

(2) Submission of an original utility application in compliance with the Office electronic filing system by an applicant who has properly asserted entitlement to small entity status pursuant to paragraph (c) of this section in that application allows the payment of a reduced filing fee pursuant to 35 U.S.C. 41(h)(3).

(c) *Assertion of small entity status.* Any party (person, small business concern or nonprofit organization) should make a determination, pursuant to paragraph (f) of this section, of entitlement to be accorded small entity status based on the definitions set forth in paragraph (a) of this section, and must, in order to establish small entity status for the purpose of paying small entity fees, actually make an assertion of entitlement to small entity status, in the manner set forth in paragraphs (c)(1) or (c)(3) of this section, in the application or patent in which such small entity fees are to be paid.

(1) *Assertion by writing.* Small entity status may be established by a written assertion of entitlement to small entity status. A written assertion must:

(i) Be clearly identifiable;

(ii) Be signed (see paragraph (c)(2) of this section); and

(iii) Convey the concept of entitlement to small entity status, such as by stating that applicant is a small entity, or that small entity status is entitled to be asserted for the application or patent. While no specific words or wording are required to assert small entity status, the intent to assert small entity status must be clearly indicated in order to comply with the assertion requirement.

(2) *Parties who can sign and file the written assertion.* The written assertion can be signed by:

(i) One of the parties identified in § 1.33(b) (e.g., an attorney or agent registered with the Office), § 3.73(b) of this chapter notwithstanding, who can also file the written assertion;

(ii) At least one of the individuals identified as an inventor (even though a § 1.63 executed oath or declaration has not been submitted), notwithstanding § 1.33(b)(4), who can also file the written assertion pursuant to the exception under § 1.33(b) of this part; or

(iii) An assignee of an undivided part interest, notwithstanding §§ 1.33(b)(3) and 3.73(b) of this chapter, but the partial assignee cannot file the assertion without resort to a party identified under § 1.33(b) of this part.

(3) *Assertion by payment of the small entity basic filing or basic national fee.* The payment, by any party, of the exact amount of one of the small entity basic filing fees set forth in §§ 1.16(a), 1.16(b), 1.16(c), 1.16(d), 1.16(e), or the small entity basic national fee set forth in § 1.492(a), will be treated as a written assertion of entitlement to small entity status even if the type of basic filing or basic national fee is inadvertently selected in error.

(i) If the Office accords small entity status based on payment of a small entity basic filing or basic national fee under paragraph (c)(3) of this section that is not applicable to that application, any balance of the small entity fee that is applicable to that application will be due along with the appropriate surcharge set forth in § 1.16(f), or § 1.16(g).

(ii) The payment of any small entity fee other than those set forth in paragraph (c)(3) of this section (whether in the exact fee amount or not) will not be treated as a written assertion of entitlement to small entity status and will not be sufficient to establish small entity status in an application or a patent.

(4) *Assertion required in related, continuing, and reissue applications.* Status as a small entity must be specifically established by an assertion in each related, continuing and reissue application in which status is appropriate and desired. Status as a small entity in one application or patent does not affect the status of any other application or patent, regardless of the relationship of the applications or patents. The refiling of an application under § 1.53 as a continuation, divisional, or continuation-in-part application (including a continued prosecution application under § 1.53(d)), or the filing of a reissue application, requires a new assertion as to continued entitlement to small entity status for the continuing or reissue application.

(d) *When small entity fees can be paid.* Any fee, other than the small entity basic filing fees and the small entity national fees of paragraph (c)(3) of this section, can be paid in the small entity amount only if it is submitted with, or subsequent to, the submission of a written assertion of entitlement to small entity status, except when refunds are permitted by § 1.28(a).

(e) *Only one assertion required.*

(1) An assertion of small entity status need only be filed once in an application or patent. Small entity status, once established, remains in effect until changed pursuant to paragraph (g)(1) of this section. Where an assignment of rights or an obligation to assign rights to other parties who are small entities occurs subsequent to an assertion of small entity status, a second assertion is not required.

(2) Once small entity status is withdrawn pursuant to paragraph (g)(2) of this section, a new written assertion is required to again obtain small entity status.

(f) *Assertion requires a determination of entitlement to pay small entity fees.* Prior to submitting an assertion of entitlement to small entity status in an application, including a related, continuing, or reissue

application, a determination of such entitlement should be made pursuant to the requirements of paragraph (a) of this section. It should be determined that all parties holding rights in the invention qualify for small entity status. The Office will generally not question any assertion of small entity status that is made in accordance with the requirements of this section, but note paragraph (h) of this section.

(g)(1) *New determination of entitlement to small entity status is needed when issue and maintenance fees are due.* Once status as a small entity has been established in an application or patent, fees as a small entity may thereafter be paid in that application or patent without regard to a change in status until the issue fee is due or any maintenance fee is due.

(2) *Notification of loss of entitlement to small entity status is required when issue and maintenance fees are due.* Notification of a loss of entitlement to small entity status must be filed in the application or patent prior to paying, or at the time of paying, the earliest of the issue fee or any maintenance fee due after the date on which status as a small entity as defined in paragraph (a) of this section is no longer appropriate. The notification that small entity status is no longer appropriate must be signed by a party identified in § 1.33(b). Payment of a fee in other than the small entity amount is not sufficient notification that small entity status is no longer appropriate.

(h) *Fraud attempted or practiced on the Office.*

(1) Any attempt to fraudulently establish status as a small entity, or pay fees as a small entity, shall be considered as a fraud practiced or attempted on the Office.

(2) Improperly, and with intent to deceive, establishing status as a small entity, or paying fees as a small entity, shall be considered as a fraud practiced or attempted on the Office.

[47 FR 40139, Sept. 10, 1982, added effective Oct. 1, 1982; para. (c) added, 47 FR 43276, Sept. 30, 1982; paras. (b), (c), and (d), 49 FR 553, Jan. 4, 1984, effective Apr. 1, 1984; revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; revised, 65 FR 54604, Sept. 8, 2000, effective Sept. 8, 2000; para. (a) revised, 69 FR 56481, Sept. 21, 2004, effective Sept. 21, 2004; paras. (b) and (c)(3) revised, 70 FR 3880, Jan. 27, 2005, effective Dec. 8, 2004]

§ 1.28 Refunds when small entity status is later established; how errors in small entity status are excused.

(a) *Refunds based on later establishment of small entity status.* A refund pursuant to § 1.26, based on establishment of small entity status, of a portion of fees timely paid in full prior to establishing status as a small entity may only be obtained if an assertion under § 1.27(c) and a request for a refund of the excess amount are filed within three months of the date of the timely payment of the full fee. The three-month time period is not extendable under § 1.136. Status as a small entity is waived for any fee by the failure to establish the status prior to paying, at the time of paying, or within three months of the date of payment of, the full fee.

(b) *Date of payment.*

(1) The three-month period for requesting a refund, pursuant to paragraph (a) of this section, starts on the date that a full fee has been paid;

(2) The date when a deficiency payment is paid in full determines the amount of deficiency that is due, pursuant to paragraph (c) of this section.

(c) *How errors in small entity status are excused.* If status as a small entity is established in good faith, and fees as a small entity are paid in good faith, in any application or patent, and it is later discovered that such status as a small entity was established in error, or that through error the Office was not notified of a loss of entitlement to small entity status as required by § 1.27(g)(2), the error will be excused upon: compliance with the separate submission and itemization requirements of paragraphs (c)(1) and (c)(2) of this section, and the deficiency payment requirement of paragraph (c)(2) of this section:

(1) *Separate submission required for each application or patent.* Any paper submitted under this paragraph must be limited to the deficiency payment (all fees paid in error), required by paragraph (c)(2) of this section, for one application or one patent. Where more than one application or patent is involved, separate submissions of deficiency payments (*e.g.*, checks) and itemizations are required for each application or patent. See § 1.4(b).

(2) *Payment of deficiency owed.* The deficiency owed, resulting from the previous erroneous payment of small entity fees, must be paid.

(i) *Calculation of the deficiency owed.*

The deficiency owed for each previous fee erroneously paid as a small entity is the difference between the current fee amount (for other than a small entity) on the date the deficiency is paid in full and the amount of the previous erroneous (small entity) fee payment. The total deficiency payment owed is the sum of the individual deficiency owed amounts for each fee amount previously erroneously paid as a small entity. Where a fee paid in error as a small entity was subject to a fee decrease between the time the fee was paid in error and the time the deficiency is paid in full, the deficiency owed is equal to the amount (previously) paid in error;

(ii) *Itemization of the deficiency payment.*

An itemization of the total deficiency payment is required. The itemization must include the following information:

(A) Each particular type of fee that was erroneously paid as a small entity, (*e.g.*, basic statutory filing fee, two-month extension of time fee) along with the current fee amount for a non-small entity;

(B) The small entity fee actually paid, and when. This will permit the Office to differentiate, for example, between two one-month extension of time fees erroneously paid as a small entity but on different dates;

(C) The deficiency owed amount (for each fee erroneously paid); and

(D) The total deficiency payment owed, which is the sum or total of the individual deficiency owed amounts set forth in paragraph (c)(2)(ii)(C) of this section.

(3) *Failure to comply with requirements.* If the requirements of paragraphs (c)(1) and (c)(2) of this section are not complied with, such failure will either: be treated as an authorization for the Office to process the deficiency payment and charge the processing fee set forth in § 1.17(i), or result in a requirement for compliance within a one-month non-extendable time period under § 1.136(a) to avoid the return of the fee deficiency paper, at the option of the Office.

(d) *Payment of deficiency operates as notification of loss of status.* Any deficiency payment (based on a previous erroneous payment of a small entity fee) submitted under paragraph (c) of this section will be

treated under § 1.27(g)(2) as a notification of a loss of entitlement to small entity status.

[47 FR 40140, Sept. 10, 1982, added effective Oct. 1, 1982; para. (a), 49 FR 553, Jan. 4, 1984, effective Apr. 1, 1984; para. (d)(2), 57 FR 2021, Jan. 17, 1992, effective Mar. 16, 1992; para. (c) revised, 58 FR 54504, Oct. 22, 1993, effective Jan. 3, 1994; para. (a) revised, 60 FR 20195, Apr. 25, 1995, effective June 8, 1995; paras. Subpart B — National Processing Provisions

PROSECUTION OF APPLICATION AND APPOINTMENT OF ATTORNEY OR AGENT

§ 1.31 Applicants may be represented by a registered attorney or agent.

An applicant for patent may file and prosecute his or her own case, or he or she may be represented by a registered attorney, registered agent, or other individual authorized to practice before the United States Patent and Trademark Office in patent matters. *See* §§ 11.6 and 11.9 of this subchapter. The United States Patent and Trademark Office cannot aid in the selection of a registered attorney or agent.

[50 FR 5171, Feb. 6, 1985, effective Mar. 8, 1985; revised, 69 FR 29865, May 26, 2004, effective June 25, 2004; revised 69 FR 35427, June 24, 2004, effective July 26, 2004]

§ 1.32 Power of attorney.

(a) Definitions.

(1) *Power of attorney* means a written document by which a principal designates a registered patent attorney or a registered patent agent to act on his or her behalf.

(2) *Principal* means either an applicant for patent (§ 1.41(b)) or an assignee of entire interest of the applicant. The principal executes a power of attorney designating one or more registered patent attorneys or registered patent agents to act on his or her behalf.

(3) *Revocation* means the cancellation by the principal of the authority previously given to a registered patent attorney or registered patent agent to act on his or her behalf.

(4) *Customer Number* means a number that may be used to:

(i) Designate the correspondence address of a patent application or patent such that the correspondence address for the patent application or patent would be the address associated with the Customer Number;

(ii) Designate the fee address (§ 1.363) of a patent such that the fee address for the patent would be the address associated with the Customer Number; and

(iii) Submit a list of practitioners such that those registered patent practitioners associated with the Customer Number would have power of attorney.

(b) A power of attorney must:

(1) Be in writing;

(2) Name one or more representatives in compliance with (c) of this section;

(3) Give the representative power to act on behalf of the principal; and

(4) Be signed by the applicant for patent (§ 1.41(b)) or the assignee of the entire interest of the applicant.

(c) A power of attorney may only name as representative:

(1) One or more joint inventors (§ 1.45);

(2) Those registered patent practitioners associated with a Customer Number;

(3) Ten or fewer registered patent attorneys or registered patent agents (see § 10.6 of this subchapter) (patent practitioners). Except as provided in paragraph (c)(1) or (c)(2) of this section, the Office will not recognize more than ten patent practitioners as being of record in an application or patent. If a power of attorney names more than ten patent practitioners, such power of attorney must be accompanied by a separate paper indicating which ten patent practitioners named in the power of attorney are to be recognized by the Office as being of record in application or patent to which the power of attorney is directed.

[Added, 69 FR 29865, May 26, 2004, effective June 25, 2004]

§ 1.33 Correspondence respecting patent applications, reexamination proceedings, and other proceedings.

(a) *Correspondence address and daytime telephone number.* When filing an application, a correspondence address must be set forth in either an application data sheet (§ 1.76), or elsewhere, in a clearly identifiable manner, in any paper submitted with an application filing. If no correspondence address is specified, the Office may treat the mailing address of the first named inventor (if provided, see §§ 1.76(b)(1) and 1.63(c)(2)) as the correspondence address. The Office will direct all notices, official letters, and other communications relating to the application to the correspondence address. The Office will not engage in double correspondence with an applicant and a registered patent attorney or patent agent, or with more than one registered patent attorney or patent agent except as deemed necessary by the Director. If more than one correspondence address is specified in a single document, the Office will establish one as the correspondence address and will use the address associated with a Customer Number, if given, over a typed correspondence address. For the party to whom correspondence is to be addressed, a daytime telephone number should be supplied in a clearly identifiable manner and may be changed by any party who may change the correspondence address. The correspondence address may be changed as follows:

(1) *Prior to filing of § 1.63 oath or declaration by any of the inventors.* If a § 1.63 oath or declaration has not been filed by any of the inventors, the correspondence address may be changed by the party who filed the application. If the application was filed by a registered attorney or agent, any other registered practitioner named in the transmittal papers may also change the correspondence address. Thus, the inventor(s), any registered practitioner named in the transmittal papers accompanying the original application, or a party that will be the assignee who filed the application, may change the correspondence address in that application under this paragraph.

(2) *Where a § 1.63 oath or declaration has been filed by any of the inventors.* If a § 1.63 oath or declaration has been filed, or is filed concurrent with the filing of an application, by any of the inventors, the correspondence address may be changed by the

parties set forth in paragraph (b) of this section, except for paragraph (b)(2).

(b) *Amendments and other papers.* Amendments and other papers, except for written assertions pursuant to § 1.27(c)(2)(ii) of this part, filed in the application must be signed by:

(1) A registered patent attorney or patent agent of record appointed in compliance with § 1.32(b);

(2) A registered patent attorney or patent agent not of record who acts in a representative capacity under the provisions of § 1.34;

(3) An assignee as provided for under § 3.71(b) of this chapter; or

(4) All of the applicants (§ 1.41(b)) for patent, unless there is an assignee of the entire interest and such assignee has taken action in the application in accordance with § 3.71 of this chapter.

(c) All notices, official letters, and other communications for the patent owner or owners in a reexamination proceeding will be directed to the attorney or agent of record (*see* § 1.32(b)) in the patent file at the address listed on the register of patent attorneys and agents maintained pursuant to §§ 11.5 and 11.11 of this subchapter, or, if no attorney or agent is of record, to the patent owner or owners at the address or addresses of record. Amendments and other papers filed in a reexamination proceeding on behalf of the patent owner must be signed by the patent owner, or if there is more than one owner by all the owners, or by an attorney or agent of record in the patent file, or by a registered attorney or agent not of record who acts in a representative capacity under the provisions of § 1.34. Double correspondence with the patent owner or owners and the patent owner's attorney or agent, or with more than one attorney or agent, will not be undertaken. If more than one attorney or agent is of record and a correspondence address has not been specified, correspondence will be held with the last attorney or agent made of record.

(d) A "correspondence address" or change thereto may be filed with the Patent and Trademark Office during the enforceable life of the patent. The "correspondence address" will be used in any correspondence relating to maintenance fees unless a separate "fee address" has been specified. See § 1.363 for "fee address" used solely for maintenance fee purposes.

[36 FR 12617, July 2, 1971; 46 FR 29181, May 29, 1981; para. (d) added, 49 FR 34724, Aug. 31, 1984, effective Nov. 1, 1984; para. (c), 50 FR 5171, Feb. 6, 1985, effective Mar. 8, 1985; paras. (a) & (b) revised, 62 FR 53131, Oct. 10 1997, effective Dec. 1, 1997; paras. (a) and (b) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (a) revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; (a) introductory text, (b) introductory text, and paras. (b)(1), (b)(2) and (c) revised, 69 FR 29865, May 26, 2004, effective June 25, 2004; para. (c) revised, 69 FR 35427, June 24, 2004, effective July 26, 2004; para. (c) revised, 70 FR 3880, Jan. 27, 2005, effective Dec. 8, 2004]

§ 1.34 Acting in a representative capacity.

When a registered patent attorney or patent agent acting in a representative capacity appears in person or signs a paper in practice before the United States Patent and Trademark Office in a patent case, his or her personal appearance or signature shall constitute a representation to the United States Patent and Trademark Office that under the provisions of this subchapter and the law, he or she is authorized to represent the particular party in whose behalf he or she acts. In filing such a paper, the registered patent attorney or patent agent must specify his or her registration number and name with his or her signature. Further proof of authority to act in a representative capacity may be required.

[46 FR 29181, May 29, 1981; para. (a), 50 FR 5171, Feb. 6, 1985, effective Mar. 6, 1985; revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; revised, 69 FR 29865, May 26, 2004, effective June 25, 2004]

§ 1.36 Revocation of power of attorney; withdrawal of patent attorney or agent.

(a) A power of attorney, pursuant to § 1.32(b), may be revoked at any stage in the proceedings of a case by an applicant for patent (§ 1.41(b)) or an assignee of the entire interest of the applicant. A power of attorney to the patent practitioners associated with a Customer Number will be treated as a request to revoke any powers of attorney previously given. Fewer than all of the applicants (or by fewer than the assignee of the entire interest of the applicant) may only revoke the power of attorney upon a showing of sufficient cause, and payment of the petition fee set forth in § 1.17(h). A registered patent attorney or patent agent will be notified of the revoca-

tion of the power of attorney. Where power of attorney is given to the patent practitioners associated with a Customer Number (§ 1.32(c)(2)), the practitioners so appointed will also be notified of the revocation of the power of attorney when the power of attorney to all of the practitioners associated with the Customer Number is revoked. The notice of revocation will be mailed to the correspondence address for the application (§ 1.33) in effect before the revocation. An assignment will not of itself operate as a revocation of a power previously given, but the assignee of the entire interest of the applicant may revoke previous powers of attorney and give another power of attorney of the assignee's own selection as provided in § 1.32(b).

(b) A registered patent attorney or patent agent who has been given a power of attorney pursuant to § 1.32(b) may withdraw as attorney or agent of record upon application to and approval by the Director. The applicant or patent owner will be notified of the withdrawal of the registered patent attorney or patent agent. Where power of attorney is given to the patent practitioners associated with a Customer Number, a request to delete all of the patent practitioners associated with the Customer Number may not be granted if an applicant has given power of attorney to the patent practitioners associated with the Customer Number in an application that has an Office action to which a reply is due, but insufficient time remains for the applicant to file a reply. See § 41.5 of this title for withdrawal during proceedings before the Board of Patent Appeals and Interferences.

[49 FR 48416, Dec. 12, 1984, effective Feb. 11, 1985; revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; revised, 69 FR 29865, May 26, 2004, effective June 25, 2004; revised, 69 FR 49959, Aug. 12, 2004, effective Sept. 13, 2004]

WHO MAY APPLY FOR A PATENT

§ 1.41 Applicant for patent.

(a) A patent is applied for in the name or names of the actual inventor or inventors.

(1) The inventorship of a nonprovisional application is that inventorship set forth in the oath or declaration as prescribed by § 1.63, except as provided for in §§ 1.53(d)(4) and 1.63(d). If an oath or

declaration as prescribed by § 1.63 is not filed during the pendency of a nonprovisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(b), unless applicant files a paper, including the processing fee set forth in § 1.17(i), supplying or changing the name or names of the inventor or inventors.

(2) The inventorship of a provisional application is that inventorship set forth in the cover sheet as prescribed by § 1.51(c)(1). If a cover sheet as prescribed by § 1.51(c)(1) is not filed during the pendency of a provisional application, the inventorship is that inventorship set forth in the application papers filed pursuant to § 1.53(c), unless applicant files a paper including the processing fee set forth in § 1.17(q), supplying or changing the name or names of the inventor or inventors.

(3) In a nonprovisional application filed without an oath or declaration as prescribed by § 1.63 or a provisional application filed without a cover sheet as prescribed by § 1.51(c)(1), the name, residence, and citizenship of each person believed to be an actual inventor should be provided when the application papers pursuant to § 1.53(b) or § 1.53(c) are filed.

(4) The inventorship of an international application entering the national stage under 35 U.S.C. 371 is that inventorship set forth in the international application, which includes any change effected under PCT Rule 92bis. See § 1.497(d) and (f) for filing an oath or declaration naming an inventive entity different from the inventive entity named in the international application, or if a change to the inventive entity has been effected under PCT Rule 92bis subsequent to the execution of any declaration filed under PCT Rule 4.17(iv) (§ 1.48(f)(1) does not apply to an international application entering the national stage under 35 U.S.C. 371).

(b) Unless the contrary is indicated the word “applicant” when used in these sections refers to the inventor or joint inventors who are applying for a patent, or to the person mentioned in §§ 1.42, 1.43 or 1.47 who is applying for a patent in place of the inventor.

(c) Any person authorized by the applicant may physically or electronically deliver an application for patent to the Office on behalf of the inventor or inven-

tors, but an oath or declaration for the application (§ 1.63) can only be made in accordance with § 1.64.

(d) A showing may be required from the person filing the application that the filing was authorized where such authorization comes into question.

[48 FR 2708, Jan. 20, 1983; 48 FR 4285, Jan. 31, 1983; para. (a) revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; paras. (a) and (c) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (a)(4) revised, 67 FR 520, Jan. 4, 2002, effective Apr. 1, 2002]

§ 1.42 When the inventor is dead.

In case of the death of the inventor, the legal representative (executor, administrator, etc.) of the deceased inventor may make the necessary oath or declaration, and apply for and obtain the patent. Where the inventor dies during the time intervening between the filing of the application and the granting of a patent thereon, the letters patent may be issued to the legal representative upon proper intervention.

[48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983]

§ 1.43 When the inventor is insane or legally incapacitated.

In case an inventor is insane or otherwise legally incapacitated, the legal representative (guardian, conservator, etc.) of such inventor may make the necessary oath or declaration, and apply for and obtain the patent.

[48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983]

§ 1.44 [Reserved]

[Removed and reserved, 65 FR 54604, Sept. 8, 2000, effective Sept. 8, 2000]

§ 1.45 Joint inventors.

(a) Joint inventors must apply for a patent jointly and each must make the required oath or declaration: neither of them alone, nor less than the entire number, can apply for a patent for an invention invented by them jointly, except as provided in § 1.47.

(b) Inventors may apply for a patent jointly even though

(1) They did not physically work together or at the same time,

(2) Each inventor did not make the same type or amount of contribution, or

(3) Each inventor did not make a contribution to the subject matter of every claim of the application.

(c) If multiple inventors are named in a nonprovisional application, each named inventor must have made a contribution, individually or jointly, to the subject matter of at least one claim of the application and the application will be considered to be a joint application under 35 U.S.C. 116. If multiple inventors are named in a provisional application, each named inventor must have made a contribution, individually or jointly, to the subject matter disclosed in the provisional application and the provisional application will be considered to be a joint application under 35 U.S.C. 116.

[paras. (b) and (c), 47 FR 41274, Sept. 17, 1982, effective Oct. 1, 1982; 48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983; 50 FR 9379, Mar. 7, 1985, effective May 8, 1985; para. (c) revised, 60 FR 20195, Apr. 25, 1995, effective June 8, 1995]

§ 1.46 Assigned inventions and patents.

In case the whole or a part interest in the invention or in the patent to be issued is assigned, the application must still be made or authorized to be made, and an oath or declaration signed, by the inventor or one of the persons mentioned in §§ 1.42, 1.43, or 1.47. However, the patent may be issued to the assignee or jointly to the inventor and the assignee as provided in § 3.81.

[48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983; 57 FR 29642, July 6, 1992, effective Sept. 4, 1992]

§ 1.47 Filing when an inventor refuses to sign or cannot be reached.

(a) If a joint inventor refuses to join in an application for patent or cannot be found or reached after diligent effort, the application may be made by the other inventor on behalf of himself or herself and the nonsigning inventor. The oath or declaration in such an application must be accompanied by a petition including proof of the pertinent facts, the fee set forth in § 1.17(g), and the last known address of the nonsigning inventor. The nonsigning inventor may subse-

quently join in the application by filing an oath or declaration complying with § 1.63.

(b) Whenever all of the inventors refuse to execute an application for patent, or cannot be found or reached after diligent effort, a person to whom an inventor has assigned or agreed in writing to assign the invention, or who otherwise shows sufficient proprietary interest in the matter justifying such action, may make application for patent on behalf of and as agent for all the inventors. The oath or declaration in such an application must be accompanied by a petition including proof of the pertinent facts, a showing that such action is necessary to preserve the rights of the parties or to prevent irreparable damage, the fee set forth in § 1.17(g), and the last known address of all of the inventors. An inventor may subsequently join in the application by filing an oath or declaration complying with § 1.63.

(c) The Office will send notice of the filing of the application to all inventors who have not joined in the application at the address(es) provided in the petition under this section, and publish notice of the filing of the application in the *Official Gazette*. The Office may dispense with this notice provision in a continuation or divisional application, if notice regarding the filing of the prior application was given to the nonsigning inventor(s).

[47 FR 41275, Sept. 17, 1982, effective Oct. 1, 1982; 48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983; revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; paras. (a) and (b) revised, 69 FR 56481, Sept. 21, 2004, effective Nov. 22, 2004]

§ 1.48 Correction of inventorship in a patent application, other than a reissue application, pursuant to 35 U.S.C. 116.

(a) *Nonprovisional application after oath/declaration filed.* If the inventive entity is set forth in error in an executed § 1.63 oath or declaration in a nonprovisional application, and such error arose without any deceptive intention on the part of the person named as an inventor in error or on the part of the person who through error was not named as an inventor, the inventorship of the nonprovisional application may be amended to name only the actual inventor or inventors. Amendment of the inventorship requires:

(1) A request to correct the inventorship that sets forth the desired inventorship change;

(2) A statement from each person being added as an inventor and from each person being deleted as an inventor that the error in inventorship occurred without deceptive intention on his or her part;

(3) An oath or declaration by the actual inventor or inventors as required by § 1.63 or as permitted by §§ 1.42, 1.43 or § 1.47;

(4) The processing fee set forth in § 1.17(i); and

(5) If an assignment has been executed by any of the original named inventors, the written consent of the assignee (see § 3.73(b) of this chapter).

(b) *Nonprovisional application—fewer inventors due to amendment or cancellation of claims.* If the correct inventors are named in a nonprovisional application, and the prosecution of the nonprovisional application results in the amendment or cancellation of claims so that fewer than all of the currently named inventors are the actual inventors of the invention being claimed in the nonprovisional application, an amendment must be filed requesting deletion of the name or names of the person or persons who are not inventors of the invention being claimed. Amendment of the inventorship requires:

(1) A request, signed by a party set forth in § 1.33(b), to correct the inventorship that identifies the named inventor or inventors being deleted and acknowledges that the inventor's invention is no longer being claimed in the nonprovisional application; and

(2) The processing fee set forth in § 1.17(i).

(c) *Nonprovisional application—inventors added for claims to previously unclaimed subject matter.* If a nonprovisional application discloses unclaimed subject matter by an inventor or inventors not named in the application, the application may be amended to add claims to the subject matter and name the correct inventors for the application. Amendment of the inventorship requires:

(1) A request to correct the inventorship that sets forth the desired inventorship change;

(2) A statement from each person being added as an inventor that the addition is necessitated by amendment of the claims and that the inventorship

error occurred without deceptive intention on his or her part;

(3) An oath or declaration by the actual inventors as required by § 1.63 or as permitted by §§ 1.42, 1.43, or § 1.47;

(4) The processing fee set forth in § 1.17(i); and

(5) If an assignment has been executed by any of the original named inventors, the written consent of the assignee (see § 3.73(b) of this chapter).

(d) *Provisional application—adding omitted inventors.* If the name or names of an inventor or inventors were omitted in a provisional application through error without any deceptive intention on the part of the omitted inventor or inventors, the provisional application may be amended to add the name or names of the omitted inventor or inventors. Amendment of the inventorship requires:

(1) A request, signed by a party set forth in § 1.33(b), to correct the inventorship that identifies the inventor or inventors being added and states that the inventorship error occurred without deceptive intention on the part of the omitted inventor or inventors; and

(2) The processing fee set forth in § 1.17(q).

(e) *Provisional application—deleting the name or names of the inventor or inventors.* If a person or persons were named as an inventor or inventors in a provisional application through error without any deceptive intention on the part of such person or persons, an amendment may be filed in the provisional application deleting the name or names of the person or persons who were erroneously named. Amendment of the inventorship requires:

(1) A request to correct the inventorship that sets forth the desired inventorship change;

(2) A statement by the person or persons whose name or names are being deleted that the inventorship error occurred without deceptive intention on the part of such person or persons;

(3) The processing fee set forth in § 1.17(q); and

(4) If an assignment has been executed by any of the original named inventors, the written consent of the assignee (see § 3.73(b) of this chapter).

(f)(1) *Nonprovisional application—filing executed oath/declaration corrects inventorship.* If the correct inventor or inventors are not named on filing a

nonprovisional application under § 1.53(b) without an executed oath or declaration under § 1.63 by any of the inventors, the first submission of an executed oath or declaration under § 1.63 by any of the inventors during the pendency of the application will act to correct the earlier identification of inventorship. See §§ 1.41(a)(4) and 1.497(d) and (f) for submission of an executed oath or declaration to enter the national stage under 35 U.S.C. 371 naming an inventive entity different from the inventive entity set forth in the international stage.

(2) *Provisional application filing cover sheet corrects inventorship.* If the correct inventor or inventors are not named on filing a provisional application without a cover sheet under § 1.51(c)(1), the later submission of a cover sheet under § 1.51(c)(1) during the pendency of the application will act to correct the earlier identification of inventorship.

(g) *Additional information may be required.* The Office may require such other information as may be deemed appropriate under the particular circumstances surrounding the correction of inventorship.

(h) *Reissue applications not covered.* The provisions of this section do not apply to reissue applications. See §§ 1.171 and 1.175 for correction of inventorship in a patent via a reissue application.

(i) *Correction of inventorship in patent.* See § 1.324 for correction of inventorship in a patent.

(j) *Correction of inventorship in a contested case before the Board of Patent Appeals and Interferences.* In a contested case under part 41, subpart D, of this title, a request for correction of an application must be in the form of a motion under § 41.121(a)(2) of this title and must comply with the requirements of this section.

[48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983; 49 FR 48416, Dec. 12, 1984, effective Feb. 11, 1985; 50 FR 9379, Mar. 7, 1985, effective May 8, 1985; para. (f)(1) revised, 67 FR 520, Jan. 4, 2002, effective Apr. 1, 2002; paras. (a)-(c) and (i) revised and para. (j) added, 69 FR 49959, Aug. 12, 2004, effective Sept. 13, 2004]

THE APPLICATION

§ 1.51 General requisites of an application.

(a) Applications for patents must be made to the Director of the United States Patent and Trademark Office.

(b) A complete application filed under § 1.53(b) or § 1.53(d) comprises:

(1) A specification as prescribed by 35 U.S.C. 112, including a claim or claims, see §§ 1.71 to 1.77;

(2) An oath or declaration, see §§ 1.63 and 1.68;

(3) Drawings, when necessary, see §§ 1.81 to 1.85; and

(4) The prescribed filing fee, search fee, examination fee, and application size fee, see § 1.16.

(c) A complete provisional application filed under § 1.53(c) comprises:

(1) A cover sheet identifying:

(i) The application as a provisional application,

(ii) The name or names of the inventor or inventors, (see § 1.41(a)(2)),

(iii) The residence of each named inventor,

(iv) The title of the invention,

(v) The name and registration number of the attorney or agent (if applicable),

(vi) The docket number used by the person filing the application to identify the application (if applicable),

(vii) The correspondence address, and

(viii) The name of the U.S. Government agency and Government contract number (if the invention was made by an agency of the U.S. Government or under a contract with an agency of the U.S. Government);

(2) A specification as prescribed by the first paragraph of 35 U.S.C. 112, see § 1.71;

(3) Drawings, when necessary, see §§ 1.81 to 1.85; and

(4) The prescribed filing fee and application size fee, see § 1.16.

(d) Applicants are encouraged to file an information disclosure statement in nonprovisional applications. See § 1.97 and § 1.98. No information disclosure statement may be filed in a provisional application.

[42 FR 5593, Jan. 28, 1977; paras. (a) and (c), 47 FR 41275, Sept. 17, 1982, effective Oct. 1, 1982; paras. (a) and (b), 48 FR 2709, Jan. 20, 1983, effective Feb. 27, 1983; para. (b), 57 FR 2021, Jan. 17, 1992, effective Mar. 16, 1992; paras. (a) & (b) revised, 60 FR 20195, Apr. 25, 1995, effective June 8, 1995; revised, 62 FR 53131, Oct. 10, 1997, effective Dec. 1, 1997; para. (b) revised, 65 FR 54604, Sept. 8, 2000, effective Nov. 7, 2000; para. (a) revised, 68 FR 14332, Mar. 25, 2003, effective May 1, 2003; paras. (b)(4) and (c)(4) revised, 70 FR 3880, Jan. 27, 2005, effective Dec. 8, 2004]

§ 1.52 Language, paper, writing, margins, compact disc specifications.

(a) *Papers that are to become a part of the permanent United States Patent and Trademark Office records in the file of a patent application or a reexamination proceeding.*

(1) All papers, other than drawings, that are submitted on paper or by facsimile transmission, and are to become a part of the permanent United States Patent and Trademark Office records in the file of a patent application or reexamination proceeding, must be on sheets of paper that are the same size, not permanently bound together, and:

(i) Flexible, strong, smooth, non-shiny, durable, and white;

(ii) Either 21.0 cm by 29.7 cm (DIN size A4) or 21.6 cm by 27.9 cm (8 1/2 by 11 inches), with each sheet including a top margin of at least 2.0 cm (3/4 inch), a left side margin of at least 2.5 cm (1 inch), a right side margin of at least 2.0 cm (3/4 inch), and a bottom margin of at least 2.0 cm (3/4 inch);

(iii) Written on only one side in portrait orientation;

(iv) Plainly and legibly written either by a typewriter or machine printer in permanent dark ink or its equivalent; and

(v) Presented in a form having sufficient clarity and contrast between the paper and the writing thereon to permit the direct reproduction of readily legible copies in any number by use of photographic, electrostatic, photo-offset, and microfilming processes and electronic capture by use of digital imaging and optical character recognition.

(2) All papers that are submitted on paper or by facsimile transmission and are to become a part of the permanent records of the United States Patent and

Trademark Office should have no holes in the sheets as submitted.

(3) The provisions of this paragraph and paragraph (b) of this section do not apply to the printed information on paper forms provided by the Office, or to the copy of the patent submitted on paper in double column format as the specification in a reissue application or request for reexamination.

(4) *See* § 1.58 for chemical and mathematical formulae and tables, and § 1.84 for drawings.

(5) If papers that are submitted on paper or by facsimile transmission do not comply with paragraph (a)(1) of this section and are submitted as part of the permanent record, other than the drawings, applicant, or the patent owner, or the requester in a reexamination proceeding, will be notified and given a period of time within which to provide substitute papers that comply with paragraph (a)(1) of this section in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

(6) Papers that are submitted electronically to the Office must be formatted and transmitted in compliance with the Office's electronic filing system requirements.

(7) If the papers that are submitted electronically to the Office do not comply with paragraph (a)(6) of this section, the applicant, or the patent owner, or the requester in a reexamination proceeding, will be notified and given a period of time within which to provide substitute papers that comply with paragraph (a)(6) of this section in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

(b) *The application (specification, including the claims, drawings, and oath or declaration) or reexamination proceeding and any amendments or corrections to the application or reexamination proceeding.*

(1) The application or proceeding and any amendments or corrections to the application (including any translation submitted pursuant to paragraph

(d) of this section) or proceeding, except as provided for in § 1.69 and paragraph (d) of this section, must:

(i) Comply with the requirements of paragraph (a) of this section; and

(ii) Be in the English language or be accompanied by a translation of the application and a translation of any corrections or amendments into the English language together with a statement that the translation is accurate.

(2) The specification (including the abstract and claims) for other than reissue applications and reexamination proceedings, and any amendments for applications (including reissue applications) and reexamination proceedings to the specification, except as provided for in §§ 1.821 through 1.825, must have:

(i) Lines that are 1 1/2 or double spaced;

(ii) Text written in a nonscript type font (*e.g.*, Arial, Times Roman, or Courier, preferably a font size of 12) lettering style having capital letters which should be at least 0.3175 cm. (0.125 inch) high, but may be no smaller than 0.21 cm. (0.08 inch) high (*e.g.*, a font size of 6); and

(iii) Only a single column of text.

(3) The claim or claims must commence on a separate physical sheet or electronic page (§ 1.75(h)).

(4) The abstract must commence on a separate physical sheet or electronic page or be submitted as the first page of the patent in a reissue application or reexamination proceeding (§ 1.72(b)).

(5) Other than in a reissue application or reexamination proceeding, the pages of the specification including claims and abstract must be numbered consecutively, starting with 1, the numbers being centrally located above or preferably below, the text.

(6) Other than in a reissue application or reexamination proceeding, the paragraphs of the specification, other than in the claims or abstract, may be numbered at the time the application is filed, and should be individually and consecutively numbered using Arabic numerals, so as to unambiguously identify each paragraph. The number should consist of at least four numerals enclosed in square brackets, including leading zeros (*e.g.*, [0001]). The numbers and enclosing brackets should appear to the right of the left margin as the first item in each paragraph, before the first word of the paragraph, and should be highlighted in bold. A gap, equivalent to approximately four spaces, should follow the number. Non-

text elements (*e.g.*, tables, mathematical or chemical formulae, chemical structures, and sequence data) are considered part of the numbered paragraph around or above the elements, and should not be independently numbered. If a nontext element extends to the left margin, it should not be numbered as a separate and independent paragraph. A list is also treated as part of the paragraph around or above the list, and should not be independently numbered. Paragraph or section headers (titles), whether abutting the left margin or centered on the page, are not considered paragraphs and should not be numbered.

(7) If papers that do not comply with paragraphs (b)(1) through (b)(5) of this section are submitted as part of the application, the applicant, or patent owner, or requester in a reexamination proceeding, will be notified and given a period of time within which to provide substitute papers that comply with paragraphs (b)(1) through (b)(5) of this section in order to avoid abandonment of the application in the case of an applicant for patent, termination of proceedings in the case of a patent owner in a reexamination proceeding, or refusal of consideration of the papers in the case of a third party requester in a reexamination proceeding.

(c)(1) Any interlineation, erasure, cancellation or other alteration of the application papers filed must be made before the signing of any accompanying oath or declaration pursuant to § 1.63 referring to those application papers and should be dated and initialed or signed by the applicant on the same sheet of paper. Application papers containing alterations made after the signing of an oath or declaration referring to those application papers must be supported by a supplemental oath or declaration under § 1.67. In either situation, a substitute specification (§ 1.125) is required if the application papers do not comply with paragraphs (a) and (b) of this section.

(2) After the signing of the oath or declaration referring to the application papers, amendments may only be made in the manner provided by § 1.121.

(3) Notwithstanding the provisions of this paragraph, if an oath or declaration is a copy of the oath or declaration from a prior application, the application for which such copy is submitted may contain alterations that do not introduce matter that would have been new matter in the prior application.

(d) A nonprovisional or provisional application may be in a language other than English.

(1) *Nonprovisional application.* If a nonprovisional application is filed in a language other than English, an English language translation of the non-English language application, a statement that the translation is accurate, and the processing fee set forth in § 1.17(i) are required. If these items are not filed with the application, applicant will be notified and given a period of time within which they must be filed in order to avoid abandonment.

(2) *Provisional application.* If a provisional application is filed in a language other than English, an English language translation of the non-English language provisional application will not be required in the provisional application. See § 1.78(a) for the requirements for claiming the benefit of such provisional application in a nonprovisional application.

(e) *Electronic documents that are to become part of the permanent United States Patent and Trademark Office records in the file of a patent application or reexamination proceeding.*

(1) The following documents may be submitted to the Office on a compact disc in compliance with this paragraph:

(i) A computer program listing (see § 1.96);

(ii) A “Sequence Listing” (submitted under § 1.821(c)); or

(iii) Any individual table (see § 1.58) if the table is more than 50 pages in length, or if the total number of pages of all of the tables in an application exceeds 100 pages in length, where a table page is a page printed on paper in conformance with paragraph (b) of this section and § 1.58(c).

(2) A compact disc as used in this part means a Compact Disc-Read Only Memory (CD-ROM) or a Compact Disc-Recordable (CD-R) in compliance with this paragraph. A CD-ROM is a “read-only” medium on which the data is pressed into the disc so that it cannot be changed or erased. A CD-R is a “write once” medium on which once the data is recorded, it is permanent and cannot be changed or erased.

(3)(i) Each compact disc must conform to the International Standards Organization (ISO) 9660 standard, and the contents of each compact disc must be in compliance with the American Standard Code for

Information Interchange (ASCII). CD-R discs must be finalized so that they are closed to further writing to the CD-R.

(ii) Each compact disc must be enclosed in a hard compact disc case within an unsealed padded and protective mailing envelope and accompanied by a transmittal letter on paper in accordance with paragraph (a) of this section. The transmittal letter must list for each compact disc the machine format (*e.g.*, IBM-PC, Macintosh), the operating system compatibility (*e.g.*, MS-DOS, MS-Windows, Macintosh, Unix), a list of files contained on the compact disc including their names, sizes in bytes, and dates of creation, plus any other special information that is necessary to identify, maintain, and interpret (*e.g.*, tables in landscape orientation should be identified as landscape orientation or be identified when inquired about) the information on the compact disc. Compact discs submitted to the Office will not be returned to the applicant.

(4) Any compact disc must be submitted in duplicate unless it contains only the “Sequence Listing” in computer readable form required by § 1.821(e). The compact disc and duplicate copy must be labeled “Copy 1” and “Copy 2,” respectively. The transmittal letter which accompanies the compact disc must include a statement that the two compact discs are identical. In the event that the two compact discs are not identical, the Office will use the compact disc labeled “Copy 1” for further processing. Any amendment to the information on a compact disc must be by way of a replacement compact disc in compliance with this paragraph containing the substitute information, and must be accompanied by a statement that the replacement compact disc contains no new matter. The compact disc and copy must be labeled “COPY 1 REPLACEMENT MM/DD/YYYY” (with the month, day and year of creation indicated), and “COPY 2 REPLACEMENT MM/DD/YYYY,” respectively.

(5) The specification must contain an incorporation-by-reference of the material on the compact disc in a separate paragraph (§ 1.77(b)(5)), identifying each compact disc by the names of the files contained on each of the compact discs, their date of creation and their sizes in bytes. The Office may require applicant to amend the specification to include in the paper portion any part of the specification previously submitted on compact disc.

(6) A compact disc must also be labeled with the following information:

- (i) The name of each inventor (if known);
- (ii) Title of the invention;
- (iii) The docket number, or application number if known, used by the person filing the application to identify the application; and
- (iv) A creation date of the compact disc.
- (v) If multiple compact discs are submitted, the label shall indicate their order (*e.g.* “1 of X”).
- (vi) An indication that the disk is “Copy 1” or “Copy 2” of the submission. See paragraph (b)(4) of this section.

(7) If a file is unreadable on both copies of the disc, the unreadable file will be treated as not having been submitted. A file is unreadable if, for example, it is of a format that does not comply with the requirements of paragraph (e)(3) of this section, it is corrupted by a computer virus, or it is written onto a defective compact disc.

(f)(1) Any sequence listing in an electronic medium in compliance with §§ 1.52(e) and 1.821(c) or (e), and any computer program listing filed in an electronic medium in compliance with §§ 1.52(e) and 1.96, will be excluded when determining the application size fee required by § 1.16(s) or § 1.492(j). For purposes of determining the application size fee required by § 1.16(s) or § 1.492(j), for an application the specification and drawings of which, excluding any sequence listing in compliance with § 1.821(c) or (e), and any computer program listing filed in an electronic medium in compliance with §§ 1.52(e) and 1.96, are submitted in whole or in part on an electronic medium other than the Office electronic filing system, each three kilobytes of content submitted on an electronic medium shall be counted as a sheet of paper.

(2) Except as otherwise provided in this paragraph, the paper size equivalent of the specification and drawings of an application submitted via the Office electronic filing system will be considered to be seventy-five percent of the number of sheets of paper present in the specification and drawings of the application when entered into the Office file wrapper after being rendered by the Office electronic filing system for purposes of determining the application size fee required by § 1.16(s). Any sequence listing in compliance with § 1.821(c) or (e), and any computer

program listing in compliance with § 1.96, submitted via the Office electronic filing system will be excluded when determining the application size fee required by § 1.16(s) if the listing is submitted in ASCII text as part of an associated file.

(e)(5) revised, 70 FR 54259, Sept. 14, 2005, effective Sept. 14, 2005]

§ 1.53 Application number, filing date, and completion of application.

(a) *Application number.* Any papers received in the Patent and Trademark Office which purport to be an application for a patent will be assigned an application number for identification purposes.

(b) *Application filing requirements - Nonprovisional application.* The filing date of an application for patent filed under this section, except for a provisional application under paragraph (c) of this section or a continued prosecution application under paragraph (d) of this section, is the date on which a specification as prescribed by 35 U.S.C. 112 containing a description pursuant to § 1.71 and at least one claim pursuant to § 1.75, and any drawing required by § 1.81(a) are filed in the Patent and Trademark Office. No new matter may be introduced into an application after its filing date. A continuing application, which may be a continuation, divisional, or continuation-in-part application, may be filed under the conditions specified in 35 U.S.C. 120, 121 or 365(c) and § 1.78(a).

(1) A continuation or divisional application that names as inventors the same or fewer than all of the inventors named in the prior application may be filed under this paragraph or paragraph (d) of this section.

(2) A continuation-in-part application (which may disclose and claim subject matter not disclosed in the prior application) or a continuation or divisional application naming an inventor not named in the prior application must be filed under this paragraph.

(c) *Application filing requirements - Provisional application.* The filing date of a provisional application is the date on which a specification as prescribed by the first paragraph of 35 U.S.C. 112, and any drawing required by § 1.81(a) are filed in the Patent and Trademark Office. No amendment, other than to make the provisional application comply with the patent statute and all applicable regulations, may be made to the provisional application after the filing date of the provisional application.

(1) A provisional application must also include the cover sheet required by § 1.51(c)(1), which may be an application data sheet (§ 1.76), or a cover letter identifying the application as a provisional application. Otherwise, the application will be treated as an application filed under paragraph (b) of this section.

(2) An application for patent filed under paragraph (b) of this section may be converted to a provisional application and be accorded the original filing date of the application filed under paragraph (b) of this section. The grant of such a request for conversion will not entitle applicant to a refund of the fees that were properly paid in the application filed under paragraph (b) of this section. Such a request for conversion must be accompanied by the processing fee set forth in § 1.17(q) and be filed prior to the earliest of:

(i) Abandonment of the application filed under paragraph (b) of this section;

(ii) Payment of the issue fee on the application filed under paragraph (b) of this section;

(iii) Expiration of twelve months after the filing date of the application filed under paragraph (b) of this section; or

(iv) The filing of a request for a statutory invention registration under § 1.293 in the application filed under paragraph (b) of this section.

(3) A provisional application filed under paragraph (c) of this section may be converted to a nonprovisional application filed under paragraph (b) of this section and accorded the original filing date of the provisional application. The conversion of a provisional application to a nonprovisional application will not result in either the refund of any fee properly paid in the provisional application or the application of any such fee to the filing fee, or any other fee, for the nonprovisional application. Conversion of a provisional application to a nonprovisional application under this paragraph will result in the term of any patent to issue from the application being measured from at least the filing date of the provisional application for which conversion is requested. Thus, applicants should consider avoiding this adverse patent term impact by filing a nonprovisional application claiming the benefit of the provisional application under 35 U.S.C. 119(e) (rather than converting the provisional application into a nonprovisional application pursuant to this paragraph). A request to convert a provisional application to a nonprovisional application must be accompanied by the fee set forth in § 1.17(i) and an amendment including at least one claim as prescribed by the second paragraph of 35 U.S.C. 112, unless the provisional application under paragraph (c) of this section otherwise contains at least one claim as prescribed by the second paragraph of 35 U.S.C.112. The nonprovisional application resulting from conversion of a provisional application must also include the filing fee, search fee, and examination fee for a nonprovisional application, an oath or declaration by the applicant pursuant to §§ 1.63, 1.162, or 1.175, and the surcharge required by § 1.16(f) if either the basic filing fee for a nonprovisional application or the oath or declaration was not present on the filing date accorded the resulting nonprovisional application (*i.e.*, the filing date of the original provisional application). A request to convert a provisional application to a nonprovisional application must also be filed prior to the earliest of:

(i) Abandonment of the provisional application filed under paragraph (c) of this section; or

(ii) Expiration of twelve months after the filing date of the provisional application filed under paragraph (c) of this section.

(4) A provisional application is not entitled to the right of priority under 35 U.S.C. 119 or 365(a) or § 1.55, or to the benefit of an earlier filing date under 35 U.S.C. 120, 121 or 365(c) or § 1.78 of any other application. No claim for priority under 35 U.S.C. 119(e) or § 1.78(a)(4) may be made in a design application based on a provisional application. No request under § 1.293 for a statutory invention registration may be filed in a provisional application. The requirements of §§ 1.821 through 1.825 regarding application disclosures containing nucleotide and/or amino acid sequences are not mandatory for provisional applications.

(d) *Application filing requirements - Continued prosecution (nonprovisional) application.*

(1) A continuation or divisional application (but not a continuation-in-part) of a prior nonprovisional application may be filed as a continued prosecution application under this paragraph, provided that:

(i) The application is for a design patent;

(ii) The prior nonprovisional application is a design application that is complete as defined by § 1.51(b); and

(iii) The application under this paragraph is filed before the earliest of:

(A) Payment of the issue fee on the prior application, unless a petition under § 1.313(c) is granted in the prior application;

(B) Abandonment of the prior application; or

(C) Termination of proceedings on the prior application.

(2) The filing date of a continued prosecution application is the date on which a request on a separate paper for an application under this paragraph is filed. An application filed under this paragraph:

(i) Must identify the prior application;

(ii) Discloses and claims only subject matter disclosed in the prior application;

(iii) Names as inventors the same inventors named in the prior application on the date the application under this paragraph was filed, except as provided in paragraph (d)(4) of this section;

(iv) Includes the request for an application under this paragraph, will utilize the file jacket and contents of the prior application, including the specification, drawings and oath or declaration from the

prior application, to constitute the new application, and will be assigned the application number of the prior application for identification purposes; and

(v) Is a request to expressly abandon the prior application as of the filing date of the request for an application under this paragraph.

(3) The filing fee, search fee, and examination fee for a continued prosecution application filed under this paragraph are the basic filing fee as set forth in § 1.16(b), the search fee as set forth in § 1.16(l), and the examination fee as set forth in § 1.16(p).

(4) An application filed under this paragraph may be filed by fewer than all the inventors named in the prior application, provided that the request for an application under this paragraph when filed is accompanied by a statement requesting deletion of the name or names of the person or persons who are not inventors of the invention being claimed in the new application. No person may be named as an inventor in an application filed under this paragraph who was not named as an inventor in the prior application on the date the application under this paragraph was filed, except by way of correction of inventorship under § 1.48.

(5) Any new change must be made in the form of an amendment to the prior application as it existed prior to the filing of an application under this paragraph. No amendment in an application under this paragraph (a continued prosecution application) may introduce new matter or matter that would have been new matter in the prior application. Any new specification filed with the request for an application under this paragraph will not be considered part of the original application papers, but will be treated as a substitute specification in accordance with § 1.125.

(6) The filing of a continued prosecution application under this paragraph will be construed to include a waiver of confidentiality by the applicant under 35 U.S.C. 122 to the extent that any member of the public, who is entitled under the provisions of § 1.14 to access to, copies of, or information concerning either the prior application or any continuing application filed under the provisions of this paragraph, may be given similar access to, copies of, or similar information concerning the other application or applications in the file jacket.

(7) A request for an application under this paragraph is the specific reference required by 35 U.S.C. 120 to every application assigned the application number identified in such request. No amendment in an application under this paragraph may delete this specific reference to any prior application.

(8) In addition to identifying the application number of the prior application, applicant should furnish in the request for an application under this paragraph the following information relating to the prior application to the best of his or her ability:

- (i) Title of invention;
- (ii) Name of applicant(s); and
- (iii) Correspondence address.

(9) See § 1.103(b) for requesting a limited suspension of action in an application filed under this paragraph.

(e) *Failure to meet filing date requirements.*

(1) If an application deposited under paragraph (b), (c), or (d) of this section does not meet the requirements of such paragraph to be entitled to a filing date, applicant will be so notified, if a correspondence address has been provided, and given a period of time within which to correct the filing error. If, however, a request for an application under paragraph (d) of this section does not meet the requirements of that paragraph because the application in which the request was filed is not a design application, and if the application in which the request was filed was itself filed on or after June 8, 1995, the request for an application under paragraph (d) of this section will be treated as a request for continued examination under § 1.114.

(2) Any request for review of a notification pursuant to paragraph (e)(1) of this section, or a notification that the original application papers lack a portion of the specification or drawing(s), must be by way of a petition pursuant to this paragraph accompanied by the fee set forth in § 1.17(f). In the absence of a timely (§ 1.181(f)) petition pursuant to this paragraph, the filing date of an application in which the applicant was notified of a filing error pursuant to paragraph (e)(1) of this section will be the date the filing error is corrected.

(3) If an applicant is notified of a filing error pursuant to paragraph (e)(1) of this section, but fails to correct the filing error within the given time period or otherwise timely (§ 1.181(f)) take action pursuant

to this paragraph, proceedings in the application will be considered terminated. Where proceedings in an application are terminated pursuant to this paragraph, the application may be disposed of, and any filing fees, less the handling fee set forth in § 1.21(n), will be refunded.

(f) *Completion of application subsequent to filing—Nonprovisional (including continued prosecution or reissue) application.*

(1) If an application which has been accorded a filing date pursuant to paragraph (b) or (d) of this section does not include the basic filing fee, the search fee, or the examination fee, or if an application which has been accorded a filing date pursuant to paragraph (b) of this section does not include an oath or declaration by the applicant pursuant to §§ 1.63, 1.162 or § 1.175, and applicant has provided a correspondence address (§1.33(a)), applicant will be notified and given a period of time within which to pay the basic filing fee, search fee, and examination fee, file an oath or declaration in an application under paragraph (b) of this section, and pay the surcharge if required by § 1.16(f) to avoid abandonment.

(2) If an application which has been accorded a filing date pursuant to paragraph (b) of this section does not include the basic filing fee, the search fee, the examination fee, or an oath or declaration by the applicant pursuant to §§ 1.63, 1.162 or § 1.175, and applicant has not provided a correspondence address (§ 1.33(a)), applicant has two months from the filing date of the application within which to pay the basic filing fee, search fee, and examination fee, file an oath or declaration, and pay the surcharge required by § 1.16(f) to avoid abandonment.

(3) If the excess claims fees required by §§ 1.16(h) and (i) and multiple dependent claim fee required by § 1.16(j) are not paid on filing or on later presentation of the claims for which the excess claims or multiple dependent claim fees are due, the fees required by §§ 1.16(h), (i) and (j) must be paid or the claims canceled by amendment prior to the expiration of the time period set for reply by the Office in any notice of fee deficiency. If the application size fee required by § 1.16(s) (if any) is not paid on filing or on later presentation of the amendment necessitating a fee or additional fee under § 1.16(s), the fee required by § 1.16(s) must be paid prior to the expiration of the
